PEONIES

Peonies. The world's greatest collection, 1200 sorts. Send for list. C. Betscher, Canal Dover, O.

"PEONIES FOR PLEASURE"

This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure." We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

ROSE AFTER-SATISFACTION.

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that should come from planting quality roses, the knowing that no better results are possible to be obtained outside of G. & R. Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional roses. Think of it, the after-satisfaction selling five million roses, and demanding a million increase in one year. Going some! you say. Yes; but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality roses. None better, none so good.

Our new catalog, giving prices on all roses and other plants, now ready. Write for it today.

Flower Market Reports

(Continued on page 723)

indoor peonies and delphinium. The indoor peonies while very good are not meeting with the ready sale that would warrant their taking up space in the greenhouses and hardly bring back production costs. Callas are plentiful, but the supply of lilies is not large. Washington dailies are already putting forth a plea for the wearing of a carnation on Sunday next in the honor of mothers, living and dead, and the local florists are planning to take advantage of "Mothers' Day." It is expected that there will be a heavy run on this flower but, regardless of a reported shortage at the present time, it is believed that all calls will be attended to.

NEWS NOTES.

Washington, D. C.—Considerable interest is being manifested in the annual rose show of the Brookland Citizens' Association to be held in Brookland, D. C., late this month and the number of entries is already large. No admission will be charged to the public to view the display. Miss Belle C. Saunders, of the Agricultural Department, C. Leslie Reynolds, superintendent of the Botanical Gardens, and Dr. John A. Parker, of the Catholic University, will be the judges.

Washington, N. J.—This town, although of lesser fame than its namesake further south, yet enjoys a floricultural distinction of no small magnitude and its most distinguished citizen, floriculturally, is Alonzo J. Bryan, who holds his own in his particular line just as well as his namesake in Washington, D. C., does in his. Alonzo J. doesn't claim relationship to W. J., but he does claim to control an immense plant shipping trade North, South, East and West, and that is glory enough for him. He is well located for transportation facilities and with 130 acres of rich soil, clear country air, and an inexhaustible water supply piped all over that area, he has all the natural requirements for an unlimited business. There are eight ample greenhouses, two of which are new, 36 x 144 feet each, Jacobs construction, and long lines of frames filled with stock, all of which will be found listed in his advertisement in this paper. One hundred thousand sturdy geraniums are ready this season, but next year he proposes to handle half a million and we see no reason why he cannot, if he continues to advertise in HORTICULTURE.

Obituary.

Herman Blumenscheid.

Herman Blumenscheid, a carnation grower of Richfield, N. J., died of pneumonia on April 27th. He was born in Germany and was about 40 years of age. His wife and three children survive him.

Henry Eicke.

Henry Eicke, formerly with F. E. McAllister & Co., and Stumpp & Walter Co., New York, and recently with O. V. Zangen, died at Christ Hospital, Jersey City, N. J., on April 10. He was 47 years of age.

John S. Haynes.

John S. Haynes, a florist of Lowell, Mass., committed suicide by shooting himself on the morning of May 3. Despondency due to business troubles is believed to have been the cause.

Mrs. August Dressel.

Mrs. August Dressel, widow of the late August Dressel, whose death we noted a few months ago, and mother of Mrs. Samuel Pearce, with whom she lived, passed away, April 26th, following a stroke of apoplexy. Mrs. Dressel was a native of Copenhagen, Denmark, and came to America when a child. Her husband, two sons, son-in-law and daughter all being in the florists' business, Mrs. Dressel was for a half a century closely connected with the trade in Chicago and elsewhere and had made many friends during her long life. She would have been 75 years old in July and leaves four children—August, Henry, Lewis and Mrs. Samuel Pearce. The funeral took place April 30th, and was largely attended.

NEWS NOTES.

CORN GROWING IN RHODE ISLAND.

The Rhode Island State College and the State Board of Agriculture, in co-operation with other organizations, have for the last two years been conducting a corn growing contest, the purpose of which has been to increase an interest in this important crop. Classes have been arranged not only for adult corn growers but also for boys. In order to bring in the girls, classes in baking, canning and sewing have been included. This has resulted in the formation of a state corn growing association and the formulation of plans for holding a much larger contest and exhibit the coming year, in Providence.

Rhode Island stands in the forefront of corn growing states in production per acre, the average being about 41 bushels. The record for Rhode Island,

however, is over 100 bushels and it would seem readily possible to raise the average production per acre at least 10 bushels and add to the income of corn growers in the state an aggregate of from \$70,000 to \$80,000 a year. The slogan for the Corn Growing Association will, therefore, be: "An average of 50 bushels of corn per acre in Rhode Island." If the purpose of this association can be accomplished, Rhode Island will lead all the rest of the states in the country in corn production per acre. In addition to corn, it is proposed to include in the contest this year all kinds of plants of the grass family including small grains and useful and ornamental grasses, and to show the importance of this one family of plants as a source of food and other necessities. Anybody who grows any of the

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

Where We Stand On Our Wind-Resisting Iron Frame Construction

JUST after the big western blow that laid low so many houses, an advertisement appeared in the Florist magazines stating that "All concerns have had some of their houses blown down sometime."

We want to flatly contradict such a statement, because never, to our knowledge, in our long years of greenhouse building has any of our iron frame houses been blown down. They have been up against many big blows too.

For example: one of our representatives has just returned from Omaha, Nebraska, where the recent wind, although it blew the glass out of a range of our houses and broke some of the wooden roof bars, still the iron frame-work itself, stood there unharmed.

Directly attached to it, were several houses, **not our construction**, which the wind tumbled over and made kindling wood of.

We tell you these things, not in an attempt to profit by less experienced firms' misfortunes, but as a conclusive bit of evidence, that our constructions are based on an accurate knowledge of **stress and strain** and the safe way of providing for them.

As staunch and strong as our standard iron frame house is, we believe our New Cantilever construction to be still stronger although fewer columns and rafters are used.

Send for our commercial iron frame catalog and go carefully into the details of our various constructions. Then and not till then are you in a position to buy intelligently.

The houses still standing are of Hitchings Iron Frame Construction

Fred Metcalfe's Iron Framers at Irondequoit, N. Y. The first L. & B. 40 foot Iron Frame house in that section.

How the Irondequoit Growers Came To Build L & B Iron Frame Houses

An Interesting Bit of Development History

THE other day several of our salesmen were luncheoning together with the Sales Manager. I came in late, but just in time to catch some most interesting facts about how the leading growers in Irondequoit jumped from our Pipe Frame to the 40 ft. Iron Frame construction. It seems that Del Titus, first started buying our Pipe Frame houses a good many years ago.

J. H. West and Sons, who had 5 of the same construction started the Iron Frame ball rolling, when they jumped from pipe frame houses 28 feet wide to a 72 feet iron framer 125 feet long, divided in three compartments.

Fred Metcalfe and P. B. Pengally were the first to build the 40 foot iron framers.

The interesting thing about Mr. Pengally's order was, that he had already signed up for a Pipe Frame house, but on visiting with Mr. Metcalfe, the Burt Olney Canning Co's range at Albion, N. Y., he promptly changed his mind in favor of the Iron Frame.

A similar case was C. H. Metcalfe, and his brother Fred. C. H. had ordered a Pipe Frame house, but when the materials for his brother's iron frame began to arrive, he was so thoroughly convinced of its superi-

ority that he promptly cancelled the Pipe Frame order and contracted for an Iron Framers 40 by 133 feet.

And then there is Anderson and Merrill. They were entirely satisfied with their L. & B. Pipe Frame house and had made up their minds to order a duplicate. But after seeing J. H. West & Son's, and several others, they flopped over to the Iron Frame construction.

The same day that Anderson and Merrill changed their minds, our friend, C. W. Cole also "saw the great light," and signed up for one 40 by 141 feet.

After the lunch was over and we were walking back to the office, our Boston man said he felt confident "that in five years time the Market Growers wouldn't think of building anything but the best Iron Frame construction money could buy." "The ice in the Eastern section," he said, "was broken when Alexander Porter put up his big iron framer 50 feet by 450 feet for growing tomatoes."

We have just issued a supplement to our Iron Frame Catalog showing half a dozen or more splendid big double page illustrations of some of these houses.

Send for it. Get posted on what your brother grower is doing.

SEND FOR HENDERSON'S BULB BARGAINS

Our Import Catalogue of Superior Flower Bulbs, Roots, Etc. for those who place their orders with us this Spring. For shipment as the bulbs arrive during Summer and Fall. Everything to gain and nothing to lose by ordering now!

Orders placed with us early enable us to estimate our requirements more closely and by including your order with ours, for importation, we can afford to sell you at lower rates than in the Autumn, for the reason that when importing on a certainty we take less risk in having a surplus left. Should we be able to offer anything at a lower rate later in the season we will give you the benefit.

HENDERSON'S
SUPERIOR

FLOWER BULBS

FOR FALL
PLANTING

IT IS CONCEDED THAT HENDERSON'S BULB DEPARTMENT

handles *the largest quantities, the highest quality and the greatest variety* of Flower Bulbs of any one firm in the world. America, Great Britain, Italy, France, Holland, Japan, China, Asia Minor, Bermuda, etc., yield up to us annually millions of their bulbous floral treasures.

THERE IS A BIG DIFFERENCE IN THE QUALITY OF BULBS

Superior bulbs—the pick of the crops—are largely consumed by critical European buyers, the “seconds” and “substitutes” being too often palmed off on less critical American dealers. We insist—with a penalty attached—on being supplied with the same high grade—true to name varieties—that the English, Germans and Russians get, and we see that we get this superior grade by personally conducted trials. Henderson's Superior Bulbs therefore cost a little more than inferior grades, but our customers appreciate the difference.

Peter Henderson & Co.
35 & 37 CORTLANDT ST., NEW YORK.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Antirrhinums

You will have noticed the popularity and call for the snapdragon (*Antirrhinum*) this spring. It is time now to put in cuttings to secure nice young stock for benching in August or September to flower during early winter. The strong growths from which you have been cutting blooms last month, will send outside shoots, which will root readily, and must then be carried over summer in pots plunged in a frame in the full sun. This is a better preparation to make early-flowering plants than carrying in the shaded greenhouse. By cuttings you can also perpetuate the most desirable forms and colors which from seed you are not sure of doing. Don't let them become pot-bound before they are planted out, but shift even into 4 or 5-inch pots. When put on the benches in September or October they will soon give a crop of flowers, and once they begin to bloom you may expect to cut right along until late spring. Fumigate moderately and often so that green fly will not get a foothold. Keep them watered and syringed to promote good growth and it is better not to pinch until the stem has reached a medium height, as you then will get better breaks.

Chrysanthemums

Commercial growers who desire to cut flowers by the end of September should now have their stock in condition to be planted. A good fibrous loam, with one-fourth well decomposed stable manure and a light sprinkling of fine bone, make the ideal compost. To produce good flowers the plants must be set no closer than 9 by 6 inches and with many varieties 9 by 8 would be even better. This is for single stem plants. Those who grow chrysanthemums in the house from first to last can give them better and closer attention at all times. Do not neglect giving them a good syringing early every morning; this will allow the foliage time to dry out nicely before night fall, but during dark or cloudy weather keep your plants as dry as possible. During the hot weather damping down will be necessary two or three times a day on the walks or paths to supply the proper moisture in the atmosphere. Go over the beds every day so there will be neither dry spots nor places showing a saturated condition, for either of these conditions is very detrimental to the chrysanthemum. Ventilate freely both day and night for these plants delight in a circulation of fresh air at all times.

Cinerarias

If you wish to have nice flowering plants for December, sow now. Sow on light, porous soil—say equal parts of loam and leaf mold with enough of sand to make it gritty. Give the pans or flats a good watering previous to sowing the seed. Press and cover lightly with some finely sifted soil of the above compost, just enough so the seeds are out of sight. Keep in a close, moist house of about 60 degrees and place a pane of glass over them until the seeds germinate, when they should be kept in the coolest house you have. When they

are large enough to handle prick off into flats. In about five or six weeks they should be potted singly in 2-inch pots, using a soil a trifle richer and heavier at every subsequent potting. When they become established a cold frame is an excellent place to summer them in. See that the glass is shaded and, as the weather gets warmer, raise the sashes back in front, for it is coolness that they want, with plenty of fresh air. By sowing at intervals from now until August you can have nice flowering plants from December until spring. Give a slight fumigation once a week for green fly.

Increasing Begonias

Where there is a demand for flowering or the Rex begonias now is a good time to increase stock for another year. Cuttings taken from the new side growth and those coming directly from the base of your flowering begonias will make the most satisfactory plants and those of the Rex class come fine from leaf cuttings. An ideal place to propagate these begonias is on a bench in some well-shaded house not too near the ventilators, and where a reasonable amount of humidity can be kept up. Ventilate so the air of the house will not be violently disturbed by sweeping air currents. When treated this way they will soon root and can be potted into small pots using a compost of new loam, leaf mold and sand in equal parts. When they fill these pots they should be given a good portion of well decayed cow manure, leaf mold and loam in equal parts.

Cycas Stems

At about this season and until mid-summer the dried stems of cycas will be arriving. All florists who have use for these palms should secure some and start them up. Use as small pots as will comfortably hold them. Give thorough drainage as these plants require an abundance of water when they begin to make roots. For a compost use equal parts of turfy loam, leaf mold and well decomposed cow manure, thoroughly mixed. After potting they should be placed in a temperature of about 70 degrees at night. When accommodated with some bottom heat they will make much freer and more vigorous growth. Water at the roots sparingly at first until growth starts when the supply can be increased. Keep the stems well moistened by syringing them two or three times daily. When the whorl of leaves appear they will require some shade and until they become hardened up, when they should stand full sun.

Tuberoses

Tuberoses that were started in 4 or 5-inch pots should be kept growing under glass until after the middle of June. Where space in the house is available it pays to shift these into 6-inch pots and grow under glass as they will produce better flowers. When planted outside they are very easily damaged by cold rains and the inclement weather we are liable to have. Give them a bench where they can have full sun with lots of ventilation. As they fill their pots with roots they will require a great deal of water to bring them on to perfection.

Mr. Farrell's next notes will be on the following: Lilies; Planting Dahlias; Planting of Violets; Single-Stemmed Cereus tuberosus; Tender Nymphaeas; Stock Plants for Next Winter.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Benson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Benson. Such communications should invariably be addressed to the office of HORTICULTURE.

Finishing Peaches and Nectarines

The earliest trees in the first peach house will now be ripening their fruit. Duke of York peach and Cardinal nectarine will probably be in the lead followed by Alexander and Hale's Early peaches and Early Rivers nectarine. The latter is second to none in the early house, excepting that Cardinal has it beat by about ten days in coming in. To obtain the maximum of color all fruits should have been previously exposed to the sun by placing a piece of lath behind each. This makes them stand out from the trellis and often places them beyond the reach of the foliage. Occasionally it is impossible to use the lath or piece of wood without taking a big risk of pushing the fruit off altogether; in such a case push the foliage (which will naturally be covering the fruit on a cross-trellis) to the back side. While it is never policy to advocate the removing of any good healthy foliage from a growing fruit tree, an exception sometimes has to be made when seeking a perfect finish to a peach or nectarine. A leaf may lie right across a fruit and remain there after all persuasion to take a back seat has been brought to bear on it. Such a one is best pinched off or you will get a study in black and white on the fruit. Nothing that I know of demonstrates the sun's power and action so plainly as a nectarine so colored. Should there be a bunch of leaves hiding a fruit as we often find on pot trees, these can very advantageously be tied in a bunch for a week or so until the fruit is removed.

Immediately on detecting the first signs of ripening—usually a rich fragrance from the fruit—discontinue syringing. This should be done gradually by using the hose in a morning only for a week, in which time probably all will be "on the turn." Feeding must cease, but see that the trees do not want for water. Air should be given more abundantly, but do not lose sight of the fact that there are other trees coming along in the same house. What might be termed "a betwixt and between" line must be drawn. A crack of air ought to be left on all night. If an excessive night temperature has been maintained of late reduce this as the fruit ripens.

A word of warning about suddenly bringing the fruits into the full sunlight or what is generally called "propping." There is a possibility of their burning for a few days until they are accustomed to it, so a light shading should be put on the glass, using something that will remove easily. Whitening mixed with water or separated milk can be removed with a dry brush or a stream from the hose. Cardinal nectarines seem to have a very tender skin.

Packing

To pack peaches and nectarines so that they do not show any signs of traveling when at their destination

require careful handling in the first instance and also careful packing. Gather them before they are fully ripe. Some trouble may be found in getting them off before they are "willing." Peregrine is an offender in this respect. When removing them do not try to do it all with one finger and the thumb. Let the pressure be even and all around. Have a receptacle ready to receive them on removal. This can be a shallow wooden box having a sheet of cotton-wool on the bottom with a piece of wax paper laid over it. The best boxes for packing into are made of wood and deep enough to take one layer only. Cardboard boxes are all right if it is intended to send them by messenger. For shipping by express wooden boxes are the safest. Have the box lined with paper first, following with thick cotton wool. Before commencing to pack the fruit, cut up enough wax paper into squares of a suitable size so that one nicely envelopes a fruit. The cotton-wool can also be made ready in a like manner. This makes packing easier and quicker; being laid in a convenient place they are picked up in rotation. First the fruit is wrapped in wax paper, then in cotton-wool and placed in a box. When the box is filled another sheet of wool is laid on the top, which, if the boxes are made for the purpose will nicely fill it so that they cannot move. Packed thus both peaches and nectarines should travel without any injury whatever.

Finishing Grapes

Grapes will have been cutting from pot vines since the last week in April. Keep the house dryer to enable any still hanging to keep in good condition. Do not, however, let the roots want for water. The early vinery will now be coloring and probably (if not already done), a light shading on the glass will be beneficial. Not only does it prevent scalding of the berries and a possible burning of the foliage, but it keeps so much more moisture in the house. Feeding must be of quick-acting manures to push all that can be into the berries.

Late Vineries

Late vineries will be in full flower and should be kept a little dryer about noon to enable the pollen to move around. No difficulty will be experienced in setting these. Give the rods a shaking at noon after getting on all the air the weather will permit. Get busy with the scissors soon after the berries are set as they swell with great rapidity. Black Alicante and Gros Colman and other inmates of this house, set so thickly that a little swelling makes a tight bunch, which takes double the time to thin than it would if taken in time.

Apples and Pears

Apples and pears will take all the feeding they can get prior to finishing. Cramped into small pots the roots have not the chance to seek for it. Keep the trees well syringed and look out for aphids which at times will creep in in spite of diligence. Fumigate before they become an established tenant, following it up with a little extra water pressure.

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Early Celery

The early celery should be planted out in its permanent quarters now. Trenches containing a single or double row is the method most commonly practiced, but the writer prefers a well-enriched frame for this crop, believing that the same arguments as were set forth in a previous issue in regard to growing lettuce in frames applies likewise to the early crop of celery. The plants will make a better growth with less liability to check in this way than any other. Convenience of water and ease for shading when transplanted are great factors.

Late Celery

Sow seed now for the winter crop and sow it in flats or pans with the idea of transplanting once or twice before the final planting. The celery plant unless transplanted early tends to make a long root which is not conducive to a good plant later. The transplanting causes it to make those numerous small roots or rootlets which every grower so much likes to see and which cling to the small soil particles so tenaciously. The best soil for pricking out celery is one containing an admixture of leaves or old mushroom-bed manure.

Pithy Stems in Celery

Pithiness is a cause of great annoyance in celery sometimes and is generally attributed to overfeeding, especially overfeeding with nitrogenous manures. My experience points rather to poor grades of seed as being the cause. Hence the necessity of buying seed from reliable sources. I have grown two stocks of seed of the same variety side by side and fed them just alike and in one lot found a lot of pithy plants while there were scarcely any in the other lot.

Varieties of Celery

The self-blanching kinds such as White Plume and Golden Self-Blanching are the best for summer use, but for keeping in winter the Boston Market, Winter Queen, Giant Pascal and Fin de Siecle are among the best; in fact we know of no better keeper or variety with finer flavor than Fin de Siecle.

Celeriac

Celeriac or turnip-rooted celery should be sown at once if not already sown, as it requires quite a long season to develop.

Corn

Sweet corn is decidedly a tropical plant that turns yellow and stunted with the least breath of frost, therefore as a general thing it does not pay to sow outside before the middle of May, but our climate is such a fickle thing that we can never tell just what is going to happen, and as we have all got to take chances now and then it is well to take a chance on the corn and get some in at once, because should it turn wet and cold enough to rot this lot we can yet plant some more. Sow some of the early kinds and some of the mid-season varieties and be sure your ground is well supplied with phosphate and potash, bone meal for the former and wood ashes for the latter if applied at this season.

Swiss Chard, Okra, Kohl Rabi and Florence Fennel

All these may be sown now in drills a foot to eighteen inches apart, to be thinned out later to their proper distances apart in the rows.

Chicory

This is a splendid vegetable for a winter salad and should be sown now in deep rich soil. Later sowings would make fair plants but it pays to grow good big crowns as the after product is so much finer. Sow in drills a foot apart and thin out to six inches in the rows.

Succession Sowing

Carrots, beets, lettuce, spinach, (sow also some of the New Zealand spinach now), peas, radish, cauliflower and turnips should all be sown again to keep up supplies.

Rhubarb—Sea Kale

Here are two of the finest winter-forcing vegetables grown and while there are always good roots for sale by the seed houses for forcing purposes, yet most gardeners will get better results from stock grown at home and seed of these two should be sown at once in drills. Of course it will take at least two years to grow roots to a size for forcing, but if a start be once made, then by sowing every year the stock of roots will always be on hand. Sea kale is something like horse-radish in that if it once takes possession of a piece of ground it is rather hard to eradicate, as every little bit of a root will grow and make a plant. So this should be borne in mind and a place selected to grow them where they will not ultimately become a pest.

Tariff corrections

We find that we were a trifle previous in our congratulations last week on the good results which had been achieved in straightening out the tariff ambiguities. Our deductions were based on a letter received by Mr. McHutchison from Congressman Taylor stating that all the amendments suggested by the horticultural trade had been accepted. It appears evident that it was the intention of Congress to so act, and they undoubtedly thought they had. A few minor errors, however, appear in the

bill as now printed but probably no great difficulty will be experienced in having these corrected according to original intention.

"Publicity" run mad

How fast the waste basket fills up in these days of printers' ink publicity! The amount of money squandered in superfluous circular letters, folders, cards, return envelopes, blotters and eccentric devices for catching the eye and exciting curiosity is "something fierce," to use a street phrase. Whole towns are industriously circularized from all sorts of directory sources by concerns hundreds or even thousands of miles away. Doubtless many of our readers have had experiences similar to our own in which we not infrequently receive catalogue mail addressed to the street number vacated by us ten years ago or even the address of twenty-five years ago. The postage on all this misdirected energy might well be applied to a better use. An antiquated mailing list, and that for random distribution, is a very light-weight asset in any business.

In the public eye

We believe in advertising the florist and his wares and their uses. As the first journal to advocate publicity campaigns to educate and inspire the public to a more general use of flowers HORTICULTURE stands ready at all times to applaud and to assist all well-directed work on this line. We can see, however, in any pronounced effort to establish a trade-made special annual floral occasion, as in the case of "Mothers' Day," enough of the element of mischief to make it advisable to go slow. The experience in some places, at least, would seem to show that zealous advice to the public to honor their respective mothers by all wearing a carnation on a certain day, coming as it does from people who have flowers to sell, however neatly it may be dressed up in sentimental trimmings, measures up simply as an appeal for trade—that and nothing more. Particularly in the case where the exclusive use of a special flower is advocated, the public are not to be blamed if they connect in their minds the urging and the doubled-up price and draw conclusions not all complimentary to the florist trade. It may be well to stop and think whether money used to create publicity which carries such a recoil is well-spent, from a good advertising standpoint.

Seeds good and bad

Circular No. 43 of the U. S. Department of Agriculture is concerned with the "adulteration and misbranding of the seeds of Kentucky bluegrass, red top and orchard grass." It states that, in compliance with the act of Congress, 1,344 samples of these seeds were secured from various dealers and on analysis 189 out of 1,344 samples tested were found to be adulterated or misbranded. This circular gives the names and addresses of the dealers so charged, together with the percentage of true seed, mixture, and dirt and chaff found in each instance. The percentage of dereliction in some cases is almost infinitesimal but in certain others, if these published tests are to be believed, the transgression is such as to astound us, although we believe that the seed trade generally are honest. We are pleased to note the almost entire absence from the list of the names of seed houses that use the advertising columns of HORTICULTURE. One prominent patron of this paper says in the preamble to his annual seed catalogue, "One method we practice where quality is required, is to supply reliable well known growers with reselected stocks—that we know are true to type. It is the business of these specialists to see that seeds come true. All reliable seedsmen sell good seeds."

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Tying the Young Plants

The American Beauty plants in 4-in. pots will no doubt require small stakes to hold them up, and tying to keep them from lying all over. It is a pity to see so many young plants that would otherwise become strong and vigorous, go to waste because of lack of a little time to tie them. It is almost impossible to syringe the young plants when they lie over and more impossible still it is to keep out that dreaded little pest—spider. Make a point of it to keep the young plants clean and you will not have a large lot of spider to begin the new season with. With clean houses and clean plants little trouble will be experienced in keeping the plants free during the fall of the year when it is impossible to syringe for a fortnight or longer.

Shifting the Potted Plants

Do not allow the plants to grow of their own accord without seeing to placing them in their proper places. Always see that all the taller plants are set to the back of the bench, spaced if it is necessary to keep them from crowding. This arrangement will give the little plants plenty of show to spread out and grow to perfection, whereas were they allowed to grow among the tall plants they would hardly amount to anything.

Pinching the Buds

Never neglect to pinch the buds in time. If they are allowed to grow up and develop into flowers, it means so much vitality wasted that would otherwise go into the plant itself. All buds should be pinched when about the size of a grain of wheat or even smaller. Pinch them as soon as they are visible, taking one leaf with each bud so that the new growth will not have a bud again as soon as it grows up a few inches. Destroy all the buds that are thus cut off. Underneath the bench is not a place for them and only gives all the insects a good place to play hide-and-seek in. Keep all space underneath the benches as clean as you would the walks or any other part of the house.

Repotting

A large number of plants will now be potted from 3-

inch pots into 4-inch. In doing this care should be taken to fill up the pot well so as to leave no air spaces, which would not be of any benefit to the plants. One can hardly expect the plants to do real well if they are not potted properly, as potting is a very important part in successful plant growing. Have the soil screened as finely as possible and you will have but little trouble.

Old Soil for Potting

At times when the supply of potting soil runs low we are tempted to use the old soil all over again. Now, many may do so with good success but when it comes to us we would never take any chances, and would prefer soil taken from the field and mixed to use right before potting. This would insure soil free from fungus at least. Well decayed manure can be added quite freely but must be run through a screen to break it all up very fine so that it will not be in lumps. Then add your bone meal and soot and your soil is ready, being much more valuable than all the old soil ever was. Of course we would not hesitate to use carnation soil, which would be a little different, but we always give preference to the new.

Fumigation

Never neglect this, as you will soon wish you had not. If you spray instead, this applies just the same. Keep the plants clean. Do not wait until the plants move with the quantity of bugs on them, but keep right after them all the time. Fumigating or spraying regularly each week, never letting the houses go once. It is much better to fumigate while it is raining, as all crevices will then be full of water and the houses almost air-tight. Never fumigate unless the houses are below 70 degrees and well watered, as it would endanger the plants to fumigate with a greater temperature and a dry atmosphere with it.

Cattleya Zephyra

The beautiful hybrid *Cattleya* which forms the subject of our cover page illustration this week, was raised by Mr. Clement Moore of Hackensack, N. J., and is but one of many interesting crosses made and raised at the greenhouses of this enthusiastic orchid lover.

ADVERTISING TALKS—By RALPH M. WARD—No. 10

There are 60,000,000 people in the United States who live outside of towns and cities. How many of these people do you suppose buy flowers habitually? How many do you think might buy flowers if they were properly advertised? If 5 per cent of this vast majority were taught to buy \$1.00 worth of flowers per month, it would mean \$36,000,000 added to the sales of florists. The writer estimates there are about 20,000 florists in the States and Canada. This number of florists, or half of them, could afford by combined advertising to

make flowers one of the most popular articles to civilization in this country. Have you ever stopped to think how few advertisements you remember? Do you think other people remember your advertisement any more than you do their's? Not much. The great public is absorbed in its own affairs—it cares nothing for you or your goods. It has no reason to believe you are really trying to render it a service. You must make the public pay attention by talking from its point of view. See yourself as others see you—then make

yourself as you would have others see you—make your advertisements the same way—interesting to others. Keep it up—cater—cater—cater—that is the secret of success. Give the public what it wants—don't try anything else—but sell the people—the great mass—sell them. They will pay for what they want—the price of cut flowers is not made by the cost of production—it's made by public opinion—and if you would succeed you had better start right now to mould public opinion before public opinion moulds you.

THE MINNEAPOLIS PARK SYSTEM

Minneapolis has today a park system of 3,710 acres. Of this total area about one-third is made up of lakes, lagoons and canals. Park history dates back to 1857, but active acquisition and development commenced only with the creation of the Board of Park Commissioners in 1883, and the existing three small squares were at that time transferred to the jurisdiction of the Board by the City Council.

The well distributed and comprehensive system of parks and parkways bears testimony of the wisdom and forethought exercised by early public-spirited citizens; and the securing and developing of what is rightly considered one of the city's chief assets has been in capable hands.

Minneapolitans are justly proud of the city's park possessions and visitors are agreeably surprised at the liberal way nature has endowed the system. Many and varied are its natural advantages and attractions. Park authorities agree that it will rival any in the country. Famed are its system of urban lakes, the historic falls, the mighty river and an almost endless variety of picturesque scenery.

Minneapolis devotes one acre in every ten of its entire area to public recreation purposes; a much greater proportion than in any of the twenty-eight principal cities in the United States having a population exceeding 250,000 each. The park system represents an investment of over \$6,000,000 for land and improvements, and the value of donations is estimated at about \$800,000.

A brief description of the system will give a general idea of the park possessions. Loring Park, of thirty-six acres, named in honor of Mr. G. M. Loring, known as the "Father of

WILSON PARK, MINNEAPOLIS
A Small Neighborhood Park.

the Minneapolis Park System," is the most centrally located and is much admired for its natural beauty and the many embellishments provided by the hand of man. The system of parkways starts at this point, and for a distance of seventeen miles one travels continuously on park lands over an ever-changing course, connecting many of the principal parks through varied and beautiful scenery.

Kenwood Parkway, starting at Loring Park and going west, skirts on our right. The Parade, a large open space of sixty-eight acres, ideal for a playground and athletic field, and

then through a fine residential district past the wooded and rolling Kenwood Park of thirty-three acres, and connects us with the chain of magnificent urban lakes with finely wooded shores and splendid encircling boulevards.

Lake of the Isles, of 200 acres (water area 107 acres), is the first and rightly called, the most picturesque, with its pretty islands and irregular shore line. Next, in a southerly direction we come to Lake Calhoun, of 522 acres (water area 460 acres), the largest of the system. This lake is much used for sailing, boating, canoeing and other water sports, and here is located the commodious Calhoun Baths, conceded to be the most up-to-date in the country. A little further south is Lake Harriet, of 408 acres (water area 353 acres), the favorite recreation spot of park visitors. Free concerts are given here daily during the summer by the famous Minneapolis Park Band, and canoeing, boating, fishing and spacious picnic grounds add to the popularity of this resort.

Minnehaha Parkway connects with Lake Harriet Boulevard and in an easterly direction follows the winding course of Minnehaha Creek through natural scenery of hill and dale the whole distance of 5½ miles, past Lake Nokomis of 409 acres (water area 295 acres), and then bringing us to that romantic spot called Minnehaha Park, of 142 acres, and considered by many the gem of the park system. Here we have the celebrated Minnehaha Falls immortalized by the poet Longfellow. From here we follow the course of the Mississippi River along the west bank in a northerly direction. The boulevard is built on the bank high above the river, and the land between the drive and river is

LOGAN PARK PLAYGROUND
Minneapolis Park System.

rolling, irregular of contour and finely wooded.

For a distance of $3\frac{1}{2}$ miles we travel along the west bank through attractive natural scenery and get occasional glimpses and again unobstructed views of the Mississippi River and gorge. At Franklin avenue we cross over to the east side and continue along River road, East, which connects with grounds of the University of Minnesota and brings us within three miles of our starting point at Loring Park.

There are many other parks, large and small, embracing a general plan of large and medium-sized neighborhood parks at convenient distances, throughout the city, there being 85 in all, ranging from one acre or less to 584 acres. The largest and most prominent is Glenwood Park of 584 acres—the great scenic park of the system. This grand natural park of hill, meadow, woods and lakes will soon be linked with the system of parkways through connection with the Cedar Lake Boulevard from Lake of the Isles. The nursery, supplying practically all the planting material for the various park plantings, is located at Glenwood Park, also a wild botanic garden.

The chief attraction at Lyndale Park is the rose garden, and rose culture in the Northwest has received a great stimulus through the successful development of this garden. It is the Mecca for visitors during the flowering season. Trailing and climbing roses are planted along the enclosing fence and arbors, and border plantings of wild roses enhance its setting. The adjoining grounds are being developed along the lines of an arboretum.

Among the many attractive and pleasing features of the park system that has received hearty popular approval is the elaborate, appropriate and well-arranged floral displays. There are about 300 flower beds in the different parks and approximately 200,000 plants are used in their em-

bellishment. All the material for this purpose is grown at the Park Board greenhouses.

Splendid opportunities have been provided for the enjoyment of outdoor sports of all kinds; particularly is this true of water sports. At Lake Calhoun the recently finished and splendidly arranged bathhouse furnishes accommodations for 1,300 bathers at one time. The building is of pleasing design, concrete construction, fire-proof throughout, and cost about \$65,000. Admission and use of all the privileges are free. In connection with this building the finest inland bathing beach known, is provided. The beach is 1,400 feet long and 150 feet wide, gradually sloping into the lake. There are also bathhouses at Glenwood Lake, Lake Nokomis and Camden Park. Minneapolis has eight modern, well-equipped and properly supervised park playgrounds and several more are being improved and equipped. In most parks play apparatus for the children is provided and there is almost unlimited opportunity for tennis, baseball and kindred sports.

Great strides in park improvements have been made here during the past seven years, and the money liberally and judiciously expended has brought results, which to be appreciated must be seen. Minneapolis is justly proud of her park possessions and is particularly glad of an opportunity to show so well informed a body on park matters as the S. A. F. and O. H., her system of parks and boulevards.

CORNUSES AT LOCUST VALLEY.

Never, in our remembrance, have the dogwoods (*Cornus florida*) made such a glorious show as in the present season. This is one of the few native trees that have been accorded a place in ornamental gardening and so not only the woodlands but the residential plantations are just now radiant with drifts of dazzling white, interspersed here and there in the gardens with masses of the glowing rosy pink form of this much prized tree.

We took occasion a few days ago to visit the A. G. Hodenpyl estate at Locust Valley, Long Island, N. Y., where the cornuses are a striking feature of the landscape and enjoyed the rare opportunity to see them in unrivalled beauty, under the escort of our old hospitable gardener friend, A. Hans, formerly of Stamford, Conn., but now superintendent of this extensive estate, embracing several hundred acres. Under his expert care and the appreciative encouragement of its owner and his gracious lady, this place is rapidly gaining many very attractive features, despite the drawbacks of a rather dry, sandy soil. The locations adapted to Mr. Hans' pet hobby—the ferns—are not many but he has made the best of it and the banks and braes of a favoring brook in the low-lying section present a pretty picture. Laurels and callunas, which seem very much at home, and many other things, have been planted freely and in due time will delight the visitor but for the present the dogwoods hold full sway and it is hard to see anything else while they last.

W. WELLS' IMPRESSIONS OF NEW YORK SHOW.

Thinking it would be interesting to you, also to the carnation lovers of the "H. T. J.," I am sending you a few extracts from letters received from W. Wells, Senr., who was present at the Third International Exhibition in America.

Unlike the British Horticultural Exhibitions, our friends across the water, have certain days for certain classes of flowers. Tuesday, April 8th, was Carnation Day, and the flowers were staged upon the floor which had held the roses the day before, the latter being stood around the room upon tall pedestals, and quite nobly they looked, each vase containing 100 blooms.

Carnation Day had arrived, and carnations there were, not hundreds but thousands, all with long stiff stems and color to perfection; 17 entries in the classes for 100 blooms, and how many entries for 50 blooms I do not know. One great fault with the staging is that they are simply dumped down in the vases, no attempt at arrangement; it takes a grower to produce such blooms, but anyone can put them in vases as is done here.

A mighty big task it is for the judges, there are the sweet scented, pure white Matchless; Pink Delight, which is a delight; Gloriosa, Peacon, Enchantress, White Perfection, Enchantress Supreme, Princess Dagmar, Scarlet Glow, Mrs. B. P. Cheeney, Mrs. C. Barron, Electra, sweetly scented; W. Eccles, Northport, Miss A. Coombs, M. a Ward, Virginia, Salmon Beauty, Melody, Benora, Rosette, Majestic, Gorgeous and a few others, all vying with each other for the Blue Ribbon (paper slip) to be stuck upon the card.

In novelties, the beautiful Matchless wins the American and the British Carnation Societies' Gold Medals; there are only two points dividing the first and second prizes, it is almost a toss for it, but Matchless secures full number of points for scent, viz.: 5 against the others 3.

American Society's Medals—First, Matchless, white, 90 points, Gold Medal. Second, Miss A. Coombs, pink, 88 points, Silver Medal. Third, Princess Dagmar, 86 points, this is a crimson variety; all flowers shown were 4 inches across.

The British Perpetual Flowering Carnation Society's Medals—First, Matchless, 90 points, white, Gold Medal. Second, Gorgeous, 88 points, dark pink, Silver Gilt Medal. Third, Princess Dagmar, 86 points, crimson, Silver Medal.

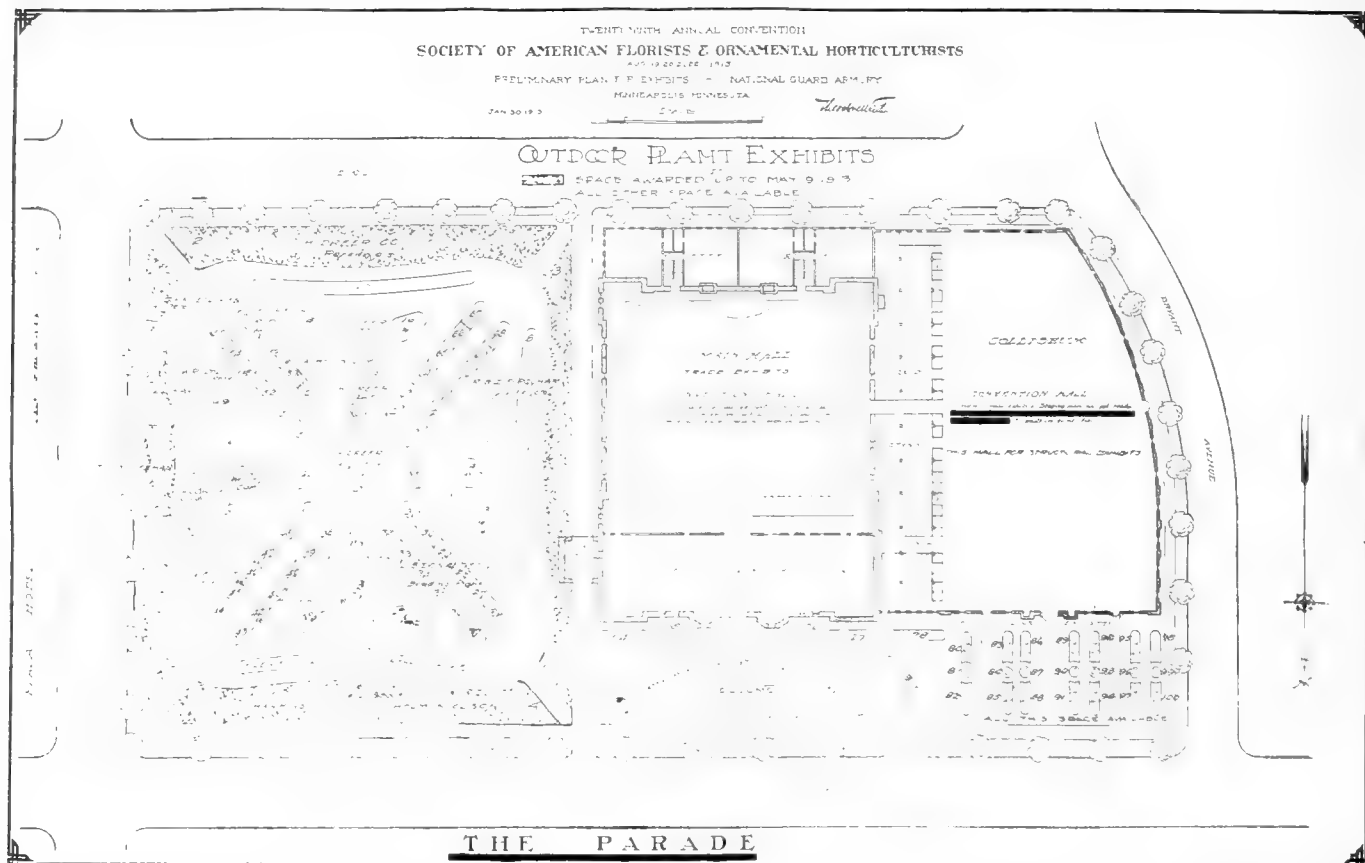

—W. Wells, Junr., in *Horticultural Trade Journal*, London, for April 30.

Woburn, Mass.—S. E. Spencer, the gladiolus grower, is building a large cement bulb building here. He has some fine new seedling gladioli that bid fair to make a good showing wherever grown.

BIRCHWOODS, GLENWOOD PARK
Minneapolis Park System.

PLAN OF CONVENTION HALL AND OUTDOOR EXHIBITION AT MINNEAPOLIS

The accompanying ground plan shows the layout of the Convention Halls and the outdoor exhibition space in front of the two buildings together with the names of intending exhibitors in the outdoor planting section and the spaces which have been assigned

to them. As will be seen, there is yet much space available for late-comers but planting time is now on and exhibits should be sent at once as after June 10th it will be too late to plant for effect during convention week. The opportunity is one that every dealer

in outdoor decorative material should avail himself of. The charge for space is merely nominal and this includes expert care of the beds until convention time. Send applications to Theo. Wirth, Dept. Parks, Minneapolis, Minn.

During Recess

Florists' Club of Washington.

The members of the Florists' Club of Washington, their ladies and friends, spent a very enjoyable evening at the Hotel Ebbitt on the occasion of their annual banquet, on Tuesday, May 6.

The guests were greeted by the incoming president, Otto Bauer, who, after a few words turned the gavel over to William F. Gude, the toastmaster of the evening. Following the completion of an elaborate menu, a song was rendered by Edwin Callow, accompanied by Mrs. Callow, and thereafter speeches, songs and recitations were intermingled. Richard Vincent, Jr., of White Marsh, Md., won the hearts of the ladies, when referring to the attractiveness of flowers and music he said "The American Beauty women sitting about this board are far more attractive."

In speaking of the growing of American Beauties, Adolphus Gude recommended specialization rather than endeavoring to produce all the flowers handled in a store at the same time. "Select your specialty; grow

that specialty a little bit better than the other fellow does and the store people will come around and want your goods and those of nobody else and thus you will make money. The growing of American Beauties by our firm is the best thing it has ever done.

"I want to say one word about Mother's Day. I believe it is a mistake for the retailer or the wholesaler to raise the price on carnations when Mothers' Day comes around (applause). If there is one day in the year on which you should sell them reasonably, it is on Mothers' Day. Do not make it a day especially for the making of money." In conclusion, Mr. Gude, with a few well chosen words presented to David Grillbortzer, the retiring president, a handsome water set, consisting of a cut glass pitcher and six glasses on a tray, the gift of the members as a token of their esteem.

In response to a toast by Mr. Gude, Mrs. J. A. Phillips responded for the ladies and Mrs. Rosina Stauff spoke a few words in answer to the reference made to "Washington's first wholesale florist—a woman." N. S. Hamner asked the aid of those present in making the outing to be given in August

at Chesapeake Beach by the bowling team a success; Mr. Rosnosky, looking ahead two years, spoke on the prospects of a show in Philadelphia that would beat all records, and Mr. Oehmler regretted the fact that competition prohibited the observance of Sunday as a day of rest and hoped that some time a law would be passed prohibiting Sunday labor.

Cook County Bowling League, May 7, 1913.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The May meeting of this club drew out a very large attendance as might be expected directly following the successful International Flower Show and the widespread interest in the proposition to follow it up with another spring exhibition next year at the same place. Chairman Totty reported receipts from the show about \$32,000 and approximate expenditure \$30,000, leaving a balance approaching \$2,000 to be divided between the Exposition Co. and the S. A. F. and then asked "Do you want a show organized on local lines next year?" This brought the proposition directly to the front and it was discussed thoroughly and at length by many members. Patrick O'Mara made the principal speech giving in detail the experiences, sweet and bitter, fortunate and unfortunate, of the Club in its past exhibition enterprises. He urged very careful consideration expressing some doubt as to the outlook for proper enthusiasm and advising that the chances for success would be greatly enhanced by acting jointly with the Horticultural Society of New York if that body could be interested in the project.

Max Schling favored the movement but recommended a date one month earlier than this year's show, before society people have begun to go away. F. H. Traendly expressed great optimism and confidence in the outlook. He thought too much stress was laid upon the

question of financial results and that the trade should be glad to pay for the show, as an investment of value to their business. W. A. Manda took the same view as Mr. Traendly and urged that the business men, if every one will do his part, can well afford to put up a show and sink the cost. H. A. Bunyard spoke enthusiastically on same line and said that the amount spent would all come back in due time. J. A. Manda maintained that the show can be made a success if run properly and asserted that it would be both selfish and foolish for the Club to attempt to get public support for a club affair. The Horticultural Society is strong enough to assume it and has the ear of the right people and this, he believed, is the right solution of the problem. It was stated by Mr. Traendly that the Madison Sq. Garden people are in the field with a show proposition and asked that they be given consideration.

J. H. Pepper made a motion that a committee to consist of the local governing board together with Mr. Manda, and Mr. Totty as chairman be appointed with power to confer with the various parties interested and decide upon dates, etc., and the motion was carried by a nearly unanimous vote. So it looks quite promising for a big show in New York next year.

C. B. Weathered for the permanent badge committee submitted a design for a gold button which was adopted. H. A. Bunyard, for the transportation

committee, reported progress. Phil. Kessler for the outing committee, promised an affair even more enjoyable than any hitherto. Patrick O'Mara, on behalf of the legislative committee, reported a very hopeful outlook for the plan to provide a \$60,000 greenhouse outfit for Cornell. A communication from the Cook County Florists' Association asking the club to go on their special train from Chicago to Minneapolis next August was turned over to Chairman Bunyard.

Richard Vincent, Jr., of White Marsh, Md., was an interested and interesting visitor. He spoke enthusiastically on the subject of "affiliation" and referred briefly to the unsettled items in tariff classification in the bill now before Congress.

CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club held its regular meeting, Thursday, May 8th, at the Union Restaurant. A number of appeals from flood and storm sufferers were read, but no definite list of their requirements accompanied same. Arrangements were made to take care of them when the necessary information is received. The club has also taken up the question of transporting such stock as may be given for the victims, with the express company, free of charge. Everyone is interested in this work and spoke highly of the practical way the club is handling this proposition.

The special committee appointed to

BOSTON, MASS.

31 Otis St.

represent the club as to matters of publicity at the New York show gave an interesting report on the benefit derived by retailers through, of course, the wholesalers and growers, from the great amount of advertising exhibitors get at the flower shows, which seems to be one of the most effective ways of advertising. The Transportation Committee reported that arrangements for a special train had been made with the Great Western Railroad Company, the very best Pullman equipment, to leave August 18th. A number of letters were received from various clubs, stating that they would be pleased to join the Chicago Florists' Club special train at Chicago. A very interesting itinerary will soon be sent out. The Good of the Club Committee has taken an active part in publicity. Chairman Waters promised some interesting items on publicity at our next meeting. V. Niemitz, expert on horticulture, of Russia, who has been traveling in our Western States the past six months, was present.

ST. LOUIS FLORIST CLUB.

The meeting of the St. Louis Florist Club which was held on Thursday, May 8th, was a pleasant one but very poorly attended. Fifteen regulars including three officers were in attendance. The trustees reported on the annual picnic and were given full power to act as to place and date. The publicity committee reported on their work for "Mothers' Day." A letter from President Farquhar of the S. A. F. informing the club that he had appointed Mr. Edwin Denker as state read by the secretary. Mr. Denker,

vice-president for eastern Missouri was who was present, was informed that he would have charge of the transportation to the S. A. F. meeting at Minneapolis next August.

An invitation from the director of the Missouri Botanical Garden inviting the club to hold its next meeting at the garden was accepted with thanks.

The Chicago Florists' Club and the Cook County Florists' Association of Chicago both sent invitations inviting the members to travel with them on their special trains to the S. A. F. convention.

The question box as usual brought out some very interesting discussions and the few present enjoyed a very pleasant afternoon. The next meeting will take place at the Missouri Botanical Garden on Thursday, June 12th, at 2 P. M.

NEW JERSEY FLORICULTURAL SOCIETY.

At the meeting of this Society on May 9th, a very interesting report was received from Prof. Blake of the State Experiment Station, on experiments in Rose Culture during the past season. They found that Killarney is much more susceptible to injury from lack of lime than My Maryland and that some soils need much more lime than others and different mixtures of the same soils apparently show the need of different amounts of lime. In their tests there appears to be very little difference between magnesium limestone and the regular calcium limestone. They found that the organic matter content in the soil is an impor-

tant thing in growing American Beauties. It has also been shown that the pruning out of the fine growth of My Maryland roses has a tendency to reduce the yield. Fairly uniform results were attained from nitrate of soda, cottonseed meal and concentrated tankage, as a source of nitrogen. The regular monthly competition for points resulted as follows:

Wm. Reid—carnations 90, roses 80; John Dervan—roses 75; Max Schneider—carnations 85, sweet peas 70, lilies 85; F. Berge-land—carnations 65; E. Panuska—Cattleya Skioneri 55, Aclanema commutatum 60. For the Lord & Burnham and Skern prizes: E. Panuska—Ficus pandurata 50; J. Dervan—roses 68; Wm. Reid—carnations 90.

The eighth annual Dahlia, Fruit and Vegetable Show will be held at English's Banquet Hall, Main and Walnut streets, Orange, N. J., on Saturday, September 27th, and Sunday, September 28th.

JOHN DERVAN, Secretary.

433 Centre St., Orange, N. J.

ST. LOUIS COUNTY PLANT AND FLOWER GROWERS' ASSOCIATION.

This new organization held a meeting on Wednesday night, May 7th, to put into effect a permanent organization and fifty of the most prominent florists in the county enrolled their names as members.

Permanent officers were elected as follows: Frank Vennemann, president; Wm. Winter, vice-president; Joe Dietchmann, secretary; W. J. Pilcher, treasurer; F. W. Ude, Jr., Hugo Gross and H. H. Ahuer, trustees. The committee on organization and by-laws re-

ported and their draft was adopted as read.

There was some talk of building a meeting hall and this will be discussed at the next meeting. The association will continue to meet on the first Wednesday of each month until further notice. All St. Louis county growers are eligible to membership.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular meeting of this club will be held at Horticultural Hall, Boston, on Tuesday evening, May 20, at 8 o'clock. Wilfrid Wheeler of Concord, will lecture on "Small Fruits." A cordial invitation is extended to any not yet affiliated with the club to hear Mr. Wheeler's address.

The club will hold a field day with W. H. Elliott at Madbury, N. H., on Wednesday, May 21. Train will leave the North Union Station, Boston, at 8.55 A. M. The mammoth rose houses and large stock farm will be special attractions. The Boston & Maine Railroad has promised to run a special train for seventy-five people at regular rates, and if one hundred agree to go the fare will be reduced to \$2.30 for the round trip. It seems probable that over one hundred will attend. Reservation can be secured by addressing W. J. Kennedy, Chestnut Hill, Mass. All interested in horticulture and agriculture will be welcomed on this occasion and ladies are specially invited to make the journey.

W. N. CRAIG, Secretary.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that Albert A. Sawyer of Forest Park, Ill., offers for registration the following aster:

Name, Sawyer Asternum.

Description: "During the summer of 1904, I caught a 'sport' among my asters, having a beautiful shade of lavender and from it, by careful selection, I have produced the Sawyer Asternum in the three colors, lavender, pink and white. The blossoms are in the order of the Hohenzollern but the petals are much longer and thicker, bloom making a good shipper. In contrast, however, to the Hohenzollern the blooms of the Asternum are produced in a plant of upright growth, sending straight up long,

strong stems, and is not a branching variety. For this reason, I claim it is original with me, owing to its remarkable resemblance to many varieties of chrysanthemums."

JOHN YOUNG, Secy.

April 25th, 1913.

CLUB AND SOCIETY NOTES.

The May exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Boston, on Saturday and Sunday, May 17 and 18. It will be free to the public.

At the regular monthly meeting of the Lenox Horticultural Society, held in the Town Hall, Lenox, Mass., on Saturday evening, May 3rd, C. H. Reed of Brookfield, Mass., gave a very interesting and instructive lecture on the "Benefits of Farmers' Clubs and Kindred Organizations."

P. HAMILTON GOODSSELL, 1905 West Farms Road, NEW YORK CITY

CLUB AND SOCIETY NOTES.

The few enthusiasts who attended the Cincinnati Florists' Society meeting were insufficient in numbers to make up a quorum. The reason for the small attendance was the great inconvenience to which the florists, most of whom come from out in the suburbs, would have been put, in order to reach the meeting, because of the strike.

At the regular monthly meeting of the Engelmann Botanical Club last Saturday at the Missouri Botanical Garden two papers were read—one by C. H. Thompson on "Amaryllidaceæ," and the other by M. M. Schiller on "Growing of Succulents and Bulbous Plants." After the meeting the members were taken through the garden on an inspection tour.

A new society has just been organized by the florists of Saginaw and Bay City, Mich., under the name of the Saginaw-Bay City Floricultural Society. Monthly meetings will be held alternately at Bay City and Saginaw. The officers are: President, John Irvine, Bay City; vice-president, Carl L.

Roethke, Saginaw; treasurer, Albert G. Boehringer, Bay City; secretary, Henry W. F. Goetz, Saginaw.

The regular monthly meeting of the Westchester and Fairfield Horticultural Society was held in Doran's Hall, Greenwich, Conn., May 9th. Messrs. Forster and Flaherty were elected on the Executive Committee in place of H. Wild, elected vice-president, and James Aitchison, resigned. A fine display of spring flowers was on view.

Robert Williamson—highly commended for flowering shrubs; James Stuart—do, for Calceolaria Stewarti; A. L. Marshall—do, for Miltonia vexillaria and for Gladiolus Augusta; Anthony Pederson—honorable mention for campanulids; Geo. E. Baldwin—do, for collection of Cattleyas Mossia, including a white variety; Adam Patterson—cultural certificate for sweet peas.

Vote of thanks to the following:

F. Weiss for Darwin tulip; P. W. Popp, standard Streptosolon; A. Anderson, Tulip Gesneriana major; John McAllister, Darwin tulip; Anthony Pederson, cactus; A. L. Marshall, tree peonies and tulips; Dehn & Bertolt, Trollius Europaeus, Centaurea montana and Dielytra.

..NEW GEUM, 1913..

Geum Coccineum Mrs. Bradshaw

This is one of the finest plants of recent introduction.

It will put quite into the background all the Geums at present found in gardens

This fine variety produces very large flowers, 2 inches or more across, semi-double, and with plenty of substance in them, of the most brilliant scarlet. They are produced on long wiry stems, and continuous from June to October. For cutting and border decoration it is very hard to beat, and no doubt it will figure conspicuously on the show table in the future.

Strong Plants in 2 1-2 in. pots at \$6 per 100

Bedding Plants and Roses

"Get them at Dreer's"

ALL SEASONABLE PLANTS, SEEDS, BULBS AND SUNDRIES

HARDY PERENNIALS. The most complete collection of varieties and the largest stock in the country. Our Perennial plants have a national reputation, we spare no expense to have them in the best possible shape for the planter. Such varieties that move better when pot grown are prepared in this shape; this does not mean little seedlings, but in the majority of cases the plants were field grown, were dug and potted during the fall and winter months and are of just the right size to give immediate results; they are not to be compared with so called field clumps. Try them and be convinced. See Our Current Wholesale List for Varieties and Prices.

ROSES FOR OUTDOOR PLANTING TO GIVE IMMEDIATE RESULTS. We have three hundred thousand 5 and 6 inch pots, the usual Dreer stock and the style of plants your retail customers are looking for. These are all two year field grown plants which have been potted during the winter months and which were stored in cold houses and frames and which are now in prime condition for out-door planting. The collection is the most up-to-date, including many new varieties not offered by anyone in the trade.

Early-flowering Hardy Phlox.

HYBRID TEAS, HYBRID PERPETUALS, TEA AND EVERBLOOMING, RAMBLERS, BABY RAMBLERS, MOSS ROSES, HYBRID SWEET BRIARS, AUSTRIAN BRIARS, WICHURAIANA, ETC., ETC. See Our Current Wholesale List for List of Varieties and Prices.

AQUATIC PLANTS—WATER LILIES, NELUMBIUMS, VICTORIAS. Tender and Hardy Aquatics have been a special feature with us for nearly a quarter of a century. Over eight acres of artificial ponds are devoted to their culture. If we can assist you in making plans, or selecting varieties, the services of our expert are at your disposal for the asking.

OUR CURRENT WHOLESALE LIST also describes the following, all of which are handled as Specialties:

DECORATIVE PLANTS, PALMS, FERNS, PANDANUS, BAY TREES, BOXWOODS, DRACAENAS, etc., etc.

HARDY SHRUBS, HARDY VINES, HARDY CLIMBERS, RHODODENDRONS, AZALEAS, etc.

BULBS, DAHLIAS, TUBEROUS ROOTED BEGONIAS, GLADIOLUS, GLOXINIAS, FANCY LEAVED CALADIUMS, CANNAS, etc., etc.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

A. L. Don.

Another prominent seedsman has crossed "The Great Divide." A. L. Don, late head of the firm of Weeber & Don has been summoned by death. Like the late Frank T. Emerson, Mr. Don has not been in the public eye for several years past, and for the same reason—ill health.

Mr. Don's malady baffled the ablest specialists, and he consulted many. Sometimes a change of treatment would result in temporary improvement, and he always hailed such improvement with satisfaction, believing that at last he had found a physician who had correctly diagnosed his condition. But such gains were only transitory, and he continued to slowly lose strength and became more feeble. Through it all his courage and grit never abated one jot, and even during the last two or three years when he could walk but a few steps unassisted, there were very few fair days that did not find him at his office for at least an hour or two. During this time his two eldest sons, —bright, capable young men, have been conducting the business, aided by his counsel and advice.

To them will go out the sincere sympathy of all who knew their honored father, and best wishes for their success.

Only those who knew Mr. Don in his prime when he was a vigorous optimistic man of affairs, genial and companionable can appreciate him at his true worth. He was a man of honor, of high and unyielding principle, and was respected by everyone who knew him. He leaves to his children not only a valuable business, but the legacy of a sterling character, which should be to them a beacon light through life, and which they will do well to emulate.

Trade Reaction.

One might easily believe by reading the trade journals that the seed trade had never known such a boom as they have experienced this season, but inquiry among conservative representative houses does not sustain the claims for great and extensive growth of business as indicated by certain contemporaries. As a matter of fact, we are inclined to think that as a whole trade has been just a little bit disappointing, and it is not in the least surprising that it is so.

The situation for the last two years has been rare and exceptional, and it is not to be expected that the conditions which made these two years so prosperous can continue indefinitely. Like every other line of business the seed business has its ups and downs, and the fact that the volume of business during the season just closing and the profits are not quite equal to last

year's should neither be surprising or disappointing.

Sufficient Stock on Hand.

Peas have not sold as freely as was expected, and there will be a larger carry-over than for several years past. On the contrary there will be a pretty thorough clean-up of beans, notably the wax-podded varieties. There are two or three of the green-podded varieties in surplus, but before the next crop is available very few of these will be left. In the line of small seeds, especially biennials, while the demand has been good, stocks have been very much larger than a year ago, and nearly all of the seedsmen entered the season much better equipped than in 1912. This is particularly true of such lines as beets, mangels, carrots, parsley, parsnip, etc., and if there are normal crops on the acreage put out in 1913, the trade will certainly realize that they are blessed with a year of plenty.

California's Plight.

During the past two or three years when seed crops, both in this country and Europe, were well-nigh failures, California was the bright spot on the map, crops from the Golden State being good in yield and excellent in quality. At the present writing it looks very much like a reversal, as the unfavorable outlook in California to which attention has several times been called, has not materially improved during the past two or three weeks. It is pretty generally conceded that the sweet pea crop in California will be a failure, and this following on top of last year's failure will mean well-

high prohibitive prices in 1914. So far as we are able to ascertain at this time, the only California seed product likely to come through with an average yield will be onion seed, and not a few dispute even this.

Early Planting.

The planting of peas for seed purposes is now practically over, the seed going into the ground from two to three weeks earlier than last year, and under much more favorable conditions. A good start always is desirable, and some say that a good start is a race half won, but those who have had experience in growing peas for seed have learned by unhappy results that until the crop is actually in the bag and under cover nothing is certain about a pea crop. Of course, it may be said that the same rule would apply to any crop, but with the exception of beans, we know of nothing so uncertain as to actual results as peas.

Rain Needed.

It perhaps is somewhat gratuitous to comment on the weather, nevertheless, it is such a potent factor in the seed business that one cannot very well get away from it or fail to discuss it. We have certainly been having rather cool weather for this season, and throughout New York and New England very dry during the past three or four weeks. There have been occasional local showers, but nothing like a general rain over the territory mentioned has occurred since the middle of April. If we do not have a liberal supply of moisture soon, crops and vegetation in general will suffer more or less damage.

Notes.

Madison, Wis.—The L. L. Olds Seed Co. are about to erect a new warehouse to cost \$45,000.

Munroe, La.—The J. F. Latham Seed Co., 121 North Grand street, has added a flower seed department to its business.

Don't forget to make reservations for rooms at the Hotel Statler, Cleveland, Ohio, for the convention of the American Seed Trade Association in June.

Hancock, Mich.—James H. Dale, for many years employed by the A. M. York Estate, has entered business for himself, handling seeds, bulbs, nursery stock, etc.

Reports from French bulb markets indicate a decided shortage on Roman hyacinths and Trumpet Major and Soleil d'Or narcissi. Prices have already gone up over 20 per cent above last year's figures.

Rochester, N. Y.—George T. Boucher is making extensive alterations in his store, East avenue side, and after alterations are completed Rochester will possess one of the most up-to-date and modern stores in the florist business.

The Rochester Floral Company's new store at 255 East Main street is very superior to the old one in which they were so cramped up for room.

Visitors this last week were J. Sithens of Bowen, Dungen & Co., Philadelphia; Mr. Stearns, of Sefton Mfg. Co., Chicago, Ill.; R. Schoch, of M. Rice Co., Philadelphia.

Of Interest to Retail Florists

ADVERTISING.

"Advertising is the life of trade." When a department store receives a shipment of goods from the manufacturer or jobber, the advertising manager gets busy, and through his advertising mediums he hastens to let the public know of the numerous bargains to be had at his establishment. Why don't the retail florists exert themselves a little more and look into the depths of this scheme to move and handle more stock than they do? The only answer I have at hand is, the fear of expense to carry it on when started. As a comparison, there are a number of florists scattered throughout the United States who spend more money advertising in one year than many florists' receipts amount to in the same period. How do we account for that? The extensive advertiser did not start so heavily, but kept at it slowly but surely, choosing the method that brought the best results, then trying schemes in another way, though always sticking to those that brought sure returns and using these as a backbone when others failed to draw.

Advertising must be given a fair trial before being condemned by retailers. To keep your name and trademark before the public every day is bound to bring the desired results, providing you have the patience. The small returns derived at the first experiment should not discourage you. If it only pays for the advertisement, it has shown good results, and assures you that better ones are coming.

When and what to advertise must be carefully studied. Articles of an expensive nature will not go; therefore, you must select something within reach of all; some little floral gift suitable for all occasions, that can be

easily packed and delivered. Cut flowers when plentiful always make a tempting advertisement, and good judgment after a little experience has been gained, will soon teach you when and how to advertise.

The idea that advertising cheapens the retail flower business may, or may not, be correct, but the dollars and cents are worth more when left in your cash drawer through advertising, than if a stray customer had dropped in your place, not knowing where else to go.

Remember, my dear reader, I do not say you are going to make a fortune from the goods you are advertising, but I do say this will bring the people into your store and build up your trade for you; it comes in the form of decorations, funerals, etc., and when these orders appear you know the arrow has gone straight to the mark; your advertisements are working for you and success is assured; but you must keep at it. A sudden stop means a sudden drop.

MR. STOREMAN.

POT ROSES IN CHICAGO.

Retailers say their spring trade calls for an increasing number of pot grown roses each year and the retail flower stores are beautiful with these offerings now. For use in producing large specimen plants and fancy shapes, Tausendschoen beauties and Lady Gay seem to be in the lead here and very showy plants of these add much to the attractiveness of the stores though they may not find quite so ready sale as the smaller plants. Many Dorothy Perkins, Hiawatha and Flower of Fairfield are also seen. Chicago growers find these are the best of the Rambler type for small specimens and they grow them in quantities far outnumbering the large plants. The great demand for the small and medium plants is comparatively recent here and growers are on the alert for new varieties, two of which we have noticed, deserving of special mention, grown commercially here for the first time this year. Erna Teschendorf, of Holland origin, is so rich a red that

its success here is assured and the color in the cut sent out by the introducers is not exaggerated. The other new one is Louis Walter, commonly called Baby Tausendschoen. As grown here the flowers are about the same size as those of its namesake but the color differs somewhat, being more of the true pink and less of the yellow or salmon and perhaps fades a little easier, still growers are regarding it as a valuable addition.

The Jessie and Orleans roses are comparatively new to the Chicago market but have become popular in the two or three years they have been offered. Mme. Levavasseur, the original "Baby Rambler," still has an important place with the Chicago growers and great quantities are sold each year although the color is not quite so pleasing as that of some of the newer varieites. The white roses and the hybrid perpetuals, on the other hand, are not received with much favor in Chicago.

Owatonna, Minn.—L. J. Wesely, a former salesman for the Mitchell Nursery Co., has started business for himself under the name of the Owatonna Nursery Co.

McCray Refrigerator Co.
553 LAKE STREET. KENDALLVILLE, IND.

Personal

Henry Young, of Fort Wayne, Ind., and Miss Clara Bleeke of Decatur, Ind., were married on April 28th.

Charles W. Knight, formerly at Round Hill, Greenwich, Conn., is now with A. T. Boddington, New York City.

Mr. and Mrs. Albert Knopf of Richmond, Ind., left April 25th for a silver wedding trip through the California orange belt.

George Smith of Orange, N. J., has been appointed by the Governor as a member on Board of Visitors, to State Agricultural College at New Brunswick.

Julius Roehrs, Sr., of Rutherford, N. J., is at Capri, Italy. Recent information regarding the state of his health is not as hopeful as his friends would wish.

Much anxiety was caused to family and friends by the sudden disappearance of Thomas Pegler from his home and business at Brunswick, Me., last Saturday noon. After a widespread search of woods and ponds a telegram was received by his wife on Tuesday stating that he was in Toronto, Can., and would return at once. Mr. Pegler suffered a nervous breakdown last year in Boston, and it is believed that in the present case his mind has been affected by overwork and a relapse.

At the annual meeting of the New York Cut Flower Exchange on May 3, officers were elected for the ensuing year, as follows: President, John Donaldson; secretary, Victor Dorval; treasurer, Charles Beekman; directors, Anton Schultheis, Philip F. Kessler, Frank Millang, Fred Smith and John Schneider. John Donaldson is one of the most successful growers in the cut flower market, as well as one of the most popular. He is a good bowler, a good entertainer, and he will make a good president.

Boston visitors: W. C. Langbridge,

Cambridge, N. Y.; Hon. Harley James, Mayor of St. Georges, Bermuda.

New York visitors: R. Vincent, Jr., Whitemarsh, Md.; W. J. Vesey, Fort Wayne, Ind.; Ed. Welch, and Jos. Driscoll, Boston; Alph. Walraet, Bruges, Belgium; C. C. Pollworth and H. A. Weil, Milwaukee, Wis.; Einar Knutsson, Copenhagen, Denmark; G.

JOHN DONALDSON
 President, New York Cut Flower Exchange

C. Eldering, Overveen, Haarlem, Holland.

CHICAGO NOTES.

There was quite a severe frost Sunday morning, May 11th, which was hard on the young carnations planted just before. Some fear was felt for the peonies, also, but no adverse reports have come in as yet.

Ernest Roeber and Martin Radke, growers, Maywood, Ill., dissolved partnership at the expiration of their lease, May 1st, and each will go into business for himself, the former in Winnetka, and the latter in Glen Ellen, Ill.

Mothers' Day was beyond the ex-

pectations of even the most sanguine. The arrival of early orders indicated that the day had possibilities of a greater volume of business than its predecessors, but many wholesalers, a week previous, had the conviction firmly in their minds that orders for white carnations could not be "switched" to colored ones and when they were sold out of white, business would cease. On the contrary, white carnations were supplanted by colored carnations and then followed roses and then any kind of a flower. And this has come about here with apparently little effort by the wholesalers and still less by the retailers. A marked demand for red flowers over pink ones was noticed.

PHILADELPHIA NOTES.

The Florists' Club of Philadelphia will have an outing and May-pole dance in June. John Gracey is chairman of the committee.

There are conflicting opinions as to the effect on the flower trade from Wanamaker's giving away 25,000 carnations for Mothers' Day. Some think it was bad and hurt legitimate business. Others are equally convinced it was good and stimulated legitimate business. The latter go so far as to say that the proposition far eclipsed anything the campaign of publicity has accomplished. "You pays your money and you takes your choice."

To stimulate interest in the work that is being done in the school-gardens, President Gracey, of the Retail Florists' Association, has presented more than 1000 geranium plants to the pupils of the Robert Morris Adjunct School of Practice, offering a prize to the child whose plant at the end of the season is in the most flourishing condition. This is said to be the first step in the movement started by the association to encourage the school children of the city to study and experiment in floriculture. When the school-gardens close, next fall, the plants will be inspected and the child who produces the finest specimen will receive \$20 worth of larger plants and ferns. The work of sowing seeds has been started in the ten large school-gardens and in numerous home gardens.

Flower Market Reports

BOSTON The past ten days can show a good, clean, lively record on the right side for the flower trade. Carnations were scarce all last week, particularly the white ones, and they are still scarce. While there was more or less activity in connection with the Mother's Day observance, yet this can hardly be credited with any great share in the good conditions prevailing which are due primarily to the continued cold weather, which has accentuated the demand and curtailed the production. Lily of the valley is in active call, but is so abundant that quotations are scaled down. Roses are very plentiful, but extra fine as to quality. In these and all other items except carnations values remain about stationary, and will probably so continue until the next hot wave strikes us.

BUFFALO Had it not been for Friday and Saturday of this week in which a little extra business is looked for on account of Mothers' Day, it would have been the dulllest since the week preceding Easter. Not alone the flower dealers, but merchants in general have complained. The various strikes are blamed and with the expressmen's strike beginning on Monday last there has been no end of inconvenience and injury to business. The wholesalers suffered the most on account of not receiving shipments at time wanted and, as all freight going out could not be guaranteed to be put in certain trains, out-of-town buyers could not rely on shipments getting through, and in several cases bad disappointments were had by the out-of-town dealers. Mothers' Day helped to brace up the market, but stock was plentiful enough and the retailer had very little difficulty to obtain on short notice material which was carried along from day to day.

CHICAGO The scarcity of white carnations this week and the great demand for them last week is the special feature of the past two weeks in the Chicago market. Most orders were booked at \$5.00, but toward the end of the week many were sold for \$6.00 and on Sunday some brought as high as \$8.00. The market cleaned up on everything and the old idea of the exclusive use of carnations for Mothers' Day had a decided set-back. The opening of the peony season may be

said to have taken place, though that favorite flower is not yet very much in evidence. The first shipments arrived from Sarcoxie, Mo., the last of April, and regular shipments are now coming. Prices range from \$4.00 to \$8.00. Stock is considered fair in quality. Daffodils are about gone and outdoor tulips are all that are left of that flower which has been in the market now five months. As the wedding season comes on the demand for lily of the valley increases and there are all grades of that flower to be had. American Beauties continue to be rather off-grade and the proportion of second-class stock is large. All kinds of roses are plentiful but no approach to a glut. The cold weather has held back outdoor stock and lilacs still are in good supply. Iris is not having the ready sale of last year; no particular cause can be detected, however, for the stock is first-class. There is also a good supply of miscellaneous stock and of all kinds of green.

CINCINNATI What promised to be a very active market has received another bump. True there is a very considerable amount of work about town, but the demand is not near what it should be since the street car strike

began last Saturday. Every line of retail business down-town is feeling the effects and unless the men and the company get together business will receive some more hard knocks. The largest part of the present demand is coming via the telephone, but while this is good in its way it is not like having the customer at hand. The strike has not and cannot interfere with shipping business which is very brisk. Mothers' Day proved to be the best we have had so far and nearly everything in the wholesale market cleaned up. Carnations were the bloom most sought after by the buyers and as a result prices on some varieties were nearly doubled. The supply of roses is large and includes good cuts of every variety. Beauties are easily sufficient for requirements. The average quality of all of them is very high. Peonies are now in the market. Within the next fortnight heavy shipments of them are anticipated. The sweet pea cut is adequate. Most of the receipts are short but of good quality. German iris is not cleaning up very well. Gladioli sell nicely. Snapdragon, too, moves well. Some excellent outdoor tulips are coming into the wholesale houses.

Flower Market Reports

(Continued from page 761)

DETROIT Business was of a rather indifferent nature all last week. A general revival, though, took place at the end of the week when Mothers' Day helped out. That wholesalers as well as retailers profited by it can be well understood when we see the price of carnations up to \$4.00 per 100 and all the shelves in the wholesale houses are swept clean of everything called a flower. Retailers are having a hard struggle to get enough material to fill orders which situation will not be soon relieved because of the prevailing cold weather. The trade in hanging baskets and porch boxes is starting up very good and the outlook for this year is splendid.

NEW YORK This market has little to boast about for the past week although just at present the receipts are somewhat lightened up and stock clears out better in consequence. So much outdoor material is now coming in that it holds the greenhouse product down tight and prevents any advance from the low prices prevailing during the late heated term. American Beauties have been selling very slowly and most of those disposed of have been sacrificed at cut figures. John Wanamaker sent up from Philadelphia on Saturday for 30,000 carnations to give away to his customers so that they might wear them to honor their mothers. The result was a big advance in value of carnations. Flowers that might have been bought for \$1.00 on Monday were held at \$5.00 on Saturday. Many were sold at varying prices but considerable quantities were in evidence in the wholesale places on Sunday and Monday saw a tumble in values. As to "Mothers' Day" itself, the New York public took absolutely no notice of it, either on West Side, East Side, in circles of high or of low degree. Virginia peonies are coming in freely and there are lots of splendid double stocks all about. Lilies are badly overstocked. In fact, there is a surplus of everything and this includes cattleyas of finest grade.

PHILADELPHIA The early part of the week was rather disastrous. Stock came very freely and there was no business to speak of. On Thursday there was a slight improvement and Friday and Saturday were very good, stimulated largely by the "Mothers' Day" demand. The retailers are now generally recommending other flowers for this occasion instead of the white carnation so that all lines shared more or less in the activity. The Beauty situation was greatly relieved by a good out-of-town demand, and white roses have been in especially good demand. From now on the May trade will be greatly helped here by the children's processions which are quite a feature of the churches, especially those of the Catholic and Episcopal denominations. The gardenia crop has shortened up a good deal and orchids are also in shorter supply. Some very choice *C. gigas* are now arriving. Sweet peas are not so good, the hot weather having hit this crop pretty hard. Peo-

CHRYSANTHEMUM, THE. By A. Herington. The author has endeavored to assist and direct the efforts of those who would grow and excel in producing perfect chrysanthemum flowers, showing that not in secret arts and practices, but in plain course of procedure are the desired results attained. Illustrated, 100 pages. Price 50 cents.

Orders filled by HORTICULTURE, 11 Hamilton Place, Boston.

PEONIES

Peonies. The world's greatest collection,
1200 sorts. Send for list. C. BETSCHER,
Canal Dover, O.

"PEONIES FOR PLEASURE."

This book of "Peonies for Pleasure" gives
information on peony history, soil and
plants to use, how and when to plant, fer-
tilizers and how to apply, and describes the
most extensive planting of really valuable
peonies ever gathered together under the
sun; describes the old and new, as well as
the plebeian and aristocrat of the peony
family. If you want information on the
plant that stands next to the rose in
beauty, that is practically known to the
amateur as simply a red, white and pink
peony, then send for "Peonies for Pleasure."
We also issue a special wholesale price
list of peonies for fall sales, 1913. Send for
both of the booklets.

Our catalogue of everything you need
mailed on application. Write for it today.

Obituary.

Ernest Fischer.

Ernest Fischer, a member of the firm of Fischer & Scheick, Sharon, Pa., died at his home, April 29th, after a long illness. He is survived by his wife and two grown children.

Mrs. Edward Swayne.

After being an invalid for a long time Mrs. Edward Swayne died at West Chester, Pa., on the 6th inst. She was the wife of Edward Swayne, a well-known florist of that city, formerly of Kennett Square. Mrs. Swayne was a lady of high culture and character and greatly respected in her community. Her husband and four children survive; also her mother, two brothers, and three sisters.

A. L. Don.

A. L. Don, for 35 years a well-known seedsman of New York City, died on May 8, aged 58 years. Mr. Don had been in failing health for the past fifteen years with stomach trouble and other complications, but to the last stuck heroically to his business, in which his two sons were associated with him, and his death resulted from cerebral hemorrhage.

Mr. Don was a native of Brechin, Scotland. We first knew him at Peter Henderson & Co.'s, where he was engaged from 1882 until 1887, holding the position of superintendent during the latter part of that time. After leaving this post he took a desk at A. D. Cowan's seed store on Chambers street as agent for a foreign seed house and later he associated himself with C. G. Weeber, an employee of Cowan, and they bought the Cowan fixtures and started in business as Weeber & Don, under which name the establishment is still conducted, although Mr. Weeber retired some years ago.

Mr. Don was recognized as a seedsman of high qualifications and especially an authority on grass seeds. He served as secretary and treasurer of the American Seed Trade Association from 1891 to 1897 and has always been held in high esteem by a host of friends in the trade because of his personal geniality as well as his business ability. He leaves a widow, three daughters and two sons and the sons will continue the business.

We have received the following appreciative tribute to Mr. Don's character:

"Alexander L. Don's distinguishing characteristic was indomitable courage. The body was frail, but the will was something marvellous. In addition to that, he was ever actuated by a high sense of honor—deep love of truth and unsubduable courage in its defense. He was a real seedsman: trained from the basement up to the highest pinnacle; and one of the brightest ornaments of that ancient and honorable profession.

GEORGE C. WATSON."

William B. Robb.

We regret to report the death on the 2nd inst., from cancer, of William B. Robb, for the past eighteen years gardener at the City Hospital, Boston. About a year ago he underwent an operation and all that surgical skill could do was done in his behalf but without avail.

Mr. Robb was born at Arndilly, Craigellachie, Scotland, 52 years ago. His boyhood and early manhood were spent there and under the capable guidance of his father, Alexander Robb, one of the most noted authorities on horticultural matters that the north of Scotland has ever produced, he and his three brothers received their early training, all of whom have since taken prominent places in their chosen profession.

The deceased came to this country some 25 years ago and spent the first six or seven in Milton with G. M. Anderson, who was then engaged in commercial growing. After considerable

WILLIAM B. ROBB

negotiation he entered the employ of the City of Boston as gardener for the hospital. His natural talents and abilities (although laboring under many disadvantages) early became apparent and the hospital grounds were a source of admiration to both the sick and the well. At the convention of the Medical Association held here three years ago, the visiting doctors were unstinted in their praise, not only did they congratulate Mr. Robb and the superintendent but they stated to the trustees that in their opinion the grounds of the City Hospital of Boston were the most artistic and best kept of any they had seen in all their travels.

Mr. Robb's life mission was to make a somewhat dreary world beautiful and those who knew him and his work best and noted the results, know that he did it well. Apart from his professional abilities, his sterling qualities of head and heart earned for him the respect of all with whom he came in contact.

He leaves a wife, two sons and two daughters to mourn his loss and we

Just the place to establish a greenhouse as well as to secure a desirable home. Address T. W. B., care HORTICULTURE.

beg to extend to them our heartfelt sympathy in their bereavement.

In conclusion, we say: "Well done good and faithful servant," the world is bigger and better for your coming.

NEWS NOTES.

New York, N. Y.—P. Hamilton Goodsell, nurseryman, has removed from 200 Broadway to 1905 West Farms road.

Cambridge, Mass.—On Friday night, May 9, the storehouse of A. H. Hews & Co., pottery manufacturers, at North Cambridge, was destroyed by fire which caused a damage of between \$40,000 and \$50,000. The blaze was prevented from spreading to the main factory building only by the absence of any wind and the strenuous efforts of the firemen. Three alarms were sounded.

CATALOGUE RECEIVED.

Loechner & Co., 11 Warren street, New York—List of New Zealand-Grown Sweet Peas.

New professions fill up pretty fast; the supply of foresters is overtopping the demand.—*Boston Journal.*

Flower Market Reports

(Continued from page 763)

Recent cold biting winds have not improved trade and no one seems to have been so busy this week as previously. Slight frosts have been noticed two or three mornings and most of the out-of-door bulbous stock has been picked, thus flooding the market with tulips, jonquils and daffodils which sell for next to nothing. Good brisk business finished up the week and thousands of carnations were disposed of for "Mothers' Day." Out-door grown lilacs are at their best now and bring a fair price. Carnations are fine, with long, straight stems. Sweet peas are of good color and quality and sell quickly. They are becoming very popular for corsage work. There has been a scarcity of lilies, but they are making an appearance again now. Lily of the valley is plentiful. Roses of most kinds are also plentiful. The white winter stock is good and used profusely for decorations. Smilax, asparagus sprengeri and plumosus are in fair supply. There is a large demand for bedding plants.

Last week the market was good but not enough to consume the large consignments, and prices were very low except on Friday and Saturday, when "Mother's Day" sent the price on carnations up to 5 cents when early in the week 1 cent bought almost the best stock. Still the trade had to have the stock and bought quite heavy in all colors. Sweet peas came in heavy also roses; the price on these did not advance as on carnations. Lily of the valley had a big demand all week. Peonies and gladioli sold well. There is a lot of outdoor stock coming in which is being bought for window displays.

CLUB AND SOCIETY NOTES.

The 82nd annual exhibition of the American Institute of the City of New York will be held in the Engineering Building, Nos. 25 to 33 West 39th street, New York City. On September 23rd to 25th, 1913, premiums will be awarded for Dahlias, Orchids, Gladioli, Roses, Carnations, Ornamental Plants, etc., Fruits and Vegetables, on November 5th to 7th, 1913, Chrysanthemums, Orchids, Roses, Carnations and other Ornamental Plants, etc.

WM. A. EAGLESON.

The May meeting of the New London Horticultural Society was made interesting by papers prepared by Mr. Enoch Evans on the "Seed-Sowing Question and the Care of the Seedlings," followed by a discussion. City Forester Henry C. Fuller gave a report on work which had been done in the way of distribution of shrubs and plants during the "Clean City Week;" the demand was greater than was anticipated. Attention was also called to the tent caterpillar, which has not been so bad and early for a number of years.

The Medford Horticultural Society is but an infant among the societies, yet I venture to say that J. K. M. L. Farquhar must have been pleased at the size and intelligence of the audi-

LEMON OIL CO'S
STANDARD
INSECTICIDE
SOLUBLE IN WATER
NO ODOR NO POISON

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange. Effective where others fail.

ence that came to hear his informal and practical talk on "Spring Planting and Care of Flowers" on the evening of May 7.

Mr. Farquhar began by telling how great a factor the automobile has become in enlarging the suburbs of great cities, a corresponding interest in horticulture being the result of that quick and pleasant mode of locomotion. He spoke with no uncertain sound of the distorting of nature by building stiff and formal looking walls of masonry on country estates, thereby robbing them of their artistic and restful appearance. Speaking of trees he drew attention to the many different species that are available for planting and regretted how little they seem to be known. Care of lawns, and cultivation of soil was touched upon, also different kinds of manures and their effect upon crops. He spoke of her-

Aphine
The Insecticide that kills plant lice of every species

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.
\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE
An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE
A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.
\$1.00 per Quart. \$3.00 per Gallon.
All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

In Answer to a Question

If you wanted to get a small diamond for your best girl, would you go to a small one-horse jeweller from whom you were not quite sure whether you were getting your money's worth or not?
Of course you wouldn't!

Your common sense would tell you to go to a large well-known firm whose reputation stood as a guarantee for the flawless beauty of the diamond.
Reasoning along the same lines—if you want only a small greenhouse, you want it right in every

way and up-to-date in every way. The U-Bar is unquestionably the gem of greenhouse constructions. We are the only concern who sells this flawless gem.

ROSES

"MRS. GEORGE SHAWYER"

The growers who are claiming that Mrs. Sawyer cannot be grown without mildew, are welcome to call at this establishment and see for themselves whether or not this is the case. We have not seen mildew on Sawyer since Thanksgiving and any grower who has it is simply growing it too hot. A night temperature of 56 to 58 will suit Sawyer to perfection. We can still quote Sawyer and Milady first-class own root, 3-inch stock at \$30.00 per hundred; \$250.00 per thousand.

Also Pink and White Killarney, Richmond, Taft, My Maryland, and American Beauty, 3-inch own root stock at \$10.00 per hundred.

CHARLES H. TOTTY MADISON, N. J.

YOUR PROFIT ON LILIES

depends so much upon the quality of the bulbs you plant that it does not pay you to take a penny risk in the purchase price. The price of Horseshoe Brand bulbs is based on the quality and quantity combined and not on the asking price of competitors. Our aim is to get the best there is, and make the price cover the cost plus a very moderate percentage of profit. You can help us materially by sending us your orders and in return we can help you by giving you the kind of lily bulbs you really need in your business, at reasonable prices.

Send for the Book of Bulbology with prices.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Lilies

Lilium longiflorum and various other lilies intended for summer flowering will need a cool house in order to keep them back. *Lilium speciosum* and *longiflorum* for summer flowering should have a house without much shade. Give them an abundance of air at all times as they resent coddling. As buds show it will be well to give the stems some support. The stalks may keep erect now, but it will be otherwise when the flowers start to open. Do not omit fumigation. Once green fly gets a good foothold it will deform or run a great part of the flowers. Strong sunshine and heat will necessitate constant close attention to watering at the roots. Keep them well syringed on all bright days until the flowers begin to open. When they are open enough pick the pollen out and place in a cool and dry shed or cellar. This will keep them in good condition longer than if left in the house.

Planting Dahlias

The increasing demand for the dahlia is largely due to the advent of new forms and the great increase in the popularity of the cut flowers. Planting can be done any time from now and up to the middle of June. All dormant roots if not already done should be planted now. Those that were grown from cuttings should not go out until the first of June. Given a well-enriched soil, well drained and in a sunny position dahlias will prove a great factor for the cut flower trade. They should be planted at least two feet apart in the rows and about five feet between the rows. When planting out from pots see that they are thoroughly soaked through, and firm each plant well. Keep the cultivator agoing every week.

Planting Violets

It is always well to plant out the violet stock early so that they become established before they get torrid heat, so if you have not already selected the house for them do so at once. Clean it out well and if the benches have been used for some time, they would better be removed; in fact, if you can use them in other houses, this would be a good plan, even if you have only used them for one season, and so have your violet benches of entirely new material. Clean the paths and ground under the benches and against walls, etc., and remove all stray weed or plant growth. See that all the piping is in perfect order, the same with ventilators, etc. Clean all the sash bars and other woodwork and give a good coat of white paint. You will also want to thoroughly fumigate the house two or three times. For soil use cut sod three parts, well-rotted cow manure one part, with a little of bone meal. Plant the doubles 8 or 9 inches apart each way and the single one about a foot

each way. Shade the house and keep on plenty of ventilation both day and night.

Single-Stemmed Chrysanthemums

The proper time to propagate single stemmed chrysanthemums is from now and up until June 10. They will require every attention, such as several dampings overhead during the day, to keep the cuttings fresh and plump. The propagating bench should be well soaked for the first two weeks and then gradually reduce the amount as the roots begin to form. From now on they will need more shading and copious waterings and spraying. When potting use good rich soil. A turf loam three parts, well-rotted cow manure one part and a fair sprinkling of pure ground bone will make a good compost for the present. Be sure that they have ample drainage. Great care must be used after potting in regard to watering. The soil, if watered too freely for the first month is likely to get soured but when they get a good hold of the soil they should be watered thoroughly, otherwise the plants will become hard and woody. Give frequent syringings which will encourage good growth and also help to keep down red spider which often becomes troublesome. Give full ventilation both day and night.

Tender Nymphaeas

All tender nymphaeas that were started late in April or early in May in 6 or 7 inch pots will make fine stock to plant out by the first week in June. When started early and grown this way they do better than when planted out in the natural way. The best method with tender nymphaeas is to plant them out in boxes about 3 or 4 feet square and place them where they are to remain. These boxes should be sunk so that the first leaf floats on the surface of the water and so place them so they can be gradually lowered until they are covered with about 10 to 12 inches of water. A good compost to use is heavy loam three parts, leaf mold one part, and well decomposed cow manure one part. Do not place these boxes too close together as they require quite a little room in order to do well. Each box should be allowed at least about 60 square feet. All nymphaeas like full sun.

Stock Plants for Next Winter

Now before you sell, or plant out all your stock, set aside an ample number of the different kinds to increase from, such as abutilon, acalypha, achyranthes, ageratum, alternanthera, begonia, coleus, geranium, fuchsia, heliotrope, double lobelia, petunia, pyrethrum, salvia, tradescantia, verbenas, etc. By making a little timely preparation now you will advance the success of another year to a big degree.

Mr. Farrell's next notes will be on the following: Asparagus plumosus; Bouvardia; Acanthaceae; Ericaceae; Fuchsia; Orchids; Planting Asters.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Packing Grapes

Grapes are unlike peaches, melons and most other fruits when it comes to packing and shipping. No matter how carefully they are packed they are sure to show signs of transmission after being removed and placed on the table. I refer to ordinary shipping; when secured to exhibition boards, which take up considerable room, nothing comes in contact with the berries to rub off the "bloom" or otherwise damage them. This wealth of bloom is a first line of defence to the berry and every grape is endowed with it. Different methods are employed for packing grapes, conditions being generally governed by the distance to be traveled. For ordinary purposes a good strong basket is preferable. Of course there is an objection in using them, in that the express companies charge more for shipping a basket having a handle than they would for the same weight in a box, accounting for the extra charge by the fact that boxes can be laid on top of each other while baskets cannot. This is an advantage to the shipper and consignee for they do not generally get the rough handling a box does. Boxes are often thrown carelessly from an express wagon on to a truck and likewise from the truck to the cars with a repetition of the same thing at the other end, irrespective of all the labels of caution that can be pasted on the box. Baskets will usually receive a little more consideration. Either box or basket will necessitate the same procedure when packing. Baskets should be lined with paper first and a layer of cotton wool placed around them. Over this place a piece of wax paper large enough to reach to the bottom, but do not use one large piece to cover the whole thing. Two or three separate pieces should be used, each reaching nicely over the bottom; this prevents anything like a bag being formed which the bunch would sit in instead of hanging on the sides, being suspended by threading a piece of string through the rim and around the piece of lateral usually cut with each bunch. The basket being larger around the top than it is in the bottom makes it all the more accommodating for the bunch, giving the shoulders all the room they want.

Pot-Trees, Finished

Early pot fruit trees—peaches, nectarines, apricots, etc., having ripened their crop will probably seem to be in the way, but do not rush them outside without first hardening them off a little. There will be a big change in the climate from what they have been accustomed to. Leave them in a cool house for a while keeping them thoroughly syringed and watered regularly. When transferring them outside, plunge the pots to the rim, preferably in ashes; failing this place a shovelfull underneath each pot to facilitate drainage. Keep the hose on the trees night and morning and remember the pots are full of roots and will dry out easily. Neglecting watering and syringing for the remainder of the summer will have a tendency to overripen the wood.

Fig Houses

The first crop will soon be ripening and perforce syringing has to be reduced or left out altogether until the crop is off. A discontinuance of this great factor at this time of year is done most reluctantly. If the ripe fruit is picked "close," i. e., all the fruit that can be taken off, in the early morning, a syringing afterwards will not damage them. A plentiful supply of water will be needed at the roots right along and mulching of cow manure will answer the double purpose of feeding and keeping the roots moist. Keep the stopping and tying attended to regularly.

Shading

All the earlier vineries are shaded already, the late one and probably young canes alone being exposed to the full sun. I never advocate shading anything if they will stand the full sun without injury. The later varieties have tougher skins, which helps them to keep so long in the fall and winter, yet these will have to be shaded some time after being thinned. The distance the vines are growing from the glass will make some difference; the closer they are the more liable they are to burn. Gasoline and white lead if applied when first mixed makes a nice shading and can be adjusted to any thickness when once anyone is accustomed to using it. White-wash which has been allowed to cool off is easily applied with a syringe, which is a quicker method but does not look so good.

OUTDOOR VEGETABLES AND FRUIT

Spraying the Orchard

As soon as the flowering season is past it is very important to spray with some good insect poison and this can also be combined with Bordeaux as a fungicide. Arsenate of lead, 3 lbs. to 50 gallons of water, is a good mixture and 3 lbs. of the Bordeaux to the same amount of water. In preparing this spray it will be found to work more efficiently if care is taken to thoroughly mix the materials, taking the ingredients and working them up in paste form in a pail of water.

Borers

Borers are very injurious to all kinds of fruit trees in the orchard or garden and their presence should be

carefully watched for. The dust they throw out of their holes is a good sign of their presence, and the grower having found them should proceed to destroy them by running a wire in the hole and killing them or, if not too deep, dig them out with a knife. A friend of mine tells me he has been very successful in fighting borers by squirting bisulphide of carbon into the holes with a common oil-can and stopping the holes quickly with putty.

Long Beets

The long beet has not found favor generally among American growers, but it should, as it is very much superior in flavor and texture as well as color as com-

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Spraying the Plants

Many of us will be tempted these warm days to take the hose and apply water to the plants in form of a spray. This should not be done as it will do the plants but little good and will more likely do some harm. Rather than spray the plants with water in this fashion, it is much better to give them a good syringing, which will do a lot more, in freshening them up and reducing spider, than all the spraying. To us mere spraying seems to be but a habit of the grower—a habit which should not be forgotten. When planting, water the plants well, and let it go at that, not bothering to throw water over them every few minutes. When properly planted the plants will never feel the change except to take hold of the soil and grow much more rapidly.

Syringing

Do not neglect to keep the plants well syringed, so as to make away with any unwelcome pests, such as spider. This applies especially to the young stock in pots. Be very careful to have all the plants well watered, before syringing, as the foliage will scald fearfully if the plants are dry in the least. It is best to start the hose early in the morning, and then follow with the nozzle about 9 o'clock. Should a thunder storm appear in the afternoon, do not neglect to give the plants a little air-slacked lime, blowing it well under the bottom leaves. This will seem quite useless as the plants will dry quickly enough, but we find it quite practical no matter what time of year.

Scraping the Potted Plants

This, too, is an important factor in producing fine specimen plants, for planting. Weak over-watered plants are not in demand, even if cheap, for they are

pared with the round kinds for winter use, and for the fall shows many schedules have a class for them. To get extra fine specimens a deep (at least thirty inches) soil is very necessary and it should be sandy and moderately rich with a little lime added to most soils. Sow seed now and thin to six inches apart. Blood Red and Pine-apple are both fine varieties.

Keeping the Weeds in Check

It certainly seems superfluous advice to growers to get after the weeds, but a word of warning some time helps us to do the things which we know ought to be done. There is no getting away from the fact that it is easier to fight weeds in the infant stage than later and besides the hoeing and scuffling which we do to get rid of weeds is such a help in conserving moisture and otherwise benefiting the plants that perhaps the weeds are not after all an unmixed evil.

Care of Stock Recently Transplanted

Much of the stock recently transplanted has had a very hard time, going rapidly from hot scorching weather to frost and cold winds. Mulching has been repeatedly referred to in these columns as one of the elements of good culture and careful watering whenever necessary is of course another one. Hoeing, where

dear in the end. See to it that the surface of all the pots is kept free from the green scum that is so apt to settle over the soil and fairly chokes the plant. The roots want fresh air and sweet soil, and soil that has a thick coat of green scum over it can hardly be called fresh and sweet. Therefore remove the scum with an ample tool, and keep the plants free from it.

Lime Water

This proves invaluable when it comes to sweetening the soil in the pots. Lime itself cannot be applied to the potted plants, as it would stick to the pots and to everything else, often forming a hard scum, thus keeping the water and air away. It is not practical then to apply lime. It is much better to apply it in the form of lime-water which is equally effective and much better to use. Unless the plants are grown in large numbers, it does not pay to mix the lime-water in the manure tank and apply it through the hose. Better put about half a peck of lime into a barrel, and slake it, then fill the barrel with water, allowing it to stand awhile to settle, after which the clear liquid can be used to soak the soil in the pots.

Feeding Potted Plants

Where only a small number of extra nice plants are wanted it will pay to go to the trouble and feed them quite regularly with weak liquid manure, being sure that they are quite well watered with clean water first. This is important as the plants are likely to sustain considerable injury if watered with the liquid when they are dry. Cow manure and water make the best form of liquid for this purpose, and when evenly applied the plants certainly show the effect of it.

mulching with litter is impracticable, is the next best thing, creating thereby the dust mulch.

Salsify and Scorzonera

Sowings of these two vegetables should be made now in the lightest soil available. Sow the seed in drills one foot or more apart, thinning the plants in the rows later to six inches apart.

Rushing the Season

We are all prone to rush the season and get stuff out too early. Tomatoes, egg plants, peppers, as well as Lima beans and corn which has been started inside will be much safer in the frames or in some handy place where a light covering may easily be spread over them in case of threatened frost, than if planted out too soon. June 1st is the earliest date north of New York that these plants should be set out. Egg plants in particular seem to loose more ground by one touch of frost at this season than a month's aftergrowth can make up, and it is measurably true of all the above mentioned plants.

Lenox, Mass.

Edwin Jenkins

SOME USEFUL ORCHIDS FOR THE BEGINNER

It is not necessary to have specially constructed orchid houses in order to grow a few orchids successfully. Any kind of a house with a glass roof and ventilators will do for some species, providing the temperature can be kept a few degrees above the freezing point in cold weather, and that the person in charge has made up his mind to succeed. The collection of orchids here was started on a very small scale some 25 years ago, with some plants of *Oncidium sphacelatum* and *Laelia anceps* and a few other things and they are here today in the best of health, producing their beautiful flowers each season.

The beginner, puzzled to know what varieties to grow, must be guided by conditions. Should the house be intended for cool growing plants, such as carnations, primulas, cinerarias, azaleas and the like, where the temperature is apt to be anything from 40 degrees to 50 degrees at night during cold weather, such plants should be selected as will grow under similar conditions in their native home. And fortunately there is a great variety to choose from and some of the very best and at the same time quite inexpensive species are to be found in this section. I may mention the ever popular *Cypripedium insigne*, the beautiful *odontoglossums* from the Central American Alps, the various *oncidiums* from the Organ Mountains of Brazil and many species from Mexico all of which will thrive in a place of this kind. Amongst the latter I would mention particularly the beautiful *Odontoglossum Rossii majus*. Our plant here has been in bloom for over a month and will be good for another month at least. This is best grown in small wooden baskets, suspended from the roof. It should never be allowed to get very dry, even in winter and only a little compost (*osmunda fibre*) is put around the roots when potted. It will grow a number of years in the same basket without being repotted. Cattleyas as a rule require a higher temperature, but the lovely *Cattleya citrina*, will thrive under the same conditions as the one above, but instead of growing it in a basket, this plant had better be fastened to a block of wood or cork, or even a lump of tough fernroot will do; a little fibre is first placed between the block and the plant and all fastened securely together by means of tacks and copperwire; suspend the plant from the roof with the leaves in a downward position. This is one of the cheapest orchids to be obtained.

One other inexpensive and very useful orchid which will grow with the foregoing is *Oncidium varicosum Rogersii*. It makes an elegant display in late summer and early fall with its great panicles of canary yellow flowers. It is one of the most free-flowering orchids I know of; indeed, it will virtually flower itself to death and it will be well to give it a good rest now and then, by pinching out the flowerspikes every two years or so. *Oncidium crispum* is another one to grow under similar conditions and which is quite sure to give satisfaction. *Coelogyne cristata*, Chatsworth variety, will also to be found easy to grow and sure to flower in a cool house of this kind and the white flowers are very valuable for

ONCIDIUM SPHACELATUM

bridal work. The list may be enlarged very much, but this might lead to confusion with the beginner.

Those who have a little house or part of a house at their disposal where the night temperature can be kept at from 54 to 58 degrees in cold weather, may try a few of the showy cattleyas, such as *C. Trianae*, *C. labiata*, *C. Gaskilliana*, etc., also some of the *dendrobiums*, as for instance *D. nobile*. These can be grown in shallow pots or baskets, suspended from the roof, where they will get the full benefit of the light and heat and where they will not interfere with the other plants that happen to grow in the house. Here too, the list could be increased indefinitely but my advice would be to keep to a few good species at first and extend the list later as experience is gained. In such a house most of the *cypripediums* could be grown successfully. Where bench room is scarce, most of these can be grown in shallow pans, and suspended from the roof, but they must be shaded more than the above mentioned. There are many species of orchids which require a still higher temperature than the foregoing and some very fine ones amongst them. Such conditions are usually found in what is called the stove or East Indian house. Here a place can be found for the beautiful genus *Phalaenopsis*, *vandas*, *arides*, the warmer growing *dendrobiums*—such as *D. Phalaenopsis*, *D. Dearii*, *D. superbum* and a good many others. Indeed, the list is almost unlimited and there is no place in any greenhouse, whether warm or cool, where one or another of the thousands of species and hybrids of orchids could not be successfully grown. Any of the firms advertising in *HORTICULTURE* will gladly give information as to their culture and general adaptability and should they fail to do so, *HORTICULTURE*'s pages will always be open for any questions pertaining to this subject.

by this paper is THE SORT OF PUBLI-
CITY THAT PAYS.

A DUTCH BULB TRADE EPISODE

UNITED STATES DEPARTMENT OF AGRICULTURE,
BUREAU OF PLANT INDUSTRY.

OFFICE OF SEED DISTRIBUTION.

Washington, D. C., May 16, 1913.

Messrs. R. & J. Farquhar & Company,
6 and 7 South Market Street,
Boston, Mass.

Gentlemen:

Referring to your quotation of April 12 for supplying the Hyacinth, Tulip and Narcissus bulbs required by this Department for delivery next Fall, I regret to advise you that it is deemed inadvisable to purchase Holland bulbs from American firms. Our experience last year with bulbs purchased from a reliable American dealer was so unsatisfactory, that it is thought best to purchase direct from Holland growers whose stocks have been found satisfactory.

Regretting we are unable to place any business with you, I remain,

Very truly yours,

J. C. S. S.
Acting Assistant in Charge.

McD-F

We reproduce herewith a somewhat remarkable communication from the office of seed distribution of the Agricultural Department in Washington to a well-known seed house. We are informed by Messrs. Farquhar that a few weeks ago they received from Washington a form letter notifying them that the Department was in the market for a quantity of specified hyacinth, tulip and narcissus bulbs and soliciting bids on supplying same. Messrs. Farquhar submitted their quotations accordingly, in good faith. We have no doubt that other seed houses in various parts of the country were given the same opportunity and have received a similar communication in response to their offers. If the Department's experience with American dealers has been so unsatisfactory in the past as this letter would imply, the question arises as to why they solicited American bids at all, knowing before-

hand that they would repudiate them on such grounds.

The unqualified statement that the Department "finds it inadvisable to buy Holland bulbs from American firms" on the ground of unsatisfactory material, is a challenge that should bring a prompt response from the seed trade and a demand for more explicit information as to the causes leading to the writing of so unusual a letter, which carries with it an unmistakable aspersion on the American bulb-importing industry.

The identity of the offending house of last year does not appear but we know that there are a number of houses who make a specialty of importing high-grade Dutch bulbs every year and paying prices accordingly, and if there is anything wrong with the quality of the goods they handle, the fault is not theirs. It certainly looks as though the American dealers were getting some pretty shabby treatment abroad if it be true, as the Department's letter intimates, that the quality of the material furnished by the Holland bulb houses to

a private customer—which the Department is—is superior to that supplied to the American dealers, all of whom buy in much larger volume than the Department's order can ever amount to. It seems incredible that the better class of Holland growers would be guilty of such inconsistency. The American trade generally is fully alive to the fact that quite a large proportion of the foreign bulb salesmen who annually canvass this country for business represent concerns which are not growers and have no stock of their own to sell, simply issuing a catalogue and buying wherever they can to cover sales. It will be interesting to know what foreign house or houses are bidding against their American customers in the manner disclosed by the correspondence in question. If such conditions are to obtain the facts should certainly be made public so that the trade may be thoroughly informed as to what they are getting and we believe we are doing a service by giving this matter the publicity for which it seems to call.

ADVERTISING TALKS—By RALPH M. WARD—No. 11

Suppose there were something about your business that you wanted to keep from the knowledge of the trade. Suppose that it were printed in plain, clear words, in this space! You would consider that the facts were pretty well spread then, wouldn't you? Now surely there's a lot about your merchandise you would like to have the trade know about. Well, then, why don't you

use this space for that purpose? Why don't you advertise? Nothing could be better for your business than proper advertising. Don't be a quitter in advertising. If you begin, buy space for a year so you can't quit before the time comes, when you will not want to quit. At first you will direct attention mainly from those who are looking for something—the people concerned. Later you will get the attention of the unconcerned as well—and this is one of the main de-

signs of all true advertising. Just think a minute—you are unconcerned about soap, safety razors, soda crackers, and many other things, until you want something and then it is that you think of Ivory Soap, Gillette Razors, Uneeda Biscuits, etc. You become an automatic customer—in fact, you are afraid to buy an unadvertised article—you are suspicious of it. It's the same in every business and with every advertised article. Just think a little and then act.

or unheeding growers. In the case of a novelty so widely exhibited and its requirements so generally made known as the rose Mrs. George Shawyer there seems no excuse for the complaint regarding this rose, to which Mr. Totty makes answer in his advertisement this week. In justice to this beautiful and deserving flower and its prospects as a bright star in the galaxy of valuable forcing roses we hope Mr. Totty's admonition may receive due attention and that no one will allow himself to go on record as summarily condemning this or any other good rose novelty for no worse fault than a preventable attack of mildew.

Credit the supply dealer

Of the myriad modern accessories provided for use in the florists' art, plant and flower baskets take the premier place for artistic beauty and practical utility. As compared with the old-fashioned Swiss chip, brown willow plateaus and handle baskets, and white-and-gilt wire constructions which formed the meagre assortment available for the requirements of the florist of the past generation, his brother of today has at his disposal a vast variety, including many hundreds of forms and sizes, almost endless in their variations of material, finish and color effects, assembled from every part of the globe. The florists' stock includes no flower for which a specially adapted receptacle has not been prepared and he can cater for no possible occasion for which the supply dealer has not made provision in the form of floral baskets of appropriate material and of fitting form and color. Many a tirade has been directed against the supply man and his industry because of his activity in the supplying of artificial flowers and the assumed interference of such material with the market for fresh flowers. But if all these objections were valid, which we do not admit, we claim that the florists' supply man has more than made good by what he has contributed to the advancement of the florist trade in manifold other ways and particularly in the line of plant and flower baskets.

Glory enough

It is very comforting to learn of the uprising in the City of Brotherly Love on behalf of the hitherto neglected fathers, that they may be rescued from an undeserved oblivion. As occupying a seat in the fathers' row for "lo, these many years," we feel the tingle of a new joy as we realize that we, too, as well as the mothers, are now to be brought into the limelight and are to have, on at least one day in the year, a special recognition and the pleasure of seeing the people who don't acknowledge to being fathers wearing a rose (any color permissible) in our honor. We have heard it said that the fathers have been losing their grip on family discipline of late; that never before was there so little parental control: the boys—and the girls too—come and go as they please via the latch key and the time-honored "taws" hang in the garrett, gray with the dust of idle years. Relieved, too, of the responsibilities of national and civic government, as we expect to be, as soon as "Votes for Women" become a reality, there will be little left for us fathers to worry over, little to make our hair fall out.

"He rambled, he rambled,

Up and down,

Around the town,

He rambled till the butcher cut him down."

We'll ramble no more under the new dispensation. But we will have, as a compensation, the recognition of a Fathers' Day, thanks to dear old Philadelphia, and who says that isn't glory enough?

Be fair It not infrequently happens that a new plant or flower introduced conscientiously and in the best of good faith, has to undergo aspersions and its sponsor has to suffer loss through ill-founded criticism, often emanating from inexperienced

NOTES ON THE IRIS.

This has been a very favorable spring. In our great iris family numbering 180 varieties, are many of dazzling splendor. The wonder is that more of them are not planted. The plucky little pumilas come first, then we have their hybrids with the Crimean and Alpine crosses and these reach down to the Germanica. These take us down to the Giganteas and then come the Royal Japs—giving us a succession of blooms for nearly three months.

The first of the Germans to bloom are the Black Princess. They are glorious in their splendor. Three long rows in the center of an iris field are really imposing. They are in full bloom while the others are in bud. They are of deep velvety purple, beautifully veined and traced with other colors. The large petals with lustrous sheen are sometimes two inches across. They are overwhelmed with bloom. The next in order are the very fragrant Florentina Alba. The flowers are white and of large size. These stand as sentinels waiting to introduce us to the great family which is to follow.

A Singular Freak.

Last spring we noticed among the Florentinas, flowers one-half white and the other half Black Princess. The colors divided the great petals in the middle and made a singular and charming combination. This year the same thing occurred again and we found two other clumps with the same markings. The variation seems confirmed. We want to save seed from them if they produce any and we propose to put those three clumps by themselves and see if by selection we cannot secure a new departure.

Hybrid Possibilities.

We are raising iris from seed. Some from the pumila hybrids gave us three plants with deep purple flowers. One we named Royal Purple. The flowers are immense for the size of the plant and they are exceedingly floriferous. Prairie Beauty is another cross of the Crimean type. It is light gold—a marvelous bloomer. It seems to be a law that the nearer a plant is to the parent the greater the tendency to revert. The farther you get from the original type, the more freedom it has in breaking away from its antecedents and the greater tendency it has for something original and distinct.

We propose to follow this up in the hope of securing new creations of superior worth.

C. S. HARRISON.

York, Nebr.

A SOLDIER'S GRAVE.

The dust that sleeps unthinking and unknowing,

That turf below
That reeks no more of pale December's snowing,

Or long-dayed June amid the meadows glowing,

That knows not summer's birth not winter's going

On field or bough,
Was once a soldier's heart. It ceased its beating

In duty's round

We o'er the heedless sod today are meeting

To learn the lesson Time has been repeating

And all patriot souls that sleep our greeting

From this poor mound.

—Frank H. Sweet.

ASPARAGUS LUTZI.

A glance at the accompanying illustration of a frond of this new asparagus, reproduced from Moller's Deutsche Gartner-Zeitung, will quickly disclose to the florist its promising qualities. It has already received high encomiums and seems destined to soon take a foremost place in its class in this country. Messrs. Loechner & Co., of New York, who are American agents for the sale of the plants, have sent us the following description of this novelty:

It is a cross between *A. plumosus nanus* and *A. deflexus scandens*. The thornless shoots are straight and erect, without the least tendency to winding, reaching a length of 4 to 6 feet. Each plant should be staked once, in order to tie the shoots together. Any shoot can be easily removed

without disturbing or damaging the rest, by simply pulling it out, as they do not tangle up with each other. This quality alone will be of the greatest advantage when the asparagus is grown for cutting purposes.

Asparagus Lutzii is, moreover, a splendid bloomer, putting forth profusely its snowy blooms, which are in charming contrast to the graceful light green and tufted foliage. The shoots are well-branched from the bottom. If cut, with or without flowers, they are exceedingly lasting, even when not placed in water.

The flowering sprays produce by themselves a unique and splendid decorative effect. Last summer they, in connection with the *Chrysanthemum Ada Owen*, formed the only decoration of the table of the German Emperor during his stay at Wiesbaden.

The cultivation is the simplest. This Asparagus Lutzii requires simply a cold and airy house, contrary to most of the asparagus varieties. The heavier and loamier the soil, the more luxurious the growth, the finer green the foliage, and the more profuse the blooms, which created quite a sensation as the photos of it were published in the official organ of the retail florists of Germany.

A VISIT TO MADBURY, N. H.

The Gardeners' and Florists' Club of Boston had a red-letter holiday on Wednesday, May 21, in a visit to the rose houses and farm of W. H. Elliott at Madbury. The trip, which had been talked about for some time past was a great success in every particular. Over one hundred of the craft responded and there were a dozen or more ladies in addition. A special train from Boston had been provided by the Boston & Maine Railroad and the 68 mile ride each way was enjoyed in comfort and agreeable sociability. Arriving at Madbury the ladies were taken in charge by Mrs. Elliott and autos were at their disposal at all times. The party on arrival was conducted through the vast rose houses, one of which is 1350 feet in length, and inspected the various busy departments, including the mammoth cow barn, manure tanks, soil supplies, boiler rooms, storage rooms, and other appurtenances and finally rounded up at the new cement-walled dairy room where an appetizing repast was served under the management of Mrs. Elliott, assisted by other ladies, and following which there were addresses by Prof. White of Amherst, and Messrs. W. E. Doyle, W. Penn, Wm. Downs, M. H. Norton, H. Robinson, Wm. Sim, Peter Fisher, Herman Bartsch, Wm. Nicholson, R. Cameron, and lastly by Mrs. Elliott and Mr. Elliott as hostess and host.

After dinner the group was photographed and then the time was divided up between the farm, the greenhouses and a stroll through the woods until time for the train back to Boston.

MEMORIAL DAY.

The Bivouac of the Dead.

By Theodore O'Hara.

The muffled drum's sad roll has beat
The soldier's last tattoo;
No more on Life's parade shall meet
That brave and fallen few.
On Fame's eternal camping-ground
Their silent tents are spread,
And Glory guards, with solemn round,
The bivouac of the dead.

No rumor of the foe's advance
Now swells upon the wind;
No troubled thought at midnight haunts
Of loved ones left behind;
No vision of the morrow's strife
The warrior's dream alarms;
No braying horn nor screaming fife
At dawn shall call to arms.

Their shivered swords are red with rust,
Their plumed heads are bowed;
Their haughty banner, trailed in dust,
Is now their martial shroud,
And piteous funeral tears have washed
The red stains from each brow,
And the proud forms, by battle gashed,
Are free from anguish now.

Rest on, embalmed and sainted dead!
Dear as the blood ye gave;
No impious footstep here shall tread
The herbage of your grave;
Nor shall your glory be forgot
While Fame her record keeps,
Or Honor points the hallowed spot
Where Valor proudly sleeps.

One of the most coveted prizes at the Ghent Quinquennial Show, that for sixty commercial azaleas not more than eighteen inches in diameter, was won by F. Sander & Son of Bruges, Belgium.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting of this club on Tuesday evening, May 20, was remarkably well attended, notwithstanding the very busy time with everybody. The promised talk by Wilfrid Wheeler, secretary of the State Board of Agriculture, on fruit growing, was undoubtedly the drawing card and the interest thus shown was a good index of the feeling among the gardeners in regard to this now reviving industry in Massachusetts. Mr. Wheeler's talk was mostly extempore and exceedingly practical. He has been a close student of the fruit industry and knows his subject in all its details. His address was devoted to the growing of fruit commercially rather than as a home garden occupation. He declared Massachusetts soil and climate to be well adapted to fruit culture. The apple is found to do unexpectedly well in Cape Cod sands and the supposedly worthless gravel of Essex County is producing apples and other fruits equal in beauty and much superior in quality to that grown in Oregon. As to climate New England is especially favored, orchard heaters not being needed and he instanced in support of this, the great damage suffered in Maryland, New Jersey and other southerly points by the recent freeze which scarcely touched Massachusetts. He advocated the growing of legumes to build up the soil and heavy fertilizing every year while the trees are young in order to induce early bearing. Of the small fruits, he gave particular attention to the strawberry, a specialty on which he has long been a recognized authority. The Marshall he regarded as still the best garden variety, doing particularly good near the salt water, but lacking good shipping qualities. In the multitude of varieties catalogued there is a considerable difference in their susceptibility to injury from frost—a point that it is well to consider when planting on a large scale. In feeding strawberries caution is necessary not to give too much nitrogen which makes the fruit soft and insipid. In reference to spraying and its importance in orchard operations he advised to spray for scale insects in the coldest weather and said that it was a common fault to overspray, which is simply wasteful. After the conclusion of the lecture many questions were propounded and promptly answered.

W. H. Elliott outlined for the benefit of those intending to visit his place at Madbury on the following day, the arrangements that had been made regarding special train and the program of entertainment. A communication received from the Chicago Florists' Club regarding special train between Chicago and Minneapolis next August, was referred to the executive committee. James Wheeler announced a change of date for the June exhibitions of the Massachusetts Horticultural Society, the peony show being shifted

from June 21-22 to June 14-15, and the rhododendron show being set for June 7-8.

A committee was appointed to prepare resolutions on the death of W. B. Robb and a vote was unanimously passed instructing the secretary to send flowers as a cheering gift to John Barr, who is at the hospital after undergoing a very serious operation.

MORRIS COUNTY (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

We had a full house at the regular meeting of the 14th inst., and every member was well repaid. Arthur Herrington gave an illustrated lecture on "Tree Planting." It was a masterly effort throughout and was much appreciated. The trees shown in the views were quite large, many of the deciduous ones having a root-system diameter of over 20 feet. A round of applause and a rising vote of thanks was given to the lecturer.

J. Lindabury, gardener to Robt. D. Foote, Morristown, brought down a beautiful specimen of *Cattleya gigas* having over 30 blooms. He was awarded a silver medal.

Vegetables will be made a special feature of our next Fall Show, which will be held October 27 and 28. The "Madison class" 1st prize \$75.00, 2nd, \$50.00, 3rd \$25.00, ought to bring out some good stuff. It is to be hoped that members of our sister societies will help us to make this exhibit worthy of the name of Madison by coming down here and putting up exhibits, for this is an open class. We will have the usual vegetable class besides. The citizens of Madison are getting up the prizes and we want to give them the worth of their money by showing them some good vegetables.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that Messrs. R. Vincent, Jr. & Sons Co., of Whitmarsh, Md., offer for registration, the following Geranium (zonal pelargonium):

Name: Geranium Maryland.

Description: A semi-double Geranium, the result of a cross of Alphonse Ricard and La Pilote, showing the character of growth and habit of blooming of La Pilote combined with the size and substance of the Alphonse Ricard. The color is a most dazzling, fiery red. The florets average about 2 inches in diameter. The foliage has a heavy chocolate zone.

JOHN YOUNG, Secretary.

May 10th, 1913.

As no objections have been filed, public notice is hereby given as to the registration of the Geranium, "American Beauty," by John Bauscher of Freeport, Ill., becoming complete.

JOHN YOUNG, Secretary.

May 15th, 1913.

NORTH SHORE HORTICULTURAL SOCIETY.

At the regular meeting held at Manchester, Mass., Friday evening, May 2nd, the members listened to an address on the "Culture of Gladioli," by B. Hammond Tracy. In the discussion which followed some good points were brought out. On the show tables were a nice display of *Antirrhinum* and *Calceolaria* from A. E. Parsons, and a superb vase of carnation Princess Dagmar from Patten & Co. The show committee awarded to each exhibitor a certificate of merit. There was a good attendance.

At the meeting of May 16 we were treated to a very practical talk on "Greenhouse Flowering Plants," by George Stewart of Medford, who made a plea for a larger use of many of the old-time varieties which were more in evidence in our boyhood days, than at the present time. Full cultural directions were given. At the close, a rising vote of thanks was tendered to Mr. Stewart.

JAMES SALTEB, Secretary.

PENNSYLVANIA FORESTRY ASSOCIATION.

The Pennsylvania Forestry Association held an exhibition and convention in Horticultural Hall, Philadelphia, week of May 19th to 24th. Among the speakers were H. A. Surface, "Forest Pests"; J. A. Ferguson, "What Forestry Can Accomplish"; J. W. Harshberger, "North American Forests"; N. F. Davis, "Chestnuts on Waste Lands"; J. C. Williams, "Chestnut Blight"; H. S. Graves, "National Forests"; S. B. Elliott, "Lumber Forestry"; Witmer Stone, "Bird Life"; J. T. Rothrock, "Deforested Pennsylvania." The exhibits were mostly of the photographic order, and were highly instructive and interesting. Outside of the pictures, the lumber interests put up elaborate displays of timber samples in the dried and polished state. On the whole the gala week was very successful, of high educational value to the public, and reflected great credit on all concerned.

INTERNATIONAL FLOWER SHOW PREMIUMS.

The cash premiums have all been awarded and distributed as have also the silver cups so generously donated by different parties.

Checks have been mailed to the Rose, Carnation, Sweet Pea and Gladiolus Societies some two weeks ago.

The committee is making this fact public at this time so that if any winner has not received his prizes in full he will kindly communicate at once with the Secretary, John Young, 54 West 28th street, New York.

The medals will be sent out as soon as they are received from the mint and a complete report of the show will be submitted to the S. A. F. and O. H., at the convention in August.

The Flower Show Committee begs to publicly thank every individual and society that helped to contribute toward the success of this exhibition.

CHARLES H. TOTTY,

Chairman National Flower Show.

NURSERYMEN'S CONVENTION.

Program of Sessions of the American Association of Nurserymen and Pacific Coast Association of Nurserymen to be held at Portland, Oregon, Tuesday to Saturday, June 17 to 21, inclusive, 1913:

ENTERTAINMENT.

Wednesday Evening.

Features to be announced by committee.

Friday, 12.00 Noon.

Attendants are invited to become guests of the Oregon Nursery Company on a Trolley Trip to their Nurseries at Orenco, where lunch will be served at 1.00 P. M. After inspection of the nurseries and recreation, the return trip will be made, arriving at Portland late in the afternoon.

On Saturday.

Excursion on the famous Columbia River, given by the Local Nurserymen. Steamer "Bailey Gatzert," leaving at Alder Street Docks. Time to be announced. This is considered one of the finest scenic trips in the United States.

SECRETARY'S BULLETIN.

Important Suggestions.

The Secretary expects to be in his office at the Hotel Multnomah, immediately after the arrival of the "Rochester Special," at 10.35 Tuesday evening, June 17th.

Each member must register at once on arrival and receive his Badge. Don't leave your Badge Book at home.

Those desiring to join the American As-

sociation should see the Secretary or his assistant. Membership fee is \$5, including Badge Book of....pages and Souvenir Badge.

Address letters for the Secretary, between June 9th and 14th, only, care Hotel Multnomah.

Before leaving home leave plain instructions as to how you may be communicated with.

Members' Badge.

The souvenir Badge is being prepared by the Pacific Coast brethren, and will be given to members after they have registered. Members not at the Convention will receive their badges by mail later.

CLUB AND SOCIETY NOTES.

As chairman of the membership committee of the American Association of Nurserymen, James McHutchison reports that the campaign for new members has resulted in the addition of 118 to this date.

A peony show is scheduled for Tuesday, June 3rd, at Horticultural Hall, Philadelphia, Pa., by the Pennsylvania Horticultural Society. Exhibits must be staged by 2 P. M. Exhibition open to public from 3 to 10 P. M.

The Brookland Rose Show which was opened on Tuesday last has broken all records in point of beauty of the display as well as of attendance. This is an annual affair at Washington and the rivalry for the awards is keen. C. Leslie Reynolds, superintendent of the Botanical Gardens, Miss Belle C. Saunders, of the Department of Agriculture, and Dr. John B. Raymond, of the Catholic University, are the judges.

The North Shore Florists' and Nurserymen's Association, Chicago, Ill.,

was organized on May 1st, when the following officers were elected: President, Geo. Stollery; vice-president, F. O. Franzen; secretary, Herman Schiller; treasurer, Louis Wittbold. The club will endeavor to elevate the prices of cut flowers so that dealers will make a reasonable profit and will also try to establish a standard schedule of prices for bedding plants.

The Hampden County Florists' and Gardeners' Club met at Holyoke, Mass., May 13, members being present from Northampton, Amherst, South Hadley and Holyoke. The discussion was largely on landscape gardening and a short talk was given by Park Keeper Bray on the Holyoke parks. A committee was appointed to make arrangements for a flower show to be given later. The club will not hold any meetings during the summer, but instead will get together and visit the various gardens and parks in Holyoke, Northampton and vicinity, and will resume their indoor meetings in the fall.

At the meeting of the Cook County Florists' Association held May 15th, the amendment to the by-law was read for the third time and voted favorably upon, making it impossible for the president or vice-president to hold the same office two consecutive terms.

Allie Zech, chairman of the sports committee, reported that the bowling league would play their last games before the next meeting. The prizes will be awarded the winners at that meeting and a little Dutch dinner will be given. The publicity committee re-

THE RELIABLE HOUSE

ported progress, showing that the wholesalers are interested to the extent of making verbal pledges of strong financial support to the car advertising proposition.

The monthly meeting of the Rochester Florists' Association was held on Monday, May 12th. The principal speaker was George Arnold, who has charge of the trial gardens in Ogden, N. Y., of James Vicks' Sons. His subject was "The Development of the Aster." The talk was illustrated with stereopticon views. Rochester, Mr. Arnold said, is one of the leading cities in the world in the production of aster seeds. Acres are devoted to the raising of plants in this vicinity in order that the seeds may be obtained. The seeds raised here are sent all over the world.

At the June meeting there will be a general discussion on the plans for the flower show next November. The association will not meet during July or August.

A well-attended meeting of the Nassau County Horticultural Society was held at Glen Cove, N. Y., on Wednesday, May 14th. Communications were read from several trade houses offering special prizes for the fall show. There was a fine display of Darwin and Cottage tulips. F. O. Johnson showed 34 varieties, all of them very fine. The following varieties were much admired: Elegans Alba, Mrs. Moore, Carl Becker, Picotee and Carmea. The judges awarded this collection a certificate of culture. The winners of the monthly prizes were as follows: Darwin tulips, A. Mackenzle;

gladiolus, H. Gaut; lettuce, J. McCarthy. Picotee tulips, V. Cleres honorable mention. At the next meeting, June 11th, prizes will be offered for 12 peonies, 12 T. and H. T. roses and basket of fruit.

J. MACDONALD, Cor. Sec.

At the May meeting of the Pittsburgh Florists' and Gardeners' Club, the International Flower Show at New York was discussed. Some of the displays were highly commended, but regret was expressed that the show was not more truly international in its scope, and that the high standard of excellence of some of the exhibits was not more universal. A fine display of flowers from the blooming shrubs and plants of the Bureau of Parks was made and their common and botanical names and uses of each was given by President McCallum.

Dr. Jennings, the Curator of the

Museum, then described and illustrated by example, the manner of pressing and preserving specimens of flowers and plants and showed in detail the structure and organization and uses of the different parts of the flowers. Innovations of this sort in the stereotyped way of conducting a club meeting are very useful in getting members out of the rut, giving them new ideas and keeping alive the interest.

The next meeting will be held at the usual place, the Fort Pitt Hotel.

H. P. JOSLIN, Sec'y.

ATTENTION!

To the Secretaries of the Florists' Clubs of the United States. Please send a number of members of your club to the secretary of the S. A. F., Mr. John Young, 54 West 28th street, New York. By doing so you will greatly oblige.

NEWS NOTES.

Belvidere, Ill.—Frank P. Brigham has rented the Fairview greenhouses of the B. Eldredge estate and taken charge May 15th. Mr. Brigham will continue the place as a wholesale cut flower and plant business. He has been manager here for the last three years.

Omaha, Neb.—Bids for the removal of the Joslyn greenhouse and for the reconstruction of Hanscom Park greenhouses are called for by the city council. The bids will include the following: Reconstruction of two greenhouses and construction of one new house, 21 x 100 feet; removal of the Joslyn greenhouse and its valuable contents of rare plants; changing of the greenhouse heating system from hot water to steam.

A civil service examination will be held in Alexandria, Va., June 4 and 5 for the position of assistant in plant histology, male, to which is attached a salary ranging from \$1,200 to \$1,630 per annum.

Do You Know What You Want?

Look in the "Buyers' Directory" of this issue and you will probably find represented there somebody who can supply you. It's a good plan to look it over every week, for the weekly changes and additions are many.

..NEW GEUM, 1913..

Geum Coccineum Mrs. Bradshaw

This is one of the finest plants of recent introduction.

*It will put quite into the background all the Geums
 at present found in gardens*

This fine variety produces very large flowers, 2 inches or more across, semi-double, and with plenty of substance in them, of the most brilliant scarlet. They are produced on long wiry stems, and continuous from June to October. For cutting and border decoration it is very hard to beat, and no doubt it will figure conspicuously on the show table in the future.

MAY FLOWERING TULIPS.

Seedsman who sell spring-blooming bulbs will tell you that no class of bulbs has grown in popularity and demand within the last few years as the late or May-flowering tulips. The old-time "breeders" and "cottage" tulips, stately and impressive, have now been reinforced by the new races of "Darwins" and "Rembrandts" and, once seen, the subtle infatuation of the late-May tulip parade becomes irresistible. The weird pastel color tints, at first regarded with indifference by one long familiarized with the gaudy splendor of the "single earlies," grow on acquaintance, and one soon becomes a devotee. These wonderful flowers are objects to be admired individually. Poised on tall stems, 18 to 30 inches, they demand inspection flower by flower. Then that which at a distance was but a misty grey, dull tawny buff or slaty blue, assumes an irresistible blending of pure tones and, looking into the heart of the half-opened flower, the very atmosphere seems all illumined with effulgent color. Yet in mixed mass planting these flowers have a harmonizing quality rarely found in any promiscuous tulip planting and the varieties may be used indiscriminately without any fear of color discordance or clash.

We had the pleasure, a few days ago, of viewing a very choice collection of these May-flowering tulips in which are represented all the classes as well as many of the finer tulip "species," at the trial gardens of Chester Jay Hunt at Montclair, N. J. The plantations are artistically arranged and have the advantage of a superb setting and background of garden trees and ornamental shrubbery and a stroll among them in company of Mr. and Mrs. Hunt, both of whom are evidently infatuated with their work, is a delightful privilege. We have noted below a few of the varieties that impressed us most strongly among the several hundred named sorts there shown. Some of those here mentioned are not yet on sale, but the majority of them may be procured from any of the general seed houses represented in HORTICULTURE'S advertising columns and there are, of course, many other varieties, equally desirable, of which lack of space prevents mention at this time:

Velvet King; dark maroon purple, often carrying an extra petal or two; a fine forcing flower.

Bronze Queen (Breeder) syn. Biscuit; Clio; buff, golden bronze inside; a desirable forcer.

Grand Monarch (Darwin); violet purple, with white centre.

Alice; mahogany edged with bronzy yellow.

Whistler (Darwin); maroon crimson, with blue base.

King Harold (Darwin); glowing ox-blood red.

Professor Rauwenhof (Darwin); cherry-rose with salmon glow inside.

Fulgens (Cottage); a glorious crimson, with white eye.

Sunset (Darwin); yellow, recurving petals; preferable to Golden Crown.

Fawn (Cottage); opalescent pink and pearly fawn overlaid; a lovely thing.

Inglescombe Yellow (Cottage); canary yellow; known abroad as the Yellow Darwin.

Miss Willmott (Cottage); primrose petals pointed and recurving; a distinct form and good late forcer.

Rosy Gem (Rembrandt); rosy-lilac striped carmine and feathered white.

Carnalla (Rembrandt); white, flamed and feathered carmine.

P. HAMILTON GOODSSELL, 1905 West Farms Road, NEW YORK CITY

Carinata Rubra (Species); dark crimson, each petal with a central stripe of apple green; a very unusual combination.

Avis Kennicott (Cottage); chrome yellow with black base; very long petals. This variety is said to have originated in an old American garden and after being discovered it was taken to Holland and there exploited.

Zomerschoon (Darwin); apricot rose, flaked white; said to be 250 years old, but yet very scarce.

Marconi; dark violet purple; enormous flower.

Louis XIV (Breeder); dark purple, flushed bronze with broad margin of golden brown. "The aristocrat of the race." Very scarce and high.

Jupiter (Bizarre); flamed and feathered dark maroon.

Pride of Inglescombe (Cottage); a soft and dainty misty color.

Massenet; syn. The Dove (Darwin); creamy white, flushed pale pink; remarkable blue centre markings; the whitest of the Darwins.

Semele (Rembrandt); white feathered with rosy lilac, reminding one of old chintz.

Rafael (Darwin); dark plum; rich and stately.

Jubilee (Darwin); blue purple; a Krelage novelty.

Walter T. Ware (Cottage); the deepest and richest yellow among late tulips; petals pointed and reflexing.

Viking (Darwin); lustrous dark purple with lavender edge.

La Fiancee (Darwin); old rose, petals paler at edge.

Remembrance (Darwin); pale slaty purple with silvery margin; unique.

Hersogin von Hohenberg (Darwin); metallic violet, edged pale lavender.

Julienne (Rembrandt); white, violet and dull crimson in fantastic blotching.

Albion (Breeder); pale lavender.

Princess Elizabeth (Darwin); soft satiny pink.

Judas Macabeus (Rembrandt); violet, feathered crimson.

BOSTON'S MAY EXHIBITION.

Horticultural Hall fairly glowed and sparkled with color on Saturday and Sunday, May 17 and 18, the occasion of the annual May Show of the Massachusetts Horticultural Society, and thousands of visitors enjoyed the sight, which was free to the public. The predominating feature was the display of Darwin and Cottage tulips, of which many thousands were staged and they did make a glorious spectacle. R. & J. Farquhar alone showed some 2000 blooms, comprising 300 or more varieties under name and including many of the newest and rarest mentioned in the special article on these flowers which will be found elsewhere in this paper. This exhibit received a bronze medal. Wm. Whitman showed a splendid collection of about 80 varieties, Francis Skinner a superb lot almost as extensive, and A. W. Preston about fifty varieties, all labeled in each instance.

As usual, the calceolarias were grand. They occupied the centre of the hall and among them were two fine varieties of the sensational C. Stewartii—Bailorii and Medfordii—the former bronzy orange and the latter deep bronzy scarlet. These were exhibited by C. B. Dane, gard. C. W. Rust, but a first-class certificate was awarded to George Stewart as the raiser. Another notable exhibit was a group of about 200 Liliun myriophyllum by R. & J. Farquhar & Co. These plants were from tiny bulbs in 3-in. pots but each bore one or more splendid blooms on strong 2-ft. stems, showing the wonderful flowering qualities of this striking novelty. Messrs. Farquhar also showed two other nov-

elties—a plant of Clematis montana rubens loaded with lovely pink flowers and cut stems of Rehmannia hybrida (R. angulata × an unnamed species) bearing 15 to 20 large pink blooms on 3-ft. sprays.

Walter Hunnewell, gard. T. D. Hatfield, showed a group of plants of a new hardy orange azalea from seed collected in China by E. H. Wilson, which was recognized with a first-class certificate. The new French hydrangeas were effectively shown by Mrs. J. L. Gardner, gard. Wm. Thatcher, grown to single stems and monster heads of bloom. A great collection of named lilacs was staged by Julius Heurlin, Blue Hill Nurseries, and F. J. Rea showed a very interesting collection of little-known herbaceous flowers.

One of the most impressive exhibits was a large group filling the end of the hall, by the Breck-Robinson Co., comprising a variety of forced material—phloxes and other herbaceous bloom, hardy azaleas and rhododendrons and "Seven Oaks" chrysanthemums, backed with bay trees and conifers and neatly edged with dwarf box in pots. An unusually extensive exhibit of flowers of fancy pelargoniums came from Wm. Whitman, gard. Martin Sullivan. T. T. Watt, gardener at Wellesley College, made an interesting display of miscellaneous greenhouse material including some fine orchids. From Mrs. J. L. Gardner, Mrs. C. G. Weld and E. B. Dane came elegant orchid groups, that from Mr. Dane being both rich and rare in its make-up.

Other than the honors above mentioned, the following awards were made:

Calceolarias—1st, Mrs. C. G. Weld; 2nd, Mrs. J. L. Gardner. Tulips, Darwin—1st, Francis Skinner. Late-flowering, other than Darwin—1st, Francis Skinner. Late-flowering, any or all classes—Francis Skinner; 2nd, A. W. Preston. Pansies—1st, William Whitman; 2nd, A. W. Preston; 3rd, William Whitman.

Asparagus—1st, Oliver Ames; 2nd, Mrs. Frederick Ayer. Beets—1st, W. Heustis & Son. Carrots—1st, W. Heustis & Son. Lettuce—1st, Oliver Ames. Radishes—1st, Oliver Ames; 2nd, W. Heustis & Son. Tomatoes—1st, Oliver Ames. Collection of Vegetables—1st, Oliver Ames; 2nd, A. W. Preston.

Honorable Mention: Breck-Robinson Co., collection of flowering shrubs, evergreens and herbaceous plants; R. & J. Farquhar & Co., primulas and violas; R. & J. Farquhar & Co., Clematis montana rubens.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. M. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Rochester, N. Y.—The continued cold weather of the past few days and the frosts which have visited this section, including Mount Morris and Palmyra, N. Y., for several nights have worked havoc with the early crops, and while it is impossible to ascertain at this time the total amount of damage, yet it is certain it will run into thousands of dollars. Previous to last week the conditions were so favorable that fruit growers were predicting a large crop, and it looked as though the crops this year would be large enough to make up for the poor yield last year. Peaches, cherries, berries, apples and in fact almost every kind of fruit has suffered more or less from the untimely frosts. Wm. L. Gallman, who is a big grower, and has a large peach orchard in which there are 10,000 trees, says there is no doubt about the big damage that the peach crop received. John Long, a grower close by, states that his orchard has been practically wiped out as far as a yield can be expected this year. Another crop that is now practically ruined is the tomato crop. The early floods destroyed hundreds of thousands of tomato plants, and now the frosts have wiped out what plants escaped the high water. Farmers who have early peas up, have now but blackened leaves.

HORACE J. HEAD.

Thorburn's New Street Number.

Through the Woolworth Building, New York City has been given a surprisingly large amount of publicity. But J. M. Thorburn & Co. are not worrying about this half as much as they are about the fact that they have to change their Barclay street address of No. 33 to No. 53, and their Park place number from 38 to 54 Park place. Naturally though, mail addressed to the old number will reach them, but you will save the post office authorities a lot of vexation and extra work by addressing your orders in the way suggested above.

PATENTS GRANTED.

Of Interest to Retail Florists

Allentown, Pa.—Marcus De Long,
who about a year ago purchased the
greenhouses of A. B. Ellsworth, has
now bought out the flower store re-
cently opened by C. F. Burkemeyer at
1103 Hamilton street.

Pittsfield, Mass.—The local florists
are now in line relative to closing on
Wednesday afternoons during the
summer months. This move has been
started by L. W. Acheson and F. I.
Drake. It is the intention of Messrs.
Acheson and Drake, if possible, to get
all florists in this city to close on
Wednesday afternoon, affording their
employees one half day of recreation.

their guest Mrs. Olinger's mother, Mrs.
Weiland, of Evanston, Ill.

Wm. Gardner of New Castle, Ind.,
manager of P. J. Olinger's green-
houses, has gone to London, Ontario,
to see his mother who is seriously ill.

Wm. Gear is traveling through the
West on an eight weeks' tour.

Visitors—H. D. Crowell, represent-
ing the S. S. Pennock Meehan Co.,
Phila.; W. D. Sutterfield, West Union,
Ohio; Mrs. Rampert, Xenia, Ohio; H.
J. Vander Horst, St. Marys, Ohio; E.
G. Hill, Jos. Hill, Fred H. Lemon,
Richmond, Ind.; R. Irving Gresham of
Dahl's, Atlanta, Ga.; W. Sutterfield of
West Union, Ohio.

Usually when a man falls short of
success the trouble lies in some speci-
fied direction; it may be bad judgment
in buying; it may be poor selling
methods; it may be improper handling
of the people. Whatever the fault, I
believe men could educate themselves
out of it, if they really resolved to do
so and went about it intelligently.—
Southern Merchant.

ORIGINALITY.

"We lead; let those that can, follow." How many florists can really use this phrase? Not very many make attempts at originality, only when they are driven to do so by flower shows, etc., otherwise they seem perfectly satisfied to go on year in and year out with the same old designs, bouquets and baskets as long as their customers will stand for it.

Hats off to our basket manufacturers, for the changes they have given us in the past few years, their introduction of baskets with linings to hold water, so the flowers can be arranged to keep for some time; otherwise we would still be using the old method of moss, sticks and wire.

Recently an original design was called for at a florist shop in the East, the lady asking for something that would travel a long distance and still retain its freshness on its arrival. The florist seeing a chance to make a fine sale, was there with the goods; and here was his suggestion. An empire wreath made of Richmond roses; nothing out of the ordinary, of course; but the originality was the frame. In place of the ordinary wire frame he had a frame made of light zinc in the form of a trough, thus holding water; the moss was soaked well and then put in the frame and tied in the usual way; the roses used had short stiff stems and were inserted in the water-soaked moss which held them firmly and also supplied the necessary moisture. After six days the lady returned from her funeral trip and congratulated the florist for his cleverness, saying that the wreath had kept beyond expectations.

While bridal novelties are never at an end, we must keep in touch with the up-to-date weddings, the bride-to-be ever hunting for originality. Brides have carried the shower bouquets for many years, then some genius originated the bridal prayer-book; another suggested the muff, another the fan; still another produced the parasol, but florists of this hemisphere have been puzzled of late as to what they should fittingly suggest next for the bride. A bridal-scarf of chiffon, lace or net, decorated lightly with lily of the valley and small sprays of adiantum or asparagus caught with tiny bows of baby ribbon is what will be seen at many of the foremost June weddings this season. The scarf can be worn over the shoulders, hanging loosely and the decorated ends falling gracefully, the right hand gripping one end of the scarf against the bodice, or it may be gently thrown over the right arm with the decorated ends in full view, this being a matter of choice.

Originality often requires nerve. If you lack that confidence in your creation it will never make a hit and you will find yourself playing second fiddle to some other originator's idea.

MR. STOREMAN.

THE IDEAL STORE.

I like to go into a warm store—not steam-heated, particularly, but heart-heated—a store where the proprietor is cordial, obliging and cheerful, where

the clerks act like they are glad to see me.

I like to go into a store where I feel welcome. In some stores I have felt like an intruder breaking into a private home.

I like to enter a store by being invited in by attractive window displays. I generally choose a store by the windows and I very seldom find that they misrepresent the quality of the store.

I like to deal with a store where I know the clerks work together pleasantly, where they receive proper credit for what they do, and the proprietor treats them well.

When I go into a store. I like to have the clerk take my complete order, and then collect the articles, wrapping them in as few parcels as possible.

I like a store where the clerks know where to find what I want without unnecessary delay.

I like to go into a store where there is plenty of light, both in the daytime and evening, and where there is good ventilation.

I like a store where the shelves are clean and where they do not show dusty packages and cans. I always patronize the cleanest store I can find.

I like to go into a store where the clerks are anxious to wait on me, where they are desirous of showing me goods, even though I may not make a purchase.

I like a store where I always get a receipt, for it is the only safe way, and I know I am getting exactly what I pay for.

When goods are delivered or I send after them, I always like to have the store send me a receipt, so I may know that I get what I ordered.

The ideal store is the one that has these good qualities and more.—*N. C. R. Weekly*

PHILADELPHIA NOTES.

The voice of the lawn mower is heard in the land and the cheerful snip of the hedge shears. The seed stores clap their hands with joy and rush them out with ball-bearing celerity.

O glory! The rhododendrons are in bloom. What effulgence of pink and lavender in a sea of green! Let "the dogwood trees bark, and the pussywillows purr;" rhododendrons for mine.

Edward Reid has been entertaining

during the week at his Lansdowne Villa. Mrs. Jno. L. Radclyffe and daughter, of Richmond, Va. A feature of this visit was an auto trip to Atlantic City.

Apropos of the proposed Fathers' Day some of the militant element among the ladies are rather free to assert that until the "old man" behaves himself better than he has been doing of late there will be no red rose for him.

Water lilies of the choicer large-flowering varieties made their appearance in this market on the 21st. The Pennock-Meehan Co. stated that they expected regular shipments from now on. These are very useful in decorations and all very lasting and effective for summer suggestions.

The past ten days have been quite cool and have kept back the local peony crop nicely, so that these will be in good shape for Memorial Day. On Sunday, the 18th, many people around here were out of coal and had to go to bed to keep warm! If you don't believe me, ask Com. Westcott. The peach crop and tender vegetables suffered considerably.

Visitors: Wm. J. Halliday, Baltimore, Md.; Mrs. Jno. L. Radclyffe and daughter, Richmond, Va.; G. R. Gresham, of C. A. Dahl Co., Atlanta, Ga.; Stephen Mortensen, Southampton, Pa. W. C. Langbridge, representing Jerome B. Rice Co., Cambridge, N. Y.

H. BAYERSDORFER & CO.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET,

PHILADELPHIA, PA.

CHICAGO NOTES.

A Rose Sale, located mostly at the hotel entrances, is booked for June 4th. If the roses offered are of good quality the idea is a good one, and the florists will not be losers but gainers by the event.

A State street window showing a properly gowned and be-flowered June bride and two flower girls attracted so much attention that the walk was blocked. While there was nothing strikingly new in the arrangement of the flowers, the work was exquisitely done. Lily of the valley was used exclusively and no ribbon.

Florists are interested in the announcement, by the local papers, of the finding of a bottle on the North Shore beach, Sunday, containing a message from the Christmas tree boat which was lost last winter. It said: "Rouse Simmons went to bottom with cargo and crew, after jamming sunken ice, crushing front of boat."

Some have the idea that the use of quantities of flowers at funerals is not so popular as heretofore, but Ernst Wienhoeber does not share this opinion. He had eight auto truck loads and several delivery wagon loads to look after at a funeral Saturday, and then many of the large pieces were not sent to the house, but went directly to the cemetery.

News of the death of G. L. Grant, editor of the Florists' Review, and for many years a resident of Chicago, was learned with deep regret, by his many

friends in the trade here. A telegram was received saying that he had not rallied from a second operation performed last Friday for appendicitis, and his daughter Mrs. Miller left for Soquel, Cal., on Saturday. The Tribune on Monday announced his death as taking place Sunday.

Inventory is being taken at E. H. Hunt's this week and the passing of the business of the oldest florists' supply house of Chicago into other hands is inevitable. Since the death of its founder, the business has gone through various crises and each time with apparently a good chance for success, started anew. This time the stock will be sold and while no final arrangements are completed it is pretty well understood that former employees will be the purchasers and the proceeds go toward paying the creditors. C. M. Dickinson, for many years manager, and his mother Mrs. E. H. Hunt, are located in Montana on a ranch near Butte.

There will be some changes in the locations of the florists of the Atlas Block, though no one expects to leave the building. At present there are twelve wholesalers on the second floor and one in the basement. The other basement room, formerly occupied by Poehlmann Bros. Co., has been rented by Zeck & Mann from the second floor, whose lease has been taken by Dominick Frerer, now renting a room from the Chicago Carnation Company, same floor. John Zeck and Mathias H. Mann bought the Michael Winandy business, March 29, 1905, and have oc-

cupied the same room ever since. Their increased business makes a large place imperative and as soon as the new location is re-decorated and ice boxes in they will take possession. The Chicago Carnation Company have also found their quarters too small and partitions will be removed, doubling their space.

Personal.

Floren Cipar thinks he will go into business for himself, having served 16 years with E. H. Hunt.

John Pavelchic, who has had charge of the wire work for E. H. Hunt for 17 years, and his four associates, are now with Poehlmann Bros. Company in the same capacity.

T. T. Clark expects to spend a few weeks with his parents at Beardstown, Ill., famous for its fine fishing and its annual fishing carnival in August, when thousands of pounds of fish are baked and given away to the summer visitors.

Visitors: E. H. Mann, Richmond, Ind.; J. J. Karins, representing H. A. Dreer, Philadelphia; E. E. Sted, Valparaiso, Ind.

Flower Market Reports

BOSTON

Premonitions of the Memorial Day rush are in the air. Retail clerks are busy in all spare time fixing up the many arrangements of preserved material which are so much in demand at that time and growers are beginning to hold back or hasten forward their special crops as conditions warrant and we shouldn't be surprised if some of them already have a good nest full of cut carnations, lilies and other things hidden away in the secret vaults. Continued cool weather keeps everybody guessing and on the temperature of the days between now and May 30th depends the outcome of many a house of astilbe and stocks as well as lots of other things. Present demand is light and wholesale prices are easy. Quality is very good on everything, especially the roses, which seem to enjoy the cool bracing atmosphere of the past ten days. No peonies have been seen in this market so far and no southern gardenias. The winter sweet pea houses are about worn out and flowers from them are of poor quality but the spring-grown Spencers are coming in superb form and there are plenty of them. As a general proposition it is safe to pre-

dict a good and plentiful supply of flowers from both outdoor and indoor sources for Memorial Day.

CHICAGO The market has recovered from the demands of Mothers' Day and rather more stock is seen on the counters of the wholesalers at this writing

than at any previous week during the month. Cool weather has kept the carnations firm and some especially fine stock, with long stiff stems are coming in daily. The Spencer sweet peas are selling particularly well, the common peas bringing about

Flower Market Reports

(Continued from page 801)

one-fourth the price of these. All kinds of roses are plentiful, prices for good stock holding up well. Lily of the valley is in great demand as the wedding season approaches, but this flower has sold well all the year. Peonies are beginning to make their presence felt. Some from Illinois are arriving this week. Outdoor flowers, especially snow balls have been held back by cold weather till they are likely to play a prominent part in Memorial Day business.

The street car strike

CINCINNATI in this city is now over and business lo-

cally will undoubtedly get back to normal conditions in a big hurry. During the pendency of the strike all retail business, including the florist business, down town was at a standstill. The retailers in the suburbs were a little more fortunate but they also say that the effects of the strike on trade in general was plainly felt by them. During the past week the market has been over-supplied in almost every line. The receipts were very large while the demand locally owing to the various conditions was correspondingly small. Shipping business was fairly good but it could not carry everything on its shoulders. Judging from the present receipts of flowers and reports from the growers the market will have an ample supply for Memorial Day. Peonies are coming in strong and if the weather continues anyways fair at all will be coming in much stronger in a very few days. Besides these, as almost a special flower for the day, are large cuts of double narcissus. There are roses, carnations, lilies, orchids, gladioli, snapdragon, sweet peas, etc. New Kentucky ferns are in.

NEW YORK For the last two or three days everything seems to be coming

in more plentifully and business has slackened considerably. All of the stores are complaining, saying business is very dull. There is not one bright spot just at present. Sweet peas seemed to have the call until Monday, when the demand for them fell off considerably. There is an abundant supply of good stocks. Callas, lilies and other large material are very abundant and with the stocks, astilbe and a plentiful supply of garden shrub and herbaceous bloom will fill a good place in the Memorial Day supply. Roses are still in excellent quality, due to the cool and bright weather. They have rarely been so

good at this date. Of carnations there is an ample number coming in—quality falling off in many cases, but prices holding up remarkably well.

PHILADELPHIA Trade on the whole has been excellent. A good supply of all the staple stocks, but no glut. In fact it is surprising in view of the large receipts to find in the long run that demand has kept up with same. This in spite of cold, cloudy weather. On Saturday it rained from morning to night and very cold. That killed it for the street men, and usually that would have meant no "clear-off" for the old accumulations. But strange to say, Saturday was the briskest day of the week, and everything went. A partial explanation is to be found in the church May Day festivals, which used up a large amount of medium-priced stock. Then came an unusual large number of weddings and other gaieties. And many good judges think that the impetus of Mothers' Day is still working. One wholesale house said they did 51 per cent more business for that occasion than last year. Roses—especially Beauty—were a little sluggish, probably caused by so many peonies around. Sweet peas, on the other hand, were scarce some days, especially on the high-grade Spencers. Carnations had a splendid inning, with even the tail ends coming in with a tally. The supply of orchids slackened up a little. Interest was added to the orchid market by the advent of gigas—

splendid large well-colored flowers. Demand very satisfactory. Gardenias fewer and demand also falling off. Gladioli are going all right; quality top-notch. Receipts rather less for the week. Blue centaurea a favorite and conspicuous item. Nothing to beat this for boutonnieres. Greens hang fire, with the exception of smilax and A. plumosa. Advance bookings for all lines of cut flowers for Memorial Day are very satisfactory to date and compare favorably with last year at same time. Of course a whole lot depends on the weather for this occasion—much more so than at Christmas or Easter—as there is such a large percentage of outdoor bloom not under control.

ROCHESTER, N. Y. Business dur-
ing the first

half of the week eased up quite noticeably. The latter part showed signs of improvement and Saturday was one of the "busy" days. Carnation quality is poor and the stems are weak and crooked, and they are scarce. Most all of the bulbs have gone and sweet peas are falling off in quality. American Beauty roses are in good condition and make fairly good prices. Other kinds of which there is practically no shortage are good. Baby gladioli sell very readily, the quality being good. There is plenty of outdoor lily of the valley. Most flowers are used up each day and practically none of them go to waste.

PEONIES

Peonies. The world's greatest collection, 1200 sorts. Send for list. C. BETSCHER, Canal Dover, O.

"PEONIES FOR PLEASURE."

This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure."

We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

Our catalogue of everything you need mailed on application. Write for it today.

Obituary.

Elbridge G. Moore.

Elbridge G. Moore of Milford, Mass., died at his home on May 1st, after an illness of several months. He was 78 years old and had been in the florist business for over thirty years. His wife and a brother survive him.

James Fraser.

James Fraser, superintendent of the Mountain Home Cemetery, Kalamazoo, Mich., died of heart disease on May 5th. He was born in London, May 19, 1862, and came to this country when 8 years of age. He is survived by a wife and two children.

William Ewing, Sr.

1913 has certainly proved so far a year of sorrow in the seed trade, in the loss of some of its most prominent and esteemed members. Within a month we have lost Frank T. Emerson and Alexander L. Don, and now comes the news from across the line of the passing away of William Ewing, of William Ewing & Co., Montreal, who died May 6th, and who was equally well known in the States as in his adopted country, where he founded a great business after receiving his early training in Glasgow, Scotland. Mr. Ewing was a most whole-souled, companionable man and beloved by everybody.

G. L. Grant.

G. L. Grant, editor of the Florists' Review, died at Soquel, Cal., following a second operation for appendicitis, on Sunday, May 18. G. L. Grant was born in Jersey City, N. J., on June 15, 1859. He went to Chicago in 1883. For a brief time he sailed on the lakes with Captain Walsh on the Alpena, which was soon afterwards lost with all on board. Our recollection is that previously Mr. Grant had been employed in telegraphic work, but he had not been long in Chicago before he entered the employ of J. C. Vaughan in the cut flower commission business, and at the time of the establishment of the American Florist, the first florists' trade paper, at the S. A. F. convention in Cincinnati, 1885, Mr. Grant was placed in a position of responsibility in the editorial office of the new paper, which he retained until the secession of a large section of the office force under his leadership and the establishment of the Florists' Review in the year 1897. Since that time he has held the position of editor and manager of that publication, although about ten years ago he went to California on account of impaired health and has resided there ever since, coming East only on such occasions as the S. A. F. conventions. He was one of the charter members of the S. A. F., and has always taken a more or less active part in its work and its politics. The telegraphic code which the Society issued in its early existence was mainly the work of Mr. Grant. He was an active participant in the organization of the Chicago

Florists' Club, 26 years ago, and afterwards served as its secretary and president.

William C. Strong.

Again it becomes our sad duty to record the decease of an old tried-and-true friend. W. C. Strong of Waban, Mass., for many years well-known as a nurseryman, horticulturist and gifted writer in bygone days, died in New York, May 14, at the home of his son where he has been living for the past year or two, at the advanced age of eighty years. He was a native of Hardwick, Vt.

Mr. Strong was an active contemporary of Hovey, Wilder, Breck, Parkman, Hunnewell, Barry and other men who in the middle of the last century left their indelible impress on American horticulture and pomology. He was a frequent contributor to the columns of the Horticulturist, Gardeners' Monthly, and similar periodicals and having a legal education and a deep seated love for his chosen profession of horticulture his writings were at all times logical and interesting. In

WILLIAM C. STRONG

the early fifties he was recognized as an authority on grapes. In 1851 he made a record exhibition of forced grapes at Horticultural Hall, Boston, and for a number of years conducted extensive graperies at Brighton. Versailles currant was first exhibited at Boston by Mr. Strong in 1857 and in the fall of 1859 the records show that he was the first to exhibit Tritoma uvaria before the Massachusetts Horticultural Society. Fuchsias, gloxinias and other choice floral products were frequently sent to the exhibition tables from his establishment. The "hillside" greenhouses erected in 1868 at Nonantum Nurseries, Brighton, attracted much attention for a time on account of their novel construction. This place has been now for many years the establishment of W. H. Elliott.

W. C. Strong became a member of the Massachusetts Horticultural Society in 1848 and with one exception—D. S. Kendall, who is recorded as having joined in the same year, was the

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "Care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

SITUATIONS WANTED

SITUATION WANTED—By gardener, life experience in all branches of gardening in and outdoors in old and this country, especially of pot plants, vegetables, fruit growing, etc. Married; age 28; abstainer; good worker. Preferably on small private place or as helper on larger. Address "P. M.," care HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. Parsbel-sky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

FOR SALE—Four acres of desirable land, good rich soil, on the main thoroughfare between Boston and Worcester. Also a good cottage house, with sheds, and stable accommodations for 14 horses. Just the place to establish a greenhouse as well as to secure a desirable home. Address T. W. B., care HORTICULTURE.

BUSINESS OPPORTUNITIES

A RARE CHANCE TO LEASE A FLORISTS BUSINESS in the best location in Brooklyn, N. Y., near Prospect Park, half way to Coney Island. No other place like it for funeral work and cut flowers. Situated one block from the new Coney Island avenue (100 feet wide). The property now contains small greenhouse, a new cement office and workroom 20 x 22 feet. Cellar full size, fitted to raise mushrooms. If you are in want of such a business, investigate. Reasons for leasing, death of my wife and poor health. Established eighteen years. Best of references. Full particulars will be given. F. A. BOLLES, Coney Island Avenue and Avenue L., Brooklyn, N. Y.

oldest member in term of service. He was recording secretary from 1852 to 1855, vice-president from 1860 to 1870 and president from 1871 to 1874, and was closely identified with the Society's activities during those and succeeding years.

Mr. Strong was a gentleman of the genuine old school, gentle mannered, kindly and sympathetic. He lived a useful life, and died at a ripe old age, maintaining to the last his love for horticulture and his interest in the career of his former business associates and friends.

The photograph from which our picture was made was taken a good many years ago, yet it is a good likeness of Mr. Strong as we remember him even after he had reached a venerable age.

HORTICULTURE:

Please do not repeat our advertisement for a man. The first insertion brought us just the right party for the place.

Yours truly,
HENRY S. DAWSON,
33 Woodland Rd., Auburndale, Mass.

HORTICULTURE:

Stop my adv. in your paper. I have secured a position. Many offers.

Flower Market Reports

(Continued from page 803)

Market overcrowded ST. LOUIS and prices down on everything. Roses especially are plentiful. Carnations also are too many for the demand. Enchantress is supreme and this variety has the call with the buyers at all times. Sweet peas have sold well but the supply is excessive. Peonies are coming in fine now at \$5 per 100 for choice. Cape jessamine buds, outdoor stock, sell at \$1.00 to \$2.00 per 100 with little demand.

The heavy frost of May 12 created havoc with the outdoor stock with the result that little of this is now coming into the local market from nearby points. The frost was the most severe experienced here in years and the growers were unprepared for it for the reason that the frost is usually out of the ground and the farmers start their planting on May 10. In addition to this, considerable trouble is being experienced from thrips which infests the American Beauties and which is damaging the stock to an alarming extent, and something has happened to the peony crop. The latter is likewise effected by some disease which prevents the development of the buds. The Mothers' Day business this year more than doubled the volume done in 1912 and it is expected that next year will break all records. The fact that many of the stores did not jump carnation prices on this day has added much to its popularity. Five cents per bloom was the prevailing price.

PUBLIC HEARING ON THE GYPSY MOTH AND BROWN-TAIL MOTH.

The Secretary of Agriculture announces that he deems it necessary, in order to prevent the distribution of the gypsy moth and the brown-tail moth into sections of the United States outside of the New England States, to extend the present quarantine lines in New England beyond those indicated in Notice of Quarantine No. 4, to cover the extension, during the year, of the known range of these two insects.

In compliance with section 8 of the Plant Quarantine Act of August 20, 1912, a public hearing will be held at the Department of Agriculture, Washington, D. C., at 10 o'clock A. M., June 12, 1913, in order that all persons interested in the extension of these quarantine lines may be heard.

PUBLICATIONS RECEIVED.

The Tennessee State Board of Entomology has just published Vol. 1, No. 4, of the Eighth Annual Report of the State Entomologist and Plant Pathologist for 1912. It contains much valuable information concerning insect pests and their extermination. Bulletin No. 8, Vol. II, No. 1, devoted to the San Jose Scale and Bulletin No. 10, Vol. II, No. 3, concerning the preparation and use of Spray Formulas, are also received. Copies may be obtained from Prof. G. M. Bentley, Knoxville, Tenn.

The Origin and History of Our Garden Vegetables—This very interesting topic to which is added some useful

LEMON OIL CO.'S STANDARD SOLUBLE INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

The Recognized Standard Insecticide.

Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart, \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart, \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

A new nicotine preparation is, for the first time, offered in the advertising columns of this paper. The manufacturers tell us that "Nikotiana" is not unlike the other nicotine preparations now on the market, excepting its difference in percentage of strength: the others being all very similar as to their concentrated form it seemed desirable that a more diluted form of nicotine at a popular price, while at the same time equally as economical as the higher priced products, would find an excellent market among the florists. The several other preparations put out by The Aphine Manufacturing Company have justified the claims of the manufacturers as to their efficacy and we look for an equally gratifying result with this new specialty.

Julius Chevalley, Blue Point, Long Island Is Another Grower Who Believes In Wide Houses And Tells Just Why They Are Good

"THIS big 72 foot house is, I think, practically perfect. Plenty of light and few columns, a pleasure to work in.

The rack and pinion chain operated vent-gear is every way satisfactory. Three hundred and sixty feet of sash operated from one spot. It works so easily—there's no inclination to 'let her go, guess that's enough air.'

Wide houses are the ones for me.

They not only keep an even temperature, due to the large volume

of air, but there is no 'down draft' of cold air to chill the plants.

The crops of carnations I've cut this year have strongly convinced me that the wide house is the house—and this L. & B. 'Iron Framer' is the most practical wide house I've yet seen."

GERANIUMS

The report comes from all sections that Geraniums are more in demand this season than ever and that all good stock will be cleaned up. We have an excellent lot of young stock ready to ship out if you wish to grow your own stock for another season, but why bother with it, as we make it our business to provide your stock for you, to be shipped anytime in the fall or winter, you have the room, after Chrysanthemums or another crop has been removed. Our stock houses of Standard sorts alone as now planted contains 300,000 plants as pretty as you ever saw. Then we have Novelty stock, Ivy Leaved sorts, Scented and Variegated varieties to the extent that we are confident we can take care of any order you may place with us. Think it over. Can you afford to bother with the stock yourself for \$18.50 per 1000, for 2-in. plants?

SCARLET BEDDER. We have bought of Elmer D. Smith & Co., stock of this superior Scarlet Geranium and offer good strong plants from 3-in. pots for immediate shipment at \$1.50 per doz., \$10.00 per 100.

SMILAX: 2-in., \$2.00 per 100, \$17.50 per 1000.

COLEUS, ALTERNANTHERAS and other **BEDDING PLANTS.**

CANNAS: 3-in. pot, good sorts, \$3.00 per 100, \$25.00 per 1000; King Humbert, \$5.00 per 100, \$40.00 per 1000

WHEN GRANDMOTHER MADE BREAD

she always used the same flour, the same yeast, the same method of preparation and the same stove. She used the best materials and her best efforts, but in spite of everything she could do, sometimes the bread did not come up to standard. She never knew why, and just considered it as luck. Now florists have about the same experience with lily bulbs. The same bulbs, and the same methods, apparently, and still they don't come right. That's according to the law of general averages. If every bulb flowered right, there would be no profit in the business, for there is never profit without risk. What florists want in lily bulbs is the very best quality at reasonable prices. This minimizes the risk and brings up the general average. There is no brand known that will equal Horseshoe Brand for a general average test—simply because they come from the very best lily bulb fields in the World. Prices very reasonable—Send for a catalogue.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Asparagus plumosus

The green question is, with many of us, an important one during the winter months. Now is the time for renewing beds or to give those that are to be carried over a good top-dressing of cow manure and soil with a sprinkling of bone meal. When making new beds give plenty of headroom—at least 12 feet. The beds or benches should be prepared as soon as possible. Above all things see that they have a generous soil to grow in. A good compost is fibrous loam two parts, and manure one part. Before planting see that the balls are moist for it never pays to plant a dry asparagus. Set them about fifteen inches apart each way and firm well. It is well to leave a small depression around each plant to hold the water. Keep them moist around the plant until the roots begin to spread out when the whole soil can be watered. Syringe frequently during favorable weather.

Bouvardias

Bouvardias should now be planted out. Give the plants a nice mellow soil; a sandy loam is ideal. When planted in such the plants will lift in September with a lot of fine roots which is what you want to be sure of for they are very sensitive in this respect. Do not crowd the plants. They should have at least 15 inches between the rows and a foot in the rows in order to do well. Cultivating should be done every week during the growing season, to keep the soil mellow and especially during dry weather to keep the moisture in the soil. To make the plants husky they should be pinched back two or three times during their stay out in the field. If wanted in flower for the holidays don't pinch any after the middle of August and lift by the first week in September. See that they get a good watering after being planted out. When the hot and dry weather comes don't allow them to suffer from want of water. There is certainly an increasing demand for these old favorites. There was a time when they were to be found in every greenhouse.

Care of Amaryllises

Now that the flowering season is over these bulbs will need attention. If a fine crop of spikes is desired next winter and spring they must have the best of attention all through the summer. They should be placed in a cold frame and if plunged to the brims in old manure or leaves the plants will not require frequent waterings, even in the hottest weather, and then plunged plants always produce much bigger bulbs than the unplunged ones. Give sash protection over them all summer, shading a little from direct sunlight. Leave the sashes tilted up, both top and bottom; all the time. A syringing two or three times a day will be appreciated. See that they are carefully watered as they should be kept growing all summer; don't dry them off until the fall.

The young seedlings that were planted early in the year should be kept potted as they may require it. These will form quite nice bulbs by fall which should flower good the third year. They can be increased by offsets which can be removed from the old bulbs just after the flowering or when you start the bulbs into active growth.

Ericas

Ericas that were headed back into shape will now need to be repotted. Those which become pot-bound should be given larger pots and some new soil to work through. Care should be taken to provide a suitable compost. They will not endure a soil that is too retentive of moisture. See that they have clean pots and plenty of clean crocks to insure good drainage. A compost to their liking is new turf-like fibery soil two parts, fibery peat two parts and enough silver sand so the water will pass through freely. These newly potted plants can be plunged out in some place convenient to water and by giving care and attention they will make good headway by the first week in September. Water at the roots so they will be kept in uniform state of moisture, never either dry or over-saturated.

Feeding Orchids

There has been much difference of opinion among cultivators with regard to the advantages of employing liquid stimulants to increase the strength and vigor of orchids. It has now become well known that judicious feeding applied with care from now on will give these plants renewed vigor. All such terrestrial orchids as cymbidiums, cypripediums, calanthes, pleiones, phaius, etc., will benefit in foliage and flower from a weak application of liquid manure water; that is, where they have plenty of working roots. For epiphytal orchids the Cookson formula would be better. This can be made with potassium nitrate three ounces and ammonia phosphate two ounces. Mix well together and place in a three-gallon jar of water. When applying use one ounce of this solution to a gallon of water about every ten days.

Planting Asters

Those who grow quite a few asters will be planting them out right along now. Do not fail to give the ground a little extra preparation, to insure better bloom and finer stems. When they are planted sow wood ashes at the rate of about 30 bushels to the acre and when about half-grown scatter some guano or any good fertilizer, using about 100 to 200 pounds to the acre. Keep up cultivation at least once a week. To keep the beetle in check spray the plants once they have become established every two weeks with a teaspoonful of paris green to a pail of water.

Mr. Farrell's next notes will be on the following: Adiantums; Compost for Bench Crops; Gardenias; Planting Smilax; Resting Callas; Sweet Peas.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Mid-Season Melons

The head line of this note could easily be criticised and with some truth, as the term "mid season" applied to a fruit which is always in season is a misnomer, yet, although it can be grown and fruited the whole year round not all gardeners have the facilities at their disposal to do so. The spring rush will soon be over; bedding stock and early vegetables are now in their permanent quarters, which often makes it possible to grow melons through the summer months or to put in an extra house or two. Any variety will grow to its best during the next few months. Seeds sown now will carry ripe fruits in fourteen weeks or possibly a little less, which brings us into September. A house can be made to last for a month or rushed through in a couple of weeks. This should be borne in mind when sowing. Those who grow melons regularly have their own particular favorites, together with their own seedlings. With us Superlative (one of the best flavored and always reliable melons), His Eminence, Royal Jubilee and Sutton's Perfection are grown most extensively. Perfection is fine during the summer months but it is not such a vigorous grower as the others, consequently is not used for early spring or late fall work. Sutton's Emerald Gem should certainly be included if the crop is to cover as long a period as possible. Ringleader, very similar to Royal Jubilee, we find blisters with the hot sun and does not surpass the latter in flavor, so it loses its place on that account although it sets very freely. King George, one of the newer ones has yet to be tested to ascertain its flavor qualities. It sets very freely.

Figs

Continue to feed trees growing in pots or tubs and otherwise treat them well and they will repay you. A mulching of half-decayed cow manure will be of great assistance to them; the roots will come into it at once, making feeding so much easier. Pack the fruits when ripe similarly to peaches. They will be found a difficult thing to pack satisfactorily owing to the fact that they require to be quite ripe before eating. Many a lover of fruit has discarded the green fig on account of having the first one not properly ripe. A fig must be ripe to taste good. To the writer the fig has a delicacy and sweetness not to be found in any other fruit.

Pot Vines

Pot vines for next year's work must receive good attention to get the very best constitution into them before fall. Having now filled out the fourteen-inch pots with roots they ought to get a little feed. Give it to them now, a little weak to commence with and gradually work it up. It is a mistake to keep them until nearly fall when the wood is commencing to get hard and then try to feed, thinking it will make no great difference to them. Do it now while the wood is soft and growing. Presuming the sub-laterals were stopped at the first leaf and the vine itself restricted to the required length of the house they are to be grown in, do not allow any

more growth on the canes; rub it off before it gets at all hard. This is making up the eyes and putting the strength where it is wanted. Keep them in a growing vinery, providing it is not shaded too heavy by the permanent vines. A young vinery growing up the first year is an ideal place for them. Do not be in a hurry to get them outside for the reason previously mentioned, of getting the wood to swell. Do not top-dress them, as it fills up the pot and leaves little room for top-dressing next spring. Canes rooted this spring and potted into tens should be encouraged to grow without restriction, which will fill out the pots with hungry-looking roots by repotting time next fall.

Strawberry Layers

To obtain the best layers for pot work a section of last year's young plants ought to be kept from fruiting this time, which will produce layers much earlier than those carrying a crop; they will also be in better shape as no feet will have been running over them from day to day. Keep them free from weeds. We find Marshall forces well at all seasons, making up nice crowns in the fall, and given proper treatment the flavor is good.

Heavy Shoulders on Grapes

Some varieties are noted for having large shoulders and would not be true specimens unless this characteristic is prominent. Gros Colman always has one large shoulder, Lady Hutt in a like manner but more length is attained by the stem which at times makes them look like twin bunches. Black Hamburgh invariably carries them, but a clean straight bunch is more desirable for appearance. If these shoulders are cut away the bunches lose considerable weight in consequence. One of the finest examples of a nice straight bunch is to be found in Muscat of Alexandria. The length of these bunches is always good and they look longer than they are, the gentle taper from top to point giving them this deceiving appearance. Gros Guillaume (Barbarossa) is a similarly shaped bunch but not near as elegant on account of the small berries. When penning a few lines on thinning I mentioned the weight-increasing device of tying up the shoulders. There always seems to be two ways of doing a thing and this case is no exception. The majority of men would make a tie or loop around the main stem of the shoulder to be tied up and run a single string up to the wire or lateral. This answers the purpose all right, but often is very difficult to get away from the bunch after cutting, concluding the bunch has filled up. It is a hard proposition to get the point of the scissors far enough in to reach the loop without injuring some berries. This is all avoided by passing the raffia underneath the stem of the shoulder and so on around the support, whatever it happens to be, making one large loop which looks like two strings. When this has to be removed one side is easily cut with scissors or knife and the whole piece draws out without leaving a trace of the valuable part it has played in the formation of the bunch.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Order

With the usual rush around Decoration Day over we once more take hold of houses and try, with all the hands at it, to put those that may have been allowed to recede just a little, back to their standard of order. If order should prevail anywhere at all, it is certainly at a florist's place. To see no system, no harmony of the men, shows poor management and means loss in the returns of the year. The planting should go on without a hitch, and the man who sees ahead, will have all the wheelbarrows fixed and in good order long before nature shows any signs of spring. With everything kept in order any job undertaken will be done easily and quickly, for "well begun is half done." Unhappy is he who waits with his sod heaps until planting time comes along. It seems bad enough as it is without stopping to put up a half dozen sod heaps.

Crimson Clover and Roses

Now is the time to plough under that patch of crimson clover that is busy storing up valuable nitrogen from the unlimited supply in the earth's atmosphere. Yes, plough it under as soon as it is in blossom and sprinkle some lime over it before the plough does its duty. This will help to decompose it and sweeten whatever acidity may be brought into the soil through the ploughing under of a green crop. Some crop could be grown on this field, but we would prefer to leave the field alone and seed it down to grass early next fall, which will assure an extra fine crop of hay the summer following, and guarantee extra fine sod for fall—sod free from all weeds, for the field should be harrowed now and then to remove all noxious growth that may spring up here and there before the grass seed is put in. What difference between sod grown to order and the common natural sod? As much difference as there is between wild flowers and the improved cultivated varieties.

As to which varieties of grass to use for the sod, let it be mostly orchard grass, which makes A-No.1 hay and excellent turf, for all purposes where such is required. The coming profitable establishments are those that will be able to produce a few by-products—same as the most successful manufacturers—turn all waste into something useful.

The Boilers

Right here is where many fail—giving but little attention to the boilers, the very minute the fire is allowed to go out. "Oh, I have had enough trouble all winter, so forget it." That is just it. The wise man will go over his boilers as critically as if he were just about to purchase them, and will mend all faults and put in any necessary repairs. Then thoroughly clean all the boilers, oil them up with fish oil, or some other cheap but efficient oil, and then they will be there to respond when he calls them to arms at the beginning of next firing season. It is a poor policy to wait until frost and then begin to repair, wiring for extra parts, shipping by express; more needless expense, and then losing hours of sleep worrying over the parts that the express company had unfortunately miscarried to the tropical regions where boilers are quite out of place. Oh, well, next year—but then we do the same thing over again.

Care of the Wires

Another thing which runs into a neat little sum—much larger in fact than many of us would suppose, is the wires that hold all those valuable roses in place. Take care of these, and remove all string, raffia, in fact, anything that may be clinging to them, before finally coiling them up neatly to put them away until they are needed again next fall. See that they are free from snags and other defects, caused by careless handling. Then do to them same as the boilers, oil the wire coils by dipping them into the oil. You will be surprised how far a gallon of oil will go, and the oil that is (?) in the can under the faucet of your barrel of auto oil, is the very thing. It is surprising how much oil can be saved by keeping some can under the faucet, a few drops at a time, but it means a pint or more every now and then, and there are only eight pints to a gallon.

The Pots

Under the bench is not the proper place for pots, unless it is the potting bench, and then they should never be put under the potting bench unless they are clean, and clean they should be. Better stack them up where they are to be washed, and make sure they are under cover from the hot rays of the sun. The sun will harden the pots too much, and it is not good for the pots to be too hard and brittle. A good pot should be porous and absorb water, which is a very important feature in pots.

The florists'
great day

It is very likely that some of our subscribers who have been accustomed to receive HORTICULTURE on Saturday may not get the present issue until Monday.

This is explained by the coming of Memorial Day on our usual mailing day. Our best wish for all, however, is that they may do so much business on this greatest of all floral holidays that they will have neither time nor ambition to read papers until after a day or two of good substantial rest. As a general proposition the outlook for Memorial Day business is uncommonly good, for the weather is cool, all flower stock is in the best of condition for use and there is a sufficiency so that the buying public can get all they want without any increase in price.

Flaws
in parcel post

The letter published on the seed trade page of this issue, in reference to parcel post inconsistencies, is worth reading and the facts therein brought to notice are worth knowing. We do not suppose that the authors of the law as it stands intended it should work out in this contradictory manner and probably, in due time, if brought to the attention of the proper parties the inconsistencies complained of will be eliminated. The matter will, we presume, be taken up for consideration by the American Seed Trade Association at its annual convention in June as many of the members of that body feel that the present arrangements of the parcel post system, insofar as they affect the seed trade, are not as practical as they might be.

Convention
innovations

The preliminary program for the Minneapolis Convention of the Society of American Florists next August, which we present this week, discloses some noticeable new departures. The reading of papers, heretofore occupying an important place in the proceedings, is, for the first time in the Society's history, omitted. We presume, however, that the programs of the auxiliary societies, which have been allotted a considerable portion of the Convention's time, will contain more or less of this time-honored feature and that those members who have a desire to listen to or participate in debates on cultural or philosophical topics will there find abundant opportunity. The innovation impresses us as an excellent one for many reasons and well worth trying out. Another break from old-time customs is the shifting of all "sporting events" to Saturday, thus officially constituting a full five days' Convention. We think this arrangement will also meet with general approval. There are some other things in the program regarding which we may have something to say later on.

Light

Everyone engaged in the raising of crops under glass should attentively read the very conclusive contribution on the action of light in greenhouses, by Dr. George E. Stone, which appears in this issue of HORTICULTURE. Rarely has it been our privilege to present a paper so practical and instructive as this which Dr. Stone has written specially for our readers and which embodies the results and deductions reached after long continued investigation and carefully conducted series of experiments. To the man commercially engaged in the production of flowers or vege-

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Planting Out the Tender Stock

Having observed due caution in holding back these several tender subjects until settled warm weather has arrived there is nothing further to do but to get them out now as expeditiously as possible.

Tomatoes

We plant our tomatoes in rows four feet apart and three feet between plants in the row. We first drive a good stake (four to five feet long) firmly into the ground where each is to be set so that a support is ready for the plant to be tied to as quickly as it is planted. To get early results from tomatoes they should be well hardened plants with fruit set on them and in five or six-inch pots. If the soil is not already over-rich dig in a little spent mushroom bed or other well rotted manure and a handful of bonemeal around each plant. See that the plants are properly soaked with water on the morning of the day of planting out as there is nothing more detrimental to the ultimate wellfare of a plant than planting out a dry root-bound ball and, further, it is always advisable to break open the ball to some extent and spread on the roots even at the risk of breaking a few.

Egg Plants and Peppers

These two popular vegetables should be planted out on a light, rich soil, with a good sprinkling of bonemeal in it. Select as sheltered a place as possible and where all the sun that shines will reach them; a distance of about two feet either way will be about right. It is sometimes advisable to put a small stake to each plant if they are fairly large when planted out as in the frames they have not been buffeted about by the winds as they are likely to be in the open, and many plants which are ultimately self-supporting are enabled to get away in root action quicker because of the friendly support of a stake.

Melons, Summer Squash, Cucumbers and Pumpkins

For reasons of cross-pollination it is advisable to keep these various kinds of plants a little apart. They are all sun and heat-loving subjects and should be planted on small mounds of soil with some coarse manure underneath. The melons will be at this time, nice plants started in the hot-beds or greenhouses, while the others can be started now by planting a few seed in each hill. Plant enough seed to allow for some losses, and if too many should come it is easy to thin to about three plants per hill.

Pests

While spider, greenfly (aphis), thrips and whitefly are not so general outdoors as in the greenhouses, yet they should not be left entirely out of mind by the vegetable grower. An occasional turning up of the underside of leaves and a little careful scrutiny of growing points where aphis "most do congregate" will either satisfy the grower that all is well or will enable him by a little timely application of some insecticide to ward off further trouble. Beside the pests above mentioned, slugs, wireworms, mice and even birds must all be provided against. For the slugs and wireworms dustings of soot and lime will help as preventive measures; traps and poisons for the mice, and birds are often kept away by stretching a few strings of twine over the objects of their attack.

Nitrate of Soda

This quick-acting, powerful, nitrogenous manure may be used with great advantage by the vegetable and fruit grower, if, during showery weather he will sprinkle small quantities of it around any plants which he wishes to stimulate into greater activity. But remember! none on the foliage, and small doses are the order.

tables under glass, the subject on which Dr. Stone treats is of the greatest importance, for under the strenuous present-day pressure of business competition, the factor of light conditions under which he operates may alone decide for him the fate of his enterprise, whether it is to prove a failure or a success. Dr. Stone's notes answer in an authoritative manner many of the problems that often perplex the reflective and studious cultivator and illumine the way to intelligent action and the avoidance of former costly mistakes when the serious question of new equipment presents itself.

Wanted—a friendly Agricultural Department

of seed distribution at Washington towards the seed merchants of their own country, appears to have attracted much attention in the seed trade and our course

HORTICULTURE's pertinent comment in last week's issue on the extraordinary attitude of officials in the office

in giving publicity to this unbecoming discrimination has brought out unqualified endorsement on all sides. The hostile atmosphere permeating certain circles within the Agricultural Department has long been apparent to everyone connected with the American seed trade but an avowal so frank as that to which we have called attention is very unusual. As to the Dutchmen's part in this particular case, it is but fair to say that there are bulb exporting houses in Holland, as elsewhere, whose methods in dealing with American trade are above criticism but it is nothing new to the readers of this paper that the business ethics of many of the foreign dealers has been for years a source of much justifiable resentment and proper criticism. A partial remedy for existing conditions is perhaps in the power of the American trade but its application might be much expedited if there was assurance of the sympathy and co-operation of a friendly Department at Washington. Unfortunately that is something which we don't appear to have.

NEW HAMPSHIRE AGRICULTURAL COLLEGE

Before a throng of guests and visitors, including the most famous people in educational life, in affairs of government and in social life in New England and representing many other parts of the country, New Hampshire College celebrated, Wednesday noon, May 21, 1913, the inauguration of President Edward Thomson Fairchild.

More than one thousand specially invited guests and visitors witnessed the ceremonies, which took place in the big college Armory. Arrangements for the day were complete, and special committees served as escorts for the guests from the time of their arrival until their departure from Durham, late in the day. Special train service brought in hundreds of visitors not only from New Hampshire and neighboring New England States, but from more remote parts of the country.

Just prior to the hour for the beginning of the exercises, one hundred of the most eminent guests were escorted by the student battalion in uniform to the Armory. By the time the hour had arrived for the exercises to begin, the auditorium was filled to its capacity, both the main floor and the galleries.

After a selection by the college orchestra, the ceremonies were formally opened by Hon. Warren Brown, President of the Board of Trustees, who introduced the presiding officer, Hon. George H. Bingham, Judge of the Supreme Court of New Hampshire.

Formal greetings were then offered by Hon. Samuel D. Felker, Governor of New Hampshire, on behalf of the State of New Hampshire. Following this, greetings were extended from Dartmouth College, by President Ernest F. Nichols; from the West by President H. J. Waters, of the Kansas State Agricultural College; from the educators of Kansas by President Joseph H. Hill, of the Kansas State Normal Schools; and from the National Educational Association by President Charles H. Keyes.

Representing the Board of Trustees, Hon. H. L. Boutwell then formally presented the charter of New Hampshire College to President-elect Fairchild. Alluding to the opportunities before and the responsibilities incumbent on the Land Grant Colleges, the speaker outlined the supreme qualities that a president must possess, and paid a deserved tribute to the President-elect.

The presiding officer then introduced President William O. Thompson, of Ohio State University, who delivered a masterful address. The message that he brought was scholarly, simple, direct and forceful.

Abstract of Address of President Thompson.

The inaugural address of President Fairchild followed. He spoke in part as follows:

The colleges of Agriculture and Mechanic Arts have at last come into their own. Fifty years ago, when they first came upon the educational stage, these remarkable institutions gave little promise of their present usefulness. There was then no real science of agriculture and but the beginnings of modern engineering. The studies that were taught were half classical and half vague attempts in an

untried field. The "farmer professors" had little standing either in science or in practice.

The years that followed were a period of development. Scientific knowledge in the field of agriculture and in that of mechanic arts grew rapidly. Special training for instructors became not only possible but essential. The more active and intelligent farmers began to see the possibilities in the movement. Application of the principles taught brought marked returns and served to establish the new science on a sound and firm practical basis.

Within the last dozen years the growth of the movement has been phenomenal. The confidence of the public in the material and educational value of these institutions has been definitely established for all time. The economic returns rendered by these colleges and their graduates have reached a value representing untold millions.

Twenty-five years ago there was added to the agricultural colleges the Experiment

EDWARD THOMSON FAIRCHILD
President New Hampshire College of
Agriculture and Mechanic Arts.

Station. These agencies, equipped with thoroughly trained investigators, have been of enormous service.

Within the last half dozen years still another marvelous development has come about; the new extension work. Through this latest movement a direct connection has finally been established between the college and experiment station on the one hand and the home and farm on the other. The college has been placed on wheels and rendered available for all the people.

Here at New Hampshire College the extension department, although started only two years ago, has accomplished far-reaching results and has made a place for itself in the hearts and confidence of the citizens of the state. It has issued more than two score concise informative publications, dealing with the fundamental factors concerned with farm life of New Hampshire; it is conducting farm surveys; it is carrying on co-operative fertilizer experiments; it is giving demonstration work of the most practical character and of the greatest value; it has made available reading courses on various topics relating to agriculture.

There is abundant need for this sort of work. This country is confronted with a new problem in agriculture. Our struggle for existence can no longer find relief by occupation of vast new and unused agricultural land, but must work out its salvation upon an ever-narrowing area—narrowing because it cannot be expanded in physical terms to accommodate our increasing population. There are 6,000,000 fewer cattle in this country than there were 10 years ago, but there are 12,000,000 more people wanting to eat beef. Our exports of agricultural products are diminishing to the vanishing point. In the next half century we must double our agricultural production. But we must do it with

the same acres that we now use, combined with a skilful elimination of waste in the marketing and consumption of our products.

All this demands the highest attainments of scientific knowledge combined with the highest form of business intelligence. The vast array of intricate problems must be solved.

By a singular Providence the study of the facts upon which these questions rest, has been pursued for half a century. It is to the agricultural colleges and their graduates that this country must now turn for advice and for help. Here and today the agricultural college is to find the amplest justification for its existence.

In past years the activities of our agricultural colleges and experiment stations have been arranged chiefly to provide a college course that would train experts in agriculture, in arts and in engineering, and to discover the basic facts in agriculture and related science. But we have seen a newer conception of the function and possibilities of these magnificent colleges. Through the initiative of the General Education Board, and through the inspiring example of Dr. Seaman A. Knapp, a splendid new plan was devised of bringing home to the farm itself the knowledge acquired in scientific study. First, instituted in the southern states, this movement is now about to assume still larger proportions in the fulfillment of the plans of the new Secretary of Agriculture and in co-operation with the agricultural colleges. A fully organized rural organization service, under the directorship of Dr. T. N. Carver, will study marketing, rural credit and co-operative buying and selling, and will establish demonstrations in each of these for the purpose of study and illustration. In this state, as in others, the State Agricultural College can assume a leadership in the rural life of the State, which will help in a remarkable degree to develop the state's greatest natural source of wealth, its farms.

But the modern college, however diversified its activities, must always devote itself primarily to the education of the youth. Its first obligation is to its student body.

Recognizing this mission, New Hampshire's College offers to the youth of the State adequate, practical and well-grounded courses in agriculture and related subjects.

It should be remembered that this college is not in competition with any other educational institution. We are simply co-workers in the education field. Our appeal is to that large body of youth who have not time, opportunity, or the desire for the particular training of other colleges.

The students of this college have at all times commanded my admiration and respect. This, because their social activities are clean, because they maintain modest standards of living and of dress, because the majority are self-supporting in whole or in part, and because they are thoroughly democratic.

A college is a public trust. It must be administered so as to serve the highest interests of all. It is not an institution for a few of the youth of a few of the people. Its task is to offer the greatest opportunity to all the youth of all the people. This is the call of the twentieth century.

At the conclusion of Dr. Fairchild's address occurred the conferring of honorary degrees.

A BIG PEONY EXHIBITION.

The Peony Show, to be held in Cleveland, Ohio, on June 12, 13 and 14, as announced in our advertising columns this week, will be the joint production of the American Peony Society and the Ohio Horticultural Society. An alliance of this character is always productive of good results and we believe the people of Cleveland will so appreciate their opportunity that no peony grower can afford to stay away. Write to the secretary, J. N. Stockwell, Room 218, City Hall, Cleveland, Ohio, and get a copy of the premium list which, we understand, is a very liberal one.

LIGHT IN GREENHOUSES

The evolution of the modern greenhouse from the older types has resulted in a marked change in greenhouse management which has brought about the use of larger glass and larger houses, and a relative decrease in the size of the framework, or anything tending to produce shade, made possible by the introduction of iron. As a consequence of this improvement in greenhouse construction crops are grown better and more cheaply, for in these large, well-lighted houses they are less exposed to sudden changes and are consequently less susceptible to disease.

There is no factor associated with the construction and management of the greenhouse which does not possess a bearing on crop production. Heat, light and moisture are especially important, and the size and direction of the house, amount of air space, system of ventilation, size, quality and angle of the glass, purloins, posts, etc., are also important, as are air and soil moisture and the physical, chemical and biological features of the soil.

Practically 95 per cent of the various substances which make up the plant are derived from the atmosphere through the chemical action of light on the green coloring matter or chlorophyll bodies, primarily located in the leaves. This process is termed carbon assimilation or photosynthesis, and consists in the taking in of carbonic acid and the exhalation of oxygen. Artificial light affects plants in proportion to its intensity and nature of its rays, and since it differs from sunlight very materially, it cannot be substituted for sunlight to good advantage unless some of the more objectionable rays are screened out.

Plants make the most growth in the night or in darkness, and the least in the daytime. Although light has a marked inhibitory effect on growth, it favors the development of mechanical or supportive tissue, which is able to resist disease. Lack of light induces the formation of weak tissue by restricting its development, and many plants are rendered more immune to attacks from saprophytic and parasitic fungi by exposure to proper light conditions.

For some years we have been making investigations on the relative value of morning and afternoon light, together with a study of the light in greenhouses and out-of-doors and its relation to plants and their diseases. In these experiments we have used many methods for determining light intensity which it is not necessary to discuss here. There are several methods which may be employed to determine the influence of light on plant growth and the relative value of morning and afternoon light. The differences in light intensity are not uniform from day to day, from month to month or from year to year, the difference being greater some months than others. Daily observations in the greenhouse covering a whole year at corresponding periods, viz., from 9 A. M. to 12 M., and from 12 M. to 3 P. M., showed a difference of 10 per cent in

favor of the morning light, and those made in the open air from sunrise to noon and from noon to sunset showed practically the same difference. The greatest difference was shown in the months of November and December, the former giving a difference of 20 per cent and December a difference of 27 per cent. These records were obtained by the chemical method; i. e., by exposing solutions sensitive to light and carefully determining by titration the amount of decomposition. The results obtained by tabulating the yield of cucumbers in houses running north and south, where the crops on the east side shaded those on the west in the morning, and those on the west shaded those on the east in the afternoon—showed a difference of 15 to 30 per cent in favor of the east side plants, due to the fact that those obtained more light. These percentages are not too high for short periods, since very often the light is 30 per cent more intense in the morning than in the afternoon. Data obtained from the measurements of the radii of tree stumps, some of which were 200 years old, showed a difference of 17 per cent, which is undoubtedly the most reliable average obtainable.

Investigations relating to the amount of light excluded by glass and shadow-casting material showed that this may vary from 13 per cent to 36 per cent or more, depending on the quality and condition of the glass, and other factors. It was found that second-quality glass transmits 18 per cent less light than first quality, that third quality transmits 33 per cent less than first quality and 15 per cent less than second quality.

The deterioration of the glass per annum is probably considerably less than 1 per cent. In one test, where a comparison was made of a house one year old and of one thirty years old, there was a difference of 8 per cent in the light transmitting properties, and in another instance there was a difference of 13 per cent between new and old glass which was dirty and had been in use many years.

The light transmitting properties of high roofs were found to be greater than those of flat roofs, one observation made February 8th showing a difference of 18 per cent in the light transmitting properties of roofs with angles of 32 degrees and 45 degrees, respectively.

Of the various reflecting surfaces experimented with, aluminum bronze was found to be the best, followed by white paint and dull black. Aluminum bronze reflected about 12 per cent more light than white paint.

Our experiments showed that the sky is an important factor in the reflection of light. Tests made to compare the light from the sky with diffused light, etc., showed considerable difference in favor of the light from the sky. The experiments also proved that considerable light is reflected from snow, for, where the reflected light from snow was excluded from our recording apparatus, the light intensity was materially decreased.

The loss of light from lapping glass was found to be about 11 per cent.

Numerous tests of the light intensity at different distances from the roof show that there is hardly any difference between five or thirty feet from the roof, although just under the glass, owing to irregularities of the surface, the intensity is modified. Tests of a large number of houses here and there have shown that as a rule the older the house, the less light it transmits. The best light is obtained in houses with large glass and light frames containing the least possible amount of shadow-casting material. The curvilinear type of construction gives the best results in this respect.

A house glazed with 24 x 24, 20 x 30, or 16 x 24-inch glass, placed lengthwise, obtains better light than one having sashbars close together or smaller glass.

Double glazing, which is still found in some sections, is impractical from all points of view, dust and moisture being collected between the two layers, often making the light very poor. In the old, primitive sashbar houses in which small, inferior glass was used, so much light was shut out that it required much longer to mature crops than it does nowadays. The tendency in modern houses to use better quality, larger glass, and less shadow-casting material, has proved most valuable. In some sections third quality glass is used, but we do not consider it a wise investment, especially in the North, where the light is inferior to that in the South.

Since morning light is better than afternoon, greenhouses running East and West should be placed from 15 to 30 degrees North of East to obtain the superior morning light. Less risk is run also in syringing the plants in these houses. We believe that East-and-West houses are better adapted for growing certain crops than North-and-South houses. The methods of trellising certain crops could also be changed to get better light exposure. A few days of cloudy weather often hold a crop back and prevent its maturing when the market is at its best. Even under good weather conditions many of our crops do not obtain sufficient light during the season of short days, and anything of a practical nature to better the light is worthy of attention.

Many greenhouse operators do not realize the full significance of the effect of light on the development of crops. There is a close relationship between light intensity and carbon assimilation in foliage and also between carbon assimilation and growth. The optimum light conditions for carbon assimilation vary in different crops. Palms, ferns, etc., require less light than cucumbers, and in some cases outdoor crops probably receive more light in summer than they require, but most of our economic plants grown under glass do not receive sufficient light during the shorter days of the year to make maximum growth.

GEORGE E. STONE.

Amherst, Mass.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

The following is the preliminary program of the twenty-ninth annual meeting and exhibition to be held in the National Guards Armory, Minneapolis, Minn., August 19th, 20th, 21st and 22nd, 1913. The program for the sports is not yet complete. The list of events, etc., will be included in the program when it is mailed to the members at a later date.

It will be necessary to have the 1913 button for admission to the hall and meetings. This button has been sent to all members who are in good standing. It will save time and confusion at the convention and facilitate the work in the Secretary's office very much, if members who are in arrears will remit their 1913 assessment promptly to the Secretary, upon receipt of which the 1913 button will be sent to them.

The floor plans showing available spaces in the Trade Exhibition, are now in the hands of the printer and will be mailed within a week. Inquiries are arriving at the Secretary's office from all sections of the country, which shows the widespread interest that is being taken in this convention, which undoubtedly will be one of the most successful in the history of the Society. Exhibitors desiring space in the Outdoor Planting Exhibition should take the matter up at once and communicate with the undersigned, who is Superintendent of the Trade Exhibition, or write directly to Theo. Wirth, Court House, Minneapolis, Minn., the Vice-President of the Society, who is making strenuous efforts to make this Outdoor Planting Exhibition one of the great features of the convention.

Tuesday, August 19th.

First Day—Opening Session.

2 P. M.—Opening Exercises; Address of Welcome; President's Address; Reports of Officers; Selection of Meeting Place for 1914.

Evening Session.

8 P. M.—President's Reception; Balloting for Meeting Place for 1914.

Wednesday, August 20th.

Second Day—Morning Session.

9 A. M.—Meeting of the American Rose Society.

10 A. M.—Meeting of the American Sweet Pea Society; Morning Session of S. A. F.; Report of Tariff and Legislative Committee; Discussion; Nominations for Officers for 1914; Reports of State Vice-Presidents.

Afternoon Session.

3 P. M.—Report of the National Flower Show Committee by Chairman Charles H.

MINNEAPOLIS PARK SYSTEM

Floral Parterre at Loring Park.

Totty; Discussion; Report of School Garden Committee; Report of Judges of Trade Exhibit.

Evening Session.

8 P. M.—Stereopticon Lecture by Theo. Wirth, "Parks and Boulevards of Minneapolis."

Thursday, August 21st.

Third Day—Morning.

9 A. M.—Meeting of the American Carnation Society.

10:30 A. M.—Meeting of the American Gladiolus Society.

10 A. M. to 12 M.—Polls Open for Election of Officers.

Evening.

8 P. M.—Reception of the Ladies' S. A. F.

Friday, August 22nd.

Fourth Day—Morning.

9 A. M.—Meeting of the American Chrysanthemum Society; Session of S. F. A.; Report of Chairman of Publicity Committee; Discussion and Action on the Following Recommendation of the Board of Directors: "Resolved, That it is the sense of the Board of Directors that some action be taken by the Society whereby exhibits of artificial flowers at our Trade Exhibits and Flower Shows, be excluded."

Saturday, August 23rd.

Fifth Day.

The delegates will be taken for an outing at Lake Minnetonka as the guests of the Minneapolis Florists, where all the

other sporting events and games will take place.

JOHN YOUNG, Secretary.

LADIES' SOCIETY OF AMERICAN FLORISTS' PROGRAM.

Tuesday, August 19th.

First Day.

Reception and Dancing at Hotel Radisson.
8 P. M.—Reception.

Wednesday, August 20th.

Second Day.

Annual Meeting at the Convention Hall; auto trip around the City of Minneapolis, with luncheon at Minikahda Club.

Evening—Open.

Thursday, August 21st.

Third Day.

10 A. M.—Ladies' Bowling.
Afternoon—Open.

Evening.

8 P. M.—Reception at Hotel Radisson.
9:30 P. M.—Dancing.

Friday, August 22nd.

Fourth Day.

Visit to St. Paul as the guests of the St. Paul Florists.

Evening.

Special Concert at Lake Harriet.

ADVERTISING TALKS—By RALPH M. WARD—No. 12

This is the last of a series of twelve Advertising Talks. The writer could go on indefinitely citing instances, and showing how advertising is made to pay. The most useful principle in advertising is common sense, for that is the sense which the common people possess—and always cater to the common people in advertising. It's the business with the great mass

that pays best. Advertising eliminates certain competition without interfering with the Sherman Law, which compels competition and then jails the successful competitor. In the florist business today it is all a question of the survival of the fittest, and the fittest is the concern of sufficient capital, whose management has brains, energy, honesty, vision and courage—a management that has the genius of doing things and winning victories.

No management ever was successful to any degree in any business without the aid of advertising. In the florist business the writer considers the daily newspaper superior to any other medium. It is not important that the advertising rates be low—the best mediums are usually the highest in rates quite naturally. It's the results obtained figured on a percentage basis with the cost of advertising that counts. It's the greatest and most successful game that was ever played—try it.

Wholesale and Retail Florists

You both will profit by using McCray Refrigerators. Don't cut down prices because of spoilage. Stop the spoilage. Our patented refrigeration will keep your stock fresh because of the perfect circulation of cold, dry air.

McCray Refrigerators

Are made not only in stock sizes but are built-to-order to suit your requirements. Write to-day for our Free Catalog No. 73 which will give you ideas to help you add to the attractiveness of your establishment.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB FIELD DAY.

A full account of the visit of the Gardeners' and Florists' Club of Boston to W. H. Elliott's rose houses was given in our issue of May 24. The photograph of the group was not finished in time so we present it herewith. We might mention that the water for this establishment is pumped from a well 460 feet deep by a gasoline engine and the same engine also drives a three-cylinder pump for forcing the manure water through the same pipes. Among other things which are rather unusual as done here is the planting out of the young rose stock in the beds after they have outgrown the 2½ in. pots instead of repotting in larger pots. The plants are set 5 in. by 5 in. in the beds and grown along until ready for planting in the permanent beds. Many were interested in the process whereby an old farm barn has been remodeled, made

tight, sanitary and attractive with small expense. Strips of 2 in. by 2 in. material were first nailed to the outside of the barn and metal lathing attached to this. The whole was then covered with stucco. The interior of the cow stables was treated the same way except that the outside coat was a smooth, hard finish.

LANCASTER COUNTY FLORISTS' CLUB.

At its regular meeting this club had a paper by Mr. Beyer of La Park, Pa., on "Bedding Plants and Their Culture." The paper was well received and afterward Mr. Nagle gave a very interesting talk on his experiences in southern France, which were both horticultural and poetic, with a little of Monte Carlo mixed between.

Mr. Rosnosky, representing the H. F. Michell Co., who was with us, expressed surprise at the number of members present and told of the good times that are coming.

The picnic committee reported hav-

ing made arrangements at Hershey's where there is a picnic park over two miles in length with all the requisites for a good time, and as we will be partly the guests of Mr. Hershey and taken through his estate and the chocolate works, it will be quite an affair. Any florist between the Arctic Circle and the Antarctic snow-capped hills is welcome to come with us—July 14th or 15th; date announced later.

The president appointed Harry Rohrer, Chas. B. Herr, Jacob Flear and others as a serving committee and refreshments were served and a general social time indulged in for several hours.

ALBERT M. HERR.

CLUB AND SOCIETY NOTES.

The Engelmann Botanical Club will meet on Saturday, June 7th, at 3 P. M. at Shaw's Garden, St. Louis.

The annual Peony and Rhododendron Exhibition of the Massachusetts Horticultural Society will be held at Boston on June 7th and 8th.

The St. Louis County Plant and Flower Growers' Association holds its regular monthly meeting at the Eleven Mile House in Kirkwood next Wednesday, June 4th, at 8 P. M.

At the New York Florists' Club meeting, June 9th, there will be an address by A. Farenwald, on "Affiliation," and a program of instrumental music by the Thos. A. Edison Co.

The regular meeting of the Albany Florists' Club will be held on June 5th at the Albany Cut Flower Exchange. Important business is to be brought up and a good attendance is urged.

The St. Louis Florist Club meets on Thursday afternoon, June 12th, at Shaw's Garden. Secretary Beneke is out with impressive postals to the

Gardeners' and Florists' Club of Boston, Field Day, at Malbury, N. H.

members urging them to attend and a large gathering is expected.

Several new members were elected at the regular meeting of the Gardeners' and Florists' Club of Baltimore last Monday night. Prof. T. B. Symons of College Park, Md. was present and invited the Club to attend the Farmers' Convention to be held at College Park under the auspices of the Maryland Agricultural College and Experiment Station, May 30. He also invited the Club to attend the annual outing of the State Horticultural Society on July 31st, at Berlin, Md. The Society is to be entertained by Mr. Orlando Harrison, who will also entertain the Peninsula Horticultural Society of Delaware at same time. The Club decided to hold their regular annual outing on August 5, at Chesapeake Beach. The Washington florists will hold their annual outing the same date and place. It is expected some interesting games and events will be arranged by the two clubs.

HYDRANGEA DENTELLE.

We show herewith an illustration of another of the new French hydran-

By courtesy of H. A. Davis

geas which have been among the really sensational introductions of the past season. Dentelle is a superb creamy white, deeply fringed flower. It is a splendid late-forcing variety, from Decoration Day onward.

BODDINGTON'S QUALITY GLADIOLI

America

This beautiful new Gladiolus has produced as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful flesh-pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet."

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

American Seed Trade Association.

The 31st annual convention will be held in Cleveland, Ohio, June 24-26, with headquarters at the new Hotel Statler, commencing at 10 o'clock A. M., Tuesday, June 24th.

As the Statler is Cleveland's newest hotel, it is running full most of the time, so it is urged that rooms be engaged as early as possible. Price of rooms, \$2.00 and upwards.

A cordial invitation has been extended to the members by the Storrs & Harrison Co. to be their guests on Thursday afternoon to inspect their nurseries and greenhouses.

Cleveland is advantageously situated to be easy of access to a large part of the members and the importance of the work to be considered should insure a large attendance.

Seed Trade Ethics.

Horticulture has done a courageous and needful thing in the interest of the seed trade, in publishing that evidence last week in regard to our national seed shop and its methods. A national government of 90,000,000 people is such a powerful agency that only one in a million would dare to make a cheap. The evidence indicates what has long been known, persistent hostility to an honorable American business—the seed trade. It is to be hoped that the new Secretary of Agriculture will give this matter his attention and make a clean sweep. The writer was in Providence last fall and heard a foreign representative of a grass seed house bragging that he had sold the Department at Washington their grass seeds. With the unthinking this had its affect. But as HORTICULTURE rightly mentions, the United States is a private customer and a due regard for the ethics precludes an endeavor in that direction. Those who "sell to the seed trade only," should sell to the seed trade only. To boast

of doing otherwise is to condemn themselves. Of course, those in the know, will understand all that the aforesaid anecdote reveals. Taken with the Farquhar episode, and numerous others that will occur to many, the leaf reveals the tree. I wish you would put one honorable Holland concern on record as selling to the seed trade only: Messrs. Barenbrug, Burgers & Co., grass seed specialists of Arnhem. They sell to the trade only, and consider their customers worthy of protection. There are many honorable houses in Holland, and we must not judge all by the abominable practices of a few. The world owes a lot to the genius of the Netherlands.

GEORGE C. WATSON.

Parcels Post Discrimination.

The Leonard Seed Company call our attention to the following extract from a letter received from one of their customers, to which we gladly give space:

"Incidentally it seems to me the seed and florist trade should protest against the unjust discrimination of the parcel post under present rulings. For instance, a customer from — wrote for seed sweet potatoes by parcel post. Had he applied to the grocery across the street from me, they could have been delivered by the rural carrier right to his door for 29 cents. But they were 'seeds, roots, bulbs or tubers for planting,' and would require 71 or 72 cents to go by parcel post. The express company carried them to — for 25 cents. Should one of my customers require 11 lbs. of alfalfa to feed to his canary, it could go to any point reached by our carrier for 15 cents or any point within 50 miles for 35 cents. But if this customer intends to plant the seed instead of feeding his 'bird,' it would cost him 88 cents to send either to any one on a route from this office or to the remotest corner of the United States. It certainly is a great system, but who can call it just, fair or right?"

Notes.

C. W. Scott and A. Kakuda of the Yokohama Nursery Co., are on a business trip in the South.

W. A. Sperling, who has been in Europe on business for Stumpp & Walter Co., New York, is on the Atlantic, homeward bound.

Among the New York visitors this week are: Wm. Satter, representing J. Blaauw & Co., John Radder and K. van Kleef, all of Boskoop, Holland.

Walter J. Barnwell, brother of the well-known Barnwell Bros., of Worthing, England, and for many years in

the employ of Peter Henderson & Co., has taken a position in the seed store of Burnett Bros., New York City.

The Horticultural Society of Chicago will have a Peony and Hardy Perennial Show at the Art Institute, June 12th and 13th. The premium list is still in the hands of the printer but the growers have taken a great interest in the show and there is promise that the affair will be a success. The admission fee will be 25 cents. Among the prizes offered will be gold, silver and bronze medals as well as money by the society and many individual prizes.

An inventory of the personal estate of the late Joseph Ault Bolgiano, shows that at the time of his death, on March 1 last, he owned securities worth \$630,803 and \$47,452 cash, a total of \$678,255, in addition to over \$50,000 worth of real estate. For many years Mr. Bolgiano was head of the seed firm of J. Bolgiano & Son, Baltimore, Md. His will, made February 7, 1890, gives the bulk of his estate to his children. The business is now owned and conducted by his son, Mr. Charles J. Bolgiano.

Formosa lily bulb crop will be short this year and prices tend upwards. Dealers have already accepted orders for more than they are going to be able to supply. The crop has been re-

duced about 40 per cent, for no other reason apparently than that the producers are not properly organized and have no comprehensive idea of the business and its possibilities. Contrary to general impression, no lilies are grown in Formosa. The so-called Formosa lilies come from Oshima, where the cycas stems come from.

THE DUTCH BULB BUSINESS.

Editor HORTICULTURE,

Dear Sir:—In reference to your article in HORTICULTURE of May 24th regarding importation of Dutch bulbs by the Department of Agriculture, I have read the same carefully and I wish to commend you in this matter. I fully agree with you that if the Department of Agriculture's experience in buying from American dealers has been unsatisfactory they should not trouble us, and I do not give the Department any credit for making statements of this kind. I know that the average quality of goods delivered to the Department of Agriculture is not better than those supplied by reliable American houses. I know all reliable dealers (the same as ourselves) purchase only the best Dutch bulbs the season produces, and when the Department of Agriculture buys from the Dutch houses direct by taking the lowest quotation at hand they always receive a quality according, and the flowering result in the spring will often show substitutions.

In general, in buying direct, the Department of Agriculture will not gain any advantages over buying from reliable American dealers. They should not overlook the fact that in buying bulbs there are many technical points mostly unknown to American florists of which they would receive the benefit in buying from experienced American importers. It might be interesting to hear from the Department of Agriculture, their experiences as to truthness of flowering, etc., in buying direct from the foreign grower. The American dealer is getting very poor treatment from his Government when they give the preference to the foreign grower who does not have American labor and other high expenses to pay; besides, the Department brings them here free of duty while the dealer pays the tariff.

Could it not be so arranged that the Department would publish to the trade exclusively copies of all foreign bids made, together with the names of successful bidders?

I hope you will agitate this matter to a successful finish, and I remain

Yours very truly,
O. V. ZANGEN.

Hoboken, N. J.

UNDER THE RED FLAG.

We are told of a party in Holland who bought up and shipped to a New York auction house 200 cases of material in which roses predominated. The roses brought \$25 per 1,000, on which the auctioneer's commission was 17½ per cent. The duty on roses is \$40 per 1,000 and the freight about \$10 per 1,000, which, of course, had to be handed over in cash by the consignee before the goods could be touched. Puzzle—who pays the commission, who pays for the roses and who makes good on the other half of the duty and freight?

Israel Quint, a well-known florist of Roxbury, Mass., was arrested and fined on a charge of violating the Sunday laws by selling some carnations on Sunday, May 25. Mr. Quint appealed to the Superior Court. We presume if Mr. Quint had sold his customer a box of cigarettes he would not have been molested. Funny laws we have.

JUNE WEDDINGS.

Memorial Day has made its exit and now ranks with the has-beens of 1913. We must represent the drowning man and grasp the last straw, namely the June wedding. Some of our more fortunate brothers will have quite a few of these juicy plums, while others will have to be content with less.

When the opportunity presents itself to grasp a small wedding, take it firmly and hold it, because it may be quite a few months before you have a chance to get another. Don't let a few dollars' difference stand in the way; if you cannot do it for the price offered, there is somebody who can.

A pretty decoration, even though it may be small, is a very big advertisement for you and therefore you cannot afford to let this free advertising get away. The first question asked after entering the house or church and admiring the decoration will be: "I wonder who the florist was?" And this means a great deal for you.

The vanishing of southern smilax at this time of the year naturally makes us turn our thoughts to the woods, and it is here we find the new growth of foliage to help us out of our difficulties; where arbors are to be put up, canopies covered and such work where large sprays of green must be used effectively; and that priceless foliage we call kalmia or mountain laurel, with its heavy clusters of pink and white blossoms will surely take the place of anything we have been in the habit of using, and will give us effective results.

Picture in your mind's eye a small church decorated with this flower of the woods—(mountain laurel), palms for a background, pulpit or altar festooned with fresh oak foliage and laurel branches interspersed through the oak; bunches of laurel on the pews and aisle-posts and your work is done; the outlay being very small and the income large taking into consideration that no cut flowers were used. For its simplicity nothing could be prettier. As for house work, a mantle banked with laurel in full bloom is very effective.

From decorations we will now pass on to bridal work and see how inexpensively it can be done, and what to do it with. The bride will possibly carry lily of the valley, and there will be plenty of out-door valley to be had; the bridesmaids may carry sweet peas, of which there is always an abundance. The maid-of-honor and flower girls may carry roses of which there are always enough to be had in June. This descriptive June wedding proves how profitable a small decoration can be done, whereas the same can not be made at any other time of the year for the same money; so take advantage while you may.

MR. S. J. HEMAN.

A WINTER WINDOW BOX.

Window boxes have not yet come to their own in the appreciation of the

public or the attention which the florist should bestow upon them as a big item in their business. The arrangement which we show in our cover illustration this week is an excellent example of the possibilities of this sort of decorative plant work in the hands of a tasteful workman. The material is such as can be supplied in abundance by the wholesale plant growers all through mid-winter and spring up to April. For summer adornment the receptacle is adapted to filling with the usual assortment of trailing and blooming plants. A great variety of styles of finish, material, etc., is now at the disposal of the florist who is enterprising enough to push their sale with his customers and a good revenue may be drawn from the periodical filling with fresh plants, etc.

CHICAGO NOTES.

E. E. Peiser says he sold 20,000 dozen peonies in 36 hours, this week.

And now comes the Lillian Russell tulip, existing, at least, in the minds of the newspaper reporters and said to be a deep purple.

Another sale of plants at a department store is scheduled for the day before Memorial Day. It is a fact that at these sales plants are sold for less than cost.

Magnolia blossoms are seldom seen here in quantity, but Miss Gunterberg received a large consignment and the heavy texture of both blooms and foliage proved their shipping qualities excellent.

Some of the retail florists have their stores handsomely decorated, displaying the Stars and Stripes among the plants and flowers. It is noticeable that our foreign-born florists are leaders in this work.

Hoerber Bros.' new smokestack being built to replace the one blown down in the recent cyclone, is made of reinforced concrete and the builders guarantee it to stand up under a wind of one hundred miles velocity.

May has been remarkable for low temperature and frequent rains, which have become more extreme as the month neared its close. Low grounds are under water, and florists' stock in the fields are not benefited by it.

Zech & Mann moved to their new

location in the basement of the Atlas Block, May 26th., working all night to put things in shape for the busy days that followed. The more commodious room has been greatly needed for a long time.

Bids for the E. H. Hunt stock of florists' supplies have proved very limited in number. The books are ready for a final closing and another week is expected to see the last of the business closed up. T. T. Clark, the receiver, is the only one left.

Plants for decorative purposes are now confined to rhododendrons, hydrangeas and roses. Bedding plants have been in good demand all the month, the season opening up rather earlier than usual. There does not seem to be anything new; just the same old stand-bys.

A. Henderson Co. are now nicely settled in their new quarters at 369 River street where large, well-lighted rooms give better opportunity for handling their growing trade. Their spring business has been very good and preparations for fall trade are already under way.

Retailers are having new proof of the old saying, "It's an ill wind that blows nobody good," for the early exodus of Chicago people to their summer homes, that occurred last year, will not be repeated this season. All in the florists' business welcome any-

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET, PHILADELPHIA, PA.

thing that will shorten the dull summer season, even a cold, rainy May.

The annual automobile parade occurs on June 3rd, and it is announced as a tissue paper carnival, which comes nearer the truth than a floral automobile parade, as heretofore stated. This means of decoration is just as acceptable to the florists, as it has always been to the disadvantage of the natural flowers when both were used.

Personal.

Phil Eichling is now with Fisher Bros., Evanston, Ill.

Miss Clara Burkhart, for five years in charge of the order department of E. H. Hunt, is now with Poehlmann Bros. Co.

Miss Lillian Ytterberg leaves the office force of A. Lange's, Saturday, after a service of four and a half years. It will be hard to find another so capable and willing, but cupid is an enemy as well as a friend of florists.

Visitors: W. J. Becker, Logansport, Ind.; F. Heintz, Terre Haute, Ind.; Roger Peterson, of J. A. Peterson, Cincinnati, Ohio; A. C. Raichert, Michigan City, Ind.; Arthur Cann, San Jose, Cal.; A. Peterson, Hoopston, Ill.; A. H. Burt, Kankakee, Ill.

NEW PUBLICATIONS.

L. C. Page & Co., the Boston book publishers, have just added two more to their list of juvenile story books, both of which will meet the approval of all who believe in providing youth-

ful readers with absolutely clean and healthy entertainment in the way of literature. These books will serve to while away many a leisure vacation summer hour with pleasure and profit.

Pussy Black-face, by Marshall Saunders, is the story of a kitten and her friends. Written surely by a lover of the dumb animals; ingenious, amusing and appeals to the human and kindly sentiments in a most winning manner. Sure to be popular with the young folks. Handsomely illustrated, with frontispiece in colors. Price \$1.50.

The Sunbridge Girls at Six-Star Ranch, by Eleanor Stuart. Illustrated by Frank J. Murch. A sterling story for girls of about sixteen. Tells of the visit of a bevy of New England girls to a Texas ranch. Full of adventure and innocent frolic. Just the right kind of a gift to the girl going away for a summer rest in the country. Price \$1.50.

PERSONAL.

J. Halsey Reock, representing R. M. Ward & Co., New York, has gone on a European business trip.

Thomas B. Collie of Burnett Bros., New York, sailed May 17th for a few weeks' vacation in Scotland.

G. A. Dennison has been appointed chief of the Department of Horticulture of the Panama-Pacific Exposition.

Cincinnati visitors—J. T. Heidegen, Aurora, Ind., and Mr. Donaldson, Sparta, Ky.

Boston visitors: Mr. Meehan, Dresher, Pa.; Gouverneur Morris, Aiken, S. C.; D. Cameron, representing Sander & Son, St. Albans, England; W. A. Manda, South Orange, N. J.

Flower Market Reports

BOSTON

Again we have to report the gratifying fact of a record-breaking Memorial Day for the florist trade of Boston and, in fact, entire New England. Cool, rainy weather has kept the supply down to a reasonable limit and the slump which otherwise might have developed into a stampede on the last day before the holiday has been escaped. There is an abundance of all kinds of material but not an unwieldy surplus and one good result of weather conditions is the high quality of everything offered. Carnations are the sole item which realized any enhanced value in the wholesale market and these maintained their lead very well until the close. Red varieties had the call and, being in short supply, they brought prices far beyond that realized for white. American Beauty roses fell by the wayside with a surprisingly light appreciation even for the medium grades. Astilbe, candytuft and stocks were too abundant. A few peonies from Pennsylvania sold well.

BUFFALO

Trade has continued fairly good the past ten days. The greenhouse men and cemetery florists are hustling to get out their work for Memorial Day, but aside from this they have a good cemetery cut-flower business on Saturdays. The wholesaler still at this writing has to contend with considerable as the express companies' strike has not been settled. Shipments are now coming through from the East and other points, and all freight has to be sent for and out-

going freight delivered to depot. Carnations have not been over-plentiful, but all other indoor and outdoor crops are in heavy supply. The outlook for Memorial Day looks promising, but a shortage in the carnation line is anticipated.

CHICAGO

Peonies have reached the point where they figure very largely in the market conditions. Quantities are coming up from the South and their condition after being in cold storage, even a short time, is hardly good enough to warrant shipping out again, and most are sold locally. The Illinois peonies are also coming now and the

quality, so far, seems to be all that could be desired and they are in great demand for shipping trade. To all appearances, Memorial Day possibilities will be limited only by the quantity of stock, which at this writing seems inadequate in all lines. None but the florists know how stock springs up from all sides when a big holiday comes, and the shortage had seemed a reality, and this year may be no exception, but the cold rainy weather and local demand has kept any from accumulation till it seems impossible to see enough stock to fill late orders. Some of the largest shippers have

Flower Market Reports

(Continued from page 837)

been refusing orders since Sunday. Carnations are decidedly scarce. A few cut-of-door snowballs, spirea, etc., are seen.

A few days of cloudy CINCINNATI and rainy weather, combined with the going off crop of some flowers and a possible holding by some florists for Memorial Day put a decided crimp in the receipts of flowers toward the end of last week and the beginning of this week. As a result on Saturday the market for the first day in several weeks cleaned up in a very satisfactory manner. This week the first few days showed a very nice business. The supply of peonies for Memorial Day is very large. The rose cut is not as large as a fortnight ago. Beauties are in good supply. The carnation glut of a fortnight ago has ended. Other staple flowers are in good quality and ample quantity. Business in green goods is good.

The weather is so that the supply of cut blooms, especially carnations, is at low ebb and difficulties to fill orders arise incessantly. Again the storeman feels the lack of supply of such plants as snapdragon, stock, moonvines, hardy phlox, etc., articles which if properly handled yield a good profit and convert many a flower lover into a steady buyer for next winter. Co-operative advertising is being tried for Decoration Day on a smaller scale than for Mothers' Day and we hope some day to make this day as important as it ought to be.

For a large part of the flower and plant trade, Memorial Day occupies attention to the exclusion of everything else this week. Nature, as usual, is a potent factor in the outlook as to supply and market value of the cut-flower product. Until this week there was some room for speculation as to the quantity and character of the available outdoor material, but now there seems no question that an enormous supply of really useful shrub and herbaceous bloom will be provided, thus checking any general advance in the value of greenhouse stock for this occasion. At present writing stiff prices are in force on carnations of acceptable quality and these are maintained in some degree by the call from the Boston wholesale shippers and from country districts remote from the principal centres of supply, but the quantity of carnations

in sight is quite large and with a generous offering of double white narcissi at \$10 a thousand and great quantities of double-flowered stocks, the outlook for local carnation demand at \$40 to \$60 per 1000 seems none too bright. Lilacs are gone, but the precocious season has replaced them with peonies and snowballs, philadelphuses and deutzia. Roses of all varieties are in full crop, judging from the wholesaler's counters from day to day. Outdoor lily of the valley is about finished and those who want lily of the valley will have to pay full prices from now on. Cattleyas are superb, but they move very slowly. The next few weeks, however, should develop a lively market for these and other high-class floral material.

PHILADELPHIA There was a falling off last week—business not

being quite so brisk as the week previous. Three days were quite dull and while Friday and Saturday were good on the lower-grade stocks, there was not enough to bring up the average. On top of that condition came a much larger influx of flowers of all kinds. The best seller on the list were probably white roses. Good sweet peas have also sold well, but there was little call for anything below first grade. Carnations are more plentiful, but are beginning to show the effect of the advancing season. The supply of American Beauty roses remains about the same. Demand is fairly good. Peonies are in excellent shape for Memorial Day work. The

late varieties seem to have pushed ahead faster than the early and medium, the latter having suffered more from the cold spell so that it is likely all will come in nearer together this year. Cattleya gigas holds the fort in the orchid market. Gardenias are not coming in so freely and what there are meet with very ready sale. Plenty of gladioli—especially of the large-flowering sorts—splendid quality.

Business last week ROCHESTER was hardly up to the standard, owing to the cold weather, but we were glad to welcome the rains, which were so badly needed. The planting of outdoor stock is in its full and everybody is busy. Cut flower stock is of excellent quality. Roses of all kinds are in fine condition. Carnations are rather slow in arriving, but their quality is improving. Peonies, which during the week made their first appearance, move rapidly. Sweet peas, lily of the valley, pansies, etc., sell at fairly good prices. Greens of all kinds are plentiful.

ST. LOUIS The market of the past week ended pretty much as the week previous, demand good but plenty of stock was left over every day and, of course, prices had to suffer. Roses are very plentiful and quality good; carnation the same. Sweet peas, too, are away too many but will soon shorten up. Gladioli and peonies are coming in heavy and the prices are down a little. Asparagus and smilax have sold well all week.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

PEONIES

Peonies. The world's greatest collection,
1200 sorts. Send for list. C. BETSCHER,
Canal Dover, O.

"PEONIES FOR PLEASURE."

This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure."

We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

Our catalogue of everything you need mailed on application. Write for it today.

Obituary.

J. R. Trumpy.

News has been received of the death of this noted horticulturist at Flushing, N. Y., on May 23, following a fall in his home which resulted in a broken thigh, as stated in a recent number of this paper. Mr. Trumpy was 83 years of age and for some time had been in failing health. His funeral on Monday was attended by a number of old gardening friends, including J. F. Huss, Samuel Parsons and Antoine Wintzer.

J. R. Trumpy was in his time the greatest hardwood propagator this country has ever had. He was the first to discover the stock for grafting maples and magnolias from Japan, which have become so famous. His hybrid rhododendrons are still the standard of hardiness here and abroad, especially in Holland and Belgium, where some years ago when their own stock was ruined by an exceptionally

J. R. TRUMPY

severe winter, Trumpy's American varieties stood unharmed.

Mr. Trumpy was born in Switzerland and came to America in 1856. For over 40 years he was connected with the Parsons nurseries at Flushing.

Patrick Quigley.

Patrick Quigley, 93, oldest man in Stockbridge, Mass., was killed May 25 by an extra freight when crossing the track on the Housatonic division of the New York, New Haven & Hartford Railroad. Being deaf he did not hear the train coming. For 60 years Mr. Quigley had lived in Stockbridge, and for 43 years he was head gardener for the late Charles E. Butler of New York.

S. D. Willard.

Samuel D. Willard, widely known in the State as a nurseryman and fruit grower, died at Geneva, N. Y., May 23, at the age of 78 years. Mr. Willard served eight years as postmaster and

was a member of the State Fair Commission for many years.

Charles L. Doran.

Charles L. Doran, an old-time retail florist on Sixth Ave., died at his home, 1015 Walton avenue, New York city, on May 15th. He is survived by his wife and one son.

Mrs. John D. Twombly.

Mary Maria Twombly, wife of John D. Twombly, florist, died at Winchester, Mass., on May 26.

GRAPE SCALDING.

Editor HORTICULTURE:

Will you please ask Mr. Jenkins to give me if possible the reason why the enclosed grape berries should become diseased. They are grown in a house at a temperature of 60 at night and about 100 at high noon. They have been syringed when the house is just warming with sunbeats and again at one in the afternoon. The berries are well shaded with foliage. The diseased part is found facing the wall. A little advice would be helpful.

R. I.

Yours truly,
J. P.

The trouble with Mr. P.'s grapes appears to be due to "scalding" and this scalding is caused by faulty ventilation, usually in the early morning. The only safe method, in fact, the only proper method of treating a vinery, is to never shut it up at all after April 1st, leaving a crack of air on at all times and keeping the required night temperature by fire heat. If this is done and then the ventilator gradually raised as the sun heat increases in the morning, trouble of this kind will never be encountered.

Lenox, Mass. EDWIN JENKINS.

NEWS NOTES.

Ann Arbor, Mich.—Three thousand students of the University of Michigan on May 28 failed in their efforts to save the south wing of University Hall, the oldest building on the campus, from destruction by flames. The fire broke out in the historic building early in the morning and was not under control until nearly noon.

While the loss from the destruction of the building itself will not be heavy, valuable libraries and notes were burned. Prof. Kaufman of the botany department lost his collection of Michigan fungi, said to be the most valuable in the world.

Los Angeles, Cal.—The California Seed Trade Association called a special meeting on the evening of May 20, at which an unusually large number of members were present and considerable interest was aroused for the benefit of the trade in general.

This Association was formed a couple of years ago for the benefit and advancement of the seed trade in this state, and has steadily grown until practically all the growers and dealers have found it to their advantage to become members.

The officers of the Association are: A. E. Aggeler, president; Theo. Payne, vice-president; M. L. Gormain, treasurer; D. F. Reichard, secretary.

The last bowling of the season, by the Cook County Florists' Association League, will take place on June 4th. The distribution of prizes will be made at a dinner of the club at their next regular meeting.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "Care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

WANTED—A good man for Cemetery work. Good position and nice home for married man to live in. Address GEO. C. WATSON, 9th and Market Sts., Phila., Pa.

WANTED—First-class assistant for outside work; young man, 25 or 26 years; Scotch preferred. Apply, enclosing references, J. G. BROCK, care E. T. Bedford, Greens Farms, Conn.

SITUATIONS WANTED

SITUATION WANTED—By Dutch Gardener, 36 years old, married, English and American experiences in private place; up-to-date landscape artist, grower in and outdoors, and decorator. Best of references. Address V. H., care of HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 215-217 Havemeyer St., Brooklyn, N. Y.

FOR SALE—Four acres of desirable land, good rich soil, on the main thoroughfare between Boston and Worcester. Also a good cottage house, with sheds, and stable accommodations for 14 horses. Just the place to establish a greenhouse as well as to secure a desirable home. Address T. W. B., care HORTICULTURE.

MEMORIAL DAY.

"Corporal Green!" the orderly cried;
"Here!" was the answer loud and clear,
From the lips of a soldier who stood
near—
And "Here!" was the word the next replied.
The fern on the hillsides was splashed with
blood,
And down in the corn, where the poppies
grew,
Were redder stains than the poppies
knew,
And crimson-dyed was the river's flood.

For the foe had crossed from the other
side,
That day, in the face of a murderous fire
That swept them down in its terrible ire;
And their life-blood went to color the tide.

"Ezra Kerr!"—and a voice answered
"Here!"
"Hiram Kerr!"—but no man replied.
They were brothers, these two; the sad
wind sighed,
And a shudder crept through the cornfield
near.

"Ephraim Deane!"—than a soldier spoke:
"Deane carried our regiment's colors," he
said,
"When our ensign was shot; I left him
dead
Just after the enemy wavered and broke.

"Close to the roadside his body lies;
I paused a moment and gave him to
drink;
He murmured his mother's name, I think,
And Death came with it and closed his
eyes."

'Twas a victory—yes; but it cost us dear:
For that company's roll, when called at
night,
Of a hundred men who went into the
fight,
Numbered but twenty that answered
"Here!"

By Nathaniel Graham Shepard.

PHILADELPHIA NOTES.

There are some commission men who are satisfied with their local market, and who never advertise for out-of-town trade. To such this pithy saying from one of our enterprising, wide-awake advertisers is worth preserving:

"It's much easier to deliver a box of flowers to the express company than to send it up to Kensington by boy or auto, five miles away."

The speaker at the next meeting of the Florists' Club will be S. S. Skidelsky. His subject, "Are We Giving Each Other a Fair Deal?" Mr. Skidelsky is a thinker and a man of experience and we are looking forward to an illuminating and interesting discourse. "Fair and square" is a tough subject. It all depends on the point of view. Mr. Skidelsky as an umpire may find himself absolutely right, and yet not popular with the fans. We trust he will take his courage in his hands, spit on them, and say: "I'd rather be right than president."

An interesting and comparatively new department at the National Farm School is the nursery under the direction of Prof. Fancourt, Professor of Horticulture. It has not been many months since this department was started, but it is now quite extensive. The nursery covers a number of acres on the side of the railroad opposite the main building and is laid out very attractively. Plans for further extending the nursery are now being worked by Prof. Fancourt. There is a wide drive through the plot across which is built a large concrete arch and just before this is reached is a large memorial circle of conifers.

An old grower says of when he was a young grower:—"First I sent my stuff to a commission house for a couple of years. Then I got dissatisfied and sent them to another commission house for another year or two. That one was worse. Then I decided to carry my stuff in myself and do my own selling. That proved worse still. So I finally went back to my original commission house a sadder and a wiser man, and I have never had any cause to complain since. I'd learned my lesson." Good for him! But we have an awful lot of growers even older than the grower referred to that haven't learned their lesson yet.

Visitors: J. J. Styer, Concordville, Pa.; E. H. Beers, Reading, Pa.

A large insurance company which is soon to erect a handsome office building at Sixth and Walnut streets will leave on one side a space some 30 feet wide and 220 feet deep, which will be laid out as a garden, thus helping further to beautify a very attractive neighborhood, while at the same time giving light to the building and guarding it from fire. It would be pleasant to see more large corporations showing such public spirit. Two savings banks on Walnut street have such gardens, whose grass, trees and flowers are a most welcome relief from the surrounding desert of stone, brick and asphalt. There is a return from beauty as well as from real estate, and it is gratifying to see that there is a

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS, TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

MASTICA FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO. 12 W. BROADWAY NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

A Worn Out Argument Knocked Into A Cocked Hat

IT'S a very funny thing that the smaller greenhouse building concerns, who are always shaking their heads in warning against the bigger ones, are straining every nerve possible to get all the business they can, to get as big as they can, as soon as they can. That's why they want your order. That's why they knock the bigger, better concerns.

With a concern like ours, whose big force of employees is divided into numerous departments, with an expert at the head of each; it is only reasonable that better results can

be secured than in concerns where a few men try to be construction engineers, heating engineers, ventilating experts, manufacturing superintendents, and erection foremen all in one.

This is the age of Big Things. An age when the little things have to be done in a big way. It takes a big concern to do both the little and the big things in the Big Way this Big Age demands.

You will agree that we are meeting such demands satisfactorily. Write or call at any one of our sales offices and make a noise like an order.

Bubbles of Glass

Looking from the inside out, you are impressed with the "cobwebby" lightness of the U-Bar construction, even more than when looking from the outside in

"BUBBLES OF GLASS"—that was the nickname given to U-Bar greenhouses when we first started to build them over a decade ago.

They were called that, because of their extreme lightness and graceful glassy airiness.

The more light the construction of a greenhouse allows to reach the plants, the quicker and stronger will be the growth.

The U-Bar construction not only introduced the curved eave for greenhouses, but the houses were so light that they at once surpassed and continue to surpass any others in growing results.

Although various attempts have been made to make other greenhouses constructed other ways, look like the U-Bar,

by adopting the curved eave; U-Bar houses are still the lightest houses built. It is the only house that has a complete galvanized, aluminum painted steel frame, giving great endurance and low up-keep cost.

Other houses with their curved eaves may look like the U-Bar, but looking like it, is the only way they are like it.

If it is not made with the U-Bar, it is not a U-Bar greenhouse.

We tell you these things as a matter of protection.

For further conviction, send for our catalog. It is rich in illustrative evidence and shows houses from the smallest up.

GERANIUMS

The report comes from all sections that Geraniums are more in demand this season than ever and that all good stock will be cleaned up. We have an excellent lot of young stock ready to ship out if you wish to grow your own stock for another season, but why bother with it, as we make it our business to provide your stock for you, to be shipped anytime in the fall or winter, you have the room, after Chrysanthemums or another crop has been removed. Our stock houses of Standard sorts alone as now planted contains 300,000 plants as pretty as you ever saw. Then we have Novelty stock, Ivy Leaved sorts, Scented and Variegated varieties to the extent that we are confident we can take care of any order you may place with us. Think it over. Can you afford to bother with the stock yourself for \$18.50 per 1000, for 2-in. plants?

SCARLET BEDDER. We have bought of Elmer D. Smith & Co., stock of this superior Scarlet Geranium and offer good strong plants from 3-in. pots for immediate shipment at \$1.50 per doz., \$10.00 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Adiantum

A house or bench where they can have a temperature of at least 60 degrees at night, a rich compost made of new fibrous soil three parts, well-rotted cow manure and leaf mold one part each and some sand, with ample drainage, are the first essentials for adiantum growing. Plants from 2½ or 3-inch pots will make fine stock to plant. Do not crowd them but give at least 12 inches between each way. Water rather carefully at first; just around the plants will do. Now that the sun is powerful they require quite a heavy shade. Keep the soil between the plants freely cultivated and clear of weeds.

Compost for Bench Crops

Sod that was cut last fall and has had the action of the frost and snow on it will make the foundation to mix up any compost needed to fill the houses. This bench soil should have enough manure mixed through it to make it rich in available plant food. A satisfactory mixture for most crops cultivated under glass can be made by using three parts of rotten sods to one of well-decayed cow manure and a liberal quantity of bone dust intermixed. This compost should be shoveled over two or three times so that all the ingredients will be well intermixed. Now that the planting season is with us do not lose any time in getting your compost into the very best shape. It may be some work and extra expense but it will surely pay in the end.

Gardenias

For next season's gardenias June is undoubtedly the best month to get the work under way. After removing all the plants and old soil make sure to wash out every corner of the benches well, then give a heavy coating of hot lime. A little straw should then be spread to keep the soil from going through the drainage. The plants should be set about 15 or 16 inches apart. With this space between the plants a 32 to 36-inch bench should only have three rows of plants. What is essentially necessary, to be successful with gardenias is to make use of a good porous soil. A good compost can be made with three parts of very fibrous soil with one part of well-rotted cow manure and enough clean sand to make it porous. Never plant a dry plant. The ball should always be moist, and do not allow the plants to be out of the pots too long before planting. Firm the soil around the ball well. After planting, soak the whole bench, after which water only the ball of the plant as necessary. Syringe freely on all good days both over and under the foliage.

Rest Callas

Callas should now have the water supply reduced gradually whether grown in pots or on a bench. Those that are planted out in benches should be done very gradually at first until the foliage shows signs of ripening up by turning yellow, when they can be lifted and the soil well shaken out. These tubers should be stored in dry sand in a cool dry place until wanted again for planting. Those that were grown in pots can be placed on their sides, often they have ripened a little, in some place where they can bake in full sun. Callas will not flower well if they do not have about eight or nine weeks of a rest. Those that were grown in benches will have quite a few offsets which can be broken off and planted out in rich ground where they will make good growth and can be lifted in September and potted up.

Planting Smilax

If it is possible to spare the room for smilax the first half of June is not too soon to plant out. At least 8 feet of head room is required for smilax. If to be grown without benches use 6 to 7 inches of good rose soil, or soil of a heavy nature. While many growers prefer to plant in the center of a house without benches, it is really safest to use a bench, for only then is the soil under control. While smilax likes moisture it will not stand for too much of it, yellow leaves and a sickly growth resulting. An over-moist condition is likely to happen when the beds are prepared on the ground. Twelve inches between the rows and 10 inches in the rows is about right for the plants. Water first around the ball until they begin to fill the soil with roots when the whole bed can be soaked. Give plenty of ventilation whenever possible. When they begin to show runners give them Silkaline to take hold of. Do not wait until they become intergrown with one another, which is sure to make trouble later on. When growing well give a mulch of well-rotted cow manure.

Sweet Peas

Now that we are coming into warm weather sweet peas will need every attention to keep them in a growing and flowering condition as long as possible. Keep them well cultivated and hoed with a thorough watering once or twice a week which should be followed by a cultivation the next day. This will place them in good condition to receive a mulching between the rows later on which helps to keep the soil cool and better able to retain whatever moisture they may get. Keep all the seed pods picked off as fast as they may appear, which will help considerably in extending their flowering season.

Mr. Farrell's next notes will be on the following: Cosmos; Cyripediums; Ficus elastica; Hydrangeas; Mignonette; Lemon Verbenas.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Watering Melon Beds

The varying constitutions of the soils used in making up melon beds makes it difficult to bring them all under one head when referring to the watering. In the first instance we will consider only those beds made upon raised benches with perforated plates for the bottom, affording, as they do, ample drainage. I might say these are in use here and give entire satisfaction. A melon is a plant that enjoys an ample supply of water through all its growing stages up to the ripening period. To try to grow them in anything but a well-drained bench is a folly, as the soil would soon go sour, a condition resented by all plants. One very peculiar characteristic about the roots of a melon is their great liking for firm soil. The firmest parts of the bed are often the most thickly netted with roots. In addition to this, after quite a number of trials, we find the firmer made beds produce the larger number of fruits, usually of medium size and well-finished.

Now the question has arisen why make the beds so firm when the water has so much trouble to pass through them and it is absolutely necessary that it should pass through, or the greater part of it at least? It is answered in the foregoing, or in a sentence "to produce quantity."

Another point I have heard discussed is—which of two benches would remain wet the longer, one put in loose or the other which is made firm? I contend the former would. A melon, we know, requires lots of water and a firm soil, which shows the necessity of watering often and thoroughly. The raised bench gives itself admirably to these conditions for it is easy to look where the water is draining and thus water on until all is soaked—no little job if the bed has dried right out. Water will often stand on the surface of a pot, bed or border for some time if the said soil is thoroughly dried out and will give one the idea that the soil is wet enough; not so, it is the top soil absorbing the moisture. A semi-wet soil will pass water through it quicker than one that is real dry providing both were made equally firm at the time they were made up. This is more noticeable in sandy soil than it is in those of a heavy nature, bearing out the theory that a dry bed is difficult to soak. The clayey soil would retain more moisture than the sandy would. After studying the soils there is no excuse for only half watering a melon bed. Never mind if a little stays on the top for a few seconds: after that has gone down, give it more until the drip is even from all parts. When growing the plants on into six-inch pots before planting them in the bed, a mound of

considerable size has to be made to cover the roots, which is often difficult to water. An inch or more can be taken off this by sinking the ball into the bed. It does not make any difference to the crop by potting them on. They may be a week or so earlier—no more, as the transfer from pot to bench takes a little time to be forgotten. By planting from threes a much smaller mound is required; in fact if the base of the plant is an inch and a half above the level of the bed that will be sufficient. No trouble with canker or stem rot should be experienced if the method advocated in these columns as a preventive is used.

It is impossible to make the solid bed with a hot bed underneath so hard as you can one in a bench and with the greater rooting space for the plants to roam in these beds will not dry out so quickly. This brings us to the point of large or small beds for melon growing. There is little to be gained and a risk of losing much with large beds. Growth will be ranker, causing trouble, which nobody wants. The fruits may be a little larger, taking longer to develop. A melon bed fifteen inches wide and four deep is sufficient and will grow first-class fruit. Give them a light top dressing soon after the fruit is set and feed well while they are swelling. Additions on the front similar to the way a vine border is made does not repay for the extra work entailed.

Mulching

With the hot weather now close at hand the question of keeping sufficient moisture in peach houses and vineries stands out more prominently than hitherto. Young vineries will be benefited by a mulching of spent mushroom manure, put on about two inches thick. This can be damped down twice daily without any injury to the roots and thus a greater amount of moisture is accumulated. It will also help draw the roots up near the surface. Some growers I know do not agree with mulching young vines in this way, yet I have never found any harm from it. Half decayed leaf-soil has been used for the same purpose. It is not to be recommended, as there is a danger of fungus going through the border. Where ripe grapes are hanging, if no top dressing was used previously, mushroom manure can be used now or wait a while until the crop is off and then use half decayed cow manure, which will give them a slight stimulant. Swelling grapes should have some good cow manure, but take care to water it in and leave plenty of air on the house during the first night or the foliage will burn.

Young peach trees are best without any kind of mulch, as they make rank enough wood the first year. Older trees can be served similar to the vines.

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Mulching the Small Fruits

Currants, raspberries, and gooseberries (as well as the strawberries which have already been referred to in these columns) will all be the better for a good mulch of straw litter, leaves or lawn grass. This mulch will mean bigger and better fruit because of its conservation of moisture, besides keeping all the lower fruit from being splashed with dirt in the case of heavy rains.

The Late Cold Snap

If the cold spell which visited this section during the last ten days has been general throughout the East, many growers will have to replant their Lima beans and some of the early sweet corn. Do not wait too long expecting these tender things to come up, but scratch away the soil and examine the seed in several different places and

if any large percentage appears to be rotting, better lose no time in getting in more seed.

Watering

Timely watering is a very important matter in the production of fine vegetables and outdoor fruit and the time to water is before the plants get very dry. Another important feature of outdoor watering is to give a good soaking or else not do it at all as mere dribbles are worse than nothing for it tends to bring the roots to the surface where they are much more likely to receive a check. After giving the ground a thorough watering, and as soon as the surface is fit to walk upon, hoe it or run through with the cultivator. This will greatly enhance the value of the watering and prevent the ground from baking and cracking.

ARNOLD ARBORETUM.

Bulletin of Popular Information.
No. 43.

For the decoration of northern gardens there are no more beautiful or desirable shrubs than the Azaleas of eastern North America. There are seven species of these plants and they are now called Rhododendrons by botanists, and in the Arboretum all Azaleas are labelled Rhododendrons. The first species to bloom, *R. vaseyi*, begins to flower the beginning of May and the flowers of the last, *R. viscosum*, can be found here as late as the middle of July, so that the Azalea season is a long one. *R. vaseyi* is a tall shrub, with slender stems and an open irregular habit. In its home in the sheltered valleys of the Blue Ridge in South Carolina it sometimes grows to the height of from fifteen to eighteen feet. The flowers are produced before the leaves appear in small compact clusters and are pure pink in color, but occasionally plants are found with nearly white flowers. Although this plant was not discovered until comparatively a few years ago, it has been much planted in gardens near Boston and it is fast becoming here one of the most popular of the early-flowering spring shrubs. With *R. vaseyi* the Rhodora (*R. canadense*) flowers. This well known dwarf shrub often covers, especially in the north, large areas of moist or swampy land with a sheet of bloom. The small flowers, however, are of a rather unattractive rose-purple color, and the fame of the Rhodora is perhaps due more to Emerson's poem than to its intrinsic beauty. Naturally, the Rhodora grows from Newfoundland to Pennsylvania and New Jersey.

The next to bloom are the two pink-flowered species, *R. canescens* and *R. nudiflorum*; the former is a northern and the latter a more southern plant and is especially common in the Gulf

States from Florida to eastern Texas. The flowers of these plants open before or with the unfolding of the leaves and in early spring fill the woods with beauty and fragrance.

The Flame-colored Azalea, *R. calendulaceum*, is the next species to flower and is already beginning to open its orange, yellow, or reddish flowers which are not fragrant. This shrub is an inhabitant of the Appalachian Mountain region from southern New York to Georgia, and is extremely abundant on the lower slopes of the high mountains of North Carolina and Tennessee. In flower it is the most showy of our Azaleas and one of the most beautiful of all flowering shrubs.

The next species to flower, *R. arborescens*, is also a native of the Appalachian Mountains on which it grows from Pennsylvania to Georgia and where in sheltered valleys it sometimes attains the height of fifteen feet or more. The flowers, which appear after the leaves are nearly fully grown, are white or faintly tinged with rose color and are made conspicuous by the long bright red filaments of the stamens. The flowers are very fragrant and the young leaves have the odor of new mown grass. Less showy in flower than the Flame-colored Azalea it is one of the most beautiful of all hardy Azaleas.

The last species to flower, the Clammy Azalea or Swamp Honeysuckle, is a common inhabitant of the swamps of the eastern states, especially of those in the neighborhood of the coast. The rather small flowers are pure white and covered with clammy hairs, and the leaves are often of a pale bluish color, especially on their lower surface. This plant is valuable for the lateness of its flowers which do not open until the flowers of most hardy shrubs have passed, and for their fragrance.

These shrubs are all perfectly hardy in eastern Massachusetts and flourish

in all exposures and in good garden soil, although like all Rhododendrons they cannot be made to live in soil strongly impregnated with lime. They are not often cultivated because it is not easy to find these plants in nurseries, for few nurserymen, especially in the United States, care to take the trouble to raise such plants from seeds, the only satisfactory way in which they can be propagated. In beauty, constitution and hardiness they are superior to the so-called Ghent Azaleas which are hybrids between the species from the Caucasus, which is not hardy here, and some of the American species. The Ghent Azaleas are favorites with European nurserymen who propagate them by grafting and they are imported in large numbers into this country. Here they grow slowly; many of the varieties are not at all hardy and others are liable to lose large branches in severe winters. The American species are better garden plants here, too, than the yellow-flowered Asiatic species, *R. japonicum*, usually called *Azalea mollis* in gardens, a common Japanese and Korean plant, and the Chinese *R. sinense* or the hybrids of these two species. *Azalea mollis* is hardy and free-flowering but the plants are short-lived in this country. The little known *R. sinense* with its beautiful yellow flowers is hardy, but the flower-buds have usually been killed in each of the two or three winters this plant has been exposed here in the open ground.

CATTLEYA HARRISONIAE.

The flowers of this useful cattleya are not large but as the illustration on our cover page shows it is a very free bloomer and the flowers, borne several on a stem, are fine for cutting. The color is a lovely tint of rose with a tinge of yellow on the lip and they are excellent keepers. A very desirable commercial species.

On the crest
of the wave

Information received this week seems to insure beyond any question the installing of another flower show in New York next spring worthy of the name and worthy of the city. Here is one of the direct results due to the recent successful affair under the auspices of the S. A. F. and affiliating societies. Previous efforts in the Metropolis have often been disheartening in their outcome, but doubt and misgiving are quickly brushed away in the light of this year's master-stroke, and courage and self-reliance take their place. This inspiring sequence to the national society's achievement, while it would not have been possible had local enthusiasm been lacking, yet adds distinctly to the lustre of that organization and places another mark to its credit as a predominating influence in horticultural progress. We look to see a widespread revival of exhibition optimism all over the country and this will be good for the business provided plans are well considered, chances carefully weighed, rash ventures avoided and modern publicity methods employed in all cases.

Holiday
scare-heads

"Prices are sky-high on cut flowers." This, in big, bold letters, formed the head-lines for a statement in a daily newspaper regarding the alleged flower famine in Boston a couple of days previous to Memorial Day. Who can estimate the loss to the florists of this community, not alone in immediate sales but in a broader and more general aspect from this stupid announcement? Whether it emanated from some inconsiderate member of the trade or in the reportorial imagination we know not, but that it worked a most regrettable injury to the floral industry nobody can dispute. Consider, you growers who rail against the sale of artificial flowers, how many metal wreaths were purchased as an explicit result of that one line flashed in the face of a hundred thousand readers! Spend money to build up the flower trade and encourage flower buying on this or that holiday and then allow your best efforts to be nullified as regularly as the days come around by these deplorable scare-heads! It is a question, after all, whether special advertising for holidays that naturally call for about all the available material, is the best use of money. If applied to the up-building of business in the dull times between, might it not prove a wiser investment?

Rhododendron
time

We can think of nothing recently published which is more instructive and valuable for the nurseryman or others interested in ornamental shrubbery, than the Bulletins that are issued from time to time, during the flowering season, by the Arnold Arboretum. No progressive planter can afford to remain uninformed as to what is being done at this great institution and if he does so remain he is no longer progressive. The extract from Bulletin No. 43, which we publish in this issue will interest many and we hope the time is not far distant when the statement that "few nurserymen care to take the trouble to raise such plants from seed" will be no longer true.

While on this subject we must mildly protest against any disparagement of the beauty of *Rhodora canadensis*. Bending in patches and irregular masses of sudden color over the trout ponds and streams in the solitude of the Maine wilderness, reflected as a purple cloud in the clear water from which the ice has just departed, this cheery herald of spring is a feast of glory to the eye of the nature lover and we cannot agree that either Emerson, or Thos. W. Higginson, who also wrote appreciatively of this wildling, overdraw its charms in the least.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF WASHINGTON.

The extreme heat of Tuesday evening prevented as large a turn-out of members as is usually the case, but there was plenty of business transacted at the June meeting of the Florists' Club of Washington.

Mr. J. L. Towner, of Baltimore, Md., was present to extend to the club an invitation to co-operate with the Baltimore Club at their outing at Chesapeake Beach on August 5. His invitation included a challenge to participate in the many sports scheduled. This is also the date set for the annual outing of the club's bowling team. The invitation was accepted and a committee will be appointed to work for the success of the joint affair.

An invitation was also received from Edward Schmid for the crab feast which he annually tenders the club and the members will look forward to this affair.

The closing of all stores on Sundays

at 1 o'clock was discussed, and a committee comprising Z. D. Blackistone, O. A. C. Oehmler and Wm. Marché, was appointed to consider and report. A committee will also look into the Minneapolis convention proposition with a view to ascertaining the number of members who will attend. Several routes are being considered and action will be taken at the July meeting.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Please note the following corrections in the preliminary program of the twenty-ninth annual convention to be held in the National Guard Armory, Minneapolis, Minn., Aug. 19-22, 1913.

Fourth Day, Friday, Aug. 22.—9 A. M., meeting of the Florists' Hall Association. 10.30 A. M., meeting of the American Chrysanthemum Society. 3 P. M., session of the S. A. F.

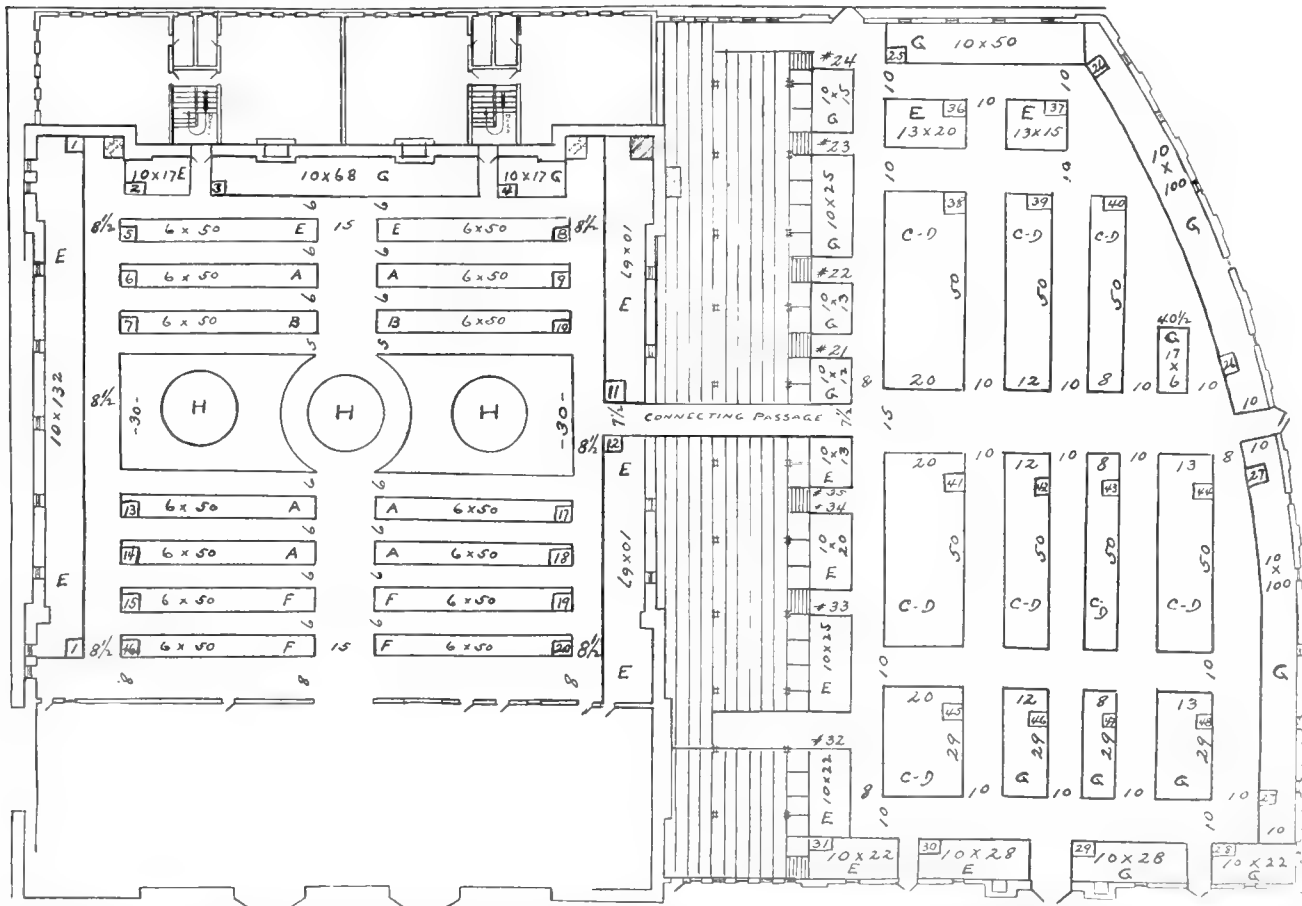

JOHN YOUNG, Sec'y.

FLORISTS' CLUB OF PHILADELPHIA.

A well attended meeting assembled on the 3rd inst. to hear Mr. Skidelsky on "are we giving each other a square deal," which proved very interesting. and which, no doubt, will appear in a subsequent issue of HORTICULTURE, Edward Towill exhibited a new rose, which excited much favorable comment. It is much darker than Maryland and has a very long pointed bud. Alphonse Pericat exhibited a rarity, Curcuma Roscoeana, and had the committee on their mettle to describe it properly. John Gracey reported that the annual summer outing will be held at Washington Park on the Delaware, June 19th. Leave Arch street Wharf 1.30 P. M. Dinner at the park. Then all kinds of games and lots of prizes. Pennock-Meehan Co. give three, Bayersdorfer three, Niessen three, Michell three, Dreer three; the retailers give nine. We

TWENTY-NINTH ANNUAL CONVENTION, SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS, AUGUST 19, 20, 21, 22, 1913.

Floor Plan, Main Hall and Coliseum, National Guards Armory, Minneapolis, Minn.

Exhibition Classes—A. Plants; B. Cut Blooms; C. Boilers and Heating Apparatus; D. Greenhouse Appliances (including Flower Pots); E. Florists' Supplies (including Fancy Earthenware); F. Bulbs, Seeds and Garden Requisites; G. Miscellaneous; H. Competitive Exhibits.

We present herewith a diagram of the floor plan of the trade exhibition to be held in conjunction with the Annual Convention of the Society of American Florists at Minneapolis. Secretary Young would like to hear early

from all intending exhibitors, indicating the location they would like to have and same will be reserved according to order in which applications are received. So if you have a preference don't delay in making it known

to the Secretary, otherwise it may be assigned to somebody else more prompt than yourself. Form of contract and all needed information as to cost, etc., can be had on application to John Young, Secretary, 54 West 28th street, New York City.

modify some of the severe things about those seceders; nine sounds as if their hearts are all right even if their heads be wrong. Arthur Niessen is treasurer and the other members of the committee are Charles E. Meehan, Adolph Farenwald, John R. Andre and Fred Michell, Jr.—all live wires, and it is bound to be one great day. There will be a potato race, wheelbarrow race, ladies' race, sack race, fat men's race, ball game and lots of other things too numerous to mention. The cost is two dollars, which includes the river trip and all et ceteras. We counted 14 items on the dinner menu. Bring your women folks. All aboard, June 19.

AMERICAN PEONY SOCIETY.

The annual meeting and exhibition of the American Peony Society will be held in Gray's Armory, Cleveland, Ohio, on June 12-14, in conjunction with the Ohio Horticultural Society. There will be no separate premium list offered by the Peony Society. Copies of the Horticultural Society's premium list have been sent to all members of the Peony Society. Further copies may be had by writing to Mr. John N. Stockwell, room 218 City Hall, Cleveland, O.

All entries should be addressed to Mr. Stockwell as above. Shipments of blooms should be addressed to the Chairman of the Exhibitions Committee at the Exhibition Hall, Gray's Armory. Express charges must be prepaid. Cut flowers cannot be received earlier than one day before the opening of the exhibition. Label cards not to exceed 2 by 4 inches must be furnished by the exhibitors, but vases for cut blooms will, as usual, be provided at the hall. Entries must be in the hands of the secretary at least 48 hours before the beginning of the exhibition, and a fee of \$1.00 must accompany the entry in each class.

See the premium list for further particulars. All intending exhibitors are advised to read the regulations carefully, as they are not exactly like those which usually govern the exhibitions of the Peony Society. The following is a list of the prizes:

Class

- 29 Collection of fifty herbaceous peonies, double, in twenty named varieties, silver cup, 1st; \$8.00, 2nd; \$5.00, 3rd.
- 30 Vase of fifty blooms, white, single, on long stems, arranged for effect, silver cup, 1st; \$8.00, 2nd; \$5.00, 3rd.
- 31 Vase of fifty blooms, light pink, single, on long stems, arranged for effect, silver cup, 1st; \$8.00, 2nd; \$5.00, 3rd.
- 32 Vase of fifty blooms, red or crimson, single, on long stems, arranged for effect, silver cup, 1st; \$8.00, 2nd; \$5.00, 3rd.
- 33 Collection of twenty-five named varieties, double, one bloom of each, \$8.00, 1st; \$6.00, 2nd; \$4.00, 3rd.
- 34 Collection of ten named varieties, double, three of each, \$10.00, 1st; \$5.00, 2nd; \$3.00, 3rd.
- 35 Best specimen bloom, white, double, (amateurs only), bronze medal.
- 36 Best specimen bloom, light pink, double, (amateurs only), medal.
- 37 Best specimen bloom, red or crimson, double, (amateurs only), bronze medal.
- 38 Collection of twelve named varieties, single, one bloom of each, \$4.00, 1st; \$3.00, 2nd; \$2.00, 3rd.
- 39 Collection of six named varieties, double, white, one flower of each, (amateurs only), gold medal, 1st; silver medal, 2nd; bronze medal, 3rd.
- 40 Collection of six named varieties, double, light pink, one flower of each, (amateurs only), gold medal, 1st; silver medal, 2nd; bronze medal, 3rd.

- 41 Collection of six named varieties, double, dark pink, one flower of each, (amateurs only), gold medal, 1st; silver medal, 2nd; bronze medal, 3rd.
- 42 Collection of six named varieties, double, red or crimson, one flower of each, (amateurs only), gold medal, 1st; silver medal, 2nd; bronze medal, 3rd.
- 43 Vase of twenty-five blooms, double, white or blush, \$6.00, 1st; \$4.00, 2nd; \$3.00, 3rd.
- 44 Vase of twenty-five blooms, double, pink, \$6.00, 1st; \$4.00, 2nd; \$3.00, 3rd.
- 45 Vase of twenty-five blooms, double, red or crimson, \$6.00, 1st; \$4.00, 2nd; \$3.00, 3rd.
- 46 Vase of twenty-five blooms, double, any other color, \$6.00, 1st; \$4.00, 2nd; \$3.00, 3rd.
- 46a Collection of one hundred named varieties, herbaceous peonies, one of each, Peony Society's gold medal.

It is hoped that there will be a good attendance of the members of the Peony Society. The plants in the northern section which were for a time very forward, have been checked by the cool weather of the past few weeks, and it looks now as if the dates of the exhibition would fall about right for the growers in the latitude of Cleveland and farther north.

The headquarters for the Peony Society will be Hotel Statler.

A. P. SAUNDERS, Sec'y.

AMERICAN ROSE SOCIETY.

The American Rose Society has been invited to have as full a representation as possible of its membership to attend the final exhibition and judging of the Hartford Rose Garden. It will be held sometime during the month of June. The judges named by President Farenwald for the service are as follows: Wallace R. Pierson, Cromwell, Conn., Eber Holmes, Montrose, Mass., and John F. Huss, Hartford, Conn.

The Rose Garden at Hartford was adopted last year and encouraged as far as it could be by the Executive Committee, and a summer meeting of the society. The reports that come from the Hartford Park Department are most encouraging for the work there done. The garden is in Elizabeth Park.

The new officers chosen at the annual meeting held in April assume their duties on the first of July, and are as follows: Wallace R. Pierson, Cromwell, Conn., president; Robert Pyle, West Grove, Pa., vice-president; Harry O. May, Summit, N. J., treasurer; executive committee, J. H. Dunlop, Toronto, Ont.; S. S. Pennock, Philadelphia, Pa.; August F. Poehlmann, Morton Grove, Ill.; Eber Holmes, Montrose, Mass.; Frank R. Pierson, Tarrytown, N. Y.; Robert Simpson, Clifton, N. J., the secretary holding over.

BENJAMIN HAMMOND, Sec.

CLUB AND SOCIETY NOTES.

The next meeting of the Gardeners' & Florists' Club of Boston will be held June 24th instead of June 17th and will be Ladies' Night. President Kennedy intends organizing a Ladies' Auxiliary.

The St. Louis Florist Club will hold its regular monthly meeting June 12 at 2 o'clock at Shaw's Garden. Members are to meet at 1.30 P. M. at the main entrance of the garden, Tower Grove and Floral Boulevard.

An exhibition of peonies, orchids, irises and miscellaneous hardy herbaceous flowers will be held on June 7 and 8 at Bronx Park, in the Museum Building of the New York Botanical Garden, under the auspices of the Horticultural Society of New York; \$200 in premiums.

The North Shore (Chicago) Florists' and Nurserymen's Association of which Fred Stollery is president, Herman Schiller, secretary, and Louis Witbold, treasurer, was organized recently. Its efforts so far have been mainly to secure uniformity of prices on the north shore.

The annual Peony and Rhododendron Exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Boston, on Saturday and Sunday, June 7 and 8. A special exhibition of peonies, including schedule classes, 192 to 207, will be held on June 14 and 15. The Rose and Strawberry Exhibition will occur on June 21 and 22.

The long-promised joint exhibition of the Newport Garden Association and the Newport Horticultural Society will take place on Wednesday and Thursday, June 25 and 26, at Harbour Court, the estate of Mrs. John Nicholas Brown. The exhibition will be open to the public at 2 P. M. on Wednesday and will close at 8 P. M. on Thursday. Admission on Wednesday, \$1.00; Thursday, 25 cents. The premium list is very comprehensive and in addition to the classes usually covered in a summer show there are prizes for borders and beds of hardy herbaceous plants which will undoubtedly bring out some very showy and unique effects. The cash prizes amount to about \$1,200.

An exhibition of peonies will be held at the Art Institute, Chicago, June 12 and 13, 1913, under the auspices of The Horticultural Society of Chicago. Silver and bronze medals and liberal cash prizes offered in the 39 classes. Entries may be made by mail, addressed to the Secretary of The Horticultural Society of Chicago, from whom copies of the schedule may be obtained. Exhibitors must designate by title and number the classes they desire to enter and are requested to make their entries three days in advance.

To insure uniformity exhibition cards shall not exceed 10 x 12 inches in size. They shall be white, with the words, "Grown by" or "Shown by" in plain black letters. The name and address of the exhibitor and the name of the private gardener, if desired, shall appear on the cards. No entry fee will be charged. Exhibits by express should be addressed to R. J. Haight, Secretary, Horticultural Society of Chicago, Art Institute, Chicago, Ill., and all charges invariably prepaid. Exhibits cannot be received earlier than the day preceding the opening of the exhibition.

The rules governing the 1913 Spring Flower Show of The Horticultural Society of Chicago will be observed so far as they apply.

Plans for hotel reservations are being made which will take care of a large attendance at the convention of the Society of American Florists and Ornamental Horticulturists, in Minneapolis, Aug. 19-23, 1913. Both the Florists' Club and the Minneapolis Civic and Commerce Association are formulating plans designed to make the stay of the visitors pleasant. The Civic and Commerce Association has assurances that there will be no inflation of hotel rates and that there will be comfortable accommodations for all who come, at reasonable prices. The committee on hotels of the Minneapolis Florists' Club will soon send out special information regarding hotels, accommodations and rates to every member of the S. A. F. & O. H., and will take pains to make good reservations for all who come to the convention.

The growing attention being given to private gardens and the extensive public work is rapidly adding to the city's prominence as a place of flowers and Minneapolis sees in the convention of the Society of American Florists a renewed impetus which will enable it in a brief time to outdistance all contenders for the "Flower City" title.

The Minneapolis Civic and Commerce Association, which has general charge of the official convention activities of the city has written a new chapter into the history of convention campaigns. Where the convention bureaus of most cities make the probable expenditures of delegates the ruling thought of their work, the Minneapolis organization devotes serious attention to the value of national gatherings as educators for the people of the city. Its newspapers give generous and intelligent treatment to the proceedings of the conventions held in Minneapolis and the Civic and Commerce Association strives to obtain gatherings whose proceedings will yield useful information to the community. This is particularly true of the convention of florists and Mr. Mac Martin, chairman of the Association's Committee on Conventions has publicly declared that this meeting will be of more value to Minneapolis than a score of other gatherings.

Under the supervision of Theodore Wirth, superintendent of parks, the outdoor exhibit is being planted at the National Guard Armory, where the convention sessions will be held. The people of Minneapolis are anxiously

awaiting the maturity of this novel exhibit. Large numbers of entries have been booked by Secretary John Young and Mr. Wirth is following directions of the exhibitors in the matter of planting.

In preparation for the meeting of florists, a special committee of the Minneapolis Civic and Commerce Association is spurring business men to display even more generously than in past years, the window boxes and other floral decorations in the downtown section which have won distinction throughout the country as "The Hanging Gardens of Minneapolis." The planting of vacant lot and home gardens under the supervision of the Garden Club of Minneapolis has exceeded the record of all previous years and Minneapolis expects to surprise the visiting florists with the abundance of its displays.

PUBLICATION RECEIVED.

A Preliminary List of Hardy Herbaceous Plants for the Gardens of Iowa. A 32-page pamphlet, in neat, attractive form. The author is Wesley Greene of Davenport, concerning whose work as Secretary of the Iowa Horticultural Society we have made appreciative comment in the past. Mr. Greene is imparting instruction on right lines when he disseminates concise and reliable information such as this pamphlet contains, among the home garden makers of his State. He tells just facts without embellishment and those who follow the directions given will escape many of the disappointments that fall to the lot of the amateur garden maker.

MINNEAPOLIS PARK SYSTEM.

TRAIL ALONG THE MISSISSIPPI RIVER

MINNEHAHA CREEK

PEONY AND ROSE SHOW AT PHILADELPHIA.

It wasn't much of a show compared with previous years. The queer season and its effects fooled nearly everybody; and the date, set three or four weeks ago, should have been a week later to get results. The Andorra people, for instance, who sent such a fine collection last year, haven't cut a peony yet; and many others were in the same fix. The principal prize winners were: W. L. Pilling (R. Schneider, gard.); Rudolph Ellis, (Axel Lindroth, gard.); Thomas Hunter, (Joseph Hurley, gard.); Geo. McFadden, Jr., (Chas. Weyand, gard.)

In lieu of their peony exhibit Andorra sent in forty varieties of rhododendrons, five varieties of azaleas and a big vase of kalmia. Among the notable ones in the rhododendron list the following impressed us as being extra fine:

Pink—Parsons' Gloriosum and English Roseum Elegans; white—Mme. Carvalho; blush—Delicatissima; maroon, Sefton.

Mr. Skutt, in charge of the exhibit, gave it as his opinion that this Sefton variety had a great future. He said it shows up much better outside than on the exhibition table. A miniature rhododendron in this exhibit (punctatum) also attracted much attention. It is a lovely tint of pink with small flowers about the size of a weigelia and is remarkably free-flowering. Thomas Meehan & Sons were represented by a nice little showing of climbing roses, among them being Paul's Carmine Pillar, Alberic Barbier, a white one with remarkably distinct and charming foliage. Mr. Matthews, who has this department in charge, stated that the variety was almost unique as to keeping quality of the foliage, which keeps beautiful up to January. A well-formed double flower of good size; seems to be a Wichuraiana hybrid. Another good one in this class was Rene Andre, double, carmine with white center. There was also a good showing of the Penzance sweet briars. One of the finest among these was the variety Amy Robsart.

WEED KILLING.

An effectual weed killer is a very great help and labor saver wherever there are avenues and paths or other spaces to be kept free from growths. Several things have been extensively advertised from time to time for this purpose but have not always turned out to do what was claimed for them. The preparation, Pino-Lyptol, which is advertised in this paper seems to fill the bill, however, and is coming into wide use. In Newport we find the majority of the gardeners on the private estates are using it and speak highly of its efficiency. John A. Forbes of "By-the-Sea" says that one application usually does the work if directions are carefully carried out. A. McWilliams of "The Reef" also has had satisfactory results in the several years he has used Pino-Lyptol. It is to be remembered when sprinkling the liquid on the drive, to keep a safe distance from the borders.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-26, 1913.

The thirty-first annual convention of the American Seed Trade Association will be held at the Hotel Statler, Cleveland, Ohio, June 24, 25, 26, 1913.

Opening Session, June 24th, 10 o'clock A. M.

Executive Sessions.

Are Standards of Purity Practicable in State Seed Laws? George S. Green (Illinois Seed Co.), Chicago.

Discussion—Seeds Grown Under Irrigation. Led by J. C. Robinson, Waterloo, Neb.

What the American Seed Trade Has Accomplished. Albert McCullough (J. M. McCullough's Sons Co.), Cincinnati, Ohio.

Cost and Overhead Expense. L. B. McCausland (Ross Bros.), Wichita, Kan.

Intensified Farming. James J. Hill (formerly President Great Northern Railway), St. Paul, Minn.

Wednesday Evening.

Educative and Civic Influence of School Garden Work. Miss Louise Klein Miller, Curator Cleveland School Gardens. (Illustrated with stereopticon.)

Social Features.

Tuesday evening—President's reception.

Wednesday evening—Annual banquet.

Thursday afternoon—Trolley ride to Storrs, Harrison Co.'s Nurseries, Painesville, Ohio.

Department Prejudices.

The publication of the letter from J. E. W. Tracy of the Department of Agriculture at Washington, to R. & J. Farquhar & Co., of Boston, has occasioned considerable discussion and called forth some pretty severe criticisms of the way the Department is

and for many years has been conducted.

For a long time—if not from its organization—this Department has been more or less of a political machine, but never more so than under former Secretary Wilson. His antagonistic attitude towards the seed trade of this country is well known to all members of this industry. There is no line of business in the country which naturally is so closely affiliated with the Department as the seed business, and with intelligent co-operation on the part of the Department much good could have been accomplished and many important reforms smoothly worked out that probably will not be attained so readily even by legislation.

Reference has been made to the prejudice shown by the former Secretary towards seedmen, and his subordinates, during the period of his reign, being well aware of this, frequently did not hesitate to give expression to it in very thinly veiled terms. George C. Watson voices the hope of every one, that the new Secretary will see his way clear to make a clean sweep of many of the hold-overs who have

been especially offensive. We cannot however, foretell what the new Secretary will do, and must await the development of his policy which probably will not become clearly defined for many months to come.

Where It Began.

The first noticeable manifestation of the former Secretary's antagonism occurred about the time that he awarded the Department's seed contract to an absolutely irresponsible bidder merely because this bidder could secure a bond from a bonding and indemnity company. The awarding of this contract, quite naturally, caused more or less adverse criticism on the part of the seedsmen, and the former Secretary resented it as personally directed against himself, and from that time on, has been—to put it mildly—not friendly to the seed trade of the country. The wretched failure which followed the awarding of the contract, in the instance referred to, as well as the difficulty in suppressing a scandal connected therewith, is known quite generally to members of the trade. It is feared that, so long as the present heads of Bureaus or what-

INSECTICIDES, FUNGICIDES, VERMICIDES, ETC.

Our Company is now in position to cater to the demands of floriculturists, horticulturists and agriculturists alike with our various products. Our list includes **APHINE**, an insecticide intended for general greenhouse and garden work against all sap sucking insects; **SCALINE** adapted principally to nurseries, orchards and the field, for all scale and sap sucking insects; **FUNGINE**, a fungicide which has already taken the place of Bordeaux mixture and lime and sulphur among many leading growers; **VERMINE**, a soil sterilizer and vermicide for all soil worms and insects,—to which we now add **NIKOTIANA** and which will prove as efficient as the other nicotine preparations already established.

For further particulars see our regular advertisement, page 877.

APHINE MANUFACTURING COMPANY

Manufacturers of Agricultural Chemicals

M. C. EBEL, General Manager

MADISON, N. J.

ever other names they may be known by, are continued, such a thing as a "square deal" from the Department will be in the words of the late Senator Ingalls:—"An iridescent dream." If reports are to be believed, some of these hold-overs from the last administration have been given increased power. It is common rumor that for several of the last years of his administration, Mr. Wilson was little more than a figurehead, the heads of Bureaus doing about as they pleased.

"Free Seed" Increase.

Attention has several times been called to one very significant fact showing Mr. Wilson's "friendliness" towards the seedsmen of the country, by the undisputed statement—that at the beginning of his administration the number of packets sent out under the free seed distribution was less than eleven millions, while it had exceeded sixty-five millions before he retired. With a secretary at the head of the Department wishing to keep this nuisance down to the lowest limit, its growth would have been very slow, if any at all, but Mr. Wilson's desire to please the congressmen and play politics, led him to readily consent to—if not actually advise—the increase in the free seed distribution from year to year until it has reached its present colossal proportions.

The Trade Partially Blamable.

However, with all deference, we beg to say that the seedsmen, themselves, have not been without fault in this matter. If one will only analyze the annual bids made by both seed growers and dealers, they will readily see what a ridiculous position they place themselves in. Most standard items are priced at figures so low that they could not be produced without loss, and it all has the inevitable tendency to create the impression in the minds of those in the Department that seeds are about the cheapest and least important of agricultural products. Few, if any, members of the Department have ever had any practical knowledge in the production of garden seeds, and have no clear idea of the cost by the time the seeds are ready to be placed in the hands of the consumer. The prices quoted according to the figures published in one of the trade journals not long ago, are about as follows:—Lettuce 14 to 16c., onion seed 20 to 22c., radish 8c., garden beets 8 to 10c., carrots 14 to 16c., peas at about half the prices quoted by the growers to the dealers. Now in this scramble for a little government pap, the growers are not wholly at fault, as many dealers have quoted prices far below what they can buy reliable seeds for, and they have thus placed themselves in a position where they cannot criticize the growers as effectively as if they had kept out of the game themselves. Had they been quoting weed seeds in many instances instead of garden seeds, they could not have quoted them as low.

But what is the use? This is the seedsman's problem and we apologize for "butting in," but could not forbear expressing a few of the thoughts that have been with us these many days.

Crop Prospects.

In discussing crop prospects, the weather again seems to be the chief factor in the situation. In saying that the month of May was extremely unfavorable for the growth and development, not only of seed crops in general—but garden "sass" as well, we are stating what everybody knows. Many crops have been seriously damaged by frost and continued cold weather, but the extent has not developed, and quite possibly, with continuous fair growing weather from now until harvest, such damage as has been done will be overcome and the labors of the seed growers and farmers may result in fairly satisfactory crops. It is all a weather problem, however, and within the next thirty days we shall be able to give a pretty correct line on the early maturing seed crops. In the meantime, there is nothing but generalizing and this is not very satisfying information.

Effect of Inflated Prices.

The calamity howler is abroad and he hails from Europe as well as from this country. Just a "report" of shortage is a sufficient text for a voluminous outburst on failure of seed crops, and urgent necessity of advancing prices. We believe most competent judges in the trade concede that prices on the general line of seeds were, and still are, too high. Those who believe in the fallacious theory of "getting all you can whenever you can" should read John Stuart Mill, and prepare for the inevitable reaction that follows inflated prices. The extreme prices asked by growers of peas for the past two seasons has developed a brood of would-be seed growers, fast of them irresponsible, and few possessing the requisite technical knowledge, justifying any dealer with a reputation to lose, in declining to place business with them. And this is only one line. How about all of the others?

LILIES

Lilium Myriophyllum
Lilium Sargentiae

The bulbs of these magnificent new Lilies are now ready for delivery. For the best results next year, they should be planted at once.

Of Interest to Retail Florists

TELEGRAPHING FLOWERS.

"Flowers telegraphed to all parts of the world." This very familiar sign now greets us in every large city and in very many small cities. The general public wonder how it is done and their curiosity is aroused to such an extent that the florist rarely passes a day, without granting some curious person the satisfaction of knowing something about the system which the florist uses in delivering flowers a great many miles at short notice.

The invention of the telegraph system has brought gold into the coffers of the florist who uses the proper advertising methods to let the public know he is prepared to take care of their orders, and who also makes use of the advertising pages of *HORTICULTURE* to let the florists in distant cities know he is capable of filling their orders as per telegram.

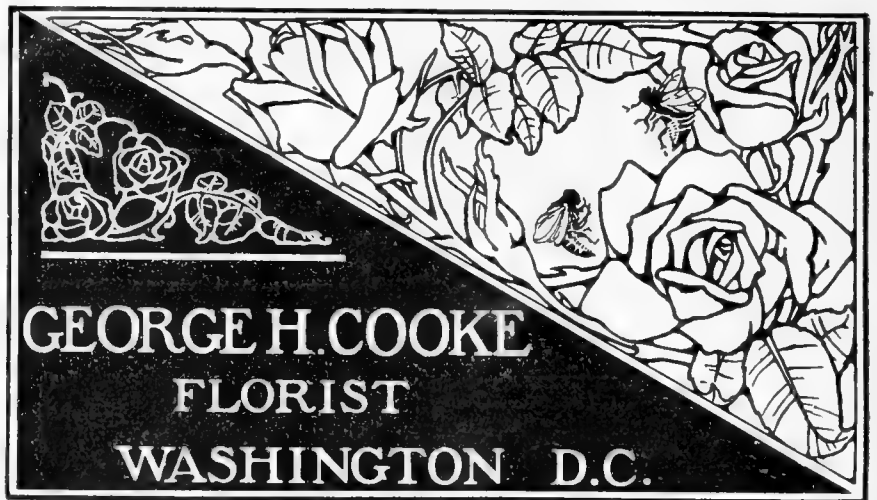

There is one serious obstacle to be overcome in telegraphing flowers; I might add a daily occurrence, and that is the "shaving down process." This is being done to such an extent that by the time the telegram reaches the correspondent, there is barely enough left for the recipient to fill the order properly, as his profit has gone through the "shaving down process" and as a result sends something inferior so as not to lose by the transaction; then he must make the usual discount, if the order is not sent net.

The sudden stopping of telegrams from one of your out-of-town correspondents, goes to show that there is something wrong in your establishment; either the flowers you sent were no good or not a sufficient amount for the money. The understanding that flowers are being delivered at a distance and will not be seen is a temptation to send something you wish to dispose of, thus causing dissatisfaction when the discovery has been made.

In this article I will attempt to give an illustration of trouble between three parties interested in flowers ordered by telegraph: first, the customer; second, the florist taking the order; and last, the florist receiving the telegram to fill the order in another city.

A customer enters a store and asks to see some long-stem roses. After looking over the stock, a selection of four dozen long-stem roses has been decided upon, to be tied into a spray, the price to be \$2.50 per dozen and telegraph charges; total, \$10.50. The customer has paid the amount after being assured that everything will be taken care of properly and leaves the store. Immediately the correspondent is wired to send a spray of four dozen roses for \$6.00 net, to the funeral of Mr. ———, and also to write a card, Mr. and Mrs. ———; so far you are through with the order.

A few weeks later the customer returns and demands an explanation as to the quality of the roses your correspondent delivered. You did not see them, but the purchaser did. Unexpectedly, he or she had decided to

GEORGE H. COOKE
FLORIST
WASHINGTON D.C.

board the train and attend the funeral; instead of seeing a spray of four dozen long-stem roses, there were four dozen miserable short-stem roses wired into a spray. Your correspondent could not furnish for \$6.00 the same sort of roses you had shown for \$10.00, thus causing dissatisfaction and driving one customer from the field of "flowers ordered by telegraph."

This illustration fully explains how you may be caught if you do not allow margin enough for your correspondent to work on. Don't try to take it all, let the other fellow get his, too.

MR. STOREMAN.

CHICAGO NOTES.

Fred Klingel's little daughters are on the way to recovery.

Ernest Farley has returned to take a position with A. L. Vaughan & Co.

Miss Parker is absent from the office of the Chicago Carnation Co. on account of illness.

Miss Ethel Anderson is assistant cashier at A. Lange's and Miss Agnes Dockery, assistant bookkeeper.

Secretary Pyfer reports reservations being taken by eastern florists for the Minneapolis convention trip, on the Pioneer Limited, known as the Cook Co. Florists' Special.

W.E. Lynch, for many years connected with the wholesale trade, is now located at Hatfield, Mass., where he will engage in the growing of tobacco. Mrs. Lynch's father has a tract of land there suitable for this purpose which Mr. Lynch will use.

A. Lange's large retail store is one of the sights in the downtown district these days. He is the only florist who seems to specialize in all lines; bedding plants, fancy plants, dollar boxes of cut flowers, large wedding decorations, etc. This month is opening with an unusual amount of business.

For once all are agreed upon a subject, and it is a pleasure to hear the "best Memorial Day sales on record" discussed by the wholesalers, especially so when, as in this case it is no exaggeration. Far from being confined to two days the sales covered nearly a week, not closing until Sunday noon. A quiet Monday was almost welcome.

Joe Beaver has charge of the arrangements for the peony show at the

Art Institute, June 12th and 13th, which are not free days. The rules of the Art Institute provide for free admission Sundays, Wednesdays and Saturdays, a fact sometimes overlooked by flower show committees, much to their financial loss. Mr. Beaver says growers have responded cordially and every indication points to a fine, first peony show. The exhibit will be staged on the main floor with additional space on the second at their disposal if desired. The exhibition is given by The Horticultural Society of Chicago, founded in 1890, and which has been keenly alive to the advantages of floral exhibits as educators of the public.

Visitor—H. E. Philpott, Winnipeg, Man.

NEWS NOTES.

Kaukauna, Wis.—Peter J. Gerend has purchased Steve Dietzler's seed store on Kaukauna street.

New Haven, Conn.—Charles Conti, a florist in South End road, was awarded \$790 in a suit for damages to his greenhouse and contents, due to blasting done by the New Haven Gas Light Company.

New York, N. Y.—On May 28th, Governor Sulzer vetoed the bill appropriating \$60,000 for new experimental greenhouses at Cornell University, Ithaca, N. Y., and of which amount over 60 per cent was to be devoted to floricultural purposes.

THE Florists' Supply House of AMERICA

1129 ARCH STREET

PHILADELPHIA, PA

PHILADELPHIA NOTES.

B. Eschner, of M. Rice & Co., has finished his European tour, and sailed for home from Southampton on the 5th inst.

Jno. F. Sibson, well-known member of the Philadelphia Florists' Club, is now in charge of the Horsh estate near Reading, Pa.

The early closing movement inaugurated among the supply houses by M. Rice & Co., is now in effect. During June, July and August they close at 5 P. M.

W. Atlee Burpee is attending the graduating exercises at Culver, Ind.; where his two sons are finishing their college course. He is expected back in Philadelphia on the 7th inst.

The dainty little pink rosebud of the polyantha type known locally as "Sweetheart," keeps up in popularity and is now seen in various places in addition to its original godfathers.

Howard M. Earl left on Sunday, June 1st, on a seed inspection tour in the west. He expects to arrive at the Burpee Farms in California June 7th. Since his illness early in 1912, Mr. Earl has been taking good care of himself and is now pretty fit, but his physician still has a steel-clamp limit on the hours of work. Sitting on the safety valve may be heroic but even a good boiler is liable to burst.

George Cook, well and favorably known as a salesman in the Pennock-Meehan forces, has formed a partnership with his brother-in-law, and opened a retail store in Chester, Pa., on Third street, three blocks from the station: P. R. R. The firm name is Harris & Cook. A handsome McCray refrigerator is one of the features of the store, which is nicely fitted up, and centrally located. Mr. Cook still retains his position with the P. M. Co., and leaves the active management with Mr. Harris.

We had the pleasure of meeting on May 30, our old friend, Patrick Foy, who is in charge of the landscape department of the Norfolk & Western R. R., with headquarters at Roanoke, Virginia. With his two boys he is going on a visit to the old country, sailing on the S. S. Merion from Philadelphia on the 31st. He stated that he still had a very lively recollection of the kind way in which the local trade en-

tertained the R. R. Gardeners' convention here, six years ago, and was very glad to greet us once more.

Visitors: R. T. Brown, Cottage Gardens, County Queens, N. Y.; J. A. Brown, Coatesville, Pa.; L. K. Peacock, Berlin, N. J.

WASHINGTON NOTES.

Mrs. Emma Rice, of M. Rice & Co., Philadelphia, a visitor in Washington last week, was surprised at the city's beauty and well pleased with her stay here.

The three new houses of Gude Bros. Co. in the Northeast section are rapidly nearing completion and within a very short time will be utilized for the growing of gardenias, American Beauty and Killarney roses.

Edward Schmid, his two daughters and two grandchildren are spending a couple of weeks visiting Springfield, Mass., and Boston and New York. The trip will wind up with a short stay at Atlantic City, N. J.

Mrs. Elmer C. Mayberry last week met with the loss of her father, Mr. Enos F. Humphrey, of Meadows, Prince George County, Md. Mr. Humphrey was 73 years of age, a veteran of the Civil War. He is survived by his widow, two sons and five daughters.

George W. Fraser has given up business in Jericho, R. I., and will devote himself to his store in Providence wholly.

H. Y. Ellison, who until recently was with W. J. Smyth at Chicago, has returned and is again with his parents who own the Ellison Floral Co., St. Louis, Mo.

OBITUARY.

Frederick W. Thielmann.

Frederick W. Thielmann died at his home, 189 Graham avenue, Brooklyn, N. Y., May 26th. He had been a florist in Williamsburg for many years.

Prof. George W. Letterman.

Prof. George W. Letterman, a noted botanist, died at Allentown, Mo. It is said that he died in poverty and many rare herbarium specimens were found in the small hut in which he made his home.

H. T. W. Winfield.

Henry T. W. Winfield, a retail florist, died at his home, 202 Bedford avenue, Brooklyn, N. Y., May 24th. Mr. Winfield was born in England 65 years ago and had been a resident of Brooklyn for 26 years. His wife, a daughter and a son survive him.

W. C. Trimble.

W. C. Trimble, senior member and vice-president of the W. E. Trimble Greenhouse Co., Princeton, Ill., died of heart trouble on May 24th, aged 82 years. He was born in Ohio, but moved to Princeton in 1849. He leaves a widow and ten children.

Mrs. Anna Mullery.

Mrs. Anna Mullery, mother of Geo. H. Augermuller and Fred W. Alves, died at her home in St. Louis, Mo. The funeral took place on Thursday, May 29th. All the wholesale florists sent floral pieces and extended their sympathy to the bereaved family.

WHEN A FLORIST'S REPUTATION

Is at stake, he cannot be too particular as to the quality of the flowers he uses, and in June, the Wedding and Commencement work probably taxes his ability more than at any other time of the year. We are getting in a magnificent supply of **VALLEY** for this work; quality was never better, owing to our grower's selection of only high grade stock and careful growing, producing the famous P-M quality eminently satisfying to the most critical June buyers. Special, \$4.00 per 100; Extra, \$3.00 per 100.

RAMBLER SPRAYS: Dorothy Perkins, Lady Gay and Crimson Ramblers, \$5.00 to \$20.00 per 100, according to length of sprays.

CATTLEYAS: Mossiae, Special, \$6.00 per doz; Extra, \$5.00 per doz. Gigas, choice quality, large, handsome flowers, beautifully colored, Special, \$7.50 per doz; Extra, \$6.00 per doz.

BEAUTIES: Special, \$3.50 doz.; \$25.00 100; Fancy, \$3.00 doz.; \$20.00 100; Extra, \$2.50 doz.; \$17.50 100; First, \$2.00 doz.; \$15.00 100.

PEONIES: \$4.00 to \$6.00 per 100.

HEADQUARTERS FOR GREENS

BRONZE GALAX, \$1.50 per 1000; \$8.50 per 10,000.

Flower Market Reports

BOSTON The market has taken a very sudden and decisive drop and at present writing is badly congested with the heavy accumulations of flowers for which no buyers can be found even at the very low prices asked. The glut includes about everything on the list—the only item which seems to hold out being lily of the valley, which maintains its price fairly well, despite the presence still of a considerable quantity of the outdoor product. Stocks and astilbe originally intended for Memorial Day, but retarded by cool weather, are now piling up hopelessly. Carnations have met proportionately the most serious reverse—values being approximately one-fifth of what they were just a week ago. An early clearing out of houses is likely if these present conditions should settle down to stay.

BUFFALO Memorial week's business exceeded that of any previous year. Tulips, narcissus, etc., were over with and there was practically nothing from outside but iris, and these in limited supply. The best demand fell on carnations, and of these the crops were off, and prices ruled high. Peonies helped out considerably, though the buds had not been developed large. There was a fine lot of lilies, also roses. The latter had a very heavy demand, and these were not plentiful on Thursday. There were an excellent lot of sweet peas, daisies, lily of the valley, etc., which shared in the demand. The market was well sup-

plied with Beauties, though no great demand was had for them.

CHICAGO Memorial Day business, both local and shipping, was excellent from all standpoints. The demand was good, the stock was good and prices were good. There was a large quantity of peonies shipped in, but all were needed and prices ranged from five cents for the poorest to eight cents for fancy, with the great bulk selling for six cents. Every kind of a rose sold and most of the growers had heavy cuts each day. The only flower that did not sell readily was the extra long American Beauty, which never is

popular for Memorial Day use. There was no change in the carnation situation until Monday, June 2nd, when stock filled the counters, a sight not seen before in many weeks or even months. There was very little first-class outdoor stock brought in, for the continued cold wind and rain had reduced the supply to a minimum. Prospects for a good supply of all kinds of material for June commencements and weddings are good and orders are being booked rapidly by the big shipping houses. Peonies are the most prominent offering just now, but roses and lily of the valley are June

Flower Market Reports

(Continued from page 869)

favorites as usual. Candidum lilies are in.

CINCINNATI The market is again crowding up in nearly every line. The call for flowers is pretty fair but not nearly sufficient to take up anything like all the offerings. Peonies are coming in very strong. The last of the early varieties and the big fine later ones are arriving in the wholesale houses in profusion. Roses, too, are coming in nice and the better quality finds a fair call. Along with these last may be included a good call for lily of the valley and small fancy green. The cut of carnations is ordinary but easily sufficient for requirement. Some very fine giganteum lilies are offered. The few candidum lilies sell readily. Gladioli meet with a fair call. Spanish iris of good quality are not finding a very good market. The sweet pea cut is very limited.

NEW YORK The Memorial Day business of this city was about on a par with previous years—a demand beforehand for material for out-of-town needs, sufficient to put a good clamp on wholesale values and then a local condition of "nothin' doing." The weather had been such, however, as to prevent any heavy accumulations, either outdoor or indoor stock and it was the first of the present week before the "dull thud" was heard. When it did come, everybody heard it and market conditions are pretty "ragged" at present writing with the certainty that the advent of a couple of warm days will do a lot more in the ragged line. Local peonies are now with us and that means a couple of weeks of hard going for roses and other things. We look for a spell of low vitality in the wholesale district for the next week or two, but if it transpires that we are mistaken and "the unexpected" should happen, nobody will be better pleased than the scribe.

PHILADELPHIA The Memorial week story along the wholesale Rialto is unanimous—the best ever. Everything salable found a market. Roses and carnations were in short supply. Peonies were plentiful, but many of them too tight and by Thursday night there was some scratching to fill urgent orders. Carnations a little off crop generally and getting smaller. American Beauty roses were of excellent quality and went off bet-

ter than usual. So did lily of the valley, which usually does not go so well around Decoration Day. Bright days have helped the sweet pea crops. These are now surprisingly beautiful—especially the Spencers.

ROCHESTER Business took a decided leap upward during the past week and the shadows of a dull, depressing week previous were all forgotten in the hustle for Memorial Day. Greenhouse men were kept busy filling orders for porch boxes, baskets and lawn work and most of these were required for the 30th. Bedding plants were especially plentiful, as was particularly noticed in the Decoration Day parade. Thirty-two express wagons were filled high with these and taken to the cemeteries of the city. Cut-flowers were plentiful in about all kinds save carnations and prices were well up. There was quite a call for purple flowers, and the old-fashioned lavender lupin which grows wild near the lake came in very useful. Roses are good in all grades. American Beauties are rather small, but other varieties are all of good quality. Sweet peas are inclined to be a little off in color, but their stems are long. Peonies sell readily. Outdoor-grown candy-tuft is on the market and is very useful for design work. Smilax is somewhat scarce, but other greens are plentiful.

ST. LOUIS Stock for Decoration Day was plentiful although the bulk was second grade and prices advancing at lot even on this. Gladiolus spikes are coming in more and prices on fancy America and Mrs. F. King are down a little. Augusta sells well also. Carnations are becoming small and soon will be scarce. Asters are coming in now and are selling well at top prices. Everything else about as usual.

DURING RECESS.

The New York and New Jersey Plant Growers' outing this year will take place on June 24 and 25. The party will leave on the Lackawanna Limited at 10.15 A. M., and go to the Delaware Water Gap, where they will spend two full days and a night. The committee in charge which consists of Julius Roehrs, Jr., and Anton Schultheis, have made full arrangements for a glorious time for all who attend, including prize bowling for the ladies and gentlemen, ride to Stroudsburg, boat trip on the Delaware River, through the Water Gap, besides dancing and other recreations. Tickets can be obtained from the secretary, William H. Siebrecht, Jr., at the Queens Plaza Court Building, Long Island City, at a cost of \$8.50 per person, which includes railroad fare, meals and all expenses.

PERSONAL.

Hugh Chesney, of Hartford, Conn., is now in the employ of Mrs. J. C. Harworth, Farmington, Conn.

S. Hanfling, of Russin & Hanfling, New York, sailed Saturday on the steamship Lapland for a two months' business trip.

Billy Gear is back in Cincinnati again after his long visit in Idaho. Mr. Gear has many interesting happenings on his trip to relate.

Cincinnati visitor—Speed S. Kelley of Lexington, Ky.

Boston visitors: H. A. Bunyard and A. F. Faulkner, New York; J. J. Karins, Philadelphia; Rudolph Roehrs, Rutherford, N. J.

St. Louis visitors—Ed. Denker of St. Charles, Mo.; E. W. Guy and H. Emunds of Bellevue, Ill., and H. Hibbert of DeSoto, Mo.

PEONIES

"PEONIES FOR PLEASURE."
This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure." We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.
Our catalogue of everything you need mailed on application. Write for it today.

NOTICE OF QUARANTINE, NO. 7.

White Pine Blister Rust.

The fact has been determined by the Secretary of Agriculture that a tree disease known as White Pine Blister Rust (*Peridermium strobi* Kleb.), new to and not heretofore widely prevalent or distributed within and throughout the United States, exists in Europe and Asia.

Now, therefore, I, David F. Houston, Secretary of Agriculture, under authority conferred by section 7 of the act approved August 20, 1912, known as "The Plant Quarantine Act," do hereby declare that it is necessary, in order to prevent the introduction into the United States of the White Pine Blister Rust, to forbid the importation into the United States from each and every country of Europe and Asia of all five-leaved pines.

Hereafter and until further notice, by virtue of said section 7 of the act of Congress, approved August 20, 1912, the importation for all purposes of all five-leaved pines from the countries named is prohibited.

This notice of quarantine amends and supersedes Notice of Quarantine, No. 1, promulgated September 16, 1912, and shall be effective until otherwise ordered.

Done at Washington this 21st day of May, 1913.

Witness my hand and the seal of the United States Department of Agriculture.

D. F. HOUSTON.
Secretary of Agriculture.

The five-leaved or White Pines are: *Pinus strobus*, *Pinus Lambertiana*, *Pinus monticola*, *Pinus flexilis*, *Pinus albicaulis*, *Pinus strobiformis*, *Pinus excelsa*, *Pinus cembra*, *Pinus pumila*, *Pinus parviflora*, *Pinus peuce*, *Pinus koraiensis*, and *Pinus Armandi*.—(Ed.)

PLANT QUARANTINE DECISION NO. 3.

The Federal Horticultural Board recommends that Regulation 8 of the Rules and Regulations for carrying out the Plant Quarantine Act (37 Stat., 315), published in Circular No. 41, Revised, Office of the Secretary, issued December 20, 1912, be amended, to take effect as amended on and after May 1, 1913, so as to read as follows:

Regulation 8. Notice of Shipment by Permittee.

Immediately upon the entry and before removal from the port of entry

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS, TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

of nursery stock, for each separate shipment or consignment thereof, the permittee shall notify the Secretary of Agriculture, through the collector of customs where entry is made, on forms provided for that purpose, stating the number of permit, the date of entry, the general nature and quantity of the nursery stock, the country and locality where grown, and the name and address of the consignee to whom it is proposed to forward the nursery stock, together with the probable date of delivery for transportation.

At the same time a copy of the notice to the Secretary of Agriculture shall be sent by the permittee to the duly authorized inspector or other officer of the State, Territory, or District to which the nursery stock is to be shipped. Lists of such inspec-

tors and officers may be obtained on application to the collector of customs or the Federal Horticultural Board, Washington, D. C.

Permits may be canceled and further permits refused if a permittee fails to give either of said notices, or gives a false notice, or knowingly mislabels any nursery stock with intent to evade any provision of the Plant Quarantine Act or of any regulation thereunder.

Should a consignee named in such a notice ship or deliver for shipment to any other State, Territory, or District such nursery stock before it has been inspected by a duly authorized State, Territorial, or District inspector or officer, he shall prior to such shipment give like notice to the Secretary of Agriculture and to the duly authorized inspector or other officer of the State, Territory, or District to which the nursery stock is to be reshipped.

Imported nursery stock which has been once inspected will be allowed to move interstate without restrictions other than those imposed on the interstate movement of domestic nursery stock.

Malcolm Franklin's Crystal Palace, Yardley, Pa.

“IN the Spring of 1912 you built for me at Green Plain Rose Farm, Yardley, one of your houses, seventy-two feet some inches wide and six hundred feet long, which to date has proven most satisfactory. It gives as much light and sun inside as there is outside and has splendid roof and side ventilation.

We planted about twenty-one thousand rose bushes of the Killarney family, and considering the quality and quantity of the roses we are now cutting, it proves to my mind that the Big

House of your build is about all that could be desired for giving best results in modern commercial rose culture.

We have had numerous visitors, growers and others, at the Farm, and one of them exclaimed, in speaking of the fine qualities, workmanship and general appearance of the house, “It is a Crystal Palace.”

GERANIUMS

The report comes from all sections that Geraniums are more in demand this season than ever and that all good stock will be cleaned up. We have an excellent lot of young stock ready to ship out if you wish to grow your own stock for another season, but why bother with it, as we make it our business to provide your stock for you, to be shipped anytime in the fall or winter, you have the room, after Chrysanthemums or another crop has been removed. Our stock houses of Standard sorts alone as now planted contains 300,000 plants as pretty as you ever saw. Then we have Novelty stock, Ivy Leaved sorts, Scented and Variegated varieties to the extent that we are confident we can take care of any order you may place with us. Think it over. Can you afford to bother with the stock yourself for \$18.50 per 1000, for 2-in. plants?

SCARLET BEDDER. We have bought of Elmer D. Smith & Co., stock of this superior Scarlet Geranium and offer good strong plants from 3-in. pots for immediate shipment at \$1.50 per doz., \$10.00 per 100.
SMILAX: 2-in., \$2.00 per 100, \$17.50 per 1000. **CANNAS:** 3-in. pot, good sorts, \$3.00 per 100, \$25.00 per 1000; **King Humbert**, \$5.00 per 100, \$40.00 per 1000.

If you knew a real good field of potatoes and wanted a similar grade, you would have to get your planting stock from that field. The field a mile away naturally wouldn't do. It would not be a matter of price so much as it would be a matter of potatoes. Same in lily fields. Fields of Horseshoe Brand Lily Bulbs are exclusive. They are the very best and most highly cultivated in existence. Now if you want bulbs from these fields you will have to buy Horseshoe Brand, because they are not packed under any other mark. Furthermore the price is not higher than other brands by reason of the volume of business done; so there is no good reason left why you should not buy them.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Cosmos

The growing of cosmos in our northerly sections is a very uncertain crop as they are cut down by a slight frost. Where one has plenty of house room in the fall it would be advisable to grow a batch in pots to flower inside. Young plants can be potted now into 3-inch pots in a rich compost of fibrous loam three parts, well-rotted cow manure one part and a sprinkling of bone meal. These pots can be plunged in a cold frame as they may need it up to 7, 8 or 9-inch pots. They should be pinched two or three times during the summer months. These plants can be kept outdoors until frost threatens when they can be placed in a cool house. You will find these indoor grown blooms superior in size and quality to outdoor ones.

Cypripediums

During spells of wet and damp weather cypripediums will require to be ventilated freely, regardless of other conditions, otherwise the fleshy leaves are liable to rot. They, however, like a good moist atmosphere to grow in so damp down enough to keep the air from becoming too dry. While they like enough of shade to keep the foliage from scorching it should never be made too dense. Apply water at the roots whenever the compost shows a sign of dryness and on all bright days do not forget to give them a good syringing both under and over the foliage. Weak manure water once a week will materially help them along.

Ficus elastica

The propagation of rubber plants on any extensive scale is carried on during a time when hard firing furnishes the needed even and continuous supply of heat. For the small grower, however, there is no better season for the increase of stock than the present and no better course of procedure than mossing. By following this method, which is nothing but a form of layering, full-fledged plants are obtained right at the start. Crippled and lanky plants, the branches of old unsalable specimen's anything unsightly in the rubber line is operated upon, the calling forth of roots at the joints and below the leafy tops being the object. The place to be mossed for the formation of roots first undergoes some sort of mutilation, with a sharp knife, as cutting the wood almost through on one side and inserting a bit of wood or gravel to keep the cut open, washing away the gum after the bleeding has stopped and then tying sphagnum moss in a good thick layer firmly around this part of the wood. Of course it is understood that frequent syringing or pouring water on from time to time will soon cause them to form roots.

Hydrangeas

The old, unsold plants of hydrangeas, and the young stock propagated last winter should now all be out in the field and will there make a rapid growth at this season. By a judicious cutting back of fast growing branches, and nipping the less vigorous growth, we endeavor to work up a compactly formed and shapely specimen. After the first week in July all pruning or stopping on stock thus planted out should be discontinued for the season, since if allowed up any later it would mean a sacrifice of bloom. Strong, sturdy shoots, now starting as an undergrowth from the main stems, should not be removed, for these will develop into the finest flowering branches a year hence. All weak and straggling growth, however, must be cleanly cut away, and the plants kept free of these at all times. By now topping the plants for the last time we obtain fine material for propagation. These top ends thus cut off and properly trimmed, will in a cold frame root in a few weeks. A good distance between the cuttings will after they are rooted make an immediate potting up unnecessary.

Mignonette

Seeds for the principal crops of winter-flowering mignonette are sown in July and on some places as late as the last week in August. Successive sowings from now until then will result in a supply of flowering plants in pots from early in the fall until the beginning of the new year. They do not like to be disturbed by shifting so sow a pinch of seeds at once in the pots in which the plants are to be flowered and sold, which can be 5 or 6 inch pots, filling them but three-fourths up with soil and adding the remainder after the seedlings are somewhat strong and have been thinned down to one or more of the sturdiest. One-half manure, if it is old enough to be handled, added to the soil, to which a fair proportion of sand is added, is what we use in the growing of pot mignonette. Press it down firmly and let it become rather dry at every watering. Place the seeds under glass, but never shut out the air, nor the light or sunshine after the plants have begun to make headway. When mignonette shows bloom buds too soon for your trade, pinch back and it will flower later. Keep in as cool a house as you may have and attend to watering, staking and syringing.

Lemon Verbenas

Young plants of lemon verbenas should be planted out in a rich piece of ground. Lemon verbenas are fast-selling florists' stock and their culture is not at all burdensome or difficult. Good cultivation and attention will make them produce plenty of material to cut from, so give them a cultivation every week, keeping the ground clear of weeds and open.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Thrips on Grapes

Replying to Mr. Coe's letter concerning thrips on grapes would advise him to take up the cudgel against them without delay. The recurrence of this pest a second year seems to indicate that they are taken on to the vines from some other sources or were allowed to remain in a partly developed state through the winter months. At times thrips are troublesome outside and this is where they may have had their origin in this case. Thrips do not like water, damping and syringing being barriers against them. Once established, however, water pressure seldom dislodges them. Fumigating with Nicotinic acid apparently has not checked them and I am doubtful if a dose sufficiently strong to kill them could be applied without injuring the Muscat of Alexandria growing in the same house. The only safe and sure method is to sponge the rod, laterals and foliage with insecticide as strong as they will stand it. The skin of the berries is so tender that clear water only should be used on them. This should be rain or clear river water that will not mark the berries in any way and be applied with a hand syringe with all possible force. Have someone to carefully hold up the shoulders which will make the interior more accessible.

The Hard and Fast Rule

No other business has such elastic rules as those governing the gardening profession. This is generally admitted yet occasionally we find some men who seem to think things must work mechanically. The very fact of vastly different methods resulting in equally good results convinces one there are more ways than one to "produce the goods" (or perhaps it leaves us in a quandary). As you roam the country you find no two places are alike; something can be learned from each transfer or visit. At times the newly acquired knowledge does not "pan out." Why? Because conditions are different and you probably are lacking in some details your informers have grown so accustomed to that they overlooked to mention them. Look at the vast stretch of country covered by the one name—America—with its many and varied climates, all of which are specially adapted for the growing of some particular product. When these, what we might call, natural specialties come to be grown in another state they are not so prolific or elegant. In a similar way the products of the green-

house will vary, some sections being better suited for certain crops than others, yet we often find these obstacles have been surmounted by giving a little here and taking a little there which might have to be reversed by a neighbor or friend elsewhere. Occasionally drastic steps have to be taken which to the casual observer would seem outrageous, but after an explanation things are viewed in a different light. I know there are instances every season where we have to divert from the beaten track, yet the writer always tries to take subjects collectively rather than individually. Each man has to study his own crops individually and even then the same routine cannot always be carried out. Approximate dates for doing this or that can be used but not set fast. A cold spell such as that which has wrought such havoc amongst the crops in different states during the past spring may change it all and the crops in the greenhouse would suffer too if due allowance is not made for the changing climatic conditions. To use an old phrase "There are a hundred and one things to be taken into consideration," each day bringing some change or varying condition. The fixtures are very few—a fact which we all have ever to remember.

Tying Young Peach Trees

The tying or training of young peach trees is not quite so important as that of a child or young gardener but yet of such importance as to merit a little space being utilized on it, for the old proverb stands good here as elsewhere, "train them in the way that they *should* go and in later years they will not depart from it." Young trees making their first year's wood are forming the main branches of the trees of years to come and if these are not laid in right, the trees never can look good in after years, and maybe the trellis will not fill up evenly as it ought to do. It is an easy matter to say let them go for a time; perhaps that time will be nearly fall with the wood half-ripened. That will never pull in as it ought to do; there will be an ugly bend near the base and most likely the growth itself will take several extra ties to make it anything like straight. "Do it now" while they are young and supple, laying the growths out to cover the whole trellis. Dispense with anything appertaining to a leader; the center should be kept open at all times. I do not wish anyone to think this will grow any larger or better fruit than those treated in a rougher way but it takes very little more trouble or energy to be neat and tidy than it does to do things "any old way."

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Outside Roses

Killarneys and Radiance planted outside for flowering will have to receive the very best of attention to carry them safely through the plague of rose bugs, fly, and thrips, to say nothing of mildew and the rest of the bothersome pests that lie in waiting for the roses. A spray of Pyrox seems to do well in doing away with all the bugs, and as it sticks well one spraying will answer for quite a while. A spray of ivory soap and water will also help wonderfully, as the insects do not like the taste of soap with their meals, and would much rather move to where no soap covers the foliage. The plants should also receive sufficient amount of water with a little feed once in a while according to the growth they are making. As a rule little or no tying will be required as the plants will make short but stocky growth, and will stand up without any support whatever.

Watering Potted Stock

Care should be taken when watering young potted stock, so that all the plants will receive the same amount of water. Also it is best to go over the benches carefully three or four times a day to make sure that no plants are too dry. Beauties will be very severely checked if they are allowed to stand dry for any length of time. Once checked, it will take a long time for the plants to start, and be themselves once more. In fact they seldom will turn out just right.

Spreading or Spacing the Plants

Be careful not to let the plants crowd one another, as they will not be as perfect as when they are given plenty of room. As soon as they begin to run into one another, spread them out so as to allow air and sun as well. Beauties are very particular in this respect and will not stand crowding at all. It is better to tear out another bench of roses, and give the young stock plenty of room.

Hydrangea Sargentiana

The frontispiece to this number of HORTICULTURE depicts a fine specimen of the new *Hydrangea Sargentiana*, but the photograph from which the illustration was made does not do full justice to the subject. The plant, grown by William Anderson, gardener to Mr. Bayard Thayer, South Lancaster, Mass., is a splendid example of cultural skill, on which Mr. Anderson is to be heartily congratulated. At the Massachusetts Horticultural Society's show on Saturday last where the specimen was on exhibition, it attracted the attention of all visitors. The plant is nearly three feet tall, very bushy and densely clothed with ovate, pointed, dark velvety green leaves, heart-shaped or rounded at the base, 9 to 12 inches or more long and 6 to 8 inches wide, borne on stalks 3 to 4 inches long. The stems and leaf stalks are clothed in a remarkable manner with pale gray bristles and the leaves with their rich, but subdued, lustre suggest some tropical Aroid. The flower heads, reared well above the leaves, are flat, 6 to 9 inches across, with a few nearly white sterile ray-flowers surrounding a mass of blue-purple fertile flowers.

than trying to crowd them all into one house with the result that half the plants will be minus about half of their foliage.

In spacing the plants it is best to plunge the pots about one-half into the ashes, on the bench. This will help keep them from drying out too rapidly, and also be a great aid when syringing, as it will not knock the plants all over the bench every time they are syringed.

The Sod Heaps

Now is the time to begin turning over all the sod heaps so as to have all the soil practically ready for the benches and not be obliged to stop every once in a while to prepare the soil. On most places the planting will be well under way, and houses put into shape as fast as the help can do so.

The Required Number of Men

Many of us will usually be short of men at the busiest part of the season. Many because they cannot get extra men, and more because they will not get them. It does not pay to let a lot of work go undone, for the returns will suffer if the work is not done at the proper time. It pays to have enough help and do all when it should be done. A man who is a week ahead with his work is the one who has many weeks ahead of another. A man a month behind is always in debt and struggling.

The Manure for the Fall Mulching

Do not wait until it is wanted, before you begin to think of getting in your supply of manure for the fall and winter use. Manure piled up and turned over every now and then will be in excellent shape by the time it is needed, next fall, and the plants will show the difference in the growth. The older the manure is the better for the plants, as they can then take hold of it at once and grow on much faster than if it is applied fresh from the stable.

This new hydrangea is native of the mountains of Central China where I was privileged to discover it in the early summer of 1907. It is a rare and local species and grows in the thickets and margins of woods between 4000 and 6000 feet altitude. The leaves are impatient of direct sun-rays and the stem is less woody than that of allied species. In this section of North America it is best treated as a cool greenhouse plant.

With its noble foliage, bristly stems and leafstalks, this newcomer is remarkably distinct from all other members of its family. It lacks the huge heads of monstrous flowers commonly associated with the name "Hydrangea," and presumably for this reason failed to interest the judging committee. At least, no other fact suggests itself to explain the award "Honorable Mention"—with which this committee insulted the specimen submitted to them.

S. H. Wilson.

**Sulzer's
mistake**

It is much to be regretted that the Governor of New York has chosen to veto the bill which had passed through the legislature carrying an appropriation for a proper equipment for instruction in floriculture at Cornell. The protest which has been expressed by the New York Florists' Club should also be voiced by every similar organization in the State of New York and by every individual who would like to see horticulture accorded the position of dignity and importance to which its character and extent now entitles it among the great industries of New York. Governor Sulzer must have been sadly lacking in knowledge of the facts, otherwise we cannot conceive of his putting the seal of official disapproval on a proposition so meritorious, thus refusing to the plant and flower growers of his State that recognition which several other States have generously accorded.

Affiliation

HORTICULTURE has from first to last been a consistent and persistent advocate of the principle of federation between organizations, local and national, working for the interests of any department of horticulture. There are very many of these bodies scattered over every section of the country now—clubs, societies and associations—all with commendable aims and the majority of them strong in numbers and able financially. Lack of cohesion and facilities for joint consideration of problems common to all or united action on matters appertaining to the general welfare has, however, and will still continue, until some practical co-operative system has been adopted, to prevent any commanding demonstration of the aggregate strength of the great horticultural industries of our country. We agree with Mr. Farenwald that the only practical means through which the needed concentration of purpose and action may be effected is by an alliance under the broad mantle of the S. A. F., whose national charter and wide scope affords room for any and all departments to get together and help one another. It can be done.

**Be
thankful**

That the season of busy activity for the florist, seedsman and nurseryman, is rapidly waning is apparent to all and if there are any at whose door prosperity has thus far failed to knock the few weeks that yet remain offer little opportunity to recoup. For the city flower dealer the end comes into sight this year with unusual suddenness. The part which the automobile plays in thus shortening the flower-buying season may not be easily determined but that it is a factor will hardly be questioned. Looking back over the season as a whole we are inclined to regard it as a fairly successful one, more so than we, perhaps, had reason to expect, considering the many disturbances and upheavals, political, economic and social, that have marked its progress and called a temporary halt, at least, in many lines of commercial enterprise. We believe that most florists have done as well as usual in the season now closing, which is a proud record as compared with that of many other avocations and, this being so, there is little reason for growling now even if the bottom has fallen out of things rather abruptly. Those who have averaged up well in the aggregate should be thankful, for it might have been much worse.

**The
Sweet Pea**

We look forward with much pleasurable anticipation to the approaching exhibition of the American Sweet Pea Society which, as stated in Secretary Bunyard's prospectus in this issue, will be held in Boston on Saturday and Sunday, July 5th and 6th. It has been objected by some that these dates will find the public pretty well scattered out-of-town, many people taking advantage of the July 4th coming on Friday to extend the holiday over to Monday, and that the attendance will suffer from that cause. This is probably true but, on the other hand, it ought to work to the advantage of florist trade people who are interested in the sweet pea, affording them an excellent opportunity to also take a couple of days' vacation with Boston and the sweet pea show as their objective point. Nothing but a repetition of last year's atrocious weather conditions can prevent this affair from being the most wonderful display of sweet peas ever seen on this continent. It will practically mark the finish in the old grandiflora type so far as the exhibition board is concerned. The Spencers will undoubtedly carry everything and with favoring weather for the next four weeks they will make a show worth traveling many miles to see.

SEEN WITH FOUR EYES

An Acquisition in Geraniums.

We advise all our readers who sell or use bedding geraniums to get in early on the new Paul Grumpel, a single scarlet so vivid in color and so large of flower and truss as to put all the older varieties in the background.

A Rose of Merit.

Referring to our recent plea for a square deal for the new rose introductions, C. H. Totty asked us to inspect his houses of the novelty, Mrs. Shawyer, and point out a mildewed leaf if such could be found. Not a trace of either old or new mildew was seen, although every part of the houses was searched. Mr. Totty asserts that this has been the condition all winter through and he certainly has demonstrated the validity of his claim that Shawyer, under intelligent culture, is not a mildewed rose. As to its productiveness any one who has ever seen it growing will be fully prepared to vouch for it.

At South Orange, N. J.

A Rambler rose which has been in existence for several years and merits wide distribution, but is scarcely known outside W. A. Manda's nurseries at South Orange, N. J., is Pink Pearl, a cross between Wichuraiana and Meteor. The flower is a lovely shell pink, exceedingly double and beautifully modelled. The foliage is very large and glossy.

Mr. Manda is dividing and potting for the last time the stock of his big novelty *Polypodium Mandaianum*, which is to be sent out in the fall of 1913. Houses and frames are filled up with it as it is a very rapid propagator and lively grower. A new tree fern from Australia seen here is *Alsophila robusta*. It seems to be all that the name implies.

A Carnation Grower.

We had the pleasure of looking over two houses of carnations recently which, in our humble opinion, were about the finest we have ever seen at this time of the year. They are the Backer range at Billerica, Mass., and are in charge of Gustave Thommen. Never have we seen plants more healthy and robust and many of the flowers stand on three foot stems. Although no syringing is done and the last fumigation was given in January there is no trace of either thrips, spider or aphids. "Kill the father and mother and children are impossible," is Mr. Thommen's remedy for these pests. Early and thorough work in the fall saves all future trouble and the condition of these houses with their 20,000 plants is indisputable proof of the correctness of this method.

Orchid Hints.

Joseph A. Manda's two new houses are, as well as the old ones, filled to their capacity with orchids, cattleyas mainly. *Gigas* is now flowering grandly and *Gaskelliana* is already exposing its sheaths. Mr. Manda says that, contrary to the experience of most growers of cattleyas for commercial cut flower purposes, he finds *Schroederia* a profitable investment. This,

CATTLEYA DOWIANA.

One of the most gorgeous of the cattleyas in size of flower and richness of coloring. The big frilled lip is purple and violet rose, beautifully streaked with gold and the sepals and

petals are bright nankeen. It is a strong grower and requires more heat than the cattleyas usually grown commercially. The flowers generally bring the top price in the market.

he explains, is due to careful planning to flower it out of the natural blooming season, thus avoiding the time of oversupply. Dowiana is a prime favorite here and Mr. Manda has probably a larger stock of plants of this species than can be seen elsewhere in this country. Imported labiatas are running small now and it is evident that the district has been practically denuded of the large plants which were collected and so freely distributed a few years ago.

A Great Nursery.

The extensive nursery establishment of R. & J. Farquhar & Co., at Dedham, Mass., is rapidly assuming an appearance of completeness and when additional greenhouses and driveways now contemplated are finished they will have an up-to-date outfit unrivaled in many respects by any in this country. Among the buildings to be erected at once is a herbaceous plant propagating house, 40 x 200.

In the large houses of the main range may be seen a new and very serviceable style of concrete bench. The width of the houses accommodates eight benches, each 4½ feet wide. The sides, instead of being of even thickness, as customary, are tapered up to the top to fit the bevel of a flower pot, thus saving considerable bench room.

The big packing shed, 60 x 300, with cement walls and floor and glass roof, is a busy place and a model of convenience. Another cement apartment, partially underground, 50 x 125 feet, has recently been constructed for use as a winter store-house. It is the aim at this establishment to be able to supply all the hardy herbaceous plant stock in pot-grown form for shipment in summer—in fact, all the year round. Roses are supplied in this way instead of being dormant.

PERSONAL.

George Newsham of New Orleans, La., left for England last week on the S. S. Baltic.

Mrs. H. H. Berger and Miss Berger of New York sailed on the S. S. Lapland May 31st for Europe.

P. Ouwkerk of Weehawken Heights, N. J., sailed for Europe June 10th on the S. S. New Amsterdam.

J. C. Vaughan, Chicago, and Mrs. Vaughan, sailed from Montreal for Europe June 5th, on the S. S. Victorian.

Mr. and Mrs. John Olinger of Aurora, Ill., are visiting their son and daughter-in-law, Mr. and Mrs. P. J. Olinger at the latter's home in Bellevue, Ohio.

Sydney B. Wertheimer and wife (nee Miss Edna Leimdorfer), who were married on June 3rd, sailed for Europe on the steamship France, June 5th, and will return early in the autumn.

Cincinnati visitors: Chas. Dudley and daughter, Parkersburg, W. Va.; Mr. and Mrs. G. A. Beckmann, Middletown, Ohio; Mr. and Mrs. Norval Kizer, Marietta, Ohio; A. W. Brandt, Indianapolis, Fred Rupp, Lawrenceburg, Ind.; Henry Lodder, Hamilton, Ohio, and H. A. Staley, Vanceburg, Ky.

George Janes, formerly employed with George H. Penson in the fruit department at Duke's Park, Somerville, N. J., and now in charge of the park and greenhouses on Mr. Wheat's estate at Gaffney, S. C., sailed on the steamship Mauretania on June 11, and will return with his bride on the steamship Oceanic, leaving Southampton, July 9. The happy young lady is Miss Besie Griggin, of Princes Risborough, Bucks, England.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

There was an attendance of about eighty interested and enthusiastic members at the meeting of the New York Florists' Club last Monday evening. W. F. Kasting of Buffalo, A. Farenwald of Roslyn, Pa., and W. R. Pierson of Cromwell, Conn., were visitors, the last named bringing with him a fine vase of Milady rose. A very dwarf form of Scotti fern was shown by John Scott, Brooklyn.

A number of committee reports were presented and favorably acted upon. H. A. Bunyard on behalf of the transportation committee recommended that the club members travel to the Minneapolis convention via the D. L. & W. R. R., the rate being \$27.80 where party consists of ten or more. The committee was given full power. A resolution expressing disappointment and regret at the action of Gov. Sulzer in vetoing the state appropriation for equipment for teaching floriculture at Cornell was presented by Patrick O'Mara as chairman of the legislative committee. The resolution was adopted by a unanimous vote. The proposed flower show for next spring at the Grand Central Palace was discussed by several members and the list of guarantors up to date was increased by the addition of a number of additional contributors. The date selected for the show is March 21 to 28, 1914. A committee was appointed to meet a committee of the Horticultural Society of New York for joint action on preliminary preparations.

Adolph Farenwald addressed the meeting on his favorite subject of "Affiliation." He instanced the good results attained in Europe through the co-operative spirit existing among allied organizations and asserted that we in this country are suffering from a lack of the general advantage thus gained. He advocated the admission of florists' club members to membership in the S. A. F. on payment of \$1.50 by each in addition to their club dues. The united force of twelve or fifteen thousand members thus obtained, together with the funds so secured, he argued, would place the S. A. F. in a position to push to a successful conclusion many needed reforms which in the present scattered condition of the flower industry are impossible of accomplishment. He urged that the New York Florists' Club come out first with a practical proposition on these lines and set an example for other bodies to follow.

W. F. Kasting thought that the amount suggested by Mr. Farenwald as dues was insufficient and recommended that it be not less than \$2. The S. A. F., of which he is treasurer, should and undoubtedly would be willing to grant some reductions to club membership applying for admission as a body. The clubs should be working branches of the mother society and he favored agitation of this matter until a generally satisfactory plan has been worked out. Mr. Kasting spoke with fervor of the need of some adequate building for the use of the horticultural industries of the Empire State and urged that all the state or-

ganizations get together for concerted action to demonstrate to Gov. Sulzer that his veto of the recent bill was a mistake and convince him that when the proposition comes up again next year it should have his approval.

At times during the evening a representative of the Edison Company entertained the meeting with some remarkably fine phonographic music.

AMERICAN SWEET PEA SOCIETY.

At a meeting of the Executive Committee Saturday, May 31st, the date for the annual summer exhibition and convention decided upon was July 5th and 6th. The Massachusetts Horticultural Society have graciously accorded us the privilege of using their hall and will also hold their annual exhibition jointly with ours. They have arranged a specially attractive schedule amounting to nearly \$500 and the outlook for a fine exhibition is assured. Our society is now completing its schedule. The cash prizes arranged for will amount to \$500 apart from the special prizes in cash, cups, medals, etc., given by individuals.

As no admission is charged at any of our exhibitions and as our only source of income is from the membership dues, we have to rely upon the generosity of the trade and a few members to subscribe to and guarantee the prize list. The society is doing good work. The Cornell Bulletins issued yearly under our auspices contain valuable information and are free to members of the American Sweet Pea Society.

The Sweet Pea is growing in popularity and is now a source of revenue to the florist, practically all the year round. With increased membership, we hope to do more and better work. The annual dues are \$2 per year; life membership \$25. We also specially appeal to the trade for subscriptions toward the exhibition fund, as you all benefit indirectly by these exhibitions, whether in the interest of the Sweet Pea or other specialized flowers.

We trust sincerely, that we may hear from you at an early date.

For further information write to the secretary, HARRY A. BUNYARD,

342 West 14th St., New York City.

SOCIETY OF AMERICAN FLORISTS

Department of Plant Registration.

As no objections have been filed, public notice is hereby given that the registration of the Aster "Sawyer Asternum," by Albert A. Sawyer, Forest Park Ill., becomes complete.

Public notice is hereby given that as no objections have been filed to the registration of the Geranium "Maryland," by R. Vincent, Jr., & Sons Co., of White Marsh, Md., same becomes complete.

JOHN YOUNG,

June 9, 1913.

Secretary.

To the S. A. F. Convention program as already published the following should be added: A meeting of the Florists' Telegraph Delivery will be held on Wednesday, August 20, at 2 o'clock. This organization has increased its membership by twenty-five firms within the past few weeks.

HORTICULTURAL SOCIETY OF NEW YORK.

A very successful exhibition of plants and flowers was given by the society, in cooperation with the New York Botanical Garden, in the Museum building of that institution, in Bronx Park, on June 7 and 8. There was a large attendance, especially on Sunday afternoon. The schedule was planned mainly for peonies and roses, resulting in a fine display of these flowers. The competition in the roses was keen, there being nearly 300 vases exhibited. Large displays of hardy shrubs and trees, irises, rhododendrons and azaleas, herbaceous plants, and orchids filled the two large halls on the ground floor of the Museum.

The following are the awards made at this exhibition:

Peonies.

Three varieties, 6 flowers of each: 1st, Cottage Gardens Co.; 2nd, T. A. Havemeyer, A. Lahodny, gard.

Three pink varieties, 6 flowers of each: 1st, Cottage Gardens Co.; 2nd, T. A. Havemeyer.

Three rose varieties, 6 flowers of each: 1st, Cottage Gardens Co.; 2nd, T. A. Havemeyer.

Three crimson varieties, 6 flowers of each: 1st, T. A. Havemeyer; 2nd, Cottage Gardens Co.

Collection of singles, 3 flowers of each: 1st, T. A. Havemeyer; 2nd, F. R. Pierson Co.

Collection, not less than 6 flowers of each: 1st, T. A. Havemeyer; 2nd, F. R. Pierson Co.

Miscellaneous.

Collection of hardy roses: 1st, Mrs. Benj. Stern, W. D. Robertson, gard.; 2nd, Gen. E. A. McAlpin, J. Woodcock, gard.

Collection of hardy flowering shrubs and trees: 1st, T. A. Havemeyer; 2nd, H. Darlington, P. W. Popp, gard.

Collection of hardy rhododendrons and azaleas: 1st, T. A. Havemeyer; 2nd, F. R. Pierson Co.

Collection of hardy herbaceous plants: 1st, Miss B. Potter, Geo. Wittlinger, gard.

Collection of irises: 1st, H. Darlington; 2nd, John Lewis Childs.

Six orchid plants, 6 varieties: 1st, Clement Moore, J. P. Mossman, gard.; 2nd, Lager & Hurrell.

Three orchid plants, 3 varieties: 1st, Lager & Hurrell; 2nd, Clement Moore.

Specimen orchid plant: 1st, Lager & Hurrell; 2nd, Clement Moore.

Special prizes: Bobbink & Atkins, for a collection of hardy herbaceous plants, bronze medal; Clement Moore, for a so-called pink variety of Vanda coerulea, certificate for a seedling of Cattleya speciosissima x Dowiana, silver medal, and for a collection of Laello-cattleyas and Cattleya hybrids, silver medal; Mrs. F. A. Constable, Jas. Stuart, gard., for three well-grown Fuchsias; W. A. Manda, for Dendrobium Sanderae, silver medal.

The judges were James Stuart, I. S. Hendrickson and Wm. Tricker.

The schedule for the fall exhibition of the society, to be held at the American Museum of Natural History, Oct. 31 to Nov. 4, is now ready for distribution, and copies may be had by application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City.

Since the publication of the schedule the following special prizes have been offered:

By M. C. Elbel, for a group of at least sixteen vegetables, to be judged by the scale of points of the Lenox Horticultural Society, a piece of silver, value \$50.00.

By Arthur T. Boddington, for a group of eighteen vegetables, to be judged by the same scale of points, \$25.00, cash or silver.

By W. E. Marshall & Co., for a group

of vegetables, a piece of silver, value \$25.00.

A second prize will be offered by the Horticultural Society of New York in each of the above.

The first special fund of the society has been established by Mrs. William Barr, of West Orange, N. J., in memory of her husband. She has given \$500 to be known as the Wm. Barr Fund, the interest of which is to be used in defraying flower prizes.

GEORGE V. NASH, Sec.

MINNEAPOLIS FLORISTS' CLUB.

At the June meeting held at Rice Bros.' store the following committees made reports:

Theo Wirth, chairman of the Convention Association, reported everything proceeding very favorably. Outdoor garden space was being taken up rapidly and the trade who were not taking advantage of this opportunity were missing a good advertising medium. The program was now completed and had been forwarded to Sec. Young. Souvenir album was making exceedingly good headway and would be a little out of the old plan of a large unhandy album but of a convenient carrying size. Special concert had been arranged at Lake Harriet for Friday evening with special privileges for the visitors. The Executive Committee was holding regular meetings and he wished to thank the members for their prompt and active assistance.

John Rovik, Baseball Committee chairman, made report of team selected for the convention and the club authorized him to secure suits, get busy and practice, showing the All Star team of the S. A. F. and O. H. that they were going up against the real thing. Mother's Day adv. committee, Carl Lindskoog, chairman, reported the cost of the adv. \$130, contributed by the trade, both wholesale and retail. A big success, the large amount of editorial space the papers gave in connection with the advertisement making it very conspicuous and discussion showed that the demand far exceeded the supply from these efforts.

Henry Will presented the club a box of cigars in honor of a boy born on June 1st. A unanimous vote of thanks was extended Mr. Will for his treat and the junior Will was made an honorary member of the baseball and bowling teams.

The July meeting is dropped and special meetings will be subject to call of the chair.

CAL F. RICE, Sec'y.

SPRING FLOWER SHOW.

By the request of the joint committees of the Horticultural Society of New York and the New York Florists' Club, the announcement is made that a Spring Flower Show, international in character, will be given by the organizations mentioned, in the New Grand Central Palace, New York, March 21-28, 1914. A meeting of the committees will be held within a few days, at which organization will be effected and a preliminary schedule drafted, copies of which will be distributed within a week or two. A

guarantee fund has been started locally and already amounts to several thousand dollars and a number of special prizes have been offered. A horticultural trade exhibition will be held in connection with the show. The undersigned has been appointed manager of the trade exhibition, and will be pleased to make reservations of space and furnish any information required. He has also been entrusted with the preparation and publication of the official program of the show, and will be pleased to quote advertising rates and book contracts for advertisements at any time.

Meeting the wishes of the exhibitors at the recent show, the display will be confined to two floors, and all music entertainment and business will at the next show be relegated to the second floor.

JOHN YOUNG,
Manager.

CLUB AND SOCIETY NOTES.

The 12th annual convention of the Ohio Association of Cemetery Superintendents will be held on June 25 and 26 at East Liverpool and Steubenville, Ohio, with headquarters at East Liverpool.

To the members of the American Gladiolus Society:

I take this opportunity, so that there will be ample time to select my successor, to announce that I shall not be a candidate this year for secretary of the A. G. S. Thanking you for the many courtesies extended me in the past,

Sincerely yours,

L. MERTON GAGE.

South Natick, Mass., June 7th, 1913.

At the meeting of the Cincinnati Florists' Society last Monday the following candidates for office for the ensuing year were nominated:

For president, A. C. Heckman, Jr., James Allen; vice-president, Ed. Schumann, J. Chas. Murphy; secretary, Alex Ostendarp, O. H. Hoffmeister; treasurer, Albert Sunderbruch, Chas. H. Hoffmeister; trustee, Gus Adrian, Henry Schwarz.

An outing committee consisting of Chas. H. Hoffmeister, A. C. Heckman, Jr. and R. C. Witterstaetter was appointed.

At the meeting of the Chicago Florists' Club, June 5th, it was decided that this year's picnic be a short boat trip to Michigan City on Sunday before the departure of the convention. All arrangements were left in the hands of the Good of the Club and Sports Committee. The time of the departure of the special train to the convention city, and whether breakfast be served on the train, was left in the hands of the transportation committee. The special relief committee gave a complete report on the good work they have done in securing stock and distributing same amongst flood victims who have appealed for aid. The names of the donors and the receivers were read.

This being Peony Night the Good of the Club Committee secured some fine specimens of a snow-white peony. Many comments were passed as to their beauty. It was quite a treat to have Mme. Peony with us.

ED. C. TOEPEL, Sec.

RHODODENDRON AND PEONY SHOW.

Visitors to Horticultural Hall, Boston, last Saturday and Sunday were treated to a display of floral magnificence rarely equalled for brilliance. Peonies, rhododendrons, irises, herbaceous flowers in great variety, orchids and carnations all contributed to this outburst of color which was enjoyed by a large number of visitors, the show being free to all.

The largest contributor was R. & J. Farquhar & Co., who put up a tremendous display of German irises, there being 133 large vases of these in which the stately Pallida Dalmatica occupied a large place. In rhododendrons Walter Hunnewell, gard. T. D. Hatfield, was the largest exhibitor, filling three tables with over 500 trusses. Mrs. J. L. Gardner, gard. Wm. Thatcher, was represented by a large collection of peonies. Thos. Meehan & Sons presented a splendid lot of trees and shrubs. There were some fine orchid groups from E. B. Dane, gard. D. Mackenzie, J. T. Butterworth and F. J. Dolansky. A. A. Pembroke and Patten & Co., were in with some fine carnations and Wm. Sim with new Spencer sweet peas. In novelties Bayard Thayer, gard. Wm. Anderson, led in interest with a fine plant of Hydrangea Sargentiana which is described fully in another part of this paper. The list of awards which we here append tells the rest of the story as to the exhibitors and what they staged.

List of Awards.

Orchids, arranged for effect—1st, E. B. Dane; 2nd, Mrs. J. L. Gardner. Rhododendrons—Largest and best collection: 1st, Francis Skinner. Hardy azaleas—1st, Francis Skinner. German irises—1st, William Whitman; 2nd, E. F. Dwyer & Sons; 3rd, T. C. Thurlow's Sons Company. Hardy herbaceous flowers—1st, Max Haendler (Old Town Nurseries); 2nd, Blue Hill Nurseries; 3rd, Frederic J. Rea.

Gratuities—F. J. Dolansky, Cattleya gigas and Cattleya Mendelii; J. T. Butterworth, specimen plant *Miltoria vexillaria*; Miss Cornelia Warren, display of *Oncidium flexuosum*; Mrs. J. L. Gardner, specimen plant, *Anthurium Brownii*; William Whitman, collection of German iris; T. C. Thurlow's Sons Company, collection of peonies and iris; George W. Page, collection of German iris; Mrs. J. L. Gardner, display of peonies; Mrs. Frederick Ayer, *Viburnum opulus*; Patten & Company, artistically arranged vase of carnation Princess Dagmar; Mrs. Frederick Ayer, carnations; William Sim, sweet peas; Mrs. R. Goodnough, *Hemerocallis*; Mrs. Frederick Ayer, pair of *Phoenix Roehelentii*; Miss Cornelia Warren, display of hydrangea in pots; Mrs. E. M. Gill, display of cut flowers.

Silver medals—F. J. Dolansky, Cattleya Mossiae Wagneri; A. A. Pembroke, eight vases of carnations; R. & J. Farquhar & Co., display of German iris.

First class certificate of merit—R. & J. Farquhar & Co., *Sniraea Henryi*.

Honorable mention—Thomas Meehan & Sons, collection of ornamental foliaged shrubs in tubs; A. H. Fewkes, hybrid *Hemerocallis*; Charles W. Parker, collection of iris and other flowers; Charles W. Parker, *Wistaria multijuga*; Mt. Desert nurseries, collection of herbaceous flowers; Walter Hunnewell, display of hybrid rhododendrons; Bayard Thayer, *Hydrangea Sargentiana*; R. & J. Farquhar & Co., display of double pyrethrums.

HORTICULTURE PUB. CO.

Gentlemen—Kindly take my ad. for roses out of the paper. Stock is nearly all sold.

Yours very truly,

J. HENRY BARTRAM.

ARE WE GIVING EACH OTHER THE SQUARE DEAL?

(Extracts from a paper by S. S. Skidelsky, read before the Florists' Club, of Philadelphia, June 3, 1913.)

After instancing the creditable records of the various national and special societies, the National Flower Show and other evidences of steady progress, Mr. Skidelsky said in part:

"It may prove something of a jolt to many of us, when we discover that, much as we have progressed in our business, much as we have modernized our business methods with regard to the flower-buying public, much as we have improved things about our stores and our greenhouses, we have made but little, if any, progress, in so far as we ourselves with relation to each other are concerned. It is a fact beyond question, that often men, possessing unbounded energy, perseverance and business acumen—all the qualifications necessary to insure one's own success—are at the same time exceedingly selfish and narrow minded.

"Let us take a casual glance at the business relations existing today between the average grower and the average storekeeper retailing his product. Are they working hand in hand for their mutual benefit? Do we find them in true brotherly accord, each considering the interest of the other and both striving to advance the general good of all? Hardly.

"In the majority of cases the grower is still looked upon by the retailer as a source to be exploited, as a means to a selfish end. And when the grower finally rebels and his agent, the commission man, is forced to enter into a business transaction with the street merchant, or fakir, in order to unload his surplus—Oh, what a wail is raised!

"It seems to be the unqualified opinion of some retail men, that it is the duty of the grower to protect the interests of what they call 'the legitimate trade,' regardless of all other consideration. But then is it not up to the retailer to devise means and ways of moving stock when stock is plentiful? We hear so much of publicity these days. What does publicity mean, anyway? Is it an academic question to be discussed and debated upon in our club rooms or does it mean advertising, pure and simple, in the manner in which any other business man advertises merchandise? What holds true of bonnets and other merchandise, holds equally true of cut flowers and plants. There is nothing gained by disregarding the law of supply and demand; nor is it possible to create and maintain inflated values on merchandise, the supply of which exceeds the demand, or at a time when business conditions in general fully warrant reductions in prices. The successful business man, we all know, is he who creates the demand and keeps things moving in and out of season and not he who simply waits for better times without bestirring himself to hasten them.

"There is, however, another side to the story. The grower in his turn is not at all slow to retaliate when his opportunity presents itself.

"The holiday seasons invariably offer opportunities to hit back, to hit hard. Need I mention about pickled stock or flowers kept too long on the plants in order to bring them in just in 'nick of time' and thus make them yield

DISPLAY OF SPRING FLOWERING BULBS

At the Bayard Thayer Estate, Gard. Wm. Anderson, South Lancaster, Mass.

We gave a somewhat extended description last year of the great spring bulb display at this noted Massachusetts estate. The accompanying views show the May-flowering tulips and daf-

tures of the garden while they are blooming, but are not distinguishable in a photograph. Mr. Anderson makes it a point to secure and try out all the bulb novelties as soon as offered,

At the Bayard Thayer Estate, Gard. Wm. Anderson, South Lancaster, Mass.

fodils at their best. While large blocks of one variety are used in the mass beds, a great variety of rare novelties and species are planted. These are the most interesting fea-

tures of the garden while they are blooming, but are not distinguishable in a photograph. Mr. Anderson makes it a point to secure and try out all the bulb novelties as soon as offered, better returns? How often do we hear about ordinary Beacon carnations bringing as high as \$15.00 per 100 at Christmas time? What sort of a margin can the retailer make on such stock, especially when a lot happens to go to the bad and when his customer absolutely refuses to pay at the

either here or abroad and the gardens so ably managed by him are a source of much interest and instruction for those who have opportunity to visit them.

time of settlement? Nor need I add that under such circumstances the retail man in general and the small fellows in particular, have not the ghost of a chance to make their salt.

"Thus we see that an atmosphere of antagonism exists between two progressive bodies of men, to the detri-

ment of the interests of both. Instead of working side by side with the sole aim and object of giving each other the square deal at all times and under all circumstances, we find that the contrary is the case. I am reminded of an argument between two boys. Said one to the other, 'If it were not for the cow, we would have no milk.' 'If it were not for the milk, we would have no use for the cow,' replied the other youngster.

"The retailer who educates the public and creates the demand for all that is best in flowers and plants, helps the grower as well as himself. On the other hand, the grower who is enterprising enough to invest his capital and to assume tremendous responsibilities in order to meet that demand, helps the retailer. It seems to me that the time is ripe when retailer and grower should get together and organize a true protective association that would concern itself with things pertaining to the general good of the trade; one that would aim to promote the interests of both. There is no need for a retail men's protective association and a growers' protective association, as separate and distinct organizations. Various irregularities and abuses practiced today as a matter of course, could be then easily corrected and overcome.

"What we need is a well defined business policy, one that would insure the square deal to each and every man in the trade, be he grower or retailer. Let us ever remember the trite, but gospel true injunctions—'A house divided against itself cannot endure,' and that 'in union there is strength.'"

ROYAL HORTICULTURAL SOCIETY'S SPRING SHOW.

For many years the Temple Show has been one of the chief events of the London season. Although these historic gardens in the heart of the Metropolis were always found conveniently accessible, their limited area left much to be desired from an exhibitor's point of view. This year all the fascinating attractions of the Temple Show were transferred by the Royal Horticultural Society to the more spacious grounds of the Royal Hospital, at Chelsea, where last year the International Horticultural Exhibition was held. The three days' show which opened on May 20th, was far in advance of any previous exhibition which has been held by the Society. The bigger space available allowed of a more liberal apportionment of space to exhibitors. This year there were 244 exhibitors, as compared with 126 at the last Temple Show. A large marquee was erected, 300 feet long and 275 feet wide, covering an area of over two acres. Under this wide expanse of canvas an array of choice floral groups furnished a picture of indescribable beauty.

The Orchids.

Orchids, of course, made a striking display, a costly collection being contributed by the leading growers. Sir George Holford, K. C. V. O., exhibited some exquisite specimens from his famous Westonbirt conservatories. A first-class certificate was awarded Laelio-cattleya Britannia (Westonbirt variety). The sepals and petals are rosy-lilac, the labellum rich claret red.

INSECTICIDES, FUNGICIDES, VERMICIDES, ETC.

Our Company is now in position to cater to the demands of floriculturists, horticulturists and agriculturists alike with our various products. Our list includes **APHINE**, an insecticide intended for general greenhouse and garden work against all sap sucking insects—**SCALINE** adapted principally to nurseries, orchards and the field, for all scale and sap sucking insects—**FUNGINE**, a fungicide which has already taken the place of Bordeaux mixture and lime and sulphur among many leading growers—**VERMINE**, a soil sterilizer and vermicide for all soil worms and insects,—to which we now add **NIKOTIANA** and which will prove as efficient as the other nicotine preparations already established.

For further particulars see our regular advertisement, page 895.

MADISON, N. J.

Awards of merit were allotted to Laelio-cattleya Ganeymede (Holford's variety) and Odontoglossum illustrissimum (Westonbirt variety). Some remarkable blooms of unique form and tint were seen in the orchid collection of Sander & Sons, St. Albans. Prominent were Brasso-cattleya Vilmo-

riniana (var. Etna), and Odontonia Laelia Sander, which received awards of merit. Orchids in a wide variation of tints and forms were also staged by Charlesworth & Co., Cypher & Sons, J. & A. McBean, and others.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Keokuk, Ia.—The Gate City Seed Co. will in the near future erect a three-story office building and warehouse and a five-story mill and elevator at Third and Exchange Sts.

The James Vick's Sons Company was represented by W. H. Dildine in a wholesale trade excursion which was run out of Rochester, N. Y., under the auspices of the Chamber of Commerce, covering a large part of Western and Central New York, from June 3 to June 5. About forty-five wholesale concerns were represented, two banks, telephone companies and several newspapers. The result was the organization of a wholesale trade boosters' association and Mr. Dildine was elected vice-president.

RETARDING PEONY BLOOMS.

(The following useful instructions are contained in a folder being distributed by the Horticultural Society of Chicago.)

The peony is undoubtedly the most gorgeously beautiful of all our hardy flowers, and the ease with which it may be cultivated, and the fact that it is under any reasonable condition sure to produce a fine crop of blooms every year after it is established, makes it deservedly a great favorite.

Its only drawback is its habit of opening all its blooms nearly at the same time, giving a great surplus of flowers for a few days and none afterwards. It is not generally known that the blooming of peony buds can be very easily delayed from several days to several weeks, depending on the variety and the method of treatment.

To delay the opening of the blooms for a few days, they are cut when the petals are just loosening, but when none of them have turned back. All the leaves are removed, except a few of the upper ones, sufficient to give the flower a proper setting of green. They are then wrapped somewhat snugly one dozen or less in a bunch—in two thicknesses of damp (not wet) newspapers, leaving the lower four or five inches of the stems uncovered. The bundles of blooms so wrapped are placed in jars of water so that the lower one-third of the stems are submerged, and placed in a cold, dark location. A cool cellar is an ideal place. In this condition they will keep up to a week without opening, but will open very quickly when unwrapped and brought into the light and warmth.

If it is desired to retard them a longer time, they are cut earlier, while showing full color but before any of the petals have loosened at all, and treated in the same way. The tighter the bud is when cut, the longer it will keep.

Some few varieties can be retarded

only a few days in this way without being injured, while others can be held back for a very long time. The professional peony grower, after preparing the blooms as described, will place them in cold storage warehouses, where the temperature is kept very low and perfectly even, and will hold them there for six weeks in the case of some varieties. There are probably a million or more peonies stored in this manner every season by professional florists in Chicago.

Where the advantages of artificially cooled storage with an absolutely even temperature cannot be had it is probably not advisable to attempt retarding the blooms over two weeks in this way, while some varieties can be held only a very few days.

President Wallace R. Pierson advises us that, the famous rose garden at Elizabeth Park, Hartford, Conn., will be at its best on Thursday, June 19th. It has been decided that the American Rose Society judges will meet on that day to judge the test garden and an invitation is extended to all who are interested in roses to meet at 11.30 that morning at the railroad station in Hartford and visit the rose garden.

This rose garden, established by Theodore Wirth while superintendent of Hartford Park System has been maintained with much skillful care by his successors and in a favorable year such as this is especially, is a spectacle of beauty worth going even a long distance to see. Those who accept the invitation of the American Rose Society will be well repaid for the trip.

The annual commencement exercises of the Maryland Agricultural College, College Park, Md., will begin June 15. Twenty graduates will receive the bachelor's degree, four former graduates will receive a master's degree and nine graduates will be given certificates for a two-year course in agriculture and horticulture.

Celtic, N. Y.-Liverpool. June 26
Cretic, Boston-Mediter'n. June 28

Pittsfield, Mass.—The florists of this city have agreed to close their establishments on Wednesdays at 1 o'clock during July and August.

Noroton Heights, Conn.—Ezra Hartwright has sold his florist business and will go south to improve some property which he owns there.

The J. M. Keller Co. announce that they have purchased the business of William Pankok, at Whitestone, N. Y., and will continue it in their own name. The establishment at Fifth avenue and 65th street, Brooklyn, will be continued as before.

GRADUATIONS.

We are now in the midst of the graduation season and we will soon wake up to the fact that this portion of our business has fallen off greatly the past few years. The day that brought the rush of baskets and bouquets for school delivery has gone, and we only receive a few straggling orders for bunches of flowers for college or high school graduates.

Where are the orders we once received yearly for the public school graduates? Who is responsible for this falling off? As near as I can surmise it must be the heads of the schools instructing the pupils not to have a floral display when graduating exercises are taking place. There must be some reason why such instructions were given.

In one of our prominent cities, some years ago, a public school turned out a large graduating class of children, some from parents in very comfortable circumstances, others poor. Can you imagine the humiliation and embarrassment of the poorer children graduating with high honors and receiving only their diplomas, while those better off graduating with smaller percentages were receiving large baskets and beautiful bouquets? Surely the hearts of the poor little graduates must have ached, and the hearts of the poor parents must have felt a pang, also; and so noticeable that the school board forbade flowers being passed from the platform. Now, the flowers are sent to an adjoining room and called for after the exercises. This to an extent, accounts for the falling off of flower demands at public schools, as the visitors do not see what the children receive until after the graduating exercises are over.

What can be done to bring back the school flowers? We must find some way to restore that which we see fading from year to year and a beautiful custom slowly but surely sinking into oblivion. Try a neatly lettered card in the window, "Flowers for Graduates," and make up a few samples of small baskets and bunches. This might arouse a little enthusiasm in some people who have a relative or friend about to graduate. The pieces must be reasonable in price and within reach of all. When these small tributes start to arrive in quantities and each child receives something, we may feel we are once again on the road we left off years ago. Do not let the old custom die out; start now to make a small display and repeat next year, and so on, and perhaps before many years the call for school flowers will be on again. This can only be done by co-operation among the retailers; one man cannot do it alone.

MR. STOREMAN.

Independence Kan.—A. L. Patridge is now sole proprietor of the firm of Kishpaugh & Patridge. His establishment will hereafter be known as the Patridge Greenhouses.

GEORGE H. COOKE
FLORIST
WASHINGTON D.C.

CHICAGO NOTES.

T. T. Hey of Maywood, Ill., is away to rest and recuperate.

Mrs. Horton, bookkeeper for Bassett & Washburn, is having a needed vacation.

The stock of E. H. Hunt is being sold out to jobbers, no bid for the whole being accepted.

The rose sale, June 4th, for the benefit of the Frances Willard National Hospital, brought nearly \$4,000. Both natural and artificial flowers were used.

Frank Ayers, who spends his leisure hours touring the surrounding country, says it looks to him as if the local peony crop is severely injured by the frost we had in May.

Miss Nettie Parker, of the Chicago Carnation Co., whose illness was mentioned last week, proved to have diphtheria. Her friends are pleased to hear that she is convalescing.

Two new houses are being added to the equipment at Plant "A," Poehlmann Bros., Morton Grove. One is a 125-foot lath house and the other a cooling house of the same size.

Chicago experienced a drop in temperature of 46 degrees the night of June 6th. The thermometer had reached 92 degrees when the drop began. More business was done by florists the next day than during the previous six.

Mr. and Mrs. C. L. Washburn leave on June 29th with a party of friends for a western trip. Their itinerary includes the Grand Canon of the Colorado, Pasadena, Cal., where they will visit E. B. Washburn and family and return by the Canadian Pacific.

C. L. Washburn had a narrow escape from a serious accident, June 10th, when a taxicab in which he was riding came to so sudden a stop that he was thrown entirely over the seat in front, striking on his head. It is characteristic of Mr. Washburn to make light of the injury to himself and deplore the loss of an expensive hat, which he says looked as if an elephant had stepped on it.

Miss Olga Tonner has moved into the premises formerly occupied by the Chicago Carnation Co. The Chicago Carnation Co. now occupies the north room and all of the east side of the space including the part they formerly sub-let to D. Freres and Miss Tonner.

The extra room is necessary for their large shipping trade. Zech & Mann have now one of the most commodious and best equipped salesrooms and offices in the Atlas Block. All is completed except the extra ice-box.

At a recent church wedding, said to be the most elaborate seen in Chicago in many years, the decorations were largely plants. George Weinhoeber, manager of the Fleischman Co., used 750 large plants in the decorative scheme. They consisted of hydrangeas, daisies and pink roses, massed together about the altar and in the windows where boxes were used. For these the plants were placed closely together without the pots and the soil covered with moss. The cut flowers were 4,000 white peonies. The aisles were all bordered and the same effect carried out at the altar rail. The bridesmaids carried hats filled with small roses, daisies and snapdragons, while the bride's bouquet was of white orchids.

Visitor: Paul M. Paley, Little Rock, Ark.

ST. LOUIS NOTES.

The Cannon Floral Co., at Webster Groves, Mo., lost some glass the past week, when a lot of hail fell in their section.

The wholesale houses have agreed to close their places from June 16 to Sept. 13 every day at 5 P. M., and at 12 on Saturday. The employees are much pleased with this arrangement.

Ludwig Zimmer, who is known as the Biddle Market Florist, will sail for his old home in Germany the latter part of this month. He will return early in September to reopen his store. This is a yearly event with Mr. Zimmer.

The Engleman Botanical Club held an interesting meeting on June 7, at the Missouri Botanical Garden. W. S. Wells and C. W. Garrett read papers,

553 Lake St., Kendallville, Ind.

the former on "Growing Roses Under Glass," and the latter on "Growing Hardy Roses."

Theo Miller's old stand at Delmar and Euclid avenues has been taken up by his brother-in-law, John Borem, who was in the landscape gardening business. Mr. Miller will confine his business to his new store at Delmar and Hamilton avenues.

The St. Louis County Plant and Flower Growers' Association held a meeting on June 4th and installed officers, and a lot of new names were added to the membership. A Publicity Committee was appointed to act with the local Florist Club committee.

F. M. Robinson, the new secretary and manager of the Coliseum, reports that the management will offer not less than \$8,000 or \$10,000 in premiums for a Flower Show for this fall; the show to be managed by the Coliseum Company with the co-operation of the St. Louis Florist Club. Mr. Robinson says his plans for a Flower Show are very elaborate and that the expense for the week would be around \$25,000. He will be present at the Florist Club meeting this week and will lay his plans before the members, and that it is up to them to say if St. Louis will have the largest Flower Show in this country this year or not. Secretary Beneke, of the Florist Club, says that he has had a talk with Mr. Robinson and that everything looks good to him and that the show will be held.

Visitors—Fred Lautenschlager, Chicago, and Martin Reukauf, of H. Bayersdorfer & Co., Philadelphia.

PHILADELPHIA NOTES.

It is announced that the wholesale and retail florists intend to shut down for a half day on the 19th inst. in order to give their employees a chance to attend the annual picnic of the Florists' Club at Washington Park on the Delaware.

W. McRae Thompson and Caspar Pennock were judges at the Lansdowne Flower Show held on the 7th inst. This show was held in the large hall of the 20th Century Club and was well attended. The Natural History Club of the borough were sponsors for the affair which proved a splendid success. These local shows are useful things and fine for the business in general. All florists ought to support them—but keep in the background.

By keeping in the background we mean: help and suggest in every way possible in time and money but give the amateurs all the credit. That

spirit properly followed eliminates the suspicion that a florist does it only for money. A florist can always show public spirit by keeping in the background at a local flower show and yet be the power behind the throne.

Every community, large or small, ought to have its horticultural society and hold flower shows. Every florist in such community should help—but keep his own name out of it. The reward of the florist comes indirectly. Put all your most prominent citizens into the glory chairs. We are not "Aristotle on government" at this minute but of the wisdom of the foregoing propositions we are thoroughly convinced.

Visitors: W. O. Smith, Carlisle, Pa.; Wallace R. Pierson, Cromwell, Conn.; Mr. Ratclyffe, Richmond, Va.; H. L. Roberts, Luther Burbank Co., Sacramento, Calif.; Chas. Loechner, Loeschner & Co., N. Y. City.

Flower Market Reports

BOSTON This market in common with most others, is in the dumps at the present time—very decidedly in the dumps. There is a heavy influx of everything in staple flowers, and a very light demand. The few weddings and dinners that occur make no impression on the enormous quantities of roses, lilies, carnations, stocks, sweet peas, irises, etc., that are piling in from all sides and the peony crop is yet to come, being held back so far by the very cool nights. Graduation exercises have hardly begun, but even when they do start, a few days hence, there is little of promise in the outlook. Quality is all right on most things, any deficiency in that respect not being blamable to either the variety or the weather but to the grower himself. While the outlook is not particularly encouraging in the matter of prices, yet we do not expect that any appreciable number of growers in this section will be likely to throw out their old stock until after the graduation season is entirely over. So present conditions are with us to stay for two or three weeks probably.

Receipts have been **BUFFALO** heavy throughout the week, especially on roses and carnations, and prices are all broken up. The coolers are again filled to their capacity. Peonies are now coming on and other outdoor stock is had in quantity. Lilies were very plentiful but the heaviest receipts was roses and Beauties. Lily of the valley and other wedding flowers are offered in abundance.

The market is at its **CHICAGO** lowest ebb just at this time and very little can be said of it that will be interesting, the cause being simply the reaction that follows an unusually good holiday, accompanied by a great quantity of stock, most of which is of fine quality. Where much of the stock is poor and there is a slump, only the good flowers sell but as is the case now the proportion of first-class flowers is so large that prices have dropped to almost nothing when the buyer is on the spot. More is realized, of course, in the shipping trade, but quotations are much lower than during last month. Certainly the month of commencements and of weddings has not opened auspiciously for florists for while stock is cheap the retail price has been cut below a chance for profit by the street offerings and the department store sales. Every kind of flower is coming in and the counters and ice boxes are filled. The cooler weather did some good but not proportionate to the quantity of stock. A large department store sold Killarneys, Richmonds and short Beauties for 9c. per dozen, Saturday the 7th, and the retailers have to compete with these special sales. A street vender's sign Monday displayed over a wagon load of carnations read "two dozen for ten cents."

(Continued on page 905)

CATTELEYAS

One of the few flowers that can be shipped safely in warm weather, magnificent, large, deep rich colored **GIGAS** or **GASKELLIANA**, \$6.00 per doz. A few **DENDROBIUM FORMOSUM** at \$7.50 per doz.

SWEET PEAS: Spencer type, and beautiful flowers they are, effective wherever used a flower for every occasion. 75c. to \$1.00 per 100.

PEONIES: Splendid quality, all colors, \$4.00 to \$6.00 per 100.

RAMBLER SPRAYS: Dorothy Perkins, Lady Gay and some of the later blooms of Crimson Rambler. \$5.00 to \$20.00 per 100, according to length of sprays; mostly medium sprays, \$5.00 to \$10.00; very few of the extra large ones at \$20.00.

VALLEY: Special, \$4.00 per 100; Extra, \$3.00 per 100.

HEADQUARTERS FOR GREENS

BRONZE GALAX, \$1.50 per 1000; \$10.00 per 10,000.

Flower Market Reports
(Continued from page 903)

The market is very CINCINNATI overcrowded in nearly every line. There is a fair demand but it is not near sufficient to take up all the offerings. Last week was a good one because of the large school commencements. The demand was for the better grades of stock but because the supply was so over-large only moderate prices were realized by the wholesalers. The rose supply is large and the Beauty cut larger and better than at a corresponding time, for several years past.

Peonies are a glut and move slowly at low prices. The carnation cut has increased much faster than the call for them. Good sweet peas are short of the actual demand. There are lilies and miscellaneous stock in abundance.

A few very warm days DETROIT at the early part of last week brought an overabundance of supply though the demand was fully up to expectations. Just now things are changed again and we are going through a cold spell near freezing point which is below anything experienced within many years. The books show that May, 1913 was a jolly good fellow, much better financially than any previous May.

Notwithstanding cool NEW YORK and retarding weather conditions the receipts of flowers at the wholesale marts have for the past week been far in excess of the means for their disposal. Never before in the recollection of the pioneer wholesalers has the drop in demand and in market value been so abrupt and so complete. The prices at which carnations, roses, lilies, etc., are offered seem absurdly low but at that they do not sell and bargain quotations still lower on large quantities stand without a taker. It is very evident that a large part of the material shipped in this week will go to loss and the grower will get practically nothing. This state of affairs is not likely to last long, however. The growers will throw out their stock rather than ship it under existing conditions; then the peonies, irises, kalmia, garden roses and other things which now contribute to the general chaos will come to an end, and some measure of relief will come to the perplexed wholesaler. So we hope to be able to report a better balanced market before long.

PHILADELPHIA Last week a tremendous amount of stuff came in and simply swamped the market. There was a fair amount of business around, but nothing like enough to absorb the extra supplies. Roses were more demoralized probably than anything else. The cool cloudy weather during much of May held them in check and the warm and brilliant rays of the past ten days brought them in with a rush. The rose seems to respond more quickly to such conditions than other subjects. Outdoor roses do not cut nearly so much of a figure in the market now as they did several years ago. The only outdoor roses occupying a prominent position today are the Ramblers—Lady Gay, Dorothy Perkins, Tausendschon and Crimson Rambler especially. Considering the season the quality of the carnation cut continues very creditable indeed. Some days the sweet peas came in good; at other times badly scorched. All the first-class ones sold well. Cattleya Gaskelliana is the latest arrival in the orchid market—taking the place of gigas, which is about over. Delphinium continues in quantity—a most charming and attractive subject. The clean-up on Friday and Saturday was all right except financially disastrous. A terrible slaughter.

ST. LOUIS Market was in good condition all last week, plenty of stock, and prices much lower. The supply was short on extra fancy stock in roses and carnations, but in the lesser

grades there was considerable overstock. Asparagus and smilax had big calls this week, owing to the scarcity of ferns.

WASHINGTON There has been an oversupply of all varieties of roses but graduation exercises in schools, seminaries and colleges, and the many June weddings, are using up large amounts of cut flowers and they are moving better than last week. Last week carnations went begging but the supply is somewhat shorter and the demand heavier since the weather turned cooler. Water lilies are now offered. Orchids have dropped in price.

NEW YORK PERSONAL NOTES.
Davie Adam is no longer engaged at Thorburn's.
A. Schmidt of 180 Ave. B, sailed for Europe last Wednesday.
Wm. Pankok, of Whitestone, N. Y., sailed for Germany on Thursday, June 12.
Bert Chadwick has left Vaughan's Seed Store to take a position with C. F. Meyer.
Max Schling plans to go to northern New York state about the middle of July and stay until September.
News from Italy, where Julius Roehrs, Sr., is now trying to regain his health, is not as encouraging as his many friends would wish.
Visitors: W. F. Kasting, Buffalo; A. Farenwald, Roslyn, Pa.; S. S. Pen-nock, Phila., Pa.

PEONIES**"PEONIES FOR PLEASURE."**

This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure." We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

Our catalogue of everything you need mailed on application. Write for it today.

J. H'b'n'r,	142 182 153	J. Zech,	133 141 145

This was the last game of the season, and interest has held steadily throughout the year, the teams being so well matched that the scores ran very close. The summing up is not complete, but it is stated by Secretary Lorman that the silver cup was won by Al. Fischer over Wm. Wolf by only 13 pins.

INCORPORATED.

Elmhurst, Ill.—Hoskins Floral Co., capital stock, \$25,000. Incorporators, D. J. Hoskins, J. F. Harris and F. Amberg.

Rose Hill, N. Y.—F. W. Brown Nursery Co., to deal in seeds, bulbs and crops. Capital stock, \$25,000. Incorporators, Francis W. Brown, Frank B. Mills and C. Albert Weeks.

Little Ads Bring Big Returns

Little ads. in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

WHAT THE USERS SAY

Kroeschell Boiler, Generator and Heating System Insure Perfect Results. Having promised you a letter as soon as we passed through a good fair test, I consider it now most timely. We had the thermometer 18° below and we've just gone through a blizzard bad enough for most any season, and am very well pleased to inform you that our heating system was equal to the occasion. So far as we have gone, am certainly well satisfied with the Kroeschell Boiler, Generator and Heating System. J. E. MATHEWSON, Sheboygan, Wis. Send for our Catalog. Do It Today.

Paint

THIS is the time of the year when the upheaval of inside painting comes.

What a nuisance it is!

What a needless expense!

That is to say: it is needless if you have a U-Bar house. Needless because U-Bar houses don't need inside painting.

Its original aluminum finish will last for years and still retain its soft, clean, pleasing finish.

It does not crack, mildew, stain or let the rust come through.

In fact there is no rust from the U-Bars because every one is heavily galvanized before it is aluminum finished.

This freedom from painting nuisance and expense is one more of the reasons why U-Bar greenhouses cost more at the start and less the rest of the time.

This U-Bar house was built eight years ago and the interior finish is still bright and free from mildew

GERANIUMS

The report comes from all sections that Geraniums are more in demand this season than ever and that all good stock will be cleaned up. We have an excellent lot of young stock ready to ship out if you wish to grow your own stock for another season, but why bother with it, as we make it our business to provide your stock for you, to be shipped anytime in the fall or winter, you have the room, after Chrysanthemums or another crop has been removed. Our stock houses of Standard sorts alone as now planted contains 300,000 plants as pretty as you ever saw. Then we have Novelty stock, Ivy Leaved sorts, Scented and Variegated varieties to the extent that we are confident we can take care of any order you may place with us. Think it over. Can you afford to bother with the stock yourself for \$18.50 per 1000, for 2-in. plants?

SCARLET BEDDER. We have bought of Elmer D. Smith & Co., stock of this superior Scarlet Geranium and offer good strong plants from 3-in. pots for immediate shipment at \$1.50 per doz., \$10.00 per 100.

SMILAX: 2-in., \$2.00 per 100, \$17.50 per 1000.

COLEUS, ALTERNANTHERAS and other **BEDDING PLANTS.**

CANNAS: 3-in. pot, good sorts, \$3.00 per 100, \$25.00 per 1000; **King Humbert**, \$5.00 per 100, \$40.00 per 1000.

WHAT COUNTS

It is not the power you generate, but the power you transmit to your business that counts.

It is not the sales that a merchant makes, but the profit he gathers from these sales that counts.

It is not the quantities of lilies you grow, but the quality of the flowers that counts—because quality means profit in the lily business.

Now in order to make the lily business count, you must have the best bulbs. Nearly all large growers use Horseshoe Brand bulbs. Isn't that pretty good evidence of their value as profit producers? Try them.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Cyclamen

Cyclamen should be placed as soon as possible in cold frames, where they will grow much better than in the greenhouses. Where you have the houses occupied practically all the year around but would like to give them a thorough cleaning and drying out, which, by the way, is an excellent thing to do, make use of frames for the cyclamen. Place a coating of fine coal ashes at least three or four inches thick so the pots can be partially plunged. Shade during the summer with lath or cloth, which will keep the plants cooler than when they are covered with glass that has been whitened. Stock that is in 3-inch pots should be shifted before they are pot-bound. A good mixture to use is well-rotted fibrous loam, three parts, leaf mold and well-decayed cow manure one part each. Add enough of sand and fine charcoal to give porosity and sweetness. On hot days syringe the plants overhead two or three times which will assist in lowering the temperature.

Chrysanthemums

Neglect in cultivating, tying, syringing or ventilating at this season is certain to cause such damage to the young chrysanthemums that, however well we may treat them afterwards, they will never recover the ground lost. Too much importance cannot be attached to cultivation and this should be persisted in until the feeding roots begin to approach the surface of the soil, when further cultivation would be injurious. In soils which are deficient in calcareous matter—and most soils are—a sprinkling of air-slaked lime on the soil previous to stirring will help to strengthen the stem and give tone to the foliage. Ventilate freely, both night and day, but guard against sudden fluctuations in the temperature for any laxity in this respect may nullify all our efforts during their growth. By keeping the shoots tied neatly to the supports, syringing is made easy and effective and it also allows free access of the sun's rays to the soil and gives opportunity for a free circulation of air which keeps the leaves hard and of good color.

Care of Poinsettias

Poinsettias that were started early should now have some fine material for propagating purposes. Don't break them off the wooded stem but use the knife, and let one or two eyes of the soft wood remain on the plants, to give more cuttings again in about four weeks. No bottom heat is required for the propagating bench. With proper watering and shielded from the sun the cuttings will be ready for 2½ inch pots in about 25 days. When they are rooted you can pot into a compost of stiff loam mixed with about one-third its quantity of well-rotted manure. A mixture of this kind will, to a large extent, prevent yellow leaves on the young

stock next fall. Keep the plants watered and syringed all summer and in full sun. Never has the poinsettia been more popular than now, and there is hardly a place where one does not find a batch grown for Christmas, and yet the average retail grower does not pay enough attention to their culture.

Cleaning, Painting and Repairing

As usual there is plenty to do in setting things right for winter. Look over the benches and give them any needed repairing so as to make them sound for another year. With the full glare of the sun on the glass, almost blinding, the work is anything but pleasant, but we can make it more tolerable by shading the house or by placing some covering over the roof during torrid weather. There is nothing worse than leaky and draughty houses. To make a thorough job and an easy and rapid one too, the removal of all the glass before planting is necessary, to be followed up with a good job of reglazing into a new bed of putty. There are many houses with shaking, rattling, putty-loosened glass where such a radical measure in doing repairs would do a world of good. Now is a good time to go at it. The wood-work will be all the better for a coat of white paint, which will lighten up the houses and help destroy any insects as well as preserve the wood. While this work is going on give the glass a shading of whitening which will make the houses more comfortable to work in.

Palms

If there are large palms that need repotting get at them now. If larger pots are not required remove some of the old soil from the roots and replace with fresh. Go over the old stock, remove every defective leaf, clean the base of the plants and wash both sides of the leaves thoroughly. For a compost use fibrous loam three parts, well-rotted cow manure one part, and about a 5-inch pot of bone meal to a barrow load. This is an excellent time to do this work, as nearly all the palms and other decorative stock make a heavy growth during the summer and the more they are encouraged the better. Place the stock in a shaded house where you can maintain a rather close atmosphere. Attend to watering carefully and spray several times every day.

Solanums

Berried solanums that are planted out should be kept well pinched to form nice bushy plants. Keep the soil well stirred by weekly cultivation and where we have a continued dry spell it will be wise to use the hose if possible. When watering these plants do it good and thorough and it will last them at least two weeks. Never let these plants suffer in any way if you want nice plants by next fall.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Syringing and Damping Down

Except in very rare cases we would advise all growers to leave damping down in the rose houses severely alone. It is absolutely necessary in the culture of the many other flowers but for roses, Beauties especially, it wants to be left in its place. With a good syringing quite often the roses will receive all the moisture they need, as far as the atmosphere in the houses is concerned. In houses where the bottom floor is all concrete, an occasional damping down will be necessary during the summer months, and then we would much rather put in an inch or two of nice screened ashes, which will hold the moisture much better than all the damping down you could do. And not only that but the moisture will be distributed much better and there is not likely to be an excess of moisture at any time as the case often is when the houses are damped down.

The Young Plants

Do not neglect to keep the young plants well syringed to keep them free from that dreaded little brute, the Red Spider. It is too bad we have to mention this little pest after the raking over this subject had in these columns, only a short time ago. But he pays no attention to that and we have to keep at him all the time so that may explain why we refer to this subject so often. To begin make sure that the plants are wet enough; better water them early in the morning to make sure, and then syringe later. Water will burn the leaves as much as anything if it is applied when the plants are a little dry at the root, and once the foliage is damaged it will take a long time for the plants to recover.

Spot on the Plants

The young plants should be very carefully watched, for spot will get in, just as sure as day, and it will be a hero's job to rid the plants of it. Space the plants so that they will not be crowded, and pick off and destroy any little trace of spot that may appear. Do not neglect this, as the old motto: "a stitch in time saves nine" can be well applied here. A spray of the ammoniacal copper carbonate mixture will do wonders in helping to keep the spot from spreading.

Lime

Do not neglect to keep a constant supply of good air-slacked lime on hand so that you can have it any time you may need it, and never have to let the plants go without because their is none to be had. After each syringing or watering always blow a little of it underneath the plants, both the old plants and the young plants as well. The young plants more so than the old ones as they will need it more. This is a wonderful help in keeping out blackspot, and about half a dozen other diseases which our roses are subject to.

Cutting

With the warm weather on hand the stuff should be cut tight as there is but little sale for opened stock when roses are as plentiful as they are just now. Never neglect to have all the boxes well iced before they leave the place, being careful not to let any of the cracked ice come into contact with the buds, as this would be apt to discolor them or otherwise ruin the buds.

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Sowing for Succession

Sweet corn, peas, beans, beets, carrots, spinach, radish and cauliflower should be sown right up to the end of June.

The Orchard

Another good spraying is now due with a combination of Bordeaux and arsenate of lead and if there are aphids on the growing tips spray with a tobacco and soap mixture.

Bugs

The cucumbers squashes, melons, eggplants and potatoes will all be attacked now by their various kinds of enemies and the grower should lose no time in getting them dusted over with some of the numerous poison powders which are on the market or spray with arsenate of lead or some other good spray.

Strawberries

The strawberry bed will be the scene of considerable activity during the next week or two and the plants should be carefully looked over daily. If the heavier trusses of fruit are propped up from the ground with forked sticks a more even ripening will result besides lessening the chances of damage from slugs and other creeping insects. In picking the fruit be sure that it has reached the proper degree of ripeness and then handle it with such care that it reaches the table unbruised and in the pink of condition. So many people go to a great deal of trouble to get good varieties—and to grow good fruit and then fall down on this very vital matter of careful picking and handling which undoes all their former labors and sets them at naught.

Forcing Asparagus

It seems a queer season to talk or write about forcing

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Melons for Cold Frames

With the warmest months of the year now with us and probably the cold frames which were used for early vegetables now standing empty there will be an opportunity to grow forcing melons in greater quantity than at other seasons of the year. Any plants that are left over after planting up the houses can be utilized this way. A small mound should be prepared for them of the usual melon soil and placed in the center of each light. It will pay to go to this extra trouble as the garden soil which has been growing lettuce, etc., may not suit them as well. Two plants can be planted in each mound, one to grow north and the other south. They should receive a thorough syringing each fine and clear morning. The sides of the frame and surface of the soil should be damped again about noon time, followed by another syringing about four o'clock when the frame can be closed up to within two inches. Keep the roots well moist all the time. This treatment will grow them until they come into flower, when the syringing will be best omitted in the mornings. When the fruit is as large as a hen's egg elevate them on an inverted pot or piece of wood; this not only shows you where the fruit is located but is easier to watch grow and also keeps it up from the soil where snails or sow bugs (wood lice) would easily mark them. Any of the freer setting varieties will grow in the frames, His Eminence and Ringleader having a reputation for good crops there.

Preparatory Work for Layering Strawberries

There are some fruit houses at this time of year that are anything but comfortable to work in after ten o'clock in the morning, a fact that should not be lost sight of. Take the fullest advantage of the early mornings, and also of any wet days that may come. These are often welcomed just as much by the man under glass as one who is employed, or who has his chief interests in the land outside. When the conditions are too warm in the houses through the middle of the day preparatory work for strawberry layering can go on. There are three-inch pots to be washed and soil to be sifted. The half-inch size sieve should be used and any sweet soil will answer the purpose. The parent plants if not carrying a crop, should be looked over occasionally, all weeds removed and the wires (or rhizomes) stopped after the first young plant is visible. Layering can be proceeded with when all the wires are showing a plant. Do not wait for them to root into the soil—rather let them root into the pot; early layers have the best chance to make good crowns by fall.

asparagus, but now is the time to seriously begin, by ceasing to cut from those roots that are designed for forcing and if we desire to produce the finest stock when forced we must give special attention to these forcing roots now, so as to grow extra fine crowns. Cut out the weakest growth as fast as they show up and feed the plants by copious waterings with weak liquid manure;

Grapes in the Early House

The early vinery will now have ripe grapes hanging, some of which will have to be in good condition for some little time. To keep them, see that rats, mice and insects are not molesting them. Give them all the air possible through the day, reducing a little by night especially after ten o'clock when the dew begins to fall. A gentle heat in the hot water pipes from this time to early morning will be of great assistance to them. See that it is stopped off as soon as the sun's power is felt, or, better still, have the night man stop off his fires right early in the morning; sufficient heat will be left in the pipes for several hours. In real hot weather the house can be damped down about three times a day, say about nine o'clock, noon and four. This will assist the foliage. With the airy and continually drying atmosphere the roots will be called upon to furnish more sap and this in addition to the soil drying out itself from the drying air will often make a watering necessary. Some are afraid to water a vine border when there are ripe grapes hanging but when the foregoing conditions are studied it must be acknowledged that water is a necessity to the best welfare of the vine. Take a pot-vine as an instance. The same requirements are to be met with there, in a minor degree of course, but how often will they dry out in a day when they are ripening or ripe? Water the borders as soon as they are in need of it, doing it in the early morning, which will benefit both the fruit and the vine. Absolutely drying the border out as the fruit is ripening and then having to water it a little before the fruit is "finished" (i. e., quite ripe) is often the cause of berries cracking.

Care of the Early Peach House

As the last fruit is picked from a peach or nectarine tree prepare to build them up for next year's crop. About the first thing is to give the trees a thorough syringing. No use of saying there is no spider; it is a lucky man indeed who can finish a peach house off without a trace of it. The dryer conditions prevailing during ripening and the absence of the syringe will have brought a few at any rate. There will be quite a difference, however, in the house that was clean up to this time and the neighbor that already possessed live stock. A spraying with insecticide will be an additional help. The trees can also be syringed again just before quitting time which will keep them moist for some time into the night. Water the border if on the dry side and if a heavy crop has been carried a little feeding will help them to build up the flower buds for next season. Keep the ventilators wide open at all times.

mulch heavily and keep down weeds. To protect the grass from being knocked down in heavy rains or wind stick some pea brush along either side of the rows or run strings to stakes along the sides. Remember the strength and quality of the growth now is an indication of what you may expect from the crowns when forced. In showery weather a light dusting of nitrate of soda will be very beneficial.

We are pleased to note that the Florists' and Gardeners' Club of Rhode Island has succeeded in having the restriction removed from the giving of flowers to the school graduates of Providence. This is a signal service to the floral industry and, as such, should place the organization high in the regard of the florists of Rhode Island, everyone of whom should, in all justice, have his name enrolled on its list of members. That is what clubs are for.

As we write, the nurserymen are enjoying their first experience, as an organization, in the hands of their brethren in the, to most of them, far off Pacific Coast country. We can readily imagine they are having a regal time, one that will not be forgotten by those who are privileged to participate. The nurserymen are a strictly business folk, but at a convention such as this the slogan for the time being is likely to be—"If business interferes with pleasure, cut out the business!"

HORTICULTURE employs no travelling representatives and no one is authorized to solicit subscriptions or take money on behalf of this paper except our regular local representatives, who are all well-known to the trade. This warning is given because word has repeatedly come to us that parties are soliciting subscriptions for HORTICULTURE in various parts of the country without authority, offering premiums and other considerations to gain their point. HORTICULTURE gives no premiums and will not be responsible for money paid under such inducement.

The Massachusetts Horticultural Society has acted most commendably in awarding its gold medal to two of Boston's most useful institutions—the Park Department and the Arnold Arboretum. It is fitting that this recognition be given to a park system which from its inception has been managed with the sole purpose of providing the people with not only a spacious pleasure ground but one that should exemplify the best principles of landscape art. That this purpose has been well carried out, the world-wide fame of the Boston park system well attests and the graceful act of the Massachusetts Horticultural Society will be heartily approved everywhere. As to the Arnold Arboretum, the Society has also done the right thing in presenting the highest testimonial in its power to this greatest of all horticultural educational institutions. The people of Massachusetts and, indeed, of the entire country, are just coming to a realization of the precious possession they have in this unique establishment which is destined to wield a mighty influence in American horticulture and arboriculture. Most of all, however, we would congratulate the Massachusetts Horticultural Society on these and other evidences of well directed activity. Old institutions sometimes get into a rut and "pointing with pride" to their past is about all they seem to do. This Society, in what it is now doing and what it is planning to do is very much alive and making good use of the ample resources which are at its command.

THE VIBURNUMS.

(Extract from Arnold Arboretum Bulletins Nos. 43 and 44.)

At no other time in the year is the Arboretum more interesting and attractive than in the early days of June. The leaves of many trees have now grown to their full size; those of others are still in their vernal stages. The conifers are now covered with the tender green of their new shoots and are more beautiful than at any other time of the year. The Rhododendrons are fast opening their flowers and these will soon be followed by those of the Laurel (*Kalmia*); many Azaleas are blooming, and the flowers of Viburnums, Cornels, and other native shrubs add to the beauty of the plantations.

The Japanese and Chinese *Viburnum tomentosum* is a large shrub with wide-spreading horizontal branches along the upper side of which the flat flower-clusters are thickly placed and are surrounded by a ring of pure white sterile or ray flowers which make the conspicuous part of the inflorescence. The flowers are followed in the late autumn by brilliant fruits which, scarlet at first, become black when fully ripe. The leaves turn orange and scarlet in the autumn. There is an interesting narrow-leaved form of this plant (var. *lanceolatum*), discovered in Japan by Professor Sargent. There are also two "Snowball" forms of this plant developed in Japanese gardens and much cultivated here and in Europe under the name of *Viburnum plicatum*. The correct name of the more common of these two plants is *V. tomentosum*, var. *dilatatum*. This is the Japanese Snowball usually cultivated in this country. The other form (*V. tomentosum*, var. *dilatatum*, f. *rotundifolium*), appears to be a dwarfier plant.

Viburnum tomentosum and the Korean *V. Carlesii* are ornamental plants of great beauty and value but, with the exception of these two plants, none of the eastern Asiatic species compare in value as decorative plants with the Viburnums of North America. To these much of the late spring and early summer beauty of the Arboretum shrubberies is due, and the successful cultivation here of these plants is at last making their value known and appreciated. Thirty years ago it was practically impossible to buy an American Viburnum in any nursery, but now several of the species are largely propagated in many North American nurseries and have been used in considerable quantities in many American parks.

About a dozen of the American Viburnums are thoroughly established in the Arboretum, the different species flowering through a period of two months. The earliest to flower and the most difficult to establish here satisfactorily, *V. alnifolium*, often called *V. lantanoides*, the Hobble Bush or Moosewood of northern woods, has been out of flower for several weeks. The Black Haw, *V. prunifolium* is a small shapely tree of the Middle States where it is often extremely common. The flowers are in convex clusters and are followed by sweet blue-black fruits. These and the leaves, which late in the season turn deep wine color, make this a particularly attractive plant in the autumn.

Viburnum Lentago, sometimes known

ROSE PINK PEARL.

This rose is well named. When fully opened its color is exquisite pearly pink. It is one of W. A. Manda's productions, the parentage being Meteor × Wichuraiana. The flowers are of good size, very double and solid and the buds before opening

are crimson making a beautiful effect when flowers and unopened buds are seen together. The foliage is leathery and glossy and almost evergreen. We have mentioned this rose before as worthy of being more generally planted. It is a gem.

as the Nannyberry, is now very conspicuous in many parts of the Arboretum. Few more beautiful shrubs than this common inhabitant of the roadside and the wood-border of New England can be found in any part of the world. It is a shrub or small tree sometimes twenty feet high with a broad round head. The leaves are large, thick and lustrous, and in the autumn assume delicate shades of red and orange; the flowers are creamy white and are borne in large and abundant convex clusters, and the large blue-black fruits hang on drooping stems and do not disappear from the branches until the beginning of winter. In the first week of June the Arboretum owes much to this plant. Another arborescent Viburnum, *V. rufidulum*, from the southern states is a plant of much beauty; it is the largest of the American species and sometimes grows in Louisiana and Arkansas into a shapely tree thirty or forty feet high with a tall stem and spreading branches. The flower-clusters are usually smaller than those of *V. Lentago*, but the leaves are larger

and much more lustrous, and no other Viburnum has such handsome foliage. It is distinguished by the rusty felt which covers the winter-buds and the edges of the leaf-stalks, and is found on the lower surface of the leaves.

One of the handsomest American Viburnums is *V. pubescens*. This is a tall shrub with small pointed leaves and small nearly flat clusters of white flowers, which are produced in such abundance that they almost entirely cover the plant. This Viburnum grows naturally on limestone soil although limestone is not essential to it and is therefore valuable in a large part of the country where limestone prevents the cultivation of many plants like Rhododendrons, Azaleas, and other members of the Heath Family. *Viburnum acerifolium*, sometimes called Arrow-wood, is a common inhabitant of the eastern part of the continent. It is a small shrub with leaves which resemble those of some Maples, small clusters of white flowers raised on long stem, and black fruits. This plant is valuable as an undershrub for it

grows well in comparatively dense shade.

Viburnum bracteatum is the rarest of American Viburnums, being known to grow naturally only on the cliffs of the Coosa river, near Rome, Georgia, where it is a tall shrub with numerous slender stems. A plant of the form of *Viburnum pubescens* from southern Missouri and Arkansas has sometimes been called *V. affine*. Another exceedingly rare species is *V. molle*, from southern Kentucky and southern Missouri, with large, nearly round thick leaves on long stems.

Viburnum americanum is one of the species with palmately lobed leaves, flat-flower clusters surrounded by a ring of showy white ray flowers, and red fruits; it is a tall broad shrub common in northern woods and particularly ornamental late in the autumn when the leaves turn yellow and orange color and the brilliant translucent fruits, which sometimes remain on the plants through the winter, are very conspicuous. Two other species of this particular group flower are *V. Opulus* and *V. Sargentii*. The former is a native of northern Europe and Siberia; the flower-clusters are smaller than those of the American species but it is a larger and handsomer shrub with thicker and darker green leaves which fall later in the autumn, and rather larger, darker colored fruit. There is a variety of this plant with yellow fruit (var. *xanthocarpum*); another variety is a low, dense little bush (var. *nanum*) which very seldom flowers. The old-fashioned Snowball or Guelder Rose is a variety of *V. Opulus* with all flowers sterile. *V. Sargentii* is a common shrub in north-eastern Asia and when it is in flower it is the handsomest of these three species, for the ray flowers are larger than those of the American or the European plant. The dark green leaves with the long, narrow terminal lobes are interesting, but the fruit of this plant is comparatively small, dull-colored, and much less attractive than that of the other species.

Viburnum cassinoides is now in flower. By many persons this tall shrub of northern swamps and swamp borders is considered the handsomest of the American Viburnums. In cultivation it is a rather low, broad plant. The leaves, which vary greatly in shape and size on different individuals, are thick and dark green; the flowers are creamy white and are arranged in large or small convex clusters and are followed by drooping fruits which, when fully grown, at first green, gradually turn flesh color or pink and finally dark blue, and are covered with a glaucous bloom, the fruit of the different colors sometimes appearing together in the same cluster. This plant takes kindly to cultivation and has been largely planted in the roadside shrubberies. The southern relative of *V. cassinoides*, *V. nudum*, has never become established in the Arboretum, although as it grows at high altitudes on the Appalachian Mountains it should prove hardy in New England.

Three blue-fruited American Viburnums, *V. dentatum*, *V. venosum* and *V. Canbyi*, will not be in bloom for some time, the latest of them, *V. Canbyi*, carrying the flowering of these plants to midsummer, so that the

flowers of American Viburnums can be seen in the Arboretum from the middle of May to the middle of July.

An illustrated guide to the Arboretum containing a map showing the position of the different groups of plants has recently been published. It will be found useful to persons unfamiliar with the position of the different groups of plants. Copies of this guide can be obtained at the Administration Building in the Arboretum, from the Secretary of the Massachusetts Horticultural Society, 300 Massachusetts Avenue, Boston, from The Houghton, Mifflin Company, 4 Park Street, Boston, at the Old Corner Bookstore, Bromfield Street, Boston, and at the office of the Harvard Alumni Bulletin, 50 State Street, Boston. Price, 30 cents.

ROYAL HORTICULTURAL SOCIETY SPRING SHOW.

(Continued from page 893)

Roses and Carnations.

Much attention was attracted to Mdme. Edouard Heriot, the best seedling rose at the International Show. This is one of the introductions of Mons. Pernet-Ducher, and was exhibited by Beckwith & Son, of Hoddesdon, who also showed a new hybrid tea, Willowmere, after the style of the popular Lyon rose. Alexander Dickson & Sons showed Irish Fireflame, and Mrs. Campbell Hall, a new tea, cream, suffused with flesh pink. The two last named received awards of merit. Wm. Paul & Son had a very effective rose group, showing amongst others a white sport from Tausendschon, St. Helena is a new H. T., which was included in the group of Benjamin R. Cant & Sons, of Colchester. This handsome bloom is creamy with a pink blush in the centre, and tinged with yellow at the base of the petals. Carnations formed an interesting section. Mary Allwood, by Allwood Bros., is a shapely bloom, cherry salmon, somewhat similar to Lady Hermione, the well-known border variety. White Wonder, Empire Day and May Day were among the other newer kinds shown in the group. A. F. Dutton had a distinctive variety in Mrs. A. F. Dutton, apple blossom tint.

Some Other Features.

Sweet peas were not a very extensive section. The trade exhibitors will be making a big display at the show of the National Sweet Pea Society in July. E. W. King & Co., of Coggeshall, Essex, had a new maroon sweet pea, Anglian Royalty. Dazzling splashes of color were furnished by the May-flowering tulip groups. Particularly striking was a group arranged by R. H. Bath, Ltd., of Wisbech, a very successful bulb-growing centre. Noticeable in the collection was a Darwin variety, Massenet, which secured a special award at a recent meeting of the R. H. S. A splendid collection of hardy rhododendrons was staged by J. Waterer & Sons, of Bagshot, Surrey, who once more demonstrated the high standard to which they have brought the cultivation of these showy subjects. A very comprehensive and meritorious collection of ferns was arranged by H. B. May & Sons, of Upper Edmonton. The firm received a first-class certificate for *Nephrolepis exaltata* Willmottae. With the vivid array of gorgeous coloring in the begonias of Blackmore & Langdon, Bath; the azaleas of Cuthbert & Co., Southgate; the delphiniums of Kelway & Son, of Langport, and the hippeastrums of

Ker & Sons, Liverpool, the show lacked nothing in the way of variety and completeness. In the fruit department, Laxton Bros., of Bedford, showed some delicious strawberries. King George V. is a new forcing variety. T. Rivers & Son, Sawbridge-worth, demonstrated the efficiency of their system of training fruit trees in pots. Some 80 varieties of apples were shown by George Bunyard & Co., of Maidstone. The outdoor displays were in keeping with the high standard which prevailed throughout the show. The art of constructing a rock garden, with its countless little plants nestling in the crevices was effectively shown by some of the leading specialists in this particular line. There were also some formal gardens of excellent design, replete with objects of interest. W. H. ABSETT.

THE REGAL MOUNTAIN LAUREL.

The delightful visit, last year, to the laurel hills of northern Massachusetts by a party of Boston horticulturists was repeated on Wednesday of this week and, as before, as guests of H. Huebner of Groton. Mr. Huebner met his friends at Ayer and the forty-mile auto ride through a most charming and picturesque country was a most enjoyable experience. Words fail to do justice to those kalmia-clad hills of Ashby and no picture could adequately suggest the sensations one feels when gazing on the resplendent beauty of those billows upon billows of rosy pink and white. The present season is an exceptional one in the profusion of bloom and the show was simply overpowering in its sublimity. The party stopped on the way to look at the patch of Scotch heather growing wild in Townsend. On the return Mr. Huebner's greenhouses and nurseries were inspected and many interesting evidences of cultural ability were noted, not the least among which were the young stock of winter-flowering snapdragons originated by Mr. Huebner and on which he has been working for years to obtain and fix the most desirable colors. It goes without saying that hospitality was unlimited and the event will live long in memory as one of rare enjoyment for those who participated.

The Federal Horticultural Board has issued a circular giving information regarding foreign inspection and making requirements under the Plant Quarantine Act substantially as prepared by the Department of Agriculture and transmitted through the Department of State under date of February 7, to the diplomatic officers of the United States for transmission by them to the governments to which they were respectively accredited. It is now reprinted for the information of importers of nursery stock, more particularly to call attention to the exact requirements as to foreign inspection and certification, and to give the proper forms of the certificates which must accompany nursery stock and also to indicate the proper marking or labeling of each package or other container as a condition of entry. The law goes into effect on and after July 1, 1913. Copies of this circular may be obtained on application to C. L. Marlatt, Chairman, Federal Horticultural Board, Washington, D. C.

CLUBS AND SOCIETIES

ST. LOUIS FLORIST CLUB.

The Florist Club held one of the largest meetings on record on Thursday afternoon, June 12, at the Missouri Botanical Garden on invitation of Director Geo. Moore. The meeting was presided over by Vice-President C. C. Young and Secretary Beneke reported 65 members in attendance besides quite a few students of the garden. W. S. Wells of the garden met the members at main entrance of the garden and escorted them to the Graduate Section rooms where the meeting was held. The trustees have selected Ramona Park for the yearly picnic and the date set is Thursday, July 17th. Fifty dollars was donated by the club. The report of the Publicity Committee was made by Carl Beyer which brought out a good discussion. Edwin Denker, state vice-president of the S. A. F., made a report as to transportation to Minneapolis Convention. The fare will be \$19.50 round trip by railroad and \$28 round trip by steamboat to St. Paul. This will again be discussed at the July meeting.

The secretary read a letter from the Coliseum management regarding a flower show to be held this fall. H. C. Irish, chairman; J. F. Ammann, W. C. Smith, Fred W. Brunig and R. J. Windler were appointed a committee, they to report at the July meeting.

After adjournment the members were escorted to various points of interest in the garden. Jules Bourdet then invited the Club to visit his place which they did with much pleasure.

The next meeting will be on July 10, when nomination of officers will be in order.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The June meeting of this society was held at Glen Cove, L. I., on Wednesday, June 11th. The exhibition of cut roses and other flowers was very fine. First prize for best vase of T. and H. T. roses was won by J. Adler. For best basket of fruit A. Fournier was first. H. Boettcher showed some wonderful sweet peas for this early date and received a certificate of culture. H. Gaut was awarded a certificate of culture for a fine pink *Antirrhinum*, "Glen Cove Beauty."

Aaron Ward roses, exhibited by H. Jones, received honorable mention. At the next meeting, July 9th, prizes will be offered for best three vases of sweet peas, pink, white and red, 25 sprays in a vase. J. MacDONALD, Cor. Sec.

AMERICAN ROSE SOCIETY.

The Hartford Rose Gardens will be judged by the American Rose Society on Saturday, June 21st. Meet in New Haven station at 11.30 A. M.

Superintendent of Parks Parker, Hartford, Conn., invites all members to be present. If you can go please notify Mr. Parker.

Judges: Wallace R. Pierson, Eber Holmes and John Huss.

ADOLPH FARENWALD, Pres.

BENJAMIN HAMMOND, Sec.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The club, at their next meeting, which has been postponed for various reasons until Wednesday evening, June 25, at Horticultural Hall, will have ladies' night. A splendid entertainment has been prepared, some noted ladies and gentlemen being included on the program. In addition M. Steinert & Son will send one of their large Victor graphophones and will at intervals favor the audience with songs from the most noted vocalists in the world. The usual collation will be served and dancing enjoyed later in the evening. It is hoped every member who can possibly attend will do so and that a large number of ladies will be present. Plans are well advanced for the annual club picnic to be held in July.

W. N. CRAIG, Secretary.

AMERICAN PEONY SOCIETY.

This society held its annual exhibition last week in Cleveland, Ohio.

BERTRAND H. FARR

President American Peony Society.

jointly with the Ohio Horticultural Society. We regret that a promised report of the exhibition has failed to reach us, much to the disappointment and chagrin of President Farr whose portrait appears herewith and who has informed us that the show was a most excellent one.

The following chairmen of committees were elected at a recent meeting of the Rochester (N. Y.) Florists' Association for the annual flower show; general committee, Charles H. Vick; reception, Hiram H. Edgerton; advertising, A. E. Crockett; decorations, F. J. Keller; finance, W. L. Keller; women's committee, Mrs. John Dunbar; executive committee, F. J. Keller, A. H. Salter, E. P. Wilson, W. H. Dildine, George T. Boucher, H. P. Neun, George B. Hart and George F. Crosman.

HORTICULTURAL SOCIETY OF CHICAGO.

The exhibition at the Art Institute, June 12-13, was worthy to take its place in history as a creditable First Annual Peony Show of the Horticultural Society of Chicago. Other exhibitions in those classic halls have grown into public recognition little by little, but this one found a place waiting for it. The exhibitors were not many, Peterson's Nurseries having the largest display, with W. W. Barnard, Vaughan's Seed Store, Iowa State College, Ames, Iowa, and Rosehill Cemetery Association all staging creditable collections of peonies. On account of the unfavorable weather conditions in May, when a frost damaged the peony crop, the exhibit was necessarily limited in size. The attendance was 574 on Thursday and considerably larger Friday, and neither was a free day. Peony classes were open to professionals, private gardeners and amateurs.

For best display of blooms first prize went to Iowa State College, gard. John Reardon, which also won a silver gilt medal for over 100 blooms of *Festiva Maxima*. Second prize, a silver medal, went to W. W. Barnard, who also was first for collection of standard named varieties. In the various classes for 50 blooms and 12 blooms of specified color Peterson's Nurseries and Vaughan's Seed Store were the main winners, while in the classes for 10 blooms W. W. Barnard took most of the prizes. The collection of perennials was good considering the limited number in bloom at this time. Vaughan's Seed Store had the largest display and C. O. Youngstrand, Golf, Ill., also staged a collection which won a silver medal.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The committee charged with the securing of funds wherewith to erect a suitable memorial to the late Wm. R. Smith, who was for over sixty years superintendent of the U. S. Botanic Garden, and father of the charter of the Society of American Florists and Ornamental Horticulturists, has so far completed all preliminary steps and are now ready to receive subscriptions towards erecting a memorial worthy of the man.

The form which the memorial shall take cannot be definitely decided until we have an approximate idea of the amount of money at the committee's disposal. When this has been ascertained the committee will then formulate plans, and submit them to the Society of American Florists and Ornamental Horticulturists, who will finally pass on them. The committee therefore asks that you take immediate steps with your organization to further this cause, and forward subscriptions to Wm. F. Gude, chairman of the committee, Washington, D. C.

Very respectfully yours,

WM. F. GUDE.

Chairman of the Committee.

PEONY SHOW AT BOSTON.

The special peony show of the Massachusetts Horticultural Society on Saturday and Sunday, June 14 and 15, was one of the most brilliant displays ever seen in Horticultural Hall. Three distinct and remarkable features were the display of peonies by R. & J. Farquhar & Co., comprising several hundred varieties, the sensational exhibit of *Eremurus robustus* and *E. Himalayicus* by Mr. Thatcher of the Mt. Desert Nurseries and the collection of Spencer sweet peas by Wm. Sim. Each of these three exhibits was awarded the gold medal of the Massachusetts Horticultural Society and in each case this high recognition was worthily bestowed. The *eremurus* group contained no less than one hundred and fifty stately spikes and created a sensation among the visitors. E. J. Shaylor and G. H. Peterson were also extensive exhibitors of peonies. Eastern Nurseries and Old Town Nurseries made displays of hardy herbaceous flowers, and the fuchsias from Mrs. Frederick Ayer were very handsome. Awards were as follows:

Herbaceous Peonies—Collection of 20 varieties, double: 1st, Geo. H. Peterson; 2d, James McKissock; 3d, T. C. Thurlow's Sons Co. Ten varieties: 1st, Geo. H. Peterson; 2d, Mrs. J. L. Gardner; 3d, James McKissock. Specimen bloom: 1st, Geo. H. Peterson; 2d, Wm. Whitman. Collection of 12 varieties, single: 1st, T. C. Thurlow's Sons Co. Vase of blooms on long stems, arranged for effect: 1st, Mrs. J. L. Gardner. Six named double varieties, white: 1st, Mrs. J. L. Gardner; 2d, T. C. Thurlow's Sons Co.; 3d, Dr. Charles S. Minot. Six rose pink: 1st, Mrs. J. L. Gardner; 2d, James McKissock; 3d, T. C. Thurlow's Sons Co. Six red: 1st, James McKissock; 2d, T. C. Thurlow's Sons Co. Vase of 25, white: 1st, Mrs. J. L. Gardner; 2d, Geo. H. Peterson; 3d, John R. Comley. Twenty-five, pink: 1st, Wm. Whitman; 2d, Geo. H. Peterson; 3d, Wm. Whitman. Twenty-five, red: 1st, Geo. H. Peterson; 2d, Mrs. J. L. Gardner; 3d, Wm. Whitman. Twenty-five, any other color: 1st, Wm. Whitman; 2d, T. C. Thurlow's Sons Co.; 3d, James McKissock.

Gratuities: E. J. Shaylor, display of peonies; Breck, Robinson Co., display of peonies and herbaceous flowers; G. W. Page, collection of seedling peonies; Mrs. E. M. Gill, peonies and roses; A. W. Preston, collection of pyrethrums; Thos. T. Watt, orchids; J. T. Butterworth, orchids and Spanish iris; Eastern Nurseries, herbaceous flowers; M. P. Haendler, herbaceous flowers; Mt. Desert Nurseries, herbaceous flowers; Mrs. Frederick Ayer, fuchsias; Ellen Page, collection of native plants; Wm. Whitman, peonies; W. Heutis & Son, collection of vegetables.

Gold Medals: Wm. Sim, collection of sweet peas; Mr. Desert Nurseries, *Eremurus*; R. & J. Farquhar & Co., display of peonies.

First Class Certificates of Merit: Mr. Desert Nurseries, seedling peony; C. S. Sargent, *Geum coccineum* var. *Bradshaw*; Wm. Sim, sweet peas.

Honorable Mention: Dr. C. S. Minot, seedling peonies; Thos. T. Watt, specimen *Dendrobium thyrsiflorum*.

SPRING SHOW, NEW YORK, 1914.

The joint committees of the Horticultural Society of New York and the New York Florists' Club held a meeting on Friday, June 13. Permanent organization was effected as follows: Frank R. Pierson, chairman; John Young, secretary; F. R. Newbold, treasurer; H. A. Bunyard, C. H. Totty and Wallace R. Pierson, publicity committee. It was decided to invite all local societies to cooperate. The secretary announced the guarantee list to be over \$4500 to date.

Another meeting was arranged for Wednesday, the 18th, when the schedule would be considered so that it could be sent out at once. Great in-

terest in this exhibition is being shown in all quarters and many of the leading retailers have signified their intention of taking an active part.

JOHN YOUNG, Sec.

A CARD FROM MR. TOTTY.

Members of the Society of American Florists and Ornamental Horticulturists and National Association of Gardeners:

I wish to thank each and every one of you individually for the magnificent gift which I received last week in recognition of my work as chairman of the International Flower Show.

This present is all the more appreciated because it was entirely unexpected. I feel the success of the show was due, not so much to my hard work, but to your earnest co-operation with me in every way.

I only regret I am unable to share this beautiful gift with my fellow committeemen, who worked hard and faithfully and without whose assistance the show would be an impossible undertaking.

Trusting I may have the pleasure of reciprocating in some way in the near future, I remain,

Very sincerely yours,

CHARLES H. TOTTY.

CLUB AND SOCIETY NOTES.

The New London (Conn.) Horticultural Society will hold its rose exhibition on June 24.

The Ladies' Society of American Florists offer a yearly bowling prize of \$25 to the lady having the highest score, said lady bowler to be a member of the Ladies' S. A. F.

MRS. CHAS. H. MAYNARD,

Sec. Ladies' S. A. F.

The annual rose and strawberry exhibition of the Huntington Horticultural Agricultural Society, with the added attractions of ice cream and cake and a dance at the end, drew a large crowd at the Bijou Opera House Thursday, June 12. The display was one of the finest ever given by the society. Some of the finest estates on the North Shore of Long Island were among the exhibitors.

The regular monthly meeting of the Lenox (Mass.) Horticultural Society was held in the Town Hall, Lenox, on Saturday evening, June 7th. H. Heermans, F. Butler and Wm. Griffin were appointed as a committee for the August exhibition, for which the schedules have been issued. There was a very fine exhibit of *Clarkia Veitch's* Queen Mary from R. W. Paterson's place, gard. Thomas Proctor, which was awarded a diploma. The National Association of Gardeners have offered a silver vase for the most meritorious display at the fall exhibition, which is open to all members of the Lenox Society.

J. MAIR, Asst. Sec.

The New Jersey Floricultural Society have decided to continue their agitation to have professional gardeners on park and shade tree commissions. At a meeting held in Lindsley's Hall, Orange, N. J., last week, a communication was received from Prof. M. A. Blake of the State Agricultural College at New Brunswick, endorsing the movement. Wm. A. Manda deplored

the lack of American appreciation of flowers and the men who raise them and contrasted this with conditions in England. M. C. Ebel advised the gardeners not to take any positions on commissions where they did not receive pay.

"Rose Night" brought out one of the largest and most beautiful exhibitions of the June flowers seen at a meeting of this society. George Wraight, gardener to Mrs. M. B. Metcalf of Orange, won first prize.

The Florists' and Gardeners' Club of Rhode Island has won a signal victory in its fight for the unrestricted use of flowers at the summer graduations in schools, especially in the city of Providence. Following a conference between a committee representing the club, and Isaac O. Winslow, superintendent of the schools of Providence, the latter agreed to see to it that all flowers delivered at schools at graduation periods will be accepted, placed in a separate room and delivered to the graduates at the close of the exercises. In making this arrangement the florists feel that they have won a good fight. For the past two years there has been a spirit of antagonism rampant in the Providence schools, particularly the faculty, against the use of flowers. Last year at some of the schools flowers sent there on order were refused admittance to the buildings. The committee, composed of Eugene Appleton, Robert Johnston and William E. Chappell, made its report at the regular meeting of the club, held in Swart's Lodge Hall, Providence, Monday evening.

The regular monthly meeting of the Westchester and Fairfield Horticultural Society was held in Doran's Hall, Greenwich, Conn., June 13th. The second Summer Show of the society will be held in the Town Hall, Greenwich, Conn., June 20-21, when it is hoped a large entry will be made in the various classes for the valuable prizes offered. After a very warm debate it was decided to hold the Third Annual Outing at Rye Beach early in August, date to be announced later.

The exhibits were of excellent culture. The judges' decisions were as follows:

Mr. McAllister, honorable mention for rose Conrad F. Meyer and strawberry Gandy; Thos. Ryan, honorable mention for sweet peas; Jas. Tierney, honorable mention for sweet peas; Oscar Addor, cultural certificate for *Cattleya Mendelli*; W. D. Materyowski, highly commended for peonies; Paul Daunger, vote of thanks for *Excelsior* rye, seven feet high; Dan Pastori, vote of thanks for sweet williams.

The third annual fall exhibition will be held in the Armory, Stamford, Conn., Oct. 31st-Nov. 1st. Schedules are out.

OWEN A. HUNWICK,

Cor. Sec.

NEWS NOTES.

New York, N. Y.—C. C. Trepel is doubling his floor space in Bloomingdale's and is adding two more greenhouses to the conservatories on the roof.

Sedalia, Mo.—The Archias Floral Co. has purchased an entire block on which they will erect a range of rose houses. Other improvements are planned which will more than double the present plant.

AMERICAN ASSOCIATION OF NURSERYMEN.

As we go to press the American Association of Nurserymen is in session at Portland, Oregon, this being its 38th annual convention. Secretary John Hall has kindly furnished us with a copy of his report, which we present herewith and we hope in next week's issue to have at least a partial report of the association's proceedings in that far distant city.

Report of Secretary John Hall.

We have approached this convention with considerable anxiety from the fact that a peculiar combination of circumstances has prevented very many of our members from attending this anniversary. One of the main explanations for this condition is that the meetings of the association, it is claimed, are held at an inopportune time. The spring packing season has barely closed by the time for which this annual gathering is scheduled and the work which follows the packing season demands such close attention that members cannot leave home without incurring loss. Besides, they have

JOHN HALL.

Secretary American Association of Nurserymen.

no intelligent idea at that early date of what stock they have on hand and what their future wants will be. Quite a number of members have expressed themselves as favoring a later date, suggestions varying from two weeks to two months later than the constitutional date.

Then, too, the Panama-Pacific International Exposition of 1915 in San Francisco is claiming the attention of many members to the extent of their letting this convention pass. There are still others who had planned to be present who are prevented from doing so by sickness, either of themselves or members of their families. There is also a strong feeling that the annual convention should be held at some more central point or points which will be reasonably easy of access to members from all directions.

Never in the history of the association have the receipts of the secretary been so large as this year. We report a total income of over \$3300, and we hope to receive at this convention a number of new members.

Another feature which it gives us

pleasure to mention is the large addition which has been made to the membership through the earnest efforts of Mr. James McHutchison, who was appointed a committee for this purpose by President Meehan.

The Grim Reaper has again been busy among us and in the latter half of the year 1912 the losses sustained were very severe.

June 17th—George S. Josselyn died at his home in Fredonia, N. Y., aged 70 years. "Papa Josselyn" will live in the memory of members not alone as an enterprising nurseryman, but also for his excellent personal qualities.

July 26th—Michael H. Golden, president of the Genesee Valley Nurseries, died in Rochester, N. Y.

August 10th—Prof. John Craig, who was at the head of the Department of Horticulture in Cornell University, died at Siasconset, Mass., in his 48th year. We were able to make record of this event in the 1912 annual report.

September 14th—Charles L. Yates died somewhat suddenly at his home in Rochester, aged 65 years. Mr. Yates was for many years the treasurer of this association. He was also business manager of the "National Nurseryman," the official organ of this association, and Prof. Craig was editor of the same publication. It was a singular coincidence that the death of these two men should have come so near together.

September 27th—John Chase, Derry Village, N. H., died, aged 80 years. He first became a member of this association in 1895.

November 13th—George Allen Sweet, Dansville, N. Y., was called home at the age of 68.

November 29th—Charles Dingee, West Chester, Pa., passed away in his 88th year.

February 16th, 1913—William D. Ellwanger, son of the late George Ellwanger, and president of the Ellwanger & Barry Nurseries, passed away at the age of 59 at his home in Rochester, N. Y.

May 29th, 1913—Martha G. Lear, sec-

DURING RECESS.

Cook County Bowling Prizes.

The prizes will be awarded at the Cook Co. (Chicago) Florists Association dinner June 19 and are as follows:

Teams—1st "Roses," \$25; 2nd, "Orchids," \$15; 3rd, "Violets," \$10; 4th, "Carnations," \$5. High single team game—Roses, \$5; high team average, \$5; high individual single score, A. Fisher, \$5; high individual three-game average, Frank Ayers, \$5; individual championship, Cook Co. Florists' Association cup, Al. Fisher; six highest individuals, umbrellas, donated by Zech & Mann—A. Fisher, Wm. Wolf, F. Price, A. Zech Barstrom, F. Ayers; high single score, A. Fisher, watch fob; high average man each team, stick pin; high average three game, F. Ayers, fountain pen.

There was much good natured rivalry all the year, the teams being closely matched. The two highest individual averages were but 5-36 of a point in difference for the year.

WANTED—To lease with privilege of buying, a small range of greenhouses, with a few acres land and house, near some good Massachusetts town. Address J. E., care HORTICULTURE.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS, TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

BEVERLY, MASS.

A CAPE COD GARDEN.

The garden committee of the Massachusetts Horticultural Society, on Monday, June 16, visited the peony and rose garden of Wilton Lockwood at Orleans, Mass. It is a long train ride of over three hours to this town at the further end of Cape Cod but the visitors were well repaid by the sumptuous hospitality of their host and the impressive demonstration his garden affords of what persistence and well-directed industry can achieve in most unpromising surroundings and naturally unproductive soil. Mr. Lockwood's show garden comprises about an acre quadrilateral in form, surrounded by a fringe of trees and a high pergola or arbor, the inner walls of which are covered with various rambler roses, the outside clothed with honeysuckle and the top covered with grape vines, which makes an effectual protection against the wild winds which sweep across the sandy barrens of Cape Cod and without which protection peony culture would be impossible. Never have we seen such luxuriant growth as these climbing roses have made under the generous feeding of fertilizer and water which they evidently receive.

The centre of the garden is occupied by a circular lily pond in which rare aquatic gems abound. Around this pond with grass walks between are the peony beds. Here every promising novelty gets an affectionate reception and trial and, in instances not a few, proving that "promising" is the limit of their virtues. The ears of some of the peony introducers ought to tingle when Mr. Lockwood lets loose a volley of his choice invective in the use of which he is a past master. He has planted a number of English oaks to provide needed shade against the torrid sunlight. The peculiar arrangement of this garden hemmed in by the high arbor and enjoying the evaporation from the water in the centre seems to provide ideal conditions for roses particularly. Many hybrid teas are interspersed and they make a marvelous growth and inflorescence. The peonies are not up to last year's quality, Mr. Lockwood says, but the visitors all agreed that they looked pretty good to them.

TWO NOTABLE AWARDS.

On Friday, June 13, the committee on prizes and exhibitions of the Massachusetts Horticultural Society and a number of invited guests made a tour of the Boston Park System and then visited and inspected the Arnold Arboretum, the result of the visit being that a gold medal was voted for the Park Department in recognition of what it had conferred upon the people of Boston in demonstration of tasteful landscape planting and a gold medal for the Arnold Arboretum as a testimonial of the society's appreciation of the great work done by that institution for the advancement of horticulture.

Waterloo, Ia.—The Galloway Bros.-Bowman Seed Co. have moved their greenhouses from Prospect Hills to land south of their seed house, where they will be enlarged to double their present capacity.

TARIFF AMENDMENTS.

We are notified that a brief, in part as follows, has been filed with Congress by the Tariff Committee of the S. A. F. & O. H.:

"H. R. 3321, page 54, paragraph 215, line 15: Omit the words and all other decorative greenhouse plants and on page 53, paragraph 216, line 10, insert the words, or greenhouse immediately after the word nursery.

"Reasons: This will harmonize the bill by bringing nursery and greenhouse stock into the same paragraph, at the same rate of duty which is essential because the line of distinction between nursery and greenhouse stock is so ill defined, that it is impossible to distinguish the two classes of stock for instance: Nursery stock grown out of doors in Southern United States would be greenhouse stock in the north; this would necessitate the different rates of duty for different parts of the United States, or the arbitrary application of a rate not in accordance with the provisions of the Bill. Again such plants as bay trees are hardy outdoors eight months of the year, but during the winter must be kept in greenhouses. Then there are other plants grown out of doors as nursery stock, also used for forcing in greenhouses, such as lilacs, hydrangeas, rhododendrons, and many others.

"These conflicting conditions would lead to endless confusion and litigation in the classification of this merchandise, so the above changes are absolutely necessary to insure the smooth working of the Bill, also to protect the honest importer, and prevent the unscrupulous from making false custom entries. In addition to this, much of the greenhouse stock consists of cheap plants which are used by the masses and might very properly come under the lower rate of paragraph 216.

"H. R. 3321, page 125, line 1, paragraph 399, insert the words 'four years old or less' after the word 'seedlings.' This change is important, otherwise nothing could prevent large valuable evergreen trees coming in free of duty. It is also the exact intent of the law and will avoid the endless litigation which prevailed under former tariff.

"These changes have the endorsement, as before stated, of the United States Examiner of Plants at the port of New York, also of the American Association of Nurserymen and three other trade organizations who handle these goods."

The above does not come to us officially from the Tariff Committee of the S. A. F., but it seems to be in line with good reasoning and, no doubt, is well advised.

NEWS NOTES.

New York, N. Y.—Frank M. Duggan, formerly with Rickards, has opened a seed and bulb store at 42 West 28th street.

New York, N. Y.—Ralph M. Ward started June 7th on an extended Western trip via Toronto to Vancouver.

SUMMER HINTS.

The hot weather is at hand and va-
cations will soon be in order, but be-
fore your men start off see that the
work of cleaning the store from the
accumulation of the long winter
months is commenced. Fancy baskets,
bric-a-brac, etc., must be given some
consideration and protection from the
flies and dust. Have the individual
pieces taken from their cases or
shelves and thoroughly cleaned, then
wrapped carefully in tissue paper with
a heavy covering of wrapping paper
over all, marking each article properly
in order that the contents are easily
known; these should be stored away
in any part of the cellar where they

will not be easily broken, and next
fall you can bring them into the
store again looking fresh and clean in-
stead of dusty and shopworn, feeling
well repaid for your trouble in the be-
ginning.

Cover all mirrors and chandeliers
with cheese cloth, also all nickel and
brass fixtures, to keep them dustproof,
then pack away all jardineres and any
articles that you will not use through
the summer months, thus giving your
place a cool, airy appearance and
making the work of cleaning and
painting for the coming season an easy
task.

Summer window displays can now
go into effect, removing the heavy
groups of plants, etc., and replacing
same with garden scenes and fountains,
or anything that represents a rural
scene. Fountains with gold fish, tur-
tles, windmills in action, or mechan-
ical displays will carry you nicely
through the next few months. For an
original summer window show for
those not wishing to go to any great
expense just now, and the size of the
window permitting, I would suggest a
quiet woodland scene which can be

carried out as follows: For the center
of the window get an oblong zinc or
sheet iron tank, from five to six feet
long, two or three feet wide, and
about four to six inches deep; have
two attachments made whereby a rub-
ber hose can be fitted to each, one as
an inlet, the other as an outlet; cover
the bottom of the tank with white
sand or gravel, and putting a few gold
fish in, this will be your centre, bank-
ing the edges all around with cork-
bark, green moss and broken rocks,
thereby giving it a rustic finish. A
few stumps of trees scattered carelessly
around the window and small piles
of rock and green moss banked up ir-
regularly in mounds will complete the
foreground. Palms and foliage plants
placed as a background is all that is
necessary to finish a simple summer
show. MR. STOREMAN.

CHICAGO NOTES.

Edward Eisner, for many years with C. A. Samuelson and lately in the retail business for himself, is now in charge of H. Rowe's store on East Monroe street.

Theo. Arndt, 844 Roscoe street, who has been a conspicuous figure at the flower shows, demonstrating how flower pots are made, will leave shortly for North Germany where a legacy bequeathed by an uncle awaits him.

The little group of retail florists, organized a few months ago, as the North Shore Florists' Association, has already seen the possibilities of a broader field for their energies. At their last meeting they changed their name to the Retail Florists Association of Chicago and have sent an invitation to other florists to join with them.

The local papers are commenting on the popularity of the window boxes on office buildings, stores and hotels in the crowded loop district. The success of these attempts to beautify and soften the appearance of the forbidding masses of stone, commonly known as skyscrapers, seemed an idle dream, for the heat reflected from the walls and sidewalks was like a blast from an oven during the hot summer days, but notwithstanding this, these boxes are more in evidence each year and the plants are making fairly good growth away up above the heads of passers by.

The Kroeschell Boiler shipping season has opened up at a lively pace. On June 12th three Kroeschell Boilers were shipped to heat 85,000 square feet of glass. One of the boilers went to the Atlantic Sea Coast, the other one to the Pacific Coast, and the third one to Chicago's largest suburb, Milwaukee. The first shipment of the day was a No. 14 Kroeschell Boiler to Mueller Greenhouse Company, Brown Deer, Wis. The second, a No. 14, to Mr. Carl Ruef, Salem, Oregon, and the third, a No. 6 boiler, to Mr. Ed. Buchtenkirch, Sea Cliff, N. Y. R. J. Tussing of Canal Winchester, O., is also in with an order for a No. 6.

At Poehlmann Bros. Co., Morton Grove, the carnation houses are an object lesson on what expert management coupled with the best possible equipment will do. After a long winter of continuous bloom and a spring of unusually heavy crops, the summer finds the plants apparently as fresh and prolific as ever. Gloriosa is now producing stems averaging 40 inches, with occasional ones reaching 47 inches and more.

Foreman Guy French, who, by the way, is president of the Chicago Florists' Club, is a student as well as a grower and keeps an exact record of the plants. He now has 20,000 Gloriosa and will grow more next year. Enchantress does not weaken, but on the contrary never was better in every particular. Scarlet Glow presented a splendid appearance. They plant their stock in the bench and let them remain and bloom without stopping for two years at a stretch. The natural weakness of stem in Scarlet Glow is overcome by proper feeding. The carnation range yielded 110,000 blooms Memorial week. The young chrysanthemum stock is large, strong and of good color. There are 250,000 plants of standard varieties and pom-

pons in excess of the requirements of their own houses.

Personal.

Mrs. C. N. Dickinson leaves this week with her son for Montana.

Mrs. A. T. Pyfer and son are spending a couple of weeks in Sheboygan, Wis.

Miss Gertrude Lewis of J. Mangel's will spend her vacation near Winnipeg, Man.

Peter Reinberg has tendered his resignation as president of the Chicago School Board.

Fred Hinks and Henry C. Boler, gardener at Hubbard Woods, Ill., will leave in July for two months in England.

Visitors—W. Otto, Tolleston, Ind.; C. B. Knickman, representing McHutchison & Co., New York; A. J. Beehler, South Bend, Ind.

ROCHESTER NEWS ITEMS.

About thirty delegates from Rochester and vicinity left last Friday for the convention of the American Association of Nurserymen in Portland, Ore. John Hall, for four years secretary of the Association, will return early in July by way of California and Salt Lake City.

The plant of the American Fruit Products Company of Rochester, N. Y., was totally destroyed by fire on June 11th and the loss is estimated to be at least \$150,000. Owing to the fact that the plant is located outside of the city line only a limited amount of apparatus could be sent to the scene. The main plant contained several thousand cider barrels but in fifteen minutes after the fire was discovered the plant was a mere shell.

CINCINNATI NOTES.

C. E. Critchell has rented the floor above his present place. Mr. Critchell will use the new space for supplies and offices and the present space for cut flowers alone.

Visitors: Harry Balsley, Detroit, Mich.; Al Newman, Zanesville, O.; Mrs. Lampert and Miss Lampert, Zanesville, O., and Mr. and Mrs. B. H. Klus, Anderson, Ind.

The Outing Committee has selected Coney Island for the annual outing pursuant to their instructions. It will be on Thursday, July 17. Tickets are being mailed to the various florists.

PERSONAL.

J. H. Dann, Sr., of Westfield, N. Y., sails on June 24th on a voyage to Arctic regions.

Mr. and Mrs. Peter Hollenbach of Chicago sailed on the S. S. New Amsterdam June 10th for a three months' trip to Europe.

James Benzie, gardener on the Flanagan estate at Newton, Mass., sailed for Europe on the Franconia from Boston, Tuesday, June 10.

Miss Catherine Montgomery, daughter of Alexander Montgomery, and Mr. Hallett E. Jones were married at Natick, Mass., on Tuesday, June 10.

Bert L. Chadwick informs us that the report that he had left Vaughan's Seed Store to take a position elsewhere, which was current last week, is not correct and that he is still with the above-mentioned concern.

Boston visitors—S. G. Harris, Tarrytown, N. Y.; Bertrand H. Farr, president of the American Peony Society.

Washington visitors—James Heacock, of Joseph Heacock & Sons; Charles W. Fox and Mr. Connors, with Lord & Burnham, all of Philadelphia, Pa.

ALFRED REHDER HONORED.

HORTICULTURE extends hearty congratulations to Mr. Alfred Rehder, of the Arnold Arboretum, who was the recipient of the honorary degree of A. M. from Harvard University, on Wednesday, June 19.

1129 ARCH STREET

PHILADELPHIA, PA

PHILADELPHIA NOTES.

Fred Michell visited the graduation exercises last week at State College where two of his boys have just finished their first year of the course in agriculture.

The Maule forces are having a busy summer. The moving into the new Maule Building at 20th and Arch streets, has already commenced, and they expect to have the big job completed by September 1st.

Jno. F. Sibson, in a personal letter, writes: "I am working for John D. Horst, four miles from Reading, Pa. It is a new place. The landscaping is by Olmsted and I am working from their plans. Beautiful country around here. I like it, but I miss the club meetings very much. Kindly remember me to all the boys."

The sweet pea show of the Philadelphia Horticultural Society is scheduled for the 26th inst. The prize list may be obtained on application to the secretary. There are premiums also for Japanese irises and other hardy perennials. Also for zinnias and gloxinias. No doubt Burpee and other enthusiasts will be on hand as usual with non-competitive exhibits of great interest.

B. Eschner of the M. Rice Co. was busy on Monday receiving congratulations on his safe return from his European trip. Mr. and Mrs. Eschner arrived at New York on the 14th on the S. S. "America." They sailed on the "George Washington." If there be anything in names—some patriotism that! When they reached London the flags were out. It looked like a great welcome for our good Americans, but it turned out that it was only the King's birthday.

Visitors.—Felix Alberts, manager for H. P. Muen, Rochester, N. Y.; John Walker, Youngstown, O.

NEWS NOTES.

Rushville, Ind.—Mrs. Mina E. Fleenor has purchased the greenhouses of the Rushville Floral House, 520 East 11th street, formerly owned by R. L. Friend.

Maywood, Ill.—Rober & Radke have dissolved partnership. Ernest Rober will start in business for himself July 1st at Wilmette, taking over John Felke's place.

Portland, Ore.—A. A. Harter has leased the greenhouse range of W. W. Sibson and will conduct a wholesale business, Mr. Sibson continuing his nursery business as in the past.

FLORISTS FINED FOR VIOLATING LABOR LAW.

Because the state legislature failed to include cut flowers in the list of perishable articles, the care of which would necessitate the employment of a woman more than 10 hours in any one day, Henry Smith and Alfred Hanna, florists, were compelled to pay fines of \$10 and costs in police court yesterday to evade jail sentences of 20 days each.

Smith and Hanna were arrested a week ago on warrants sworn out by Labor Inspector Luella M. Burton, charging them with employing girl clerks more than 10 hours on May 31. When arraigned in police court both pleaded not guilty, but yesterday appeared, unrepresented by attorneys, and changed their pleas to guilty and were each fined \$10 and costs by Acting Police Court Judge Loucks.

The law under which the two florists were arrested has an exception clause which permits the packers of fruits and other perishable articles to employ their female help to exceed 10 hours any one day if it is necessary to keep the perishable stuff from decay. Cut flowers, however, were not considered perishable by the legislators and the recent arrests were the result. The two florists explained to the court that their employees are permitted to leave their places of employment when business is dull, and are often away for an hour or two at a time. This, however, failed to excuse them in the eyes of the court.—*Grand Rapids (Mich.) Herald.*

IN BANKRUPTCY.

Holland, Mich.—Alfred Mitting, liabilities, \$10,000, no assets.

Edenvale, Cal.—I. J. Fraser, liabilities, \$4,750, no assets.

OBITUARY.

William Pirie.

We regret to announce the death of William Pirie which took place suddenly, Friday morning, June 13th, at Rochester, N. Y. The deceased appeared to be in his usual health and showed no signs of trouble. He had just given the morning orders to the men and in two minutes afterward he was found dead, having fallen where he stood, heart trouble being the cause. Mr. Pirie, who was only 34 years of age, came to this country ten years ago, having worked on some large estate in Scotland. For two years he was at Manchester, Mass., and has been head gardener for George Eastman (of kodak fame) for the past eight years. His death has come as a great loss to the Rochester florists and to his many friends and associates. He was a man ever willing to help—trustworthy and congenial. Mr. Pirie leaves his wife and two children to mourn his loss.

HORACE J. HEAD.

Patrick T. Quinn.

Patrick T. Quinn, 75 years old, an authority on agriculture and credited with having introduced the American cranberry into England, died at his home in Newark, N. J. At various times he held offices as secretary of the State Agricultural Society, the State Board of Agriculture and the State Centennial Commission.

Henry Guillaume.

Henry Guillaume, Sr., a prominent florist of La Crosse, Wis., died at his home, 119 Sixth street, May 28th. He was born in Germany 66 years ago. His wife and three children survive him.

Flower Market Reports

BOSTON The state of the flower market here this week is worse, if anything, than it was at the time of our last report. There is an enormous accumulation of all kinds of flower stock and a demand that is far from making any impression on the daily receipts. Beauty roses are of fairly good quality and there are excellent offerings of Cardinal, Carnot and Taft, all of which are recognized as good summer roses but there are only a few buyers who are particular enough to be willing to pay even quoted prices for this grade of stock. Carnations are very good and very bad according to the grower but the best have a hard task to realize a respectable price. Sweet peas are in overwhelming quantity. Only the best are moved and those only at figures that should apply to the lowest quality. The best are superlatively good, however, and ought to have a better recognition. Gardenias are small and inferior and are not wanted. Lily of the valley superb and with a moderate call. Cattleyas good and not sufficiently abundant to break down the normal market price.

BUFFALO There was no life in the market the early part of the previous week. In fact, business was on the quiet side. Plenty of stock and on some lines too much to command any price. All roses were in over-supply except Kaiserin and Richmond. Local peonies have added to the influx and some good varieties in pink and white are in. There has been plenty of all other material and the retail merchant

has had his own way. Weddings are becoming a little more noticeable, though no special demand has been had on any one thing. School commencements are soon in order and a little extra business is figured on.

CHICAGO Weddings and commencements, local and otherwise, are responsible for the moving of most of the flowers not sold for funeral purposes. The season shows nothing remarkable so far, either in number of events or quantity of material used, with few exceptions. White or light orchids are increasing in favor with the brides but lily of the valley still is the mainstay and very good stock is to be had. There seems to be no limit to the

number of roses in the market, but wholesalers say that the really good roses all find buyers. White Killarney meets a steady demand and the call for American Beauty is said to be fairly good, some of the poorer grade having to be worked off cheap. The great majority of the stock of carnations and roses shows that summer is here and much of it is sold at a low price and moved in large quantities. The peonies that come direct from the field to the counters are all disposed of and now the cold storage stock is being used. Many out of door Spencer sweet peas are now coming in, but they do not have the dainty poise of the greenhouse ones. Plenty of mis-

Flower Market Reports

(Continued from page 935)

cellaneous flowers are to be had and all kinds of green.

The local market is CINCINNATI rather weak. The supply is very large and the call for stock is not nearly taking up all of the offerings. A substantial part of the receipts are hardly up to the standard in quality. Quite a few roses are badly mildewed while many of the carnations are soft when they arrive and are affected either by the excessive heat or by red spider. Still, receipts of flowers of quality are more than adequate for the demand. The rose supply includes some very choice offerings but the sales do not begin to take up all of them. Some very fine Giganteum lilies are coming in but they find a slow market. There is a strong demand for lily of the valley. Carnations have been pretty thoroughly shot to pieces by the warm weather. Good gladioli are coming in. Sweet peas have been selling very well.

While there are occasional spurts of mild activity on one or another specialty yet it cannot be said that the flower business in general has made much headway from the stagnant conditions reported last week. Retailers are at times quite busy with steamer baskets, bridal work and graduation bouquets, but the receipts coming in are so heavy that all these things together are comparatively insignificant and they make no impression either on accumulated stock or its market value. The price is generally about what the retailer is disposed to pay, a condition that will be easier to imagine than to describe. A couple of hot days played havoc with the quality of roses, carnations and sweet peas especially and the stock is by no means as good as that offered a week ago. Peonies are still seen in large quantity and the lily situation is not much improved yet.

There was little change in the PHILADELPHIA market last week. Perhaps a little less stock and also a little less business. After the middle of June that condition is to be expected, although according to general opinion among the wholesalers, summer business has gradually increased during the past five years. Roses were very plentiful, especially among the lower grades, and the week's accumulations had to suffer another great sacrifice on Saturday. However, the present week will likely see the end of that. The flush is over, and besides many growers have begun

Iris	1.00	to 2.00	1.00	to 2.00
Daisies	.50	to 1.00	.50	to 1.00
Snapdragons	3.00	to 6.00	3.00	to 6.00
Stocks	1.00	to 3.00	1.00	to 3.00
Sweet Peas (per 100 bunches)	4.00	to 6.00	4.00	to 6.00
Gardenias	5.00	to 8.00	5.00	to 8.00
Adiantum	to 1.00	.75	to 1.00
Smilax	12.00	to 15.00	12.00	to 15.00
Asparagus Plumosus, strings (per 100)	35.00	to 40.00	35.00	to 40.00
& Spreng (100 bunches)	15.00	to 25.00	15.00	to 25.00

to tear out. Carnations are going down hill fast, both in quantity and quality. Next in importance to the rose and carnation at present is the sweet pea. This crop is now very heavy and much more than the market can handle. Mostly all out-door grown, and excellent quality. But it is too late for the church festivals and commencements which are the features that call for this class of stock in May and the first half of June. If possible the growers ought to try to get the flush of this crop in a month earlier to get the money out of it. Gardenias on the wane; few and poor. Orchids in smaller supply with demand sluggish. Fine gladioli a feature. Water lilies and blue delphinium are also conspicuous items.

This market has had a supply of cut stock but the dry and hot weather of late makes the quality poor and extra fine roses and carnations are cut of question at the present time. Prices have fallen off considerable. Ferns are scarce. Asparagus and smilax sell well.

A very satisfactory amount of business has been transacted during the past week. Graduation and commencement exercises have been numerous and demanded a great quantity of flowers—chiefly sweet peas, which we are glad to say were very plentiful and of good size and color. American Beauty and Milady roses were also in demand. Children's Day exercises, June weddings, etc., are in profusion and some large decorations have been done this week at the churches. Carnations are not quite so good as of late. Roses in all grades are good,

also lily of the valley. Out-door roses are plentiful, these retailing at 50 cents per dozen. Peonies are very numerous and the market is practically full. Lemon lilies, Spanish iris, etc., are included as good stock. Smilax is still scarce. Other greens are fairly plentiful.

The intense heat of the present week has caused an influx of roses in a full open condition, with the result that there has been a drop in prices. There is a fair demand for A1 stock. Carnations are fast going out of crop. Cattleyas have dropped somewhat in price. The graduation rush continues. The several conventions held here last week called for extensive dinner decorations but, aside from this, business as a whole is quiet.

The Smith & Hemenway Co. of New York City, inform us that instead of carrying stock in two places they have arranged to carry at the factory, Irvington Mfg. Company, 130 Coit street, Irvington, N. J., a complete stock after July 10th and all shipments will be made from the Irvington Mfg. Company after that date. This enterprise is a movement in the right direction as it means facilitating shipment to customers and making more prompt delivery. Also, they have largely increased the facilities of the factory and stock room to take care of additional stock and of their increased business. It might be well to mention the fact that they are manufacturers of the largest line of hand tools made in the United States, and are owners of the famous trademark, the Genuine "Red Devil."

PEONIES

"PEONIES FOR PLEASURE."
This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure." We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

Our catalogue of everything you need mailed on application. Write for it today.
THE GOOD & REESE CO.

READ THIS

You will need to buy something this
summer—stock, supplies, equipment,
etc., for store or greenhouse. Look
through the Buyers' Directory and
List of Advertisers in this paper and
you'll probably find what you want
listed there. We are proud of the
fact that HORTICULTURE is recog-
nized as the best paper of its class
in this country in quality of reading
matter and also of the fact that it is
coming to be acknowledged as the
best advertising medium. The best
friends of HORTICULTURE are those
who buy from HORTICULTURE'S
advertisers whenever possible and,
in corresponding with the dealers al-
ways take the trifling trouble to re-
fer to the paper. We have many such
friends, otherwise our advertising
columns would soon be deserted.
Don't forget to do your part.

For List of Advertisers See Page 915

GREENHOUSES BUILDING OR CONTEMPLATED.

Range Recently Completed for Seattle Park

FROM our factory at Elizabeth, New Jersey, to Seattle, Washington, is a long way to ship materials for an iron frame range the size of this one. Think of what the freight alone must be on a job of such magnitude. The American people, and especially the Western ones, are noted for their willingness to pay the price necessary to secure a good thing; provided that thing is backed up by the sterling reputation of the firm who manufactures it.

So, in the case of Seattle Park, as our friend, Mr. Post of Postum says: "There's a reason."

Whether it is a magnificent layout proposition like Bronx Park Conservatories, New York; or one of our splendid little \$250 houses; matters not. The same high grade material and thoroughness of workmanship go into any and all of them. You can depend on depending on Hitchings' work, whatever or wherever it is. Send for catalog.

WHAT THE USERS SAY

Kroeschell Boiler, Generator and Heating System Insure Perfect Results.

Having promised you a letter as soon as we passed through a good fair test, I consider it now most timely. We had the thermometer 18° below and we've just gone through a blizzard bad enough for most any season, and am very well pleased to inform you that our heating system was equal to the occasion. So far as we have gone, am certainly well satisfied with the Kroeschell Boiler, Generator and Heating System. J. E. MATTHEWSON, Sheboygan, Wis.

No. 2

Alexander Porter, of Woburn, Mass. Builds an Iron Frame House for Vegetables. Here's What He Says of It:

"IRON FRAME houses are a new thing for us vegetable growers here in the East.

I hesitated a long time before deciding to build this big one of Lord & Burnham construction.

I have long been convinced that the wide Pipe Frame house has entirely too many columns and casts too much shade. It also requires too many repairs.

In this new Iron Frame house of mine, which is 50 feet wide and 450 feet long, there are only two columns, which makes it an easy matter to plow up the ground with a team.

(Of course, this is my first experience with an iron frame house, but I believe no one could go into my house without being impressed by the strong, thorough way in which it is framed. I believe that within the next five years all the progressive vegetable growers will be building houses of the Iron Frame type. It has the strength to stand storms."

GERANIUMS

The report comes from all sections that Geraniums are more in demand this season than ever and that all good stock will be cleaned up. We have an excellent lot of young stock ready to ship out if you wish to grow your own stock for another season, but why bother with it, as we make it our business to provide you stock for you, to be shipped anytime in the fall or winter, you have the room, after Chrysanthemums or another crop has been removed. Our stock houses of Standard sorts alone as now planted contains 300,000 plants as pretty as you ever saw. Then we have Novelty stock, Ivy Leaved sorts, Scented and Variegated varieties to the extent that we are confident we can take care of any order you may place with us. Think it over. Can you afford to bother with the stock yourself for \$18.50 per 1000, for 2-in. plants?

SCARLET BEDDER. We have bought of Elmer D. Smith & Co., stock of this superior Scarlet Geranium and offer good strong plants from 3-in. pots for immediate shipment at \$1.50 per doz., \$10.00 per 100.

SMILAX: 2-in., \$2.00 per 100, \$17.50 per 1000.

COLEUS, ALTERNANTHERAS and other **BEDDING PLANTS.**

CANNAS: 3-in. pot, good sorts, \$3.00 per 100, \$25.00 per 1000; King Humbert, \$5.00 per 100, \$40.00 per 1000.

ACTUAL VALUE

The fact is, the value of Horseshoe Brand Japan bulbs cannot be determined by the price of other brands, because according to the care given in cultivation, and the methods used, they are not susceptible of comparison. If you don't get bulbs from Horseshoe Brand fields you won't get the same grade at all. You may not appreciate the difference, but there is a difference; and often this very difference is the dividing line between good and bad results. Incidentally the cost of Horseshoe Brand Lily bulbs is not higher than most other brands which are not as good. You cannot buy better lily bulbs anywhere nor does any firm appreciate your orders more than we do.

Order now—send for the Book of Bulbology with prices.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Acacias

Acacias should now be plunged out of doors to get the benefit of the bracing summer air. Sink the pots to their rims into any loose and well drained soil, placing them convenient to the hose as they like to be syringed during all bright weather. Give them a look over twice a day for water at the roots so that they may never stand dry for any length of time. About every two weeks turn the pots around so they will not root through into the bed. Those that are rather pot-bound can have some weak liquid feeding once a week which will greatly help them to make good wood and foliage. Propagation can now be done with half-ripened wood in sand in a close frame where the cuttings can be kept shaded and moderately moist by a spraying once or twice a day. They will take some little time to root, but should be potted just as soon as the roots are about half an inch long, in a mixture of turfy loam three parts, cow manure and leaf mold one part each, and enough of sand to make it light.

Care of Pelargoniums

All these plants intended for propagation should have the water supply gradually reduced so the wood will have a chance to ripen up. Pelargoniums intended to produce young stock should have at least seven or eight weeks' rest, after which they can be repotted using a rich compost of turfy loam three parts well decayed cow manure one part, and about the same amount of leaf mold. Provide each pot with plenty of drainage as they will not stand for any stagnation at the roots. After they are repotted they should be given a very light and airy place on a bench that is well up to the glass. Give water in moderate quantity until they begin to make root action and keep well syringed overhead.

Young Primulas

With the rush of other spring work, there is great danger of overlooking those useful winter plants, the primulas. Where they are in 2-inch pots and fairly well rooted they should have a shift into 3-inch pots. Give them a compost of fibrous loam, four parts, leaf mold that is not too old, one part, well rotted cow manure one part, and a little sand. All primulas like a cool place and are benefited by a little shade, so move them into a coldframe, which is the ideal location for them in summer. From the first of June until the first of September they are better when grown under shade made of ordinary building laths, which can be put on as the sun begins to get strong in the morning, and taken off late in the afternoon when it is on the wane. Go over the frames two or three times a day, giving every attention in the way of watering and syringing. Keep shift-

ing into larger pots until you have them in their flowering sizes which will be all the way from a 4-inch up to a 6-inch pot. For a compost use fibrous loam three parts, cow manure and leaf mold one part each.

Decorative Plants

We are now at a season when most decorative plants do their best growing and the cultivator's chief aim from this out is to prevent their growth from becoming too soft and flabby. See that shading is not too densely done—just enough to break the direct rays of the sun and cause a hazy light through the plants. While they will require a certain amount of moisture in the air do not give an overplus of stagnant humidity, which is only too likely to occur. On all favorable occasions abundant ventilation should therefore be in order. Plants of advanced age and size, that have become excessively root-bound should now be repotted. All plants of this class yet on parade in overcrowded show house or narrow quarters should be spread apart, while room in other houses is now unoccupied. Infested plants should be given a thorough cleaning, and sponging, even if not just needed, will be of great benefit and should not be considered a waste of time. A little time to spacing and sorting into different grades and sizes at frequent intervals will be work well spent.

Sowing Perennials

Now that bedding plants are all planted out there will be plenty of room in the frames to sow hardy perennial seed. You can sow up to the middle of July and have nice strong plants by the fall. Give the soil in the frames a coating of manure and dig it over well, breaking all the lumps. Go over it with a rake to make it fine and level and when it is in a good mellow state draw shallow rows up and down the frame about six inches apart and sow the seed. A good rule is to cover each variety about three times their diameter and press the surface over moderately firm. After watering keep them shaded until they start to germinate when they should have full sun. Always bear in mind never to let them dry out as evaporation is great at this time. When the seedlings have progressed so they can be handled they should be transplanted to other quarters. Keep them well cultivated during the summer.

Outdoor Work

The principal care outside now will be to keep the stock in a good growing condition. Go through the plants every week, whether in the field, beds or borders, to keep them free from weeds. Cultivation, to stir the surface of the soil, should be done frequently as it not only prevents the weeds from growing but helps the soil to retain the moisture in dry weather.

Great Object Lesson at Hartford

Again have we visited the most beautiful rose garden on this continent. What inspiration and enthusiasm it brings forth! As an educational lesson on outdoor rose growing for the public, it hits the spot. This rose garden does more good to stimulate rose growing outdoors than any exhibition of cut roses, writing or talking can ever do. I wished that all the members of the American Rose Society had been there to see and to fall to the spell of this lovely little spot (they were all invited) and then to go back home with the determination that they would do all they could to start such a rose garden in their home parks and never let up in agitation until it was a reality. Any man or men who are able to bring this about will earn the greatest gratitude of the people and should have the hearty co-operation of the men in our profession. Theodore Wirth has built himself a monument at Hartford such as very few men ever attain. Let us all try and do our best to have these rose gardens established in all cities wherever possible. It not alone is a great educational work but it means much to the profession in dollars and cents, something which after all is said we must always keep in mind. The trial garden at Hartford is finding a lot of imitators, proving that Mr. Cumming's idea was a good one. The first lot of new roses were judged on June 21st.

I was glad to be there again to see and meet those genial men who are presiding over the welfare of the Hartford Parks. Mr. Parker, superintendent of all the parks, had charge and gave us visitors a royal time. The parks of Hartford are for the people and in no city have I seen this idea better carried out than here. The president of the park board, Mr. Weaver, was with us all day, taking the greatest interest in us, showing and explaining the whole park system. They are proud of their parks and the people who know how to use them. To see the thousands of men, women and children enjoying the blessings of these parks and no waste paper or other litter lying around proves the board to be correct in their ideas about who should own the parks—not the board but the public. All of us visitors, I am sure, came away with the feeling of a day well spent.

ROSE GROWING UNDER GLASS

Plants to be Run Again

Plants in the benches that are to remain another season, should be receiving every possible attention, for their doing well largely depends on their treatment in the beginning. Before doing any cutting back, it is advisable to dry the plants off for a week or two, gradually keeping the water away. It is not for the best to allow them to become too dry as the wood will be likely to get hard and rather slow to start. Killarneys we prefer to cut down to about eight inches and then replant them, as we would young plants. The old plants can be set quite close together and with us produce far more cut roses than any young plants would.

Watering the Old Plants

After planting, water will have to be applied very carefully, for, if the plants are over-watered at all they will produce quantities of weak spindly wood that will never amount to very much, and the plants will just sit

Ixias and Anthuriums

An effective floral arrangement by Max Schling, New York.

Neither ixias nor anthuriums are often found in the stock in trade of the city florist. There is no good reason why they should not be so found, however, as the ixias are easily grown, have attractive colors and keep well as cut flowers and the anthuriums are among the most brilliant, striking and long-keeping flowers in existence. The public are constantly out for something new, something different from what they see repeatedly on every side and we present this daintily arranged vase as a suggestion which may help to develop some new ideas for those of our readers who enjoy doing something out of the ordinary for their patrons.

and look sick. Spray the plants over two or three times every day until they are started, and syringe as often as is necessary to keep them clean and healthy. By saying "spray" we do not mean to soak the whole house with water, but just run along with the hose and spray the plants thoroughly.

Plants that are not to be Moved

These should have the soil scraped from the surface of the bench, and then a little bone meal sprinkled over it. This can be followed by a mulch of manure and soil, mixed about half and half. Needless to say the manure should be well decayed, and positively no fresh manure should be used. The object of this mulch is to let the roots get into it and if fresh manure is used, it will be all washed out about the time the plants begin to need it. Of course all cutting should be done before the plants are thus mulched. Water carefully, same as with the other plants, for too much water is the worst that

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Grapes Cracking

One of the causes of grapes cracking was mentioned in my notes of last week—that of allowing the border to get dry and then soaking it with water, which is going from one extreme to the other. Extremes of various kinds are generally to be blamed for cracking. Not only at the roots will excessive moisture affect them but the same thing may happen through an over-abundance in the atmosphere. Suddenly restricting or reducing the top growth will cause a rush of sap to the berries, being partly ripened, consequently the skin will not expand so readily and thus often results in the above disaster. After the first signs of ripening are noticed keep everything as uniform as possible. More air must be given and so on but make a point of doing it all gradually and keep the moisture evenly distributed, leaving any sub-laterals that may be growing to go as they please. This will take all the sap not utilized by the berries. Many houses may come through year after year without any signs of this trouble. When it does put in an appearance cut out any cracked berries right away or they will soon decay and damage their neighbors. Madresfield Court and Foster's Seedling are two of the worst in this respect and a careful watch should be kept when passing through this period.

Propping Apples

Apples can be treated in a similar manner, which will often save a considerable number of fruits. One better than this is to "prop" them. It answers the same purpose as propping peaches or nectarines—gives the sun a chance to get all around them bringing out the true color. Grown in the orchards we have to be contented with a rosy cheek on one side only—many good eating at that. Pot grown apples are not money makers but make a good decoration and novelty. To "prop" them bend a piece of wire into a ring large enough for the fruit to rest on, leaving the ends of the wire attached so that they make as it were a handle. This handle can be bent into any shape to suit the fruit it is to support, it being tied to a nearby strong branch. The cup or ring on which the fruit is to rest must be covered over with cotton wool to prevent bruising. The fruit is then laid on it horizontally and can be turned around gradually until the true color is seen on all sides. All growths made on both

could ever befall the plants during the early stage of growth.

Disbudding

With the rush of planting now on, we are bound to neglect the houses a bit, but this should never be done under any circumstances. With plenty of nice stock to choose from, the buyers will always think twice before buying a lot of poor roses, and the grower will be the one who will suffer for it in more ways than one. First his returns will not be good; second, his name on the roses will be hurt and, third, a lot of people will be dissatisfied and perhaps wait a long long time before spending a dollar for cut flowers again. Keep the houses disbudded

pears and apples should be stopped at four leaves to assist the flower bud formation.

Pears in Pots

It is well to leave pears to hang on the trees until quite ripe, if the largest and best fruit is desired, which is taking a risk if they are not guarded against falling, as a pear is liable to drop without any warning. The weight of the fruit will make the slender branches bend considerably if they are not located on a spur which has the support of a stronger branch. Where the former condition is noticeable loop them up to a stronger growth or put a stake to the tree and tie them up to this. To prevent their falling to the ground and being bruised make a tie on to the stalk of the fruit and then with the same string make a tie on to the growth bearing it, giving perhaps an inch play. Should the fruit drop off the tree it will be suspended in the air until such time as it is removed. Pears have been known to hang for days like this without injury.

The Muscat House

Muscats will now be coming in and need similar treatment to any other vines at this stage. Let them have as much air as is possible after considering the past week or two, gradually using them to the ventilators' being wide open during the day. This most sought after of all grapes grown will finish up a golden color without showing any trouble. Muscat of Alexandria will keep for a considerable time after being ripe.

Cucumbers in Frames

Cucumbers might have been coupled with melons when referring to them in the frames. The English forcing cucumbers will not grow, to amount to anything, in the open air, the frame holding the moisture makes all the difference. An advantage the cucumber has over the melon for this work is in their developing earlier and quicker and our being able to use any half developed fruits at the time the frames are wanted again. It will be necessary to shade the glass to prevent the foliage from burning with the very hot sun. Keep lots of moisture around and close up the frame early to keep up a good warm night temperature. Attend to stopping in the usual way and many good fruits will repay you.

and add more value to your stock and to the reputation of the same.

Spraying and Fumigating

Watch for a nice cool night, and then fumigate the whole place thoroughly, then try to syringe the next day and finish the job. Spraying well-done can be made to be very effective, but it has to be done carefully, and well. In any place where the spray does not reach, bugs will thrive, so beware of all corners, making sure they are all sprayed properly.

we hope their numbers will continue to increase rapidly. No greater service can the friends of HORTICULTURE render than to recommend the paper to those whom they meet. The more widely the paper is read the greater its value to the advertisers. And upon the advertising support received largely depends the size and quality of each weekly issue. So recommend the paper and recommend its advertisers to your friends at every possible opportunity. The new volume which starts with our next issue offers an excellent opportunity to begin the good work.

The Smith Memorial

The following communication comes from W. F. Gude, chairman of the Wm. R. Smith Memorial Committee.

The Committee appointed by the Society of American Florists and Ornamental Horticulturists at Chicago last year, to solicit funds for the erection of a suitable memorial to the late Wm. R. Smith at the national Capitol, have about completed all the preliminary work, and are now ready to start an active campaign to see what can be done. Would, therefore, ask in the name of the Committee, that from now on, you give this proposition all the publicity possible, towards assisting in securing for the late Wm. R. Smith, the best memorial possible.

We willingly comply with the committee's request and shall be glad if any word that we can say will be of service. W. R. Smith was a man of sterling nobility of character and represented the highest type of the practical gardener. In his unique personality he commanded universal respect and he enjoyed, as well, the sincere affection of his fellowmen. He was a benefactor to the National Society and well worthy of all the gratitude which it is possible to express in a Memorial such as is contemplated. We hope the aid and support of the fraternity which he loved so much will be generously extended to the committee and that the means may be readily forthcoming to provide a tribute worthy of the man and creditable to the profession.

The imitation flower and its place

Judging from the comments and side discussions occasionally heard at this early date, the determining of the National

Society's attitude toward the preserved or artificial flower industry is likely to bring out some pretty lively talk at the Minneapolis Convention of the S. A. F. Putting aside for the time being the question of the Society's indebtedness to the dealers in these supplies for their very substantial support extended during its entire existence, and the privileges which belong to them under the constitution of the organization, it is our belief that the artificial or dried flower holds a position of usefulness in the decorative floral industry which can be made to help rather than hinder and in no respect usurps the rightful prerogatives of the fresh material. In one of the leading flower stores of Boston a number of large paintings of chrysanthemums and other flowers are a much admired decorative feature. Who will say that the banishment of these pictures from the walls of that establishment or, for instance, the removal of the imitation flower canopy from the store window mentioned in our Chicago notes would increase by one cent the fresh flower sales of either place or add in the least degree to the repute of the flower trade or the prosperity of the flower growers? In what respect is the dignity or the general welfare of the business outraged by the exposure of these "counterfeit presentments" of floral art? When it comes to taste in arrangement we must say that "the woods are full" of so-called floral artists who in their occupation of design-making might well take a lesson in form and color effect from some of the artificial goods now offered by the supply dealers.

Close of Volume 17

With the present issue HORTICULTURE's Volume 17 becomes complete. Time flies entirely too fast when one is engaged in congenial work and the writer of these editorial notes finds it hard to realize that the close of a series begun but yesterday, as it were, is so near at hand. We may be pardoned, perhaps, if we take this opportunity to say to our many kind readers that

DISEASED PRIMULAS.

Horticulture Publishing Co., Boston, Mass.
Gentlemen: Will you kindly have Mr. Farrell or some other practical grower of Chinese primroses give instructions for the care of same while growing during the summer in frames, covered during the heat of the day with slats? I especially desire information regarding watering,—how, when and how often should the plants be watered? My pots are plunged to the rims in sand and I have been watering them morning, noon and evening (on bright days) with a sprinkling can. I cover them with slatted sash from 9 a. m. to 4 p. m. Lately I noticed that on a few of the leaves a whitish mildew is forming on edges of leaves. Can this be caused by wetting the leaves in heat of the day and what is the remedy? It would be quite a task to water each plant separately without wetting the leaves; besides the sand in which pots are plunged would dry out and absorb the moisture from the pots. Please tell me how practical growers manage these things and greatly oblige.
Yours truly,

Ohio.

F. S.

In reply to the above I would say that he has done right to cover the plants with a slat shading as the sun is bound to stunt and cripple them, and this is the only way to spare them this exhausting ordeal. As to watering there is no hard or fast rules to go by; when a plant has nearly exhausted its supply of moisture from the soil that is the time when it will require one, two or three waterings a day, and here is where the grower will have to use his best knowledge. You say that your plants are plunged, which is all right, as it helps to keep the roots cool and moist. As to the whitish mildew forming on the edge of the leaves, it may be that you are keeping a too humid atmosphere surrounding the plants. When plants are kept too dark and given lots of moisture the tissue of the leaves simply becomes overcharged with water, especially where evaporation is slow. When plants are kept in vigorous health there will be no signs of fungus. It is only when they lack vitality that they become a prey for fungus growth. As a remedy I would advise to keep the foliage dry for a while and then when you spray to do it in the morning so they will become dry at night. The plants may be infested with green or black fly. Where such is the case, give them weekly fumigation until you have them in a clean state, after which every two weeks should keep them in check. Give plenty of room between them so the air and light can give the foliage a better texture, which will not be so susceptible to the attacks of mildew or insects.
JOHN J. M. FARRELL.

GARDENERS AND POLITICS.

In last week's issue of *Horticulture* I am reported, in the account of a local horticultural society's meeting, as advising the gardeners to take no positions on a commission to which there may be no pay attached. This report unless corrected may lead to a wrong inference, and one contrary to my views, as I believe that the gardener can do nothing better in behalf of his profession than to accept positions on the public boards of his community which serve for the public welfare, when asked to do so.

The agitation on which I was asked to speak, however, is one to compel the park and shade tree commissions

of a certain city to appoint professional gardeners on such commissions. In this particular instance the commission serves without compensation and I stated that the gardener should not envy those appointed to that commission, for all that is attached to it is much work; and the man in public office who conscientiously performs his duties will, every time he pleases one, displease another, so the only remuneration that he can look for in well-doing is a bitter feeling engendered against himself because he cannot please all. There are, however, many public spirited citizens willing to serve their communities even in the face of adverse criticism which they know is bound to result; and these men are to be praised, but not to be envied.

The particular commission which is being assailed is one that is appointed by the political party in power, and I advised that if the gardeners are insistent that they be recognized they can only gain their point by becoming active in politics. To this exception was taken; but I believe that most gardeners will agree with me that the gardener is no different than any other man with political aspirations, and that if he wants political favors he must be politically active. There is nothing to be had in this world today without working for it, and this is as true in politics as it is out of it.

M. C. EBEL,

Sec'y Nat'l Ass'n of Gardeners.

Madison, N. J.

A VISIT TO WILLIAM SIM.

On Friday, June 20, the garden committee of the Massachusetts Horticultural Society visited the noted establishment of William Sim at Cliftondale, Mass. Naturally the sweet pea houses were a special attraction and much admiration was bestowed on the long rows of beautiful Spencers, the flowers of which are picked from a tall step-ladder. Next in interest were the tomatoes. House after house were noted in all stages of growth from those already producing ripe fruit to those just commencing to bloom. All the tomatoes are disbudded to a single stem and are set very close together. The stems and foliage are of enormous development. We counted 34 fruits on one plant. The houses occupied by these tomatoes were filled, some with violets throughout the winter and others until recently with sweet peas. Five acres outside are planted to early corn, started under glass, and other crops which are kept watered by an irrigating system, the water being pumped direct to the pipes from a well, by an electric engine.

A very enjoyable and hospitable time at Mr. Sim's home followed the inspection of this interesting and instructive demonstration of horticultural skill.

Mr. Sim asserts that not only are the Spencer peas more beautiful than the old Grandifloras but they are also far more floriferous. He will grow nothing but Spencers next winter if he can get enough seed.

The gold medal of the Massachusetts Horticultural Society was awarded to Mr. Sim by the committee for skillful cultivation of flowers and vegetables.

OBITUARY.

Frederick William Brookes.

With the death of Frederick William Brookes, the first of the little group of men who laid the foundation of Chicago's great flower industry, passed away, after outliving nearly all of his old associates. Born in London, Eng., Feb. 5, 1827, Frederick Brookes was a boy of six when he came to Chicago with his parents and their family and servants, numbering in all sixteen. Landing in New York, Samuel Brookes first took his family into Canada but not satisfied with that country he pressed on with horses to Buffalo, N. Y., where they were replaced with oxen and the family finally reached the little town of Chicago, just incorporated and numbering 550 people, Oct. 23, 1833. Little Frederick grew with the city and most interesting were his reminiscences. His father, Samuel Brookes, was a great lover of flowers and in London had been a member of the Council of the Horticultural Society. He was especially noted for his interest in the importation of chrysanthemums into this country and we are indebted to his collectors whose expeditions into China and Japan he financed, for such old varieties as Tasseled White, Quilled Salmon, etc. An old memorandum book shows collections made by him as early as 1817 while still in London.

Frederick inherited his father's love of flowers and when only a lad helped erect the first range of greenhouses in Chicago in 1844 where the present post office now stands. When crowded for room, another site was chosen at 39th street, between Lake and Ellis avenues in 1853 and again at 45th street and Lake avenue in 1860. Though actively engaged in the growing and selling of cut flowers for many years, he also learned the printer's trade and followed it for some time. Frederick Brookes and Elizabeth Creek were married in Long Island in 1865 and Mrs. Brookes passed away in 1888. For many years Mr. Brookes has made his home with his son, Robert, at Morgan Park, where he passed away, Sunday, June 22. He leaves three sons, Frederick Arthur of California, Robt. McClure and Ralph William, several grand children and six nephews who acted as pall bearers.

He was noted for the purity of his life and the gentleness of his disposition and many floral offerings showed the respect paid to the memory of a long life well spent.

CATALOGUE RECEIVED.

Sander & Son, St. Albans, Eng., and Bruges, Belgium.—Catalogue of Orchids. A very handsome publication, finely illustrated. A 5-ft. panoramic view of the Sander orchid group at the International Exhibition in London is an insert of great interest and beauty. There must be well up to 2000 species and varieties and hybrid orchids listed in this book, which, we understand, was compiled by D. Cameron, Sander's American representative, and is a very creditable example of catalogue work.

AMERICAN PEONY SOCIETY

THE CLEVELAND MEETING.

Extracts from President Farr's Address.

Reports from all parts are that this has been a very unfavorable season for peony blooms, the mild winter and exceedingly warm weather in March and April having forced the plants into premature growth, which was checked by sudden freezing throughout the country during May, and with the result that the buds were, in many cases, destroyed entirely and blooms have been less than fifty per cent. of what they are in normal years. Again, during the blooming season the country has been visited by heavy frosts, which have affected the development of the late blooming varieties, so that in many ways it has been a most unsatisfactory season, more so than we have had for some years.

Briefly reviewing the work of the society during the last year, I would state that the most important work was the disposal of the large plantings of peonies at Cornell University. All of the old collection in the test plot was sold to Doubleday, Page & Co., and the private collections were sold to various individuals, with the result that the society shows a net increase in its treasury balance, after covering all expenses, of over \$700. This amount added to our previous balance, gives the society at the present time a net worth of approximately \$1,500, a showing which we believe no other society of so small a membership has ever been able to make in so short a time, in spite of the fact that our disbursements for premiums and contributions toward the publication of the bulletins and work at Cornell have been quite heavy each year. The digging and shipping of the peonies from Cornell was accomplished under great difficulties, as during the week that the committee in charge of this was in Ithaca we had continuous rains for four days.

The next and most important work of the society during the year was to arrange with Doubleday, Page & Co., subject to the ratification of the society, for the publishing of a complete peony manual, comprising all of the material in the present bulletins, after they have been edited, revised and corrected, together with such added material as can be gotten together as will make the book valuable for everyone interested in peonies, and to the public in general. It is the expectation that this work will be ready for publication during the coming autumn.

While the greater part of this work has naturally devolved upon the committee appointed for this purpose by the society, the committee feels that every peony grower and every member of the society should form a committee as a whole, to assist in every way possible toward making this final work as complete and as free from errors as it can possibly be made.

Information is especially desired along the following lines:

- (1) A list of all varieties that are

authentic that are not yet included in the bulletins which it would be desirable to include.

- (2) Any information which will be of permanent value in the bulletins concerning the diseases of the peony and remedies for the same.

- (3) Methods of propagation and cultivation.

- (4) Information regarding the methods of handling the cut blooms for commercial purposes, including cold-storage, etc.

- (5) A list of the best one hundred varieties in the writer's opinion, for all purposes.

- (6) A list of the best fifty varieties for landscape or ornamental work.

All correspondence on this subject should be forwarded to Professor A. P. Saunders, Hamilton College, Clinton, N. Y., secretary of the society, and also a member of the committee on nomenclature. The publication of this work brings to close the first epoch in the history of the society. It is not expected that the first edition of this work can be made absolutely free from errors, or that it will be complete in every detail, as there are still many varieties to be passed upon, but to delay the publication of the work until such time as it would be complete would be merely to deprive the members of the results of our work for a number of years to come, and would, in the long run, hinder rather than aid the progress in the work of nomenclature.

While the old planting at Cornell has been abandoned, it must be borne in mind that the final permanent planting of all of the varieties that have been passed upon by the various bulletins has been carried out, and samples, consisting of three plants of each variety, have been planted in a permanent position, where they will remain at all times open to the inspection of members and others interested who shall visit this collection and study it. At the last meeting of the society the desirability of establishing other similar selections in different parts of the country, where the blooming season, owing to latitude, occurs at a different period, and where it would be more accessible to the general public, was discussed. The desirability of establishing such a collection at Arlington farms, under the protection of the United States Government, was discussed, and it was voted unanimously by the society that the establishment of such a collection would be desirable and that steps should be taken to bring about such a planting, which should be known as representing the work of the American Peony Society, and which should at the same time be accessible to the large number of people that constantly visit Arlington.

I am glad to state to the members that Professor Beal, who now has charge of the work at Cornell, is enthusiastic about the peony, and is very anxious to maintain the collection at Cornell and continue the peonies, and to assist the society in

every way. The department is now carrying on an active study of the fungus disease which, in various localities, has attacked the peony. My own opinion of this disease is that it is transient and due largely to conditions prevalent during certain seasons, notably during the season just passed. It is a question whether the blight of the buds, that is sometimes noticed, is caused by the fungus, or whether the blight is caused by weather conditions, such as freezing, etc., which weakens the plant to such an extent that the fungus follows the injury. At any rate, it is the opinion among a large number of growers that while the disease should be stopped, and a remedy found to combat it, that it is not of sufficient importance to warrant any public agitation on the subject.

Hart Bros. won a merited gold medal with their group of *Nephrolepis* varieties.

J. M. Gasser Co. made a very attractive display of roses and some beautifully arranged floral baskets.

City Forester John Boddy, managed the exhibition with excellent judgment and contributed not a little to its success.

C. Betscher, C. Merkel & Son, A. P. Saunders, B. H. Farr, Cottage Gardens Co. and Martin Kohankie were among the successful prize winners.

E. A. Reves made a mammoth display of 100 named varieties of *Paeonia albiflora* comprising about 3000 blooms. A gold medal was his reward.

Rose Milady carried well from Cromwell, Conn., and attracted much attention. Carnation Princess Dagmar from Patten & Co., Tewksbury, Mass., also showed up good.

Officers were elected as follows:—President, B. H. Farr, Reading, Pa.; Vice-President, E. B. George, Painesville, O.; Secretary, A. P. Saunders, Clinton, N. Y.; Treasurer, J. H. Humphrey, Germantown, Pa.; director for three years, Geo. C. Thurlow, West Newbury, Mass. The next meeting will be held in Chicago.

W. P. Edgar, S. A. F. vice-president for Eastern Massachusetts, has issued a pamphlet giving full details of the contemplated trip to the Minneapolis Convention. It is planned for the party to leave Boston on Friday, August 15th, for Montreal, where they will be the guests of the Montreal Florists' Club during Saturday. On Sunday some time will be spent at Niagara Falls. Monday will be spent in Chicago and the party will travel from Chicago to Minneapolis, Monday night, via the Chicago, Milwaukee & St. Paul R. R., arriving Tuesday morning.

The St. Louis County Plant and Flower Growers' Association meets Wednesday, July 2.

CLUBS AND SOCIETIES

ROSE AND STRAWBERRY SHOW AT BOSTON.

The rose and strawberry show of the Massachusetts Horticultural Society on June 21 and 22 owed quite as much of its attractiveness to other features besides roses and strawberries. As a peony show it was a fine exhibition. There was a notably good display of vegetables, and the exhibits of perennials and annuals was large and fine, and despite the rains which shattered flowers and the dull weather of the past two days which retarded growth, there was a larger exhibit of roses than was expected.

In the main hall nearly half of the space was taken by R. & J. Farquhar & Co. for a display of peonies. Arranged on the steps of the loggia and on tables on either side of the hall, they made a beautiful display. In the centre was a large and beautiful collection of digitalis, the number of blooms running into the thousands. At the head of the steps was a striking arrangement of sweet peas, twenty-five different varieties being shown by William Sim.

Mt. Desert Nurseries, Eastern Nurseries, Oldtown Nurseries, Breck-Robinson Co. and Blue Hill Nurseries were all represented by large displays of garden bloom. The center of the smaller hall was occupied by two tanks of aquatic plants and a pyramid of fuchsias from Harvard Botanic Garden. The other exhibitors and their exhibits are set forth in the prize list, which follows:

Silver Medals—Bayard Thayer for collection of Philadelphia hybrids and seedlings; to M. P. Maendler for hardy herbaceous flowers; and to Samuel McMullen for best new strawberry not introduced. Bronze Medal—Eastern Nurseries for hardy herbaceous flowers. First Class Certificate of Merit—E. B. Dane, Dendrobium Sanderae; Walter Hunnewell, Laelia Cattleya Rex, Honorable Mention—Mrs. James Farquhar, display of hybrid tea roses; Eastern Nurseries, display of seedling hybrid climbing and other roses; Mrs. H. E. Dolbeare, collection of rambler roses; R. & J. Farquhar & Co., display of foxgloves; R. & J. Farquhar & Co., display of seedling roses.

One hundred bottles of hardy roses, named: 1st, W. J. Clemson; 2nd, Mrs. Frederick Ayer; 3rd, Colonel Frederick Mason. For the most artistic decoration of roses, with foliage, to fill space not exceeding 50 square feet: 1st, Duncan Finlayson. Best decoration of roses for table of eight covers: 1st, Mrs. Gustav Peterson. The winners in the various other rose classes were: W. J. Clemson, H. E. Converse, Col. F. Mason, Robert Seaver, Thos. N. Cook, Duncan Finlayson, Boston Consumptives' Hospital, Jas. Werner, A. W. Preston and Mrs. J. L. Gardner.

Sweet Williams—1st, Mrs. J. L. Gardner; 2nd, A. W. Preston.

Hardy Herbaceous Flowers, for private growers only—1st, Duncan Finlayson; 2nd, Walter Hunnewell.

Campanula Medium—1st, Mrs. Frederick Ayer; 2nd, Mrs. Frederick Ayer.

Gratuities—Mrs. Frederick Ayer, roses; Mrs. E. M. Gill, roses; Duncan Finlayson, roses; E. J. Shaylor, peonies; Mrs. C. G. Weld, peonies; Breck-Robinson Company, peonies; A. W. Page, seedling peonies; T. C. Thurlow's Sons Company, peonies; Harvard Botanic Garden, aquatics; Mrs. N. B. Cutter, Sweet Williams; Harvard Botanic Gardens, fuchsias; E. D. Dane, orchids; F. J. Dolansky, orchids; J. T. Butterworth, orchids; E. B. Dane, gladiolus hybrids; William Sim, sweet peas; Mt. Desert Nurseries, hardy herbaceous flowers and flowering shrubs.

The fruit and vegetable prizes were numerous, covering the entire field of June products.

AMERICAN SWEET PEA SOCIETY.

Owing to the lateness of the flowering season, it has been decided to postpone the date originally set for the exhibition and convention at Boston to Saturday and Sunday, July 12th and 13th.

The following special prizes have been offered:

W. Atlee Burpee cup, value \$25.00, for the finest twelve vases of Sweet Peas, twelve varieties.

W. Atlee Burpee prizes, for vase of one variety of Spencer type, introduced 1913: 1st, \$5.00; 2nd, \$3.00; 3rd, \$2.00.

W. Atlee Burpee prizes, for vase of Grandiflora type: 1st, \$5.00; 2nd, \$3.00; 3rd, \$2.00.

Arthur T. Boddington prizes, Challenge silver cup, value \$50.00, for a collection of 25 varieties, not less than twenty-five stems to a vase, to be shown with sweet pea foliage only. To be won twice by the same exhibitor. There will also be awarded to the winner of this cup (each time) a cash prize of \$25.00; 2nd, \$15.00; 3rd, \$10.00.

Peter Henderson & Co. prizes. For private gardeners, \$25.00; for amateur gardeners, \$25.00. For particulars, see schedule.

Henry A. Dreer, Inc., prizes, vase of Mrs. Rutzahn Spencer: 1st, \$3.00; 2nd, \$2.00. Vase of Mrs. Walter Wright Spencer: 1st, \$3.00; 2nd, \$2.00. Vase of George Herbert: 1st, \$3.00; 2nd, \$2.00.

Henry F. Michell Co. prizes, for vase of twenty-five blooms, Vermillion Brilliant, without foliage: 1st, Michell's gold medal; 2nd, Michell's silver medal. Vase of Spencer varieties mixed with foliage (not less than 100 blooms): 1st, Michell's gold medal; 2nd, Michell's silver medal.

The Jerome B. Rice Seed Co. prizes, for vase of White Spencers: 1st, \$5.00; 2nd, \$3.00; 3rd, \$2.00.

J. Horace McFarland Co. prize for twelve vases, six Spencer varieties, six Grandiflora varieties, twenty-five sprays to a vase, with any foliage: 1st, \$15.00; 2nd, \$10.00.

Stumpp & Walter Co. prizes, for six vases of Spencers in the following, six colors, Crimson Spencer, White Spencer, Variegated Spencer, Lavender Spencer, Primrose Spencer: 1st, \$15.00; 2nd, \$10.00; 3rd, \$5.00. Not less than twenty-five be used unattached.

Watkins & Simpson prize, for the best six vases Spencer or Unwin sweet peas: \$10.00.

C. C. Morse & Co. prize, silver cup, value \$25.00, for the finest collection of sweet peas (open to the seed trade only); second prize, The American Sweet Pea Society's silver medal; 3rd, The American Sweet Pea Society's bronze medal.

Sutton & Sons prize, silver cup, for best table of sweet peas, to be arranged on a space 3 x 4 ft., not to exceed 3 ft. in height.

We are expecting other special prizes to be offered before the final schedule is published. As stated in my previous report, the Massachusetts Horticultural Society's schedule amounts to about \$500, and we are expecting to apportion a similar amount from our own treasury. With the special prizes offered this will make a very attractive schedule and should be productive of the best exhibition ever held under our auspices.

The following firms and gentlemen have contributed generously toward the prize and general fund:

W. Atlee Burpee Co.; Peter Henderson & Co.; Arthur T. Boddington; Thomas Roland; William Sim; C. C. Morse & Co.; Aphine Mfg. Co.; Duncan Finlayson.

We are still open to receive additional special prizes and contributions toward the general fund, which should reach me not later than next week.

HARRY A. BUNYARD.

Secretary.

342 West 14th St., New York.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The second summer show of the above society was held in the Town Hall, Greenwich, Conn., June 21-22, and proved in every way a thorough success. The excellent quality of the exhibits left no easy task for the judges, who carried out their duties in a very efficient manner. The following were the principal prize winners:

Hybrid Perpetuals, 12 var.—1st, Mrs. F. A. Constable, Gard. James Stuart; 2nd, A. P. Stokes, Gard. A. Whitelaw; 3rd, C. F. Willis, Gard. Martin Glendon.

Hybrid Perpetuals, 6 var.—1st, E. C. Benedict, Gard. Robt. Allen; 2nd, Eugene Meyer, Jr., Gard. Chas. Ruthven; 3rd, Mrs. Henry Schaefer, Gard. Geo. Stumpp.

Vase of 25 Hybrid Perpetuals.—1st, E. C. Benedict; 2nd, Mrs. F. A. Constable; 3rd, J. Langcloth, Gard. Geo. Wooff.

Hardy Tea Roses, 18 vars.—1st, A. P. Stokes; 2nd, H. Darlington, Gard. P. W. Popp; 3rd, C. T. Willis.

Hardy Tea Roses, 6 blooms.—1st, G. D. Barron.

Vase of roses arranged for effect.—1st, H. Darlington; 2nd, A. P. Stokes; 3rd, Mrs. W. G. Nichols, Gard. Wm. McAllister.

Hardy climbing roses, 6 var.—1st, Wm. Shillaber, Gard. J. P. Sorenson.

Collection of outdoor roses, 75 square feet.—H. Darlington.

12 blooms of Frau Karl Druschki.—1st, A. P. Stokes; 2nd, Geo. Lowther, Gard. E. Johnson.

Vase of roses.—1st, H. Darlington; 2nd, Mrs. G. W. Nichols; 3rd, Wm. Shillaber.

Sweet Peas, 18 var.—1st, J. I. Downey, Gard. Thos. Ryan; 2nd, Mrs. J. B. Trevor, Gard. Howard Nicholls; 3rd, Mrs. Albert Crane, Gard. Alex. Geddis.

Sweet peas, 12 var.—1st, Mrs. Albert Crane; 2nd, Mrs. A. A. Anderson, Gard. Robt. Williamson; 3rd, Mrs. J. B. Trevor.

Sweet peas, 6 varieties.—1st, Mrs. J. B. Trevor; 2nd, W. E. Reis; 3rd, Eugene Meyer, Jr.

Vase of sweet peas.—1st, Mrs. Albert Crane; 2nd, Mrs. Henry Schaefer.

Iris.—1st, Mrs. F. A. Constable; 2nd, G. D. Barron.

Hardy flowers, 18 species.—1st, Mrs. F. A. Constable; 2nd, H. Darlington; 3rd, Mrs. Herbert P. Brown.

Hardy flowers, 9 species.—1st, Mrs. A. A. Anderson; 2nd, G. D. Barron.

Hardy flowering shrubs.—1st, Mrs. L. C. Bruce; 2nd, H. Darlington; 3rd, Striglitz.

Palm.—1st, E. C. Benedict; 2nd, Mrs. A. A. Anderson.

Foliage plant.—E. C. Benedict.

Fuchsias.—1st, Mrs. F. A. Constable; 2nd, Robt. Grunnert.

Vegetables, outdoor grown.—1st, Adrian Iselin, Jr., Gard. J. Tiernan; 2nd, H. F. Shoemaker, Gard. J. McLean; 3rd, Mrs. L. C. Bruce.

Cauliflowers.—1st, C. A. Moore; 2nd, A. Forster Higgins, Gard. Paul Dwinzer.

Peas.—1st, H. F. Shoemaker; 2nd, Geo. Lowther.

String beans.—1st, Mrs. J. B. Trevor; 2nd, Adrian Iselin, Jr.

Lettuce.—1st, E. C. Benedict; 2nd, H. J. Parks, Gard. W. L. Marshall.

Cucumbers.—1st, E. C. Benedict; 2nd, Mrs. F. A. Constable.

Strawberries, 3 qts. Robert Grunnert.

2 qts.—1st, Mrs. A. A. Anderson; 2nd, Robert Grunnert.

1 qt.—1st, Mrs. A. A. Anderson; 2nd, Nelson Macy.

Cherries.—1st, Adrian Iselin, Jr.; 2nd, Geo. Lowther.

Nectarines.—1st, Miss M. T. Cockcroft, Gard. Adam Patterson; 2nd, Mrs. F. A. Constable.

Tuber, begonias.—Mrs. A. A. Anderson.

Gloxinias.—1st, Mrs. F. A. Constable; 2nd, Mrs. A. A. Anderson.

Group of flowering and foliage plants, 100 sq. ft.—Mrs. A. A. Anderson.

Tomatoes.—1st, Robert Grunnert; 2nd, Mrs. F. A. Constable.

The silver cup for the most meritorious exhibit was won by the Geo. E. Baldwin Co., Mamaronck, with a fine collection of orchids.

Table Decorations.—1st, Mrs. F. A. Constable; 2nd, Mrs. Henry Schaefer; 3rd, J. Langcloth.

OWEN A. HUNWICK, Cor. Sec.

LANCASTER COUNTY FLORISTS' CLUB.

June 19th was perennial flower day with the Club and the exhibition table was filled with flowers. H. D. Rohrer exhibited hydrangea, delphinium, campanula and Rambler roses; A. M. Herr, Japanese iris; B. F. Barr, delphinium, Gaillardia and Tamarix; Fred Spinner, perennials J. P. Siebold, Silver Pink snapdragon; Rudolph Nagle, Scarlet Bedder, S. A. Nutt, Poitevine and Ricard geraniums. H. F. Michell Company of Philadelphia exhibited a fine lot of their new geranium Helen Michell, which was well received and their representative was given the floor to expound its merits which he did to perfection.

The Voltax Paint Co., through their agent, Mr. Thomas Langan, gave a very interesting and instructive talk on paints and painting. These talks, while in the nature of advertising, are, nevertheless, good things for the club as there is always something to be learned from them and knowledge never comes amiss.

Harry Rohrer then gave a talk on hardy flowers for Memorial Day, giving peonies first place, naming the best for this date as follows: *Officinalis Rubra*, *Festiva Maxima*, *Edula Superba*, *Rubra Triumphant* and *Agida*. In German iris, which are good Memorial Day flowers, he named *pallida Dalmatica*, *Heavenly Blue* and *Silver King*. Poppies and columbines were named and if cut and handled at the proper time they make excellent stock. Pyrethrums and delphiniums, *Dianthus barbatus* and *Gaillardia* all make fine stock for Memorial Day if properly grown. Campanula potted in the fall into six-inch pots, kept in a cold frame and brought along slowly can be had in full crop for Memorial Day and makes a very profitable flower.

Under the head of "Good of the Club," the appeal for funds for the Smith Memorial was brought up and a unanimous vote in favor of a small assessment from each member for this purpose was carried.

The Club picnic will be held at Hershey, Pa., Tuesday, July 15th, leaving Lancaster about 7.30 A. M., getting back to Lancaster about 9 P. M. Any florist who happens this way is welcome and will have the time of his life. Florists from surrounding towns should meet the train when it arrives at Hershey and get in with the Lancaster bunch to have the full benefit of our special affairs.

Lancaster, Mass. A. M. HERR.

RHODE ISLAND HORTICULTURAL SOCIETY.

The annual June exhibition of roses and strawberries of the Rhode Island Horticultural Society was held on June 18, in the parlors of the Mathewson Street M. E. Church, Providence, and it was the best summer exhibit the society has ever placed before the public, this being especially true of the roses. The general arrangement was attractive and much interest was manifested by the large gathering that attended.

The largest display of roses was that of the Vacant Lot Gardens, of which H. Howard Pepper is the owner. Mr. Pepper's exhibit occupied a centre table and included 40 varieties, all

hardy, comprising 500 flowers. Burke & Burns made a fine showing in hot-house roses and sweet peas. E. J. Bevins of East Greenwich made a fine showing in roses which captured six of the 11 awards in the out-door classes. Mr. Bevins also carried off the honors for peas. A large basket of roses, lily of the valley and ferns was made by T. J. Johnston & Co.

An excellent display of orchids was made by E. L. Nock of Providence.

At the right of the entrance there was a fine showing of larkspur by Fred C. Green, superintendent of Roger Williams Park. The showing of strawberries was small, but the quality of the fruit was very good. Samuel Razee of Ashton was awarded the prize for the best collection; Prof. Barlow of the Rhode Island State College received the honors for the best single quart; 2nd to Wallace L. Pond of this city.

The prizes in the professional classes for roses were won principally by C. Hartstra, H. Howard Pepper, T. J. Johnston & Co., E. J. Bevins, Burke & Burns and Mrs. E. Osborne. Wm. Appleton, Wm. I. Hough and others were prominent in the promiscuous classes.

Eugene A. Appleton was the judge of the flower display, and Joshua Vose of Pontiac was the judge of fruit.

NATIONAL ASSOCIATION OF GARDENERS.

Owing to the change of date of the annual show of the American Sweet Pea Society, which will occur in Boston on July 12th and 13th, the summer meeting of the National Association of Gardeners has been postponed from July 5th to July 12th and will be held in Horticultural Hall, Boston, on that day at 2 o'clock. A meeting of trustees and directors of the association will take place at 1.30 o'clock.

Members attending the meeting going by way of New York, will leave over the outside line of the Metropolitan Steamship Company, Pier 19, North River, at 5 o'clock on Friday, July 11th. This is the all-water route direct to Boston.

M. C. EBEL, Secretary.

ON and after July 1, 1913, *Mr. Sydney Bayersdorfer* will be given an interest in our business. In making this announcement we take occasion to thank the florists trade for their generous support during our many years of pleasant association with them, and we hope with the addition of young blood and increased facilities which are contemplated we may continue to merit the kind patronage of the trade.

H. BAYERSDORFER & CO.

1129 Arch St., Philadelphia, Pa.

AMERICAN ROSE SOCIETY.

Judges' Report.

Your judges passed on the exhibits of roses in the test garden at Elizabeth Park, Hartford, Conn., June 21, 1913, and present the following report:

Robin Hood disseminated by E. G. Hill Co., Richmond, Ind., 1912. Parentage, Rhea Reid x Richmond. Scored 89 points. Certificate of Merit.

Seedling, No. 510. E. G. Hill Co., Rhea Reid x Chateau des Clos Vougeot. Scored 80 points. Certificate of Merit.

Seedling, No. 525. E. G. Hill Co., Rhea Reid x Richmond. Scored 87 points. Silver Medal.

Milady. Disseminated, 1913. A. N. Pierson, Inc., Richmond x J. B. Clark. Scored 88 points. Certificate of Merit.

American Pillar. Disseminated, 1909. Conard & Jones, West Grove, Pa. Scored 85 points. Certificate of Merit.

American Pillar. Disseminated, 1909. Peter Henderson & Co. Scored 80 points. Certificate of Merit.

Shatemuc. Disseminated, 1911. Shatemuc Nurseries, Barrytown, N. Y. Hybrid of Multiflora Nana. Scored 83 points. Certificate of Merit.

Seedling, No. 411. John Cook, Baltimore, Md. Etoile de France x Seedling. Scored 83 points. Certificate of Merit.

Seedling, No. 425. John Cook, Baltimore, Md., Frau Karl Druschki x Pink Seedling. Scored 86 points. Silver medal.

Radiance. John Cook. Cardinal x Pink Seedling. Scored 86 points. Certificate of Merit.

Climbing American Beauty. Hoopes Bro. & Thomas, West Chester, Pa. Wichuraiana x Marion Dingee x American Beauty. Scored 84 points. Certificate of Merit.

Lady Hillingdon. Lowe & Shawyer. Scored 83 points. Certificate of Merit.

Respectfully submitted,

W. R. PIERSON,
E. B. HOLMES,
JOHN F. HUSS,

Judges by Appointment American Rose Society.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

That popular event known as Ladies' Night, annually looked forward to by the youth and beauty of horticultural Boston as the jolliest of the season's entertainments, drew to Horticultural Hall, Wednesday evening, a gathering that filled the lecture room to the doors. It was a notable success from start to finish and carried out with a snap and system that spoke well for the gentlemen who had it in charge.

The regular business of the Club was first taken care of. Briefly, it

included the acceptance of communications from Secretary John Young concerning the New York Show for 1914, from W. F. Gude in reference to the proposed W. R. Smith memorial, from John Barr acknowledging the Club's kindness during his recent illness, by Geo. Anderson presenting resolutions on the death of Wm. B. Robb, and a vote to join with the Horticultural Club of Boston in the projected trip to Minneapolis via Montreal next August. Four new members were enrolled.

Then came the entertainment, which was the best ever given in the Club. It consisted of piano solos by Miss Singer, songs by Mr. Jas. Singer, songs and character impersonations by Herbert A. Clark, violin solos by Miss Horton and selections from the Victrola by the courtesy of M. Steinert & Sons Company. Ice cream, strawberries, cake and coffee were served in the large exhibition hall while the lecture room was being cleared for dancing, which lasted until near midnight, a good orchestra being in attendance.

It was announced that the annual picnic would take place at Milton, on some day during the week beginning July 23.

President Kennedy made preliminary announcement of his plans for a Ladies' Auxiliary and Mrs. E. M. Gill affixed her signature as the first member.

NEWPORT FLOWER AND FRUIT SHOW.

A most interesting open-air exhibition of plants, flowers and fruit under the joint auspices of the Newport Garden Association and the Newport Horticultural Society was opened Wednesday, June 25, at Harbor Court, the residence of Mrs. John Nicholas Brown.

There were two classes of exhibits, those of the Garden Association consisting chiefly of groups of plants planted in the ground, and those of the Newport Horticultural Society comprising magnificent displays of cut roses, sweet peas and hardy perennials.

The spacious grounds of Mrs. J. N. Brown, overlooking the harbor, afforded a fine setting for the exhibition. Near the entrance was an elaborate and artistically-planted rock garden, the work of John Mahan, gardener for Mrs. H. D. Auchincloss. Following this came a large group of coniferous and other evergreen plants, planted and exhibited by Otto Schultz. Mr. Schultz also made a fine exhibit of foxgloves. Then followed showy beds of forced petunias, schizanthus, clarkias, and sweet peas—the last grown in tubs and plunged. Henry A. Dreer made a fine showing of aquatic plants and Bobbink & Atkins showed a group of their finest bay trees and topiary box trees. In the cut flower classes, sweet peas and roses were of unusual merit.

The judges for the Garden Association were Mrs. Arnold Hague, Newport, Frederick Newbold, New York, John K. M. L. Farquhar, Boston. Those for the Newport Horticultural Society were Messrs. Robertson, Carter and Craig.

In our next issue full particulars of this notable exhibition will appear.

OYSTER BAY HORTICULTURAL SOCIETY.

Prominent members of the summer colony figured conspicuously in the second annual summer show of the Oyster Bay (N. Y.) Horticultural Society, held June 12. Benjamin Stern of Roslyn, Edward F. Whitney, E. M. Townsend, Howard C. Smith, Charles L. Tiffany and Fay Ingalls of Oyster Bay and T. A. Havemeyer of Brookville were among the leading exhibitors in the regular classes.

One of the most noteworthy exhibits was the collection of peonies of all varieties and colors, of Theodore A. Havemeyer of Brookville. This wonderful collection of scores of blooms was awarded the silver cup offered by John Miller, superintendent of the L. C. Tiffany estate.

Another meritorious exhibit not in competition, however, was the collection of flowering plants exhibited by Louis C. Tiffany. This exhibit was given the society's certificate of merit.

PHILADELPHIA NOTES.

Mrs. Walter F. Fancourt sails for England on the S. S. "Merion" from Philadelphia on July 5th, on a brief visit to relatives in the old home. We wish her a happy vacation and a safe return to our midst.

Robert Greenlaw, New England representative of the Pennock-Meehan Co., paid us his annual visit this week. He has been with this firm now for several years and has met with deserved success; not only on his own personality, but from the high position which his firm holds for taste and exclusiveness in ribbons and other florists' requisites. We can well remember thirty years ago—in our first experiences of Boston—meeting with Robert's uncle—"old man" Greenlaw he was affectionately called; and we feel rather proud of the good record the younger scion of the family is making.

Visitors: C. B. Coe, of D. M. Ferry & Co., Detroit, Mich.; Philip Kessler, New York City; W. C. Langbridge, Cambridge, N. Y.; E. A. Seidewitz, Baltimore, Md.; Mr. Brunig, foreman for H. G. Berning, St. Louis, Mo.; Antoine Leuthy, Boston, Mass.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

American Seed Trade Convention.

The 31st annual convention of the American Seed Trade Association opened in Cleveland, O., on the morning of the 24th, a liberal number of members being present. The Convention was welcomed to the city by His Honor Mayor Baker, in a very bright and interesting address, after which came the President's address, and this was clear-cut and forcible. His recommendations are excellent, and a committee was appointed to consider them and recommend such as were practical, if not all of them, to the Association, for adoption at the earliest practicable date. One of Mr. Page's recommendations is worthy of especial notice; that was his advocacy of a World's Seed Convention, to be held in San Francisco in 1915. It may or may not be known that there is a strong sentiment among the seedsmen to visit California in a body during the year of the Panama Exposition, and to hold the convention that year in San Francisco. A prominent California seed grower has been mentioned as the probable president for that year, and we have been advised that he is willing to serve if drafted. This World's Seed Congress, as we may term it, is quite an ambitious proposition; at the same time there is nothing impracticable about it and we believe that the more it is considered, the stronger it will appeal to members of the American Seed Trade Association.

While the attendance, especially on the second day, was, we believe, fully up to other years, as to members, there were not nearly as many ladies present as at some of the conventions in the past. This may or may not have been due to the fact that the convention is held in a city instead of at an attractive summer resort. Whenever the latter place is chosen, the ladies turn out in much larger numbers than when the conventions are held in the towns. It is hoped that the next convention will be held at some attractive spot where the winds will have

full play and where there will be no soot and black smoke to breathe.

A number of important and interesting papers were read, chief among them being one by James J. Hill, President of the Great Northern Railroad. While Mr. Hill was not present in person, his paper was an extremely interesting and forceful one and his recommendations very practical. It was a little unfortunate that in certain of his quotations Mr. Hill was led into error by quoting from the statements of the Federal Department of Agriculture. Like many others Mr. Hill assumes that anything that comes out from that department must be correct, while, as a matter of fact, those who are familiar with the workings of this branch of the Government service know that often very ill-advised and incorrect statements are sent out. However this slight slip on the part of the great railroad man can easily be overlooked when considering the excellence of his paper as a whole.

Among other papers read, which are worthy of note was one by J. C. Robinson; one by Chas. D. Boyle. The report of the Association's counsel was also most interesting and Mr. Smith proves himself well qualified for his position.

Quite a comprehensive program of the entertainments was carried out, the principal features being an automobile ride about the city and parks, including Forest Hill, the Cleveland home of Mr. John D. Rockefeller. For this occasion Mr. Rockefeller threw open the grounds for the inspection and pleasure of the members of the Association, and this courtesy on the part of the oil king was very greatly appreciated. Another very interesting entertainment was a visit to the grounds and plant of the Storrs & Harrison Company at Painesville. The company generously provided special cars for the visit and all thoroughly enjoyed it.

Crop News.

Crop news at this time of the year is not very conclusive and one hardly knows how to guess the situation. It really is little more than a guess, with the possible exception of peas. These are rapidly nearing a stage where it will be possible to form some sort of estimate of the probable crop, but, with the exception of California, no crops are sufficiently advanced to enable us to give anything approaching a reliable estimate of final results; therefore, we will not indulge in idle guesses, but will not fail to keep our readers advised of any important developments in the crop line.

It might be well to say that the pea crop for canning purposes in Delaware and Maryland is extremely short, not averaging above 25 per cent on the acreage planted. Tomatoes also are very backward, the first settings having been nearly all destroyed by frost, necessitating starting from seed a second time, which, of course, makes the crop from four to six weeks later than it should be. If frost holds off until October, undoubtedly there will be fairly satisfactory crops of tomatoes in the two states mentioned, as well as New Jersey, which may properly be included here. We are, of course, referring to tomatoes for canning purposes.

LAWN GRASS SEED

WHOLESALE ONLY

J. OLIVER JOHNSON, 1874-76 Milwaukee Avenue, CHICAGO, ILL.

Seed Laws.

Reference has been made to the paper or report of Curtis Nye Smith, which dealt mainly with new, or attempted seed laws. He called particular attention to the persistent efforts of Senator Gronna to pass a most objectionable and unreasonable bill. Why this senator should persist, after having been shown that his measure is impossible of enforcement, it is difficult to understand, unless it is admitted that he belongs in that class of demagogues who is working to keep himself in the public eye, and especially to pose as the friend of the farmer. This law and many others are so unreasonable that Mr. Smith says they are unconstitutional, or would be if enacted. It does not seem amiss to apply a famous saying to these laws or proposed laws, that "they are conceived in ignorance, if not brought forth in iniquity." It seems to be the opinion of Mr. Smith that the seedsmen will have to devote considerable and close attention to state laws to prevent unreasonable and oppressive legislation.

Plant Trade in Chicago Seed Stores.

Counter trade in the seed stores is getting slower each day and seedsmen are getting catalogues ready for the fall bulb trade. It has been a fairly

good year, and some report the season's sales as ahead of those of last year. The demand for cannas has been unusually good, partly attributed to the growing appreciation of this flower, and partly to the fact that stock was rather scarce, but in sharp contrast to last year when sales lagged. King Humbert again led with second call for miscellaneous, always including Express, Florence Vaughan and Chas. Henderson. Gladioli, too, enjoyed a revival of favor, with this difference, that customers no longer are satisfied with any kind, but want named varieties and best of all, are willing to pay for them. Dahlias have also swung around into favor again. Perennials were so generally killed two years ago that sales have been noticeably large on the old-fashioned sorts this year.

Stumpp & Walter have leased the large store heretofore occupied by Bawo & Dotter at 30 and 32 Barclay street, New York. Extensive alterations will be made and they will move in when these are completed, probably about September 1.

The Massachusetts Horticultural Society has awarded its gold medal to the Town of Ashby, Mass., for the preservation of the native Kalmias on Laurel Hill.

DELIVERY.

The shipper's responsibility is by no means an easy berth to lie in, especially around holiday time when deliveries are unusually heavy and he must satisfy everybody, at the same time watching trains, boats, etc., and keeping his eye on the delivery wagons and boys, in addition.

Very often in rush times a few packages may be sent out in a hurry to satisfy somebody and no record made of it, no receipt taken, and it is usually these rush packages that go wrong. Sooner or later somebody appears and wants to know where the flowers are that were ordered to be sent to 215 Main St. How can you convince the

person that you sent them? You have no receipt to show, and no record in the shipping-book; only the delivery boy's word that he left them at the right address, with the elevator boy, but this does not satisfy the party, and here you have a lot of trouble on your hands because your delivery did not go through the proper form. If the express companies rushed through special packages in this manner, they would go broke, paying out claims.

The shipping department books must be just as accurate as the book-keeper's office is in their work. Establish an iron-bound rule and see that it is carried out; create a system in your delivery department and see that everybody connected with it lives up to it, so that when you hold a receipt for flowers delivered as per address, that is all that is necessary, and see that you get one for every delivery

that leaves your store, even at the busiest time. If a person wants a package to go just next door, make an entry in the shipping book and get the receipt. This lets you out, should the party not receive what was intended for them.

Many small places have no shipper; they are consequently more liable to have trouble than the larger stores, and they have to make good for purchases never received. Flowers are left at wrong addresses and the discovery made when too late; thus the order must be duplicated.

It is a very small matter to run a shipping book on a small scale, if only for your own protection and satisfaction to know your deliveries are going right. Here is a simple system of shipping flowers and keeping records: Get an ordinary day book of three to four hundred pages and put the day, date and month at the top, enter the name of your deliveries as they are to be sent out and by whom they are taken, then put down the time the deliveries left the store, and when the receipt comes back you will have a full record to show of your transaction should anything go wrong.

DURING RECESS.

Florists' Club of Philadelphia Annual Picnic.

This event took place at Washington Park on the 19th inst., and was a great success. Over 200 members and their friends took part. The women and children accompanied, and gave the finishing touch to the friendly gathering. Occasions like these are great cementers of old friendship and great promoters of new, and when well conducted (as this one was) prove good mediums—not only for an innocent day's frolic—but for the interchange of experiences and precious new ideas of inestimable value for the future.

After an hour's sight-seeing sail up and down the river the boat landed at Washington Park on the Delaware about 3 P. M. For three hours sports and pastimes were indulged in in the Athletic Field attached to the park, and at 6.30 P. M. dinner was served in the main pavilion. At 9 P. M. the party took the boat for Philadelphia—tired but happy!

Among the interesting features of the sports was the Base Ball Game.

This was a beautiful exhibition of the finest two nines that could be picked—one from the seed trade; one from the florists trade. The contest was the keenest amateur exhibition of the national game we have ever seen. The seedsmen put up a splendid fight, against big odds. They had nothing like the mass of available material to pick from that the florists had. The florists had wholesalers, retailers, growers, commission men, and all kinds of affiliations to pick from—and for our own part we consider it really astonishing that the team from only three houses of the seed trade (Michell, Burpee, and Dreer) should have made such a good showing as they did. The score was six to three, favor florists. The other pastimes resulted as follows:

Ladies' 50 yard Race—1st, Miss Heacock; 2nd, Mrs. Robertson; 3rd, Miss Connor.
Men's Sack Race—1st, Francis Stokes; 2nd, Elmer Gehring; 3rd, Robert Shock.
Girls' 75-yard Race—1st, Ethel Robertson; 2nd, Mildred Adelberger.
Ladies' Wheelbarrow Race—1st, Mrs. Rust; 2nd, Mrs. Thilow; 3rd, Mrs. Miller.
Ladies' Potato Race—1st, Miss Heacock; 2nd, Mrs. Miller; 3rd, Mrs. E. Aschman.
Boys' 75-yard Race—1st, Wm. Robertson, Jr.; 2nd, Alfred Rust.
Pat Men's Race—1st, Robert Shock; 2nd, H. Aschman; 3rd, T. Shober.
Men's Wheelbarrow Race—1st, James Heacock; 2nd, Paul Klingsporn; 3rd, Edward Reid.
Special Race—100-yard dash between Edward Towill, Adolph Farenwald, Fred Michell, Sr. and Victor Groshens, for prize consisting of a carving set, offered by Edward Reid, of Ranstead street, was won by Ed. Towill.

Secretary David Rust says it was the cheapest afternoon's enjoyment he has had in a long time. He paid six for his three tickets; but Mrs. Rust and the boy brought him back five in prizes. President Thilow was on hand and was indefatigable in seeing that everything went smoothly.

G. C. W.

The Dreer boys who sent three of their baseball nine to the florists' club picnic on the 19th inst.—to help win a game—but were unable to stop the terrific onslaught of the victors—are congratulating themselves on win-

ning a glorious victory two days later against the strong Y. M. C. A. of Hadonfield, eight to seven. This is the city team and is distinct from the Riverton Dreers.

THE WARETOWN OPENING.

The time-honored opening and flag-raising at Commodore John Westcott's hospitable club house on Barnegat Bay took place last Friday, June 20, the festivities lasting three days. The occasion was in all respects equal to its predecessors of other years. Besides the regular Philadelphia participants there were present from a distance W. F. Gude of Washington, D. C.; J. K. M. L. Farquhar, Col. W. W. Castle and W. J. Stewart of Boston; and John N. May, Jas. Dean, C. H. Totty and W. F. Sheridan from New York and vicinity. Letters of cordial greeting were received from Patrick O'Mara, J. Otto Thilow and others and a telegram from Edwin Lonsdale, Lompoc, Cal., was received with unbounded enthusiasm.

An interesting feature of the first evening's symposium was the presentation to Mr. Westcott of a Victrola with a fine selection of records and the visit was consequently enlivened with enjoyable music by this wonderful invention, in addition to the customary contributions by Robert Craig and other more or less talented vocalists. The memorial trees given by the late W. R. Smith and planted under his direction were found to be thriving vigorously and promise to soon attain to a very ornamental adjunct to the outlook from the club house piazza.

Day and night were devoted by the beloved old Commodore to the comfort and enjoyment of his guests, an occupation which is his happiest pastime. Long may he live to dispense the sweet sunshine of a disposition which finds its best expression in generous deeds and kindly admonition.

PERSONAL.

Howard M. Earl, of Burpee's, sails from New York on July 5th on the Scandinavian line for Copenhagen.

The Maryland Agricultural College at its commencement last week conferred an honorary degree on Richard Vincent, Jr., for his achievements in

horticulture and floriculture. HORTICULTURE extends sincere felicitations.

J. B. Wiese and daughter of Buffalo, N. Y., leave on Wednesday for a trip abroad and are not expected to return until Oct. 1st.

Phil Breitmeyer was a recent visitor in Buffalo, having a decoration for the wedding of his niece, Miss Buehl on Richmond avenue.

George Butler, gardener for Wells' estate at Southbridge, Mass., will leave July 1, to take charge of the estate of George E. Barnard, Ipswich, Mass.

David Welch, of Welch Bros., sailed on the Cunarder Laconia, from Boston, on Tuesday, June 24, for a short recreation trip. He will return the latter part of July.

Edw. T. Dickinson, nurseryman, of Chateauf, Seine, France, arrived in New York on the La Touraine on June 16. It is three years since Mr. Dickinson last visited this country.

Prof. H. J. Webber of the Dept. of Plant Breeding at Cornell has accepted a position in the University of California as Director of the Citrus Experiment Station and Dean of the Graduate School of Tropical Agriculture, at Riverside, Cal.

Boston visitors: A. E. Thatcher, Bar Harbor, Me.; John Young, New York.

Cincinnati visitors—A. Miller, representing A. Henderson & Co., Chicago, and Ross Adgate, representing the McCallum Co., Inc., Pittsburg.

New York visitors: J. K. M. L. Farquhar and Col. W. W. Castle, Boston, Mass.; Mr. Burns, New Canaan, Conn.

St. Louis Visitors.—Carl Whiting of A. L. Randall Co., Chicago; Jno. Buback of Schloss Bros., New York; Sam Frund, Chicago; E. C. Pruner of Poehlmann Bros., Chicago.

KENDALLVILLE, IND.

CHICAGO NOTES.

Mrs. A. H. Budlong and children are at their summer home at Williams Bay near Lake Geneva, Wis.

Poehlmann Bros. Co. will have a new catalogue of florists' supplies and plants ready for mailing, July 15th. Send for one.

Bassett & Washburn have placed an order with Kroeschell Bros. Co. for two 150 horsepower Kroeschell steam boilers for their new range at Gregg Station.

Mr. Peterson has closed his store at 2552 W. Division street and opened another at 3336 Irving Park Boulevard. He will build a greenhouse in connection with the store in the fall.

A. Setterberg, landscape gardener, has just completed a large piece of work at Escanaba, Mich., on a 1000-acre tract of land, converting it into a suitable place for a summer home.

Phil Schupp has returned from a sight-seeing trip through what was recently the floral district. He says that Dayton, Ohio, is getting into shape again and the whole country is making great strides in the work of restoring former conditions.

A. Miller, of A. Henderson Co., seedsmen, is just back from a southern trip, during which he visited the peony show at Cleveland, Ohio, and of which he speaks very highly. Mr. Miller will leave June 27th for New York and other eastern cities. Guy Rayburn will also represent the same

firm in the east, booking bulb orders for the fall.

The news of the death of Frederick W. Brookes, of Morgan Park, whose obituary is given on another page, was learned with deep regret on Sunday. Mr. Brookes was a "gentleman of the old school," and it is a matter of pride that the foundations of Chicago's great floral industry was started by such a man. A resident of Chicago for 80 years and the builder of the first greenhouses erected in the city, with a character above reproach, he was an honor to the trade.

J. Mangel is again living up to his reputation for having the finest window display among the retail florists. In the days of the old building, now replaced with a modern one, his success was attributed largely to the con-

struction of the windows which placed the flowers below the sidewalk. But now with a high and rather narrow window it is equally artistically done. The upper third of the deep window is a festoon of artificial foliage and flowers, sometimes roses, and this week daisies, giving customers the idea of an overhead wedding decoration. Flowers are banked on the corners and a miniature pond is a favorite scheme. Unusual flowers, old time favorites are always among the attractions and the results as an advertisement alone more than repay the thought and effort.

Visitors: A. T. Bushong, of Gary Floral Co., Gary, Ind.; Walter Mott, representing Benjamin Hammond, Fishkill-on-Hudson, N. Y.; Frank Madison, Elgin, Ill.; Mr. Kiting, seedsman, Sedalia, Mo.

Flower Market Reports

BOSTON As June passes out it is the same old story with the flower trade. The graduation exercises, weddings and other flower-consuming events that help out on the June flower demand and maintain whatever semblance of business there is in this closing month of the season have gradually dwindled down and the present week sees about the last of them. It cannot be said that the local demand has been noticeably good. From outside points it has been quite satisfactory so far as the wholesale trade is concerned, but even this is now whittled down to very little and it looks as though the growers might at once throw out their old stock without any fear that the action is premature. As to quality it is generally on the wane, some things averaging poor as a rule. This is not true of sweet peas, however, which are coming in from outside and are superb. Peonies are nearly finished. American Beauty roses are not plentiful.

The market has changed very little from last report, though trade conditions have been a trifle better. Prices are of the summer kind and then only one-third of the heavy surplus is consumed. Roses are showing the summer effect, Killarney especially which are small and mildewed. Maryland is growing more in demand. Some good Maryland are had and have preference over American Beauty or Richmond. Kaiserin is fine, also Carnot. Carnations are gradually becoming poor in quality. There is an abundance of lilies, which clean up quite satisfactory, but at low figures. Peonies are nearing their end.

CHICAGO June is not disappointing those who had anticipated the receipts from the sales during the month of roses and of commencements and of weddings. All sentiment aside, with the dull weeks ahead, the footings of June sales plays an important part in the summer finances. Each week has seen extremes of temperature and the market has varied accordingly. The past week has been no exception, but even so, most houses report a fair amount of business. Peonies bring 75 cents and \$1.00 per dozen for good stock and little or nothing for poor ones. White and light pink are more scarce than the red just now. American Beauties suffered from the extreme heat early in the month and there are many poor ones offered, but there is also a fair

quantity of good stock, in which the medium lengths seem to lead the demand. Carnations are good, bad and indifferent, and the buyer can have his choice. All kinds of roses are plentiful and there are few, if any, wasted. Lily of the valley, as usual, is a strong feature in the June sales. Quantities of daisies and calliopsis are to be had.

CINCINNATI The supply of all seasonable flowers continues very large. The call for them is fair but not strong enough to cause either any substantial clearance or stiffened prices. Last week was as a whole a pretty fair one. In spite of the low prices the aggregate sales totaled nicely. The receipts still include quite a large number of excellent roses. The American Beauty supply is ample. The Giganteum lilies are finding a weak market. Gladioli are good property. Water lilies do not sell any too well. The supply of lily of the valley is rather limited. A large amount of good carnations are coming in but they are rapidly on the decline.

DETROIT Supply has been away above the demand and even the effort of some

growers to sell cut carnations on the market direct did not lessen the glut. Next in line to flood the market were a shipment of 10,000 lily of the valley and one of almost the same amount of lilies within two days from one grower. In such extreme cases it seems to me the commission man ought to receive extra compensation for handling the goods.

PHILADELPHIA There is very little of interest to report. The market may be summed up in the statement that conditions have been similar to our report of last week. The indications all point to a quick recession soon—both as to receipts of flowers and the business calling for them. We hear at this writing of one prominent retailer who had four big weddings and receptions on hand, and whose forces were working night and day. A large quantity of stock was used, of course, but it takes more than one concern to make much of an impression on a metropolitan market. Last week there was quite a noticeable drop-off in the amount of stock received, all of which is what may be expected at this time of the year.

Flower Market Reports

(Continued from page 967)

“Happy is he who expects little, for he will not be disappointed.” Perhaps the foregoing quotation is not exactly correct, but it applies, anyhow, to the cut flower business of New York at this season with much exactness. The present is no different from previous seasons in respect to supply and demand—the supply being overwhelming and the demand infinitesimal as compared with the material offered. We have been recording regularly for some weeks past the congested condition of the wholesale market and the “soft snap” at the disposal of the retail dealers at prevailing prices—if they only needed the goods. The situation is not materially different now so we shall not repeat the mournful tale. Yet, it is entirely logical and in accordance with precedent. He who knows past history knows enough to expect little and if anything comes his way he is consequently grateful.

There has been a great glut of stock of about all kinds naturally bringing down the prices. Peonies are soft and carnations are softer still and are being sold on the street two doz. for 15c. Business for the first part of the week was particularly slack, but the string of graduations which came towards the end kept us busy, baskets of mignonette and candytuft with a few roses or sweet peas retailing quickly at \$1 each for these exercises. There are thousands of outdoor roses and as indoor roses have been inferior the former have been much used for design work. Spanish iris has been quite plentiful this season but is about through. June weddings have moved a quantity of the best stock, leaving the cheaper grade for other uses. There is a little shortage of greens, smilax especially.

The market has been quite busy the past week, being the last one for the florists for this season. There was plenty of stock for all, but it was very much off in quality on everything. Prices changed little and the market remained as quoted the week previous.

PERSONAL.

L. Zimmer, a St. Louis florist, left Monday, June 23rd, for a summer trip to Germany.

Jules Bourdet of the Bourdet Floral Co., St. Louis, will make a trip to his home in France this summer.

The announcement is made in our advertising department this week of the admission of Sydney H. Bayersdorfer to the firm of H. Bayersdorfer & Co. Syd, as he is familiarly called, is the son of Harry Bayersdorfer and seems to have inherited the pleasing geniality which has helped to make so many friends in the trade for that gentleman. We have watched him since his father put him on the road to try him out and we are glad to note his promotion.

1914 NEWS KILLARNEY BRILLIANT

The sensational new Killarney sport which will be introduced next year. About twice as double as Single Killarney, much larger flower and of a darker brilliant shade of pink. By far the best introduction of any Rose of recent years. Booking orders now.

GRAFTED, \$7.50 per doz., \$35.00 per 100, \$150.00 per 500, \$300.00 per 1000.

OWN ROOT, \$6.00 per doz., \$30.00 per 100, \$125.00 per 500, \$250.00 per 1000.

Delivery during March.

Also scions for grafting in 1000 to 5000 lots at \$200.00 per 1000.

Special prices on larger quantities; delivery in December and January.

Matchless

The splendid new White Carnation for 1914. Booking orders now. Deliveries can be made December, 1913, on the early orders. \$12.00 per 100, \$100.00 per 1000.

We guarantee not only the quality of our plants, but their safe delivery by express.

Ribbons and Supplies

Many new patterns in exclusive Ribbons. Write us for prices on these and on Supplies.

Small Shipments can be sent by Parcel Post at purchaser's Risk.

“Closed all day July 4th”

PEONIES—Continued

"PEONIES FOR PLEASURE."
This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure." We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

Our catalogue of everything you need mailed on application. Write for it today.

**A
NEW
VOLUME**

Vol. XVIII of HORTICULTURE begins with the next issue. Now is the time to subscribe. If you are not already on our subscription list, send \$1.00 for the coming year, or 50 cents to January 1, 1914.

BE CAREFUL. Horticulture offers no premiums for subscription and has no traveling exploiters. Any who so represent themselves are bunco men.

We do not need to dilate on HORTICULTURE'S worth. Its contents are sufficient evidence. The recognition it is constantly receiving in new subscribers shows the strong hold it has gained in the esteem and good will of the horticultural profession.

PUBLICATIONS RECEIVED.

The 44th Report of the West Chicago Park Commissioners has been received from the secretary, George A. Mugler. It comprises the doings for 1912, auditor's report, etc., and 72 splendid full-page views in Douglas, Garfield, Humboldt, Holstein, Union, Wicker and a number of smaller parks, and on boulevards. Printed on heavy tinted paper this book is a very attractive and interesting publication. The area under the charge of this commission includes 808 acres in parks, 453 acres in boulevards. The length of boulevards is 29½ miles.

The Year Book of the Department of Agriculture for 1912 is a bound volume of 784 pages, well-filled with valuable information on every phase of the department's sphere of activity. There are seventy full-page plates, several in colors, besides smaller figures illustrative of the text. The frontispiece is a portrait of the late Norman J. Coleman of Missouri, the first Secretary of Agriculture. Only by perusing the pages of this annual volume can one begin to realize the enormous amount of research investigation and useful experimenting which this great national institution is prosecuting. And its scope is constantly widening.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "Care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

SITUATIONS WANTED

WHAT THE USERS SAY

Kroeschell Boiler, Generator and Heating System Insure Perfect Results.

Having promised you a letter as soon as we passed through a good fair test, I consider it now most timely. We had the thermometer 18° below and we've just gone through a blizzard bad enough for most any season, and am very well pleased to inform you that our heating system was equal to the occasion. So far as we have gone, am certainly well satisfied with the Kroeschell Boiler, Generator and Heating System. J. E. MATTHEWSON, Sheboygan, Wis. Send for our Catalog. Do It Today.

GLASS

for GREENHOUSE and HOT BED SASHES. Our prices can be had by mail, and it will pay you to get them. We carry the largest stock of Specially Selected Glass in Greater New York and can supply any quantity from a box to a car load on a one day notice, and at Rock Bottom Prices.

PARSHELSKY BROS. Inc.

215-217 Havemeyer St., Brooklyn, N. Y.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

PATENTS

Some Straight Talk

YOU don't want a house that in a year or so you will wish you had given the go-by. Don't allow yourself to be persuaded that one curved eave house is like another, or that any house built any other way than U-Bar way can be as light. Every other construction is heavier and the heavier the frame, the less the light. That's the situation in a nut shell. Think it over. To help your thinks—send for catalog.
